July 9-10 & 12, 2015 | Orlando

## Signature® Floor Sessions 1-3

(Floor, Telephone, HERITAGE Live!®, Internet, Fax, and Mail)

Orange County Convention Center  
West Concourse • Room W204A  
9800 International Drive • Orlando, FL 32819

### Session 1 – PREMIER

Thursday, July 9 • 6:00 PM ET • Lots 3001-3441

### Session 2

Friday, July 10 • 1:00 PM ET • Lots 3442-4182

### Session 3

Friday, July 10 • 6:00 PM ET • Lots 4183-4886

## Signature® Internet Session 4

(HERITAGE Live!®, Internet, Fax, & Mail only Session)

### Session 4

Sunday, July 12 • 2:00 PM CT • Lots 7001-8391

## LOT SETTLEMENT AND PICK-UP

Friday, July 10 • 10:00 AM – 1:00 PM ET  
Saturday, July 11 • 9:00 AM – 12:00 PM ET

Extended Payment Terms available. Email: [Credit@HA.com](mailto:Credit@HA.com)

Lots are sold at an approximate rate of 200 lots per hour, but it is not uncommon to sell 150 lots or 250 lots in any given hour.

**This auction is subject to a 17.5% Buyer's Premium.**

FL Auctioneer licenses: Samuel Foose AU3244; Robert Korver AU2916; Mike Sadler AU3795; Jacob Walker AU4031; Andrea Voss AU4034; Bob Merrill AU4043; Chris Dykstra AU4069; Fiona Elias AU4469; Jennifer Jayne Marsh AU4561; Brian Nalley AU4604; Paul Minshull AU4563; Mike Provenza AU46388.

## PRELIMINARY LOT VIEWING

By appointment only. Please contact Roy Porras at 214-409-1295 or [RoyP@HA.com](mailto:RoyP@HA.com) to schedule an appointment.  
(All times subject to change)

Heritage Auctions, Dallas

Dear Bidder:

Welcome to Heritage's Official Auction of the July, 2015 Summer FUN Convention in Orlando! The mid-year timing of this event always provides momentum going into the second half of the numismatic calendar. Our auction includes more than 1,900 Floor Session lots, of which 441 coins are featured in the high-value Premier Session to be held on Thursday evening of the event. Nearly 1,400 additional lots are slated for the Signature® Internet Session.

Close to 200 individual consignors receive our sincere thanks for their contributions to this popular auction. Please take a few minutes to read about the Featured Collections that highlight our Summer FUN offering:

**The Twin Peaks Collection**

U.S. Territorial gold and Federal series gold take center stage in a consignment from The Twin Peaks Collection. Led by a nice 1852 Humbert fifty dollar octagonal gold piece and a rare 1855 Wass, Molitor & Company twenty (the Small Head variety), other Territorial gold offerings include an 1860 Clark, Gruber five and an 1861 Clark, Gruber ten with the Pikes Peak design. An 1855 Kellogg & Co. twenty is the rare K-3a variety in Choice About Uncirculated condition. A run of memorable Carson City double eagles includes a sharp 1871-CC double eagle in XF40 PCGS and a semiprooflike 1879-CC twenty in AU55 NGC.

**The Dr. Harry Salyards Collection, Part Two**

We presented the first part of Dr. Salyards' fine Seated half collection in the recent Long Beach event. Many bidders filled holes in their variety sets with high-end Seated halves in collector-friendly grades. Most of the coins were assembled two or three decades ago. Approximately 50 of the coins are listed in the Summer FUN Signature® Internet Session – they are not to be overlooked either by date or by variety, because as a group they are exceptional.

Other notable FUN lots include a small but impressive contingent of Colonials, headed by an extremely rare 1776 New Hampshire copper of the Pine Tree design, Whitman-8395, graded Good 6 PCGS.

If you plan to attend Summer FUN in person, we hope you will accept our open invitation to stop by the Heritage booth on the Bourse, view the Signature and Premier Floor Session lots on-site, and stay to bid at the auction. If you are not able to attend in person, please remember that we accept bids through HA.com, e-mail, U.S. mail, and fax. Real-time options for remote bidding include telephone bidding and online bids with HERITAGE Live!® – our proprietary, award-winning online platform.

We look forward to seeing you in Orlando, and as always we wish you good luck with your bids!

# SESSION ONE

## COLONIALS

1662 Oak Tree Twopence, AU58  
Small 2, Noe-31

**3001** 1662 Oak Tree Twopence AU58 NGC. CAC. Noe-31, W-240, Salmon 1-A, High R.6. Small 2. 10.6 gns. A horizontal die break from the top of the 2 in the date identifies the rare Noe-31 variety. The obverse is misaligned toward 5:30, as seen on the two Ford examples of the variety (lot XII:69 is Noe-31.5), while the reverse centering is nearly perfect. This golden-brown and gunmetal-gray example is surprisingly free from marks aside from a faint thin mark concealed between branches of the tree. Substantial luster shimmers from the legends, tree, and beads. Listed on page 38 of the 2016 *Guide Book*.  
Ex: *Central States Signature* (Heritage, 4/2008), lot 2213. PCGS# 17

---

Extremely Rare 1776 New Hampshire Copper, Good 6  
Pine Tree Design, Whitman-8395

**3002 1776 New Hampshire Pine Tree Copper, Breen-708, Whitman-8395, High R.7, Good 6 PCGS. CAC.** Ex: Green / Newman. 142.0 grains, 99% copper, per NGC test results. The obverse of this simply designed copper features a tall Pine Tree with the legend AMERICAN LIBERTY, while the reverse depicts a harp with the date 1776. Walter Breen's *Complete Encyclopedia* lists six different varieties under the heading New Hampshire Coppers, but that illustrated and offered here is the only variety that is considered a genuine New Hampshire copper. Sylvester S. Crosby reproduced the legislation in *Early Coins of America* and noted that a copy of the original record of March 13, 1776 included sketched designs that are nearly identical to the few surviving examples such as this piece from the Eric P. Newman Collection.

Facts about these coppers are limited and surviving examples are extremely rare, although reproductions are commonplace. In his book, *In Yankee Doodle's Pocket*, Will Nipper writes: "New Hampshire patterns are so rare that the probability of encountering a genuine specimen is almost zero. Yet, copies number in the millions." Walter Breen estimated that eight or nine examples exist and Q. David Bowers suggested almost incredibly that as many as 32 might exist when he assigned this variety a rating of "URS-5 or 6" in the *Whitman Encyclopedia of Colonial and Early American Coins*. A rating of URS-4 is in line with this cataloger's experience.

The Newman coin, the Garrett example, and one other seem to be the only three in private hands, with others in the collections of the American Numismatic Society and the Smithsonian Institution. All five examples are cast, rather than struck, perhaps unsurprising as steel for dies was unobtainable, and they were made by the silversmith, William Moulton, according to numismatic tradition. Moulton was recommended by the New Hampshire House of Representatives to produce the coins.

The cast production of these pieces undoubtedly accounts for some of the light porosity seen on all known examples. The otherwise splendid surfaces are lovely golden-brown, with the principal devices on both sides outlined. The legend and date are partially visible. All five known examples are low grade.

The New Hampshire House of Representatives established a committee on March 13, 1776 to consider the subject of coinage, and they recommended that William Moulton produce up to 100 pounds of copper coinage to be the weight of an English halfpence (the following reproduced from Crosby):

"In the House of Representatives Mar: 13th 1776.

"Voted that a Committee be chose to Join a Committee from the Honorable Board, to confer upon the expediency of making Copper Coin & make a report to this House.

"Voted, that Capt. Pierce Long, Jonathan Lovell, Esq. & Deacon Nahum Balden be the Committee for the above mentioned purpose. P. White Speaker."

Wyseman Claggett and Benjamin Giles replied with their report the same day:

"The Committee humbly report that they find it expedient to make Copper Coin, for the Benefit of small Change, and as the Continental and other Bills are so large that William Moulton be empowered to make so many as may amount to 100 lb. [weight] subject when made to the Inspection and Direction of the General Assembly, before Circulation. Also we recommend that 108 of said Coppers be equal to one Spanish [Milled] Dollar: That the said Coin be of pure Copper and equal in [weight] to English halfpence, and bear such Device thereon as the [General] Assembly may approve. Wyseman Claggett, Chairman."

Just over three months later, on June 28, 1776, the same body voted a sum not to exceed 1,000 pounds in lawful money with a weight of five pennyweight and 10 grains each (130 grains):

"Voted, That the Treasurer of this Colony receive into the Treasury, in exchange for the Paper Bills of this Colony, any quantity of Copper Coin, made in this Colony, of the weight of five pennyweight and ten grains each, to the amount of any sum not exceeding £1,000 lawful money; three of which Coppers shall be received and paid for two pence, lawful money, in all payments; which Coppers shall have the following device, viz: A Pine tree, with the word American Liberty on one side, and a harp and the figures 1776 on the other side."

The surviving pieces all weigh between 142 and 155 grains, nearly equal to the weight of an English halfpence and 10% to 20% over the authorized weight of June 28, suggesting they were produced in reply to the original recommendation of March, and that the June 28 authorization never materialized.

Silversmith and pioneer William Moulton III was born at Newburyport, Massachusetts on July 12, 1720. He married Lydia Greenleaf on September 16, 1742, and died at Marietta, Northwest Territory (Ohio) in 1793. He plied his trade in Newburyport from 1742 to 1762, and in Hempstead, New Hampshire from 1762 until 1788, when he left for the Northwest Territory. It is likely that he is the same William Moulton who made the New Hampshire coppers, and he is undoubtedly the same man who lived his last few years in Ohio Country. The June 25, 1788 issue of the *Essex Journal* of Newburyport, Massachusetts published extracts of a letter "from Mr. William Moulton, to his family in Hampstead, in the state of New Hampshire." Julia Perkins Cutler, author of *Founders of Ohio*, related an eye-witness account of Col. Joseph Barker during the Indian Wars of 1791 that specifically mentions "old Mr. William Moulton, aged seventy, with his apron full of old goldsmith's tools." There is no doubt that William Moulton, the Massachusetts and New Hampshire silversmith who made these rare copper coins, was also the Ohio pioneer.

Ex: Bartlett Collection (Thomas Elder, 1/1918); Waldo C. Newcomer; B. Max Mehl; "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ \$300.00; Eric P. Newman Numismatic Education Society. PCGS# 286

1787 Liber Natus Copper, AU50  
Excelsior Reverse  
Third Finest Known

**3003** 1787 New York Excelsior Copper, Liber Natus, Indian and New York Arms, Breen-990, W-5795, High R.6, AU50 PCGS. CAC. Ex: Whitman / Newman. 171.4 grains, 99% copper per NGC metallurgical tests. Two varieties of the Liber Natus, Excelsior coppers are known. The variety offered here combines the standing Indian obverse with the New York Arms reverse. Typical survivors are in higher grades, suggesting that the variety saw little circulation. Just over a dozen examples of this variety are known. Based on John Ford's notes, Michael Hodder presented a preliminary census of this issue in the May 2004 Ford catalog, recording nine examples. We have refined and expanded that census here:

1. MS65. Louis E. Eliasberg, Sr. Collection; Eliasberg Estate (Bowers and Merena, 5/1996), lot 58.
2. AU. Sarah Sophia Banks (1818); British Museum.
3. AU50 NGC. Eric P. Newman Collection. **The present specimen.**
4. AU. Lorin G. Parmelee (New York Coin & Stamp Co., 6/1890), lot 457; H.P. Smith (Chapman Brothers, 6/1906), lot 124; Col. James W. Ellsworth; John Work Garrett; Johns Hopkins University (Bowers and Ruddy, 11/1979), lot 601.
5. XF. F.C.C. Boyd Estate; John J. Ford, Jr. (Stack's, 5/2004), lot 312.
6. XF. Mickley Sale (W.E. Woodward, 10/1867); Bushnell Sale (Chapman Brothers, 6/1882), lot 888; Brand Collection.
7. **Fine.** William H. Woodin; Peter Gschwend (Thomas Elder, 4/1909); F.C.C. Boyd.
8. **Fine.** John G. Mills Collection (Chapman Brothers, 4/1904), lot 348.
9. VG. John Story Jenks (Henry Chapman, 12/1921), lot 5493.
10. VG. Norweb Collection, but not found in the catalogs of that collection.
11. **Good.** James Ten Eyck (B. Max Mehl, 5/1922), lot 816.
12. **Poor.** Thomas Warner (Chapman Brothers, 7/1891), lot 2094.
13. **Plugged.** New Netherlands Coin Co. (44th Sale, 6/1954), lot 71.
14. **Holed.** Matthew Stickney (Henry Chapman, 6/1907), lot 240.

Although this piece was cleaned many decades ago, both sides are now attractively and naturally toned to olive and light blue-steel. Trivial rim bruises are to be expected on these old coppers, but the obverse and reverse surfaces are outstanding.

Ex: Eric P. Newman Numismatic Education Society. PCGS# 436

---

1783 Chalmers Threepence, W-1760, AU50  
Exceptional Silver Content

**3004** 1783 Chalmers Threepence, Breen-1018, W-1760, R.5, AU50 PCGS. CAC. Ex: Newman. 10.8 grains, 94% silver, 5% copper, per NGC metallurgical tests. John Chalmers of Annapolis issued silver threepence, sixpence, and shillings dated 1783, likely to alleviate a shortage of coinage, and as a response to the refusal of the local population to accept lightweight Spanish bits that were literally cut from Spanish milled dollars. Who could blame the citizens when unscrupulous individuals would cut five “fourths” or nine “eighths” out of a single dollar?

Judging from the condition of most survivors, the Chalmers silver coins were well-received and circulated extensively, despite the estimated 8% profit that Chalmers earned on the venture, according to numismatic researcher and writer Philip Mossman. Perhaps his reputation as a community leader and former Continental Army captain aided the circulation of the Chalmers silver coins.

Annapolis, Maryland, planned in 1694, was an upper-class town of brick mansions and polished society, according to an 18th century British official. The town was also a political center that served briefly as home to the U.S. Congress in late 1783 and the first half of 1784. John Chalmers operated his silversmith business in that setting, having an interest in politics and economics. That was the environment of his silver coinage. Will Nipper writes in his book *In Yankee Doodle's Pocket*: “They may have been advertising pieces, political statements or simply a means of satisfying his customers’ need for coinage. The exact reason for their existence is unknown.”

The threepence are clearly rarer than the shillings, but they are seen more frequently than the sixpence. This example has splendid pewter-gray surfaces with light silver devices and traces of peripheral champagne toning. The strike is imperfectly centered, although most of the obverse border details are visible.

Ex: Eric P. Newman Numismatic Education Society. PCGS# 592

---

1794 Talbot, Allum & Lee Cent, NEW YORK  
Fuld-4, Lettered Edge, MS66 Red and Brown

- 3005 1794 Talbot, Allum & Lee Cent, NEW YORK MS66 Red and Brown NGC. Fuld-4, W-8590, R.1. Ex: Eric P. Newman Collection. 158.4 grains. Struck in Birmingham, by Peter Kempson & Co., and imported to America, Talbot, Allum & Lee cents were distributed into circulation in 1794 and 1795 to advertise the New York-based business, which was engaged in the India trade. Pieces are known both with and without the words NEW YORK above the ship on the reverse. This high-end example represents the with NEW YORK variant; it is the single finest certified at NGC, and is the finest of just six Red and Brown-designated pieces at NGC and PCGS combined by two full grade points (6/15). Flashy copper-red luster radiates from the recesses, with complementary pale burgundy accents on each side. The strike is sharp, and the preservation is exceptional.  
Ex: Eric P. Newman Numismatic Education Society. PCGS# 635
- 

---

1785 Immune Columbia Copper, AU53  
W-1960, Nova Constellatio Reverse

**3006** 1785 Immune Columbia, Nova Constellatio, 13 Stars, Copper, Breen-1117, W-1960, High R.6, AU53 PCGS. CAC. Ex: Bushnell, Warner, Whitman, Mills, Newcomer, Green, Newman. 144.8 grains, 99% copper per NGC metallurgical tests. The reverse belongs to the series of Nova Constellatio coppers. There seems to be some confusion about the punctuation between those words. A period or dot clearly follows NOVA, but the other element that precedes NOVA is typically called a star or an "extra star." As that element has five lobes, and the stars between the rays have six points, that design element is better described as a cinquefoil, following Walter Breen's description. The reverse die is the same as the 1783 Nova Constellatio Crosby 2-B. Often labeled as products of Birmingham, England, new evidence points to the possibility of an American manufacture.

Just over a dozen examples of this important variety are known, according to the URS-5 rating in the *Whitman Encyclopedia of Colonial and Early American Coins*. The Eric P. Newman coin is a little finer than the XF Ford coin.

A few trivial rim bumps are evident on each side of this exceptionally attractive copper. The lightly marked surfaces are pleasing olive-brown with a few maroon toning splashes on the obverse. The strike is a trifle blunt on the high points of this long-pedigreed piece. The impression is well-centered with a full date and complete legends that are well in from the partially detailed border.

Ex: Charles I. Bushnell; Thomas Warner; C.T. Whitman; John G. Mills; Waldo Newcomer; B. Max Mehl; "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ \$350.00; Eric P. Newman Numismatic Education Society. PCGS# 826

## LARGE CENTS

### 1793 Liberty Cap Cent, S-13, Fine Details Bold Motifs, Strong Borders

**3007** 1793 Liberty Cap, S-13, B-20, Low R.4 — Repaired — PCGS Genuine. Fine Details. Sheldon-13 is the only 1793 Liberty Cap cent variety that is moderately obtainable, ideal for the casual type collector. The present example is notably well-defined for the Fine Details grade, both on the central devices and around the borders. The legends are all bold and the surface display mildly granular, deep brown patina. Light tool marks on the obverse portrait are not obvious to the unaided eye, and the reverse shows a few stray hairline scratches, hidden in the deep patina. Our EAC grade Good 4. PCGS# 35489 Base PCGS# 1359

### 1795 Lettered Edge Cent, S-74, AU50 Rich, Light Auburn Patina

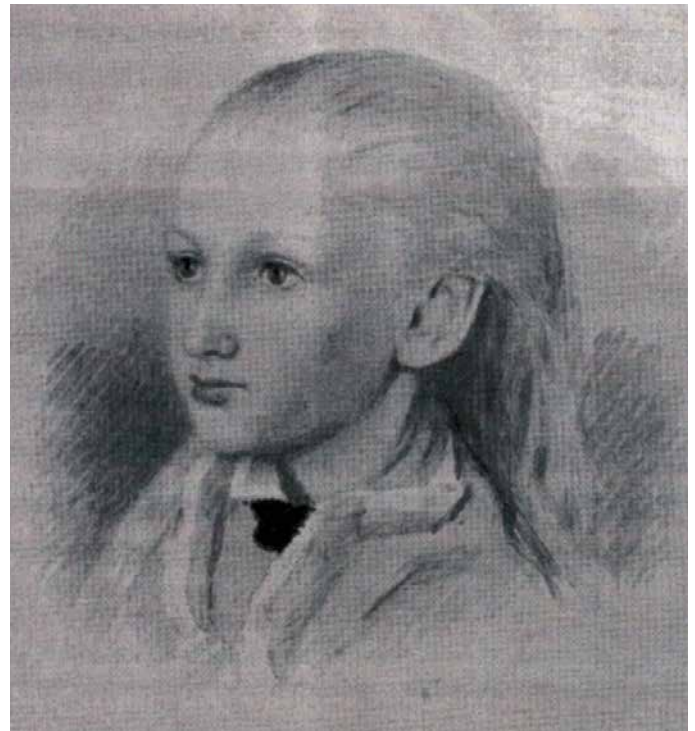

**3008** 1795 Lettered Edge, S-74, B-2, Low R.4, AU50 PCGS. Breen Die State VII; peripheral cracks circumnavigate the reverse, and there are faint remnants of clash marks in the reverse wreath. Sheldon-74 is scarce in all grades, but is particularly challenging in AU, and Mint State coins are rare. This example displays bold detail, with rich reddish-brown patina that shows deeper olive at 3 o'clock on the reverse. The surfaces are generally smooth, although a mint-made planchet flaw stretches from the reverse rim at 7 o'clock, along the top of UNITED, to the rim at 9 o'clock, and a small rim bump is noted on the same side below the fraction. Overall, a pleasing example with excellent color. Housed in a green label holder. Our EAC grade VF20. PCGS# 35714 Base PCGS# 1377

## INDIAN CENTS

### 1864 L on Ribbon Cent, MS66 Red and Brown Snow-3, Repunched Date

**3009** 1864 L On Ribbon, Repunched Date, Snow-3, FS-2302, MS66 Red and Brown PCGS. CAC. There are several Repunched Date varieties for the With L 1864 Indian cent, but Snow-3 is one of the more dramatic, showing bold recutting on the 186, with the secondary impressions evident north of the primary digits. This high-end example is boldly struck, with rich coppery-orange luster that glows beneath intermediate overtones of violet and auburn. A couple tiny specks to not detract. PCGS# 37412

*Sarah Longacre*

---

1877 Indian Cent, MS65 Red  
Old Green Label Holder

- 3010 1877 MS65 Red PCGS.** Eagle Eye Photo Seal, card not included. The 1877 Indian cent is the paramount key date in the series. The typically encountered piece is well-circulated, and Mint State coins are in high demand among advanced collectors. Most Uncirculated examples fall into the Brown or Red and Brown color categories, and few grade finer than MS64. This Gem full Red example offers the collector a rare opportunity to acquire a truly high-end example of this series key. The design elements are well-defined and the surfaces display satiny copper-gold luster with subtle overtones of rose and russet. A few tiny specks are not obtrusive. Housed in an old green label holder. Population: 25 in 65 (1 in 65+) Red, 7 finer (5/15). NGC ID# 2284, PCGS# 2129
- 

## PROOF INDIAN CENTS

---

1859 Indian Cent, Bold PR66 Cameo  
Tied for Finest at PCGS

- 3011 1859 PR66 Cameo PCGS.** A one-year proof type coin, elusive in high-grade and rarely seen with a Cameo designation. The 1859 Indian cent is distinctive due to its reverse which shows a wreath of laurel rather than the oak variety seen on subsequent issues. An estimated 800 proof 1859 Indian cents were struck, although it is unknown if all were distributed.

This outstanding example is tied with just seven others as the finest Cameo at PCGS; NGC shows a single PR67 Cameo finer (5/15). The design elements are fully rendered with significant mint frost. The fields show deep mirroring amid coppery-gold and amber hues. A few tiny specks do not detract. This coin is without a doubt one of the most visually impressive examples known of this one-year type. PCGS# 82247

---

---

1863 Indian Cent, PR67 Cameo  
Seldom Seen So Well-Preserved

- 3012 1863 PR67 Cameo NGC. The 1863 proof Indian cent is seldom seen in the higher proof grades and less often still seen with the Cameo designation. Given the meager mintage of 460+ proofs, the paucity of high-grade examples is understandable. This piece shows appreciable contrast over reddish-orange surfaces that show top-notch eye appeal, a sharp proof strike including four diamonds on the ribbon and good detail on the feather tips, and no mentionable distractions. Census: 3 in 67 Cameo (1 in 67 ★ Cameo), 0 finer (6/15). PCGS# 82262

---

1877 Indian Cent, PR65 Red and Brown  
Significant Mint Red Color

- 3013 1877 PR65 Red and Brown PCGS. CAC. The proof variant of this sought-after key issue, ideal for the collector seeking a high-quality date representative without breaking the bank for a Mint State circulation strike. This Gem proof is largely golden-orange in color, but with soft auburn and violet overtones that contribute to the Red and Brown color designation. The strike is full and the fields are mirrored. A few stray specks do not detract. CAC-approved in an old green label holder. Population: 74 in 65 Red and Brown, 6 finer (5/15). NGC ID# 229W, PCGS# 2319

---

1886 Indian Cent, PR65 Red Cameo  
Rare Variety Two Proof

- 3014 1886 Variety Two PR65 Red Cameo PCGS. Ex: Palm Beach. The 1886 issue saw a subtle shift in the design of the Indian cent that involved slight rearrangement of the feathers in the headdress. On pre-1886 coins and examples from earlier in that year, the lowest feather points between the I and C of AMERICA; on later pieces, it points between the C and A. Among proofs, the latter variety forms a tiny minority.

The present coin is the finer of just two pieces with a Red Cameo designation for the Variety 2 subtype at PCGS (6/15). The fields are lemon-gold with hints of orange, while distinct rose-orange accents visit the portrait. Both sides offer pleasing contrast, excellent preservation, and wonderful eye appeal. Arguably the most important 1886 Type Two proof cent on the market today. PCGS# 37628 Base PCGS# 92347

---

## LINCOLN CENTS

### 1909-S VDB Cent, MS66 Red and Brown Smooth, Glowing Surfaces

- 3015 1909-S VDB MS66 Red and Brown PCGS. CAC.** Impeccably smooth, satiny surfaces glow beneath rich amber-red, olive, and autumn-brown hues on this Premium Gem 1909-S VDB cent. The strike is bold and there is no obvious carbon. This key issue is seldom seen in Premium Gem condition, regardless of color designation. Population: 39 in 66 Red and Brown, 0 finer (5/15). NGC ID# 22B2, PCGS# 2427

### 1914-D Cent, MS64 Red and Brown Smooth, Satiny Surfaces

- 3016 1914-D MS64 Red and Brown PCGS. CAC.** The 1914-D is several times scarcer in Mint State than the more highly heralded 1909-S VDB, particularly with any degree of remaining mint Red. This near-Gem representative displays well-struck devices and minimally disturbed surfaces. Coppery-red luster is deepened by a uniform burgundy hue which precludes a full Red color designation. NGC ID# 22BH, PCGS# 2472

### 1915-S Cent, MS65 Red Matte-Like Surfaces

- 3017 1915-S MS65 Red PCGS.** Minutely granular luster delivers a coppery-pink glow on each side of this Gem 1915-S Lincoln cent. The design elements are boldly rendered and there are no mentionable abrasions. A few tiny specks do not detract. The 1915-S is one of the more difficult issues in the series to locate in full Red condition, and such coins are rare this fine. Population: 29 in 65 (1 in 65+) Red, 5 finer (5/15). NGC ID# 22BM, PCGS# 2485

### 1918 Lincoln Cent, Appealing MS67 Red

- 3018 1918 MS67 Red PCGS.** This is an appealing orange-red Superb Gem example of this date, which is technically a first-year subtype: 1918 was the year that the designer's initials VDB were inconspicuously replaced on Lincoln's shoulder, nine years after the hubbub surrounding their removal in 1909. The emphasis in 1918 was on quantity rather than quality, however, and few attain so high a grade. A curving lintmark above the 8 in the date is likely as struck at the Mint. This piece is boldly struck and appealing throughout both sides. Population: 29 in 67 (3 in 67+) Red, 1 finer (6/15). NGC ID# 22BV, PCGS# 2506

### 1920 Cent, MS67+ Red The Sole Finest Certified

- 3019 1920 MS67+ Red PCGS.** For Registry purposes, this magnificent Superb Gem is unrivaled. As the only one of the nine MS67 Red examples at PCGS with a Plus designation, it is the sole finest known 1920 Lincoln cent; the highest-grade examples at NGC are three MS67 Red pieces, none Plus-graded (6/15). This coin is boldly struck, despite trivial die erosion in the fields. Coppery-orange luster shows deeper rose and crimson overtones in the margins. NGC ID# 22C3, PCGS# 2524

### 1927 Lincoln Cent, MS67+ Red Paramount Registry Coin

- 3020 1927 MS67+ Red PCGS. CAC.** This blazing Superb Gem is one of the two finest 1927 Lincoln cents certified, even if only by the margin of the Plus designation. The importance of this coin to a high-ranking Registry Set is undeniable. Both sides are boldly struck and seemingly free of abrasions. The color is largely bronze-gold, although deeper coppery-orange and rose overtones grace portions of the peripheries. Population: 44 in 67 (2 in 67+) Red, 0 finer (5/15). NGC ID# 22CM, PCGS# 2578

1955 Doubled Die Lincoln Cent  
MS64 Red and Brown

- 3021 1955 Doubled Die Obverse, FS-101, MS64 Red and Brown PCGS. CAC. The 1955 doubled die obverse cent is seen with mild frequency through the MS64 grade level, but finer coins are notably rare, regardless of color designation. This Choice Red and Brown representative is especially well-struck for the issue, with well-balanced copper-red and auburn-brown patina. There are no major abrasions or detracting carbon spots. PCGS# 37911 Base PCGS# 2826

1955 Doubled Die Obverse Cent, MS64 Red  
Choice Original Luster

- 3022 1955 Doubled Die Obverse, FS-101, MS64 Red PCGS. The 1955 doubled die obverse is by far the most dramatic and highly sought-after mint error in the Lincoln cent series. When the error was noticed at the Mint, some examples were recovered from the hoppers and destroyed, but as many 24,000 pieces, per a formal inquiry by Bowers, were allowed to escape into circulation. Likely only a few thousand examples survive, mostly in circulated condition or within the Brown color category of Mint State. Full Red examples are genuinely elusive in any grade, and are rare finer than MS64. This Choice example is well-struck and devoid of major abrasions. The satiny surfaces showcase original coppery-red luster with a few trivial specks hardly of distraction. The eye appeal is excellent. PCGS reports 18 numerically finer full Red examples (6/15). PCGS# 37912 Base PCGS# 2827

**1969-S Doubled Die Obverse Cent, MS61 Brown  
Eye-Appealing and Rare**

- 3023 1969-S Doubled Die Obverse, FS-101, MS61 Brown PCGS. CAC.** The 1969-S Doubled Die cents have received enormous publicity in recent years, well-deserved given their status as among the few most spectacular doubled die errors in all U.S. coinage. Their only parallel within the Lincoln series is the 1955 Doubled Die Obverse cents, but the 1969-S cents are much, much rarer. The 1955s are even more extreme in terms of the spread of their doubling, but while the *Cherrypickers' Guide* ranks the 1955 DDO cents as URS-15 (8,000-16,000 known), the 1969-S DDO cents are URS-6 (17-32 known).

This glossy Mint State coin shows medium-brown surfaces with just a touch of red remaining around the lower obverse rim. Contact marks are minimal, although a small patch of carbon flecks appears on the lower-left reverse field, scarcely seen, save under a loupe. The strike is nicely executed, and the eye appeal is quite high for the grade. This piece is in an above-average grade for certified survivors and should do quite nicely at auction. Population: 1 in 61 Brown, 4 finer (5/15). PCGS# 2921

**1972 Double Die Obverse Cent, MS67 Red  
Glowing Deep Red Surfaces**

- 3024 1972 Doubled Die Obverse, FS-101, MS67 Red PCGS.** Fiery copper-orange and rose-red hues blend over the glowing, satin surfaces of this Superb Gem Registry coin. The design elements are boldly rendered and there are no significant abrasions. A single, tiny carbon speck is hidden near the obverse rim at the back base of Lincoln's shoulder. The 1972 double die cent is one of the most sought-after varieties in the Lincoln cent series. Population: 33 in 67 Red, 1 finer (5/15). PCGS# 38013 Base PCGS# 2950

**PROOF LINCOLN CENTS**

**1936 Satin Finish Cent, PR66+ Red and Brown  
Top-Quality Example**

- 3025 1936 Type One — Satin Finish PR66+ Red and Brown PCGS. CAC.** The obverse is largely a blazing fire-red with a few verges into violet, contrasting nicely against a mostly orange-gold reverse with a crescent of brownish-red at the left wheat ear. Another dollop of brown appears on the N of CENT, but there are no mentionable signs of carbon or other distractions. A top-notch example of this first "modern-era" Lincoln cent proof issue. Population: 6 in 66 (2 in 66+) Red and Brown, 0 finer (6/15). NGC ID# 22L2, PCGS# 3331

**1936 Brilliant Lincoln, PR65 Red Cameo  
Sole Cameo at This Grade Level**

- 3026 1936 Type Two — Brilliant Finish PR65 Red Cameo PCGS. CAC.** An attractive orange-gold example of this first-year modern proof coinage, struck in the small amount of 5,569 proof coins, which at the time could be individually ordered from the Mint. Perceptible field-device contrast as well as excellent preservation separate this piece from most of its cohort. A couple of tiny brownish flecks do not distract. Although nearly 200 examples of this issue achieve the Gem level, this is the sole Gem Cameo at PCGS, and two Cameos are finer (5/15). Worthy of a premium bid as such. NGC ID# 22L3, PCGS# 83335

## PROOF TWO CENT PIECES

### 1864 Large Motto Two Cent PR66 Red and Brown Cameo

- 3027 1864 Large Motto PR66 Red and Brown Cameo NGC.** Brown devices prevail against mostly gold and orange in the fields. Far more Red than Brown survives on this Premium Gem proof two cent, a well-preserved example of this first-year type coin. Blatant contrast exists between the reflective, mirrored fields and well-frosted devices. The surfaces on each side are free of mentionable contact. A few darker flecks appear amid the toning but require a loupe to see, and they certainly fail to detract from the eye appeal. This is the sole finest Red and Brown Cameo at NGC, although one Brown Cameo of the date is found in PR67 (6/15). PCGS# 83622

### 1869 Two Cent, PR66 Red

- 3028 1869 PR66 Red NGC.** Fire-red and golden-orange surfaces on this Premium Gem proof show considerable if unacknowledged field-device contrast and no mentionable post-strike contact. A few dark flecks appear only under a loupe. Most survivors of this proof issue of an estimated 600 coins are either in lower numeric grades or in the Red and Brown or Brown categories. Census: 9 in 66 Red, 0 finer (6/15). NGC ID# 274Y, PCGS# 3641

### 1871 Two Cent, PR66 Red Vibrant Color, Full Strike

- 3029 1871 PR66 Red PCGS. CAC.** Peach-red dominates this fully struck Premium Gem. The obverse border displays olive-gold. Evaluation beneath a lens reveals only a couple of pinpoint flecks. As always seen on 1871 proofs, the obverse is die doubled, strongest on TRUST. Population: 14 in 66 Red, 1 in 66 Red Cameo, 1 in 67 Red Cameo (6/15).  
Ex: T.W. Brown Collection (Heritage, 9/2010), lot 5140, which realized \$13,800. NGC ID# 22NH, PCGS# 3647

### 1871 Two Cent Piece, PR65 Red Cameo Extremely Rare With a Cameo Designation

- 3030 1871 PR65 Red Cameo PCGS.** The proof 1871 two cent piece was included in both silver and minor proof sets of the period; 960 pieces were struck for the former, and likely 105 for the latter, though it is unknown if all were actually distributed, or if some were left unsold and later melted. Full Red survivors are scarce, but Cameo representatives are undeniably rare in any grade. This piece is one of just three Red Cameo examples certified by PCGS, with the others being a PR66 and a PR67 coin (5/15). Bold die doubling is observed on the motto IN GOD WE TRUST, the wreath leaves, and the arrowheads. This doubling is evident on all proof 1871 two cent pieces, as all were coined from the same die pair. Frosted devices deliver bold contrast with the deeply reflective, coppery-red fields, and the strike is crisp throughout. PCGS# 83647

## THREE CENT SILVER

### 1851 Silver Three Cent, MS67 Superb First-Year Type Coin

- 3031 1851 MS67 NGC.** Coinage of silver three cent pieces amounted to more than 5.4 million coins in 1851, and this issue remains one of the most available dates in the series in Mint State, ideal for type representation. This Superb Gem is a condition rarity; NGC lists only nine others this fine, with none higher (6/15). Frosty luster glows beneath subtle lavender-blue and champagne toning with deeper forest-green and amber overtones evident in the peripheries. The shield shows some of the usual softness in the center. NGC ID# 22YX, PCGS# 3664

**1856 Silver Three Cent, MS66  
Condition Census Quality**

- 3032 1856 MS66 PCGS. CAC.** The 1856 silver three cent remains marginally available in grades through MS64, but Gems are rarely seen and anything finer is an extreme challenge to locate. The leading certification services each list only five examples in MS66 (one in MS66+ at PCGS), with none finer (5/15). Thus, the currently offered example is firmly among the finest known of this conditionally challenging Philadelphia issue. Moreover, it is only the second Premium Gem 1856 we have ever offered at auction. The other piece, also CAC-endorsed, was offered in our May 2015 sale of the Gardner Collection, Part III, where it realized \$23,500. This piece is not quite as vividly toned as that example, although the technical merit is comparable. Both sides are well-struck and display satiny luster beneath a dusting of faintly speckled olive toning. NGC ID# 22Z5, PCGS# 3672

**1857 Silver Three Cent, MS66  
Sharp Shield Detail**

- 3033 1857 MS66 PCGS.** The 1857 silver three cent is infrequently encountered in Mint State, and most such pieces grade only MS64 or lower; Gems are scarce and anything finer is genuinely rare. This Premium Gem representative displays seemingly undisturbed, satiny surfaces with pale champagne and golden-gray toning. The strike is a trifle soft around portions of the peripheries, but the central shield is bold. Clash marks are present on each side, as usual. Population: 9 in 66 (1 in 66+), 2 finer (5/15). NGC ID# 22Z6, PCGS# 3673

**1858 Silver Three Cent, Toned MS67  
Among the Finest Certified**

- 3034 1858 MS67 NGC.** The 1858 was the final silver three cent piece with a mintage of more than 1 million coins (about 1.6 million pieces). Mint State examples are plentiful through MS64, but are scarce finer; in MS67, the date is conditionally rare. This Superb Gem representative displays satiny luster beneath mottled shades of rose, gold, and sea-green toning. Moderately well-struck, but a trifle weak on the high points of the shield. Census: 16 in 67 (3 in 67 ★), 0 finer (5/15). NGC ID# 22Z7, PCGS# 3674

**PROOF THREE CENT SILVER**

**1864 Three Cent Silver, PR67 Cameo  
Only One Cameo Finer**

- 3035 1864 PR67 Cameo NGC.** Cameo examples of this elusive proof issue are seldom seen, and Ultra Cameos are almost unobtainable. This Superb Gem Cameo representative exhibits stark field-device contrast with just a touch of light golden color over each side. The design elements are razor-sharp and heavily frosted. Numerous tiny strike-throughs, as made, are evident in the fields upon close examination. Census: 4 in 67 Cameo, 1 finer (6/15). PCGS# 83714

## PROOF THREE CENT NICKELS

### 1867 Three Cent Nickel, PR68 Cameo Sole Finest at NGC

- 3036 1867 PR68 Cameo NGC. The surfaces are pristine throughout both sides, remarkably so, and show blatant contrast between the well-frosted devices and nicely mirrored fields. The strike is uniformly sharp, save perhaps for a touch of flatness confined to the middle of the center column on the reverse. Census: 1 in 68 Cameo, 0 finer (6/15). PCGS# 83763

### 1869 Three Cent Nickel, PR67 Ultra Cameo Splendid Field-Device Contrast

- 3037 1869 PR67 Ultra Cameo NGC. Lavish contrast between the mirrored fields and nicely frosted devices is the hallmark of this untuned Superb Gem proof, which also displays few signs of contact other than a single hair-thin mark on Liberty's cheek. Die-preparation lines and a few small, raised planchet defects show in the fields, neither overt nor grade-affecting. Census: 5 in 67 Ultra Cameo (1 in 67 ★ Ultra Cameo), 0 finer (5/15). PCGS# 93765

### 1875 Three Cent Nickel, PR66 Cameo Among the Finest Certified

- 3038 1875 PR66 Cameo PCGS. CAC. At least 700 proof three cent nickels were distributed in 1875, but pieces surviving with any degree of cameo contrast are rarely seen in any grade; this piece is one of just seven Cameo representatives certified at the PR66 grade level at PCGS, with none finer (6/15). Satiny mint luster highlights well-struck devices amid moderately mirrored fields, while the overall preservation is excellent. PCGS# 83771

### 1878 Nickel Three Cent, PR67 Deep Cameo Sole Deep Cameo at PCGS

- 3039 1878 PR67 Deep Cameo PCGS. CAC. Fully struck, frosty devices are set against deeply mirrored fields amid a blush of light golden toning. Devoid of contact marks or discernible hairlines. Only 2,350 proofs were coin in 1878, with no circulation strikes to supplement. This piece is the *only Deep Cameo seen by PCGS* (6/15), and is the finer of only two Deep Cameos endorsed by CAC. PCGS# 93774

## SHIELD NICKEL

### 1879 Shield Nickel, MS67 Tied for Finest Known

- 3040 1879 MS67 NGC. A Superb Gem grade is fitting for this lovely 1879 Shield nickel, and were the luster a shade more vibrant, rather than satiny, it might have garnered an MS68 designation. Nonetheless, this piece ranks alongside three others as the finest at NGC, while the best PCGS has seen is a single MS66+ coin (5/15). This piece is boldly struck and blemish-free throughout each side, and displays a warm patina of golden color overall. NGC ID# 276D, PCGS# 3808

## PROOF SHIELD NICKEL

### 1877 Shield Nickel, PR66 Cameo Stark Contrast

- 3041 1877 PR66 Cameo PCGS. CAC. This boldly struck and carefully preserved Premium Gem Cameo has few superiors at PCGS. The contrast is outstanding and the surfaces show just a hint of light golden toning. The 1877 Shield nickel is a proof only issue, essential for a complete date set of this series. Only 900 pieces are reported struck. Population: 38 in 66 (3 in 66+) Cameo, 8 finer (6/15). PCGS# 83831

## LIBERTY NICKELS

### 1885 Nickel, Satiny MS65 The Series Key

- 3042 1885 MS65 PCGS.** The 1885 Liberty nickel was not initially an object of desire for collectors, as most enthusiasts in the 19th century preferred the more plentiful and eye-appealing proof variant. It was not until the 1930s and later that collecting the circulation strike issues of this series became widely popular, and by that time, most 1885 representatives were either heavily worn or lost to attrition. This Gem Mint State example, housed in a green label holder, is devoid of any detracting abrasions, and displays satiny nickel-gray luster with lilac and champagne highlights. Trivial softness is seen on the corn ear to the left of the wreath bow, but the strike is otherwise well-executed. Population: 58 in 65 (3 in 65+), 30 finer (5/15). NGC ID# 2773, PCGS# 3846

### 1886 Liberty Nickel, MS65 Scarcest Date in the Series in Gem Condition

- 3043 1886 MS65 PCGS.** While the 1885 is a higher visibility coin, the 1886 is actually scarcer in high grades. The reason for this misconception seems to lie in the lower mintage figure for the 1885 (1.4 vs. 3.3 million pieces). This coin has fully defined features in all areas, including the ear of corn on the lower left portion of the wreath. Pale pastel toning covers each side with glowing, satiny mint luster underlying the light layering of golden-lilac color. Exceptionally clean as well with lovely, problem-free surfaces. Population: 39 in 65, 8 finer (5/15).  
Ex: *Dallas Signature* (Heritage, 12/2004), lot 5525. NGC ID# 22PK, PCGS# 3847

### 1895 Liberty Nickel, Magnificent MS67 The Single Finest Certified

- 3044 1895 MS67 PCGS. CAC.** This frosty Superb Gem 1895 Liberty nickel is virtually flawless in regards to preservation and must have just missed a Plus designation from PCGS. Even so, this piece has the distinction of being the sole finest known at either leading service (5/15). The corn ear to the left of the wreath bow is a trifle soft, but the design elements are otherwise well brought up. Vibrant silver surfaces exhibit a dazzling cartwheel effect. NGC ID# 277A, PCGS# 3856

### 1896 Nickel, Lightly Toned MS66

- 3045 1896 MS66 PCGS. CAC.** The 1896 does not stand out from its peers until the Premium Gem grade level, where examples of this date are rarely seen. This CAC-approved piece displays satiny champagne-gold luster with cool powder-blue accents throughout. The corn ear to the left of the wreath bow and a couple obverse stars are weakly defined, but the strike is otherwise pleasing. No distracting abrasions are present. Population: 24 in 66 (2 in 66+), 0 finer (5/15). NGC ID# 277B, PCGS# 3857

### 1912-D Nickel, MS66+ Tied for Finest at PCGS

- 3046 1912-D MS66+ PCGS. CAC.** The 1912-D Liberty nickel population at PCGS tops out at the Premium Gem grade level, and this stellar example is one of only two such pieces awarded a Plus designation at that service. The frosty surfaces are impeccably well-preserved and display blended pastel shades of lilac, blue, and champagne. The strike is a trifle weak on the corn ear to the left of the wreath bow, but the overall eye appeal is unhindered. Population: 37 in 66 (2 in 66+), 0 finer (5/15). NGC ID# 277P, PCGS# 3874

1912-S Nickel, MS66  
Among the Finest Certified

- 3047 1912-S MS66 NGC.** The 1912-S Liberty nickel is one of the keys to the series, and a small number of Premium Gems are the finest known. This piece displays the usual glossy luster, with mildly iridescent golden-gray toning. Lightly struck along the right obverse border, as well as on the corn ear to the left of the bowknot, as is typical of this issue. Census: 12 in 66 (1 in 66+, 1 in 66 ★), 0 finer (5/15). NGC ID# 277R, PCGS# 3875

BUFFALO NICKELS

1913 Type One Buffalo Nickel, MS67+  
Stellar Eye Appeal

- 3048 1913 Type One MS67+ PCGS. CAC.** There are a number of Type One 1913 Buffalo nickels certified at the MS67 grade level, but only a tiny fraction of those have received a Plus designation, and finer examples are rare. This piece is boldly struck, with radiant, satiny surfaces that glow with warm champagne and lilac-rose hues. Some die erosion is evident in the reverse recesses. PCGS lists 17 coins finer (6/15). NGC ID# 22PW, PCGS# 3915

1916 Buffalo Nickel, Lightly Toned AU58  
Famous Doubled Die Obverse

- 3049 1916 Doubled Die Obverse, FS-101, AU58 NGC.** The Doubled Die 1916 is the key date to a complete *Guide Book* collection of Buffalo nickels. It is even tougher than its closest competitor, the 1918/7-D. Both varieties are rare because their significance was not recognized for many years after their production, by which time most survivors were well-circulated. There was little reason to save a 1916 nickel in Mint State, since its mintage of nearly 63.5 million pieces was the highest of the type aside from the 1936 and 1937. The variety did not appear in the *Guide Book* until the 1978 edition. Breen notes in his 1988 *Encyclopedia*, "Ex. rare. Usually in low grades." The two leading grading services combined have certified a total of just 19 pieces across all Mint State grades, some of which are likely resubmissions.

This sharp, near-Mint example shows slight wear on the hipbone, which prevents an Uncirculated grade. The subtle multicolor toning is attractive, and offers lilac, powder-blue, and tan tints. Neither side reveals any reportable marks, and the overall appearance is pleasing. The obverse die doubling is strongest on the 6 in the date, but the other three date digits are also widely doubled, with a lighter impression from the initial hubbing. All three feathers are die doubled at their bases. LIBERTY is not die doubled, since the pivot point for the Class V doubling is within that legend. The absence of die doubling on LIBERTY probably delayed the reporting of the variety for many years, since doubled die varieties were inevitably compared with the 1955 DDO cent, which has dramatic Class I doubling. For Class I, the pivot point is the center of the die, and all peripheral elements exhibit a similar spread. The numismatic science of die varieties greatly advanced during the 1970s, to the benefit of important varieties such as the 1916 DDO nickel, which is now fully recognized in its great rarity. Census: 5 in 58, 12 finer (5/15).

Ex: ANA Signature (Heritage, 4/2006), lot 289. PCGS# 145628 Base PCGS# 3931

### 1918/7-D Buffalo Nickel, AU Details

- 3050** 1918/7-D — Cleaned — PCGS Genuine Secure. AU Details. Despite the PCGS caveat, a wealth of pleasing detail is on display here, starting with the bold underdigit 7, which is clear to the naked eye in both the top and bottom areas of the 8. The top-right corner of the 7 also is clear outside the top loop of the 8. A full horn and split tail show on the buffalo, as well as rugged detail remaining on his back, head, and midsection. Seldom does a 1918/7-D appear with so much detail, making this an opportunity not to be missed for series fans. NGC ID# 22RJ, PCGS# 3939

### 1920-S Nickel, Satiny MS64+ Sharper Than Usual

- 3051** 1920-S MS64+ PCGS. Like its dime and quarter counterparts, the 1920-S Buffalo nickel is characteristically weak throughout each side, and extensive die erosion is a typical occurrence. This Plus-designated Choice example shows far above average sharpness, despite moderate flow lines in the recesses. The surfaces are pleasantly devoid of major abrasions and a satiny golden hue adds a degree of warmth to each side. There are only 20 coins finer at PCGS (5/15). NGC ID# 22RS, PCGS# 3946

### 1921-S Buffalo Nickel, MS64 Sharp Central Detail

- 3052** 1921-S MS64 PCGS. CAC. Close study with a lens fails to reveal any noteworthy abrasions on this near-Gem 1921-S Buffalo nickel, while the motifs are boldly rendered and each side displays a lovely blanket of mint-gold, lilac, and pale rose toning. The 1921-S is a recognized semikey date in all grades; pieces grading finer than MS64 and genuinely scarce. NGC ID# 22RU, PCGS# 3948

### 1926-S Buffalo Nickel, MS64 Recognized Series Key

- 3053** 1926-S MS64 PCGS. The 1926-S is one of the most challenging Buffalo nickel issues, boasting the only mintage in the series below 1 million coins (970,000 pieces). This date is challenging in Choice grade, and anything finer is a rare acquisition. David Hall, writing for PCGS CoinFacts, states: "Excluding the 1918/7-D overdate, this issue is THE key date to the Buffalo nickel series." This Choice example is better-struck than is often seen for this issue, although minor softness persists on the bison's head and shoulder and the finer details of the Indian's hair; the bison's horn is defined. Iridescent golden-gray patina yields hints of rose and lilac, and the satiny surfaces are free of any major abrasions. Only 14 coins are numerically finer at PCGS (6/15). NGC ID# 22S7, PCGS# 3959

### 1927-D Nickel, Lightly Toned MS65

- 3054** 1927-D MS65 PCGS. CAC. The 1927-D Buffalo nickel is challenging at the Gem grade level and is rarely seen finer. This piece is toned in medium gold and lavender hues, with the latter color most prevalent around the periphery. The strike is weak on the bison's shoulder and the hair above the Indian's braid, as is characteristic of this branch mint issue. Population: 66 in 65 (4 in 65+), 5 finer (5/15). NGC ID# 22S9, PCGS# 3961

**1937 Buffalo Nickel, MS68  
Among the Finest Certified**

**3055 1937 MS68 NGC.** As befits the high mintage of 79.4 million pieces, this is one of the most available dates in the Buffalo nickel series, but few examples can match the quality and eye appeal of the present coin. This specimen displays delicate iridescent ice-blue, gold-beige, and lilac patina over seemingly pristine surfaces that exhibit dazzling luster. Boldly detailed with immense visual appeal. Census: 8 in 68 (3 in 68 ★), 0 finer (5/15).

Ex: CSNS Signature (Heritage, 4/2006), lot 1127, which realized \$7,475; FUN Signature (Heritage, 1/2007), which realized \$9,200. NGC ID# 22SV, PCGS# 3980

**1937-D Three-Legged Nickel, MS64  
Attractively Toned, Nicely Struck**

**3056 1937-D Three-Legged, FS-901, MS64 NGC.** Iridescent cherry-red, lime-green, and wheat-gold toning adorn this colorful and lustrous near-Gem. The strike is above average, and neither side displays any noticeable marks. The diagnostics for the key variety are irrefutable, and include the granular back leg and the series of tiny die lumps beneath the flank. PCGS# 38475 Base PCGS# 3982

**PROOF BUFFALO NICKELS**

**1913 Type One Buffalo Nickel, PR67  
Beautiful Two-Sided Toning**

**3057 1913 Type One PR67 PCGS.** For the collector who pursues the Buffalo nickel series for the artistic merit of James Earle Fraser's iconic design, a proof Type One example is almost a necessity. This Superb Gem showcases Fraser's vision in the truest form available to collectors, brought up to a relief and sharpness that is essentially impossible to acquire on a circulation strike. The thick matte surfaces are seemingly flawless, and are accentuated by rich toning that starts out lavender-blue in the centers and slowly fades to yellow-gold and amber near the borders. Population: 56 in 67 (6 in 67+), 3 finer (5/15). NGC ID# 278R, PCGS# 3988

**1913 Type One Buffalo Nickel, PR67  
Razor-Sharp Type Coin**

**3058 1913 Type One PR67 PCGS.** This is a beautiful Type One Buffalo nickel proof, fully struck and glowing in thick matte luster. Each side shows warm champagne-gold toning and there are no mentionable marks. This issue is only infrequently seen at this grade level, and anything finer is extremely rare. Population: 56 in 67 (6 in 67+), 3 finer (6/15). NGC ID# 278R, PCGS# 3988

**1914 Buffalo Nickel, PR67  
Gorgeous Matte Proof Type Coin**

**3059 1914 PR67 PCGS. CAC.** The 1914 is the most frequently seen of the matte proof Buffalo nickel issues, and it is well-known for being boldly struck with outstanding eye appeal — factors which make this issue ideal for the collector seeking a single representative of this type. The present piece is fully rendered, with modestly iridescent, light golden toning over each side. CAC-approved with seemingly unimprovable quality. Population: 85 in 67 (6 in 67+), 11 finer (5/15). NGC ID# 278T, PCGS# 3991

**1936 Satin Proof Buffalo, PR68  
Peripheral Color**

**3060 1936 Type One — Satin Finish PR68 PCGS.** The sheer technical quality and powerful strike of this high-end Superb Gem proof alone would be enough to garner a second gander, but this piece also possesses a captivating array of vivid rainbow toning that circumnavigates the margins on both sides, leaving the centers with a soft ice-blue hue. This satin proof issue is conditionally scarce in PR68, and is almost unknown finer. Population: 37 in 68, 1 finer (5/15). NGC ID# 278X, PCGS# 3994

## JEFFERSON NICKELS

### 1942-D Over Horizontal D Nickel, MS65 Rare Full Steps Example

- 3061 1942-D D Over Horizontal D, FS-501, MS65 Full Steps NGC.** This *Guide Book* variety is the most important in the Jefferson nickel series, many times rarer in Mint State than the 1939 Doubled Monticello issue. The mintmark on this variety is double punched, with the first entry erroneously rotated 90 degrees counter-clockwise. Although the *Cherrypickers' Guide* suggests this curiosity "can still be picked on rare occasions," it is clear that high-end Mint State examples are inherently rare, particularly with Full Steps. In the Five Full Steps category, NGC lists only seven Uncirculated coins, with the current piece and one other Gem tied for finest; three additional Mint State coins are listed in the Six Full Steps category, but the finest is a single MS64. This spectacular piece is boldly struck, with satiny nickel-gold luster and smooth surfaces. Trivial contact on the high points of Monticello appears to be the primary grade-limiting factor, although the eye appeal is unaffected. PCGS# 38496 Base PCGS# 84015

### 1945-P Nickel, MS67+ Full Steps Lightly Iridescent Toning

- 3062 1945-P MS67+ Full Steps PCGS.** This satiny Superb Gem is tied for the finest-certified Full Steps example of the 1945-P Jefferson nickel, and ranks more than a full grade point finer than the coin in the current highest-rated Registry Set. The strike is bold and each side displays pastel gold, lavender, and pistachio-green toning, with deeper umber around the obverse periphery. Population: 11 in 67 (2 in 67+) Full Steps, 0 finer (6/15). NGC ID# 22TX, PCGS# 84025

### 1945-S Jefferson Nickel, MS67 Remarkable Example With Full Steps

- 3063 1945-S MS67 Full Steps PCGS.** Areas of faint toning are present on this lustrous and appealing Superb Gem with the Full Steps designation. A couple of minuscule marks on the nose and a tiny area of as-made struck-in grease on Monticello are not distracting. Adding to the desirability of this example, PCGS and NGC have only certified a combined total of 15 examples at the MS67 level with Full Steps, with none numerically finer at either service (6/15). NGC ID# 22TZ, PCGS# 84027

### 1952-D Nickel, MS67 Full Steps Nearly Six Complete Steps

- 3064 1952-D MS67 Full Steps PCGS.** As the numismatic hobby approaches 30 years of third-party certification, the online population data provides a clear indication of the relative rarity for every series, with the understanding that the data is biased toward higher grade and rarer coins. PCGS has certified 866 1952-D Jefferson nickels, with just 102 of those assigned the Full Steps designation. Understanding that a Full Steps example is more likely to be submitted in the first place is important when considering the relative rarity of these coins. This brilliant Superb Gem, with delicate champagne toning over frosty mint luster, just misses six complete steps on the reverse. PCGS has only certified two examples as MS67 Full Steps, with none finer (5/15). NGC ID# 22UL, PCGS# 84047

## PROOF JEFFERSON NICKEL

1976-S Jefferson Nickel, PR70 Deep Cameo  
Registry-Quality Acquisition

**3065** 1976-S PR70 Deep Cameo PCGS. PCGS has certified only 29 proof 1976-S nickels in PR70 Deep Cameo (6/15), an example of which is essential for a competitive Registry Set. This piece is fully struck with stark cameo contrast. Traces of light golden toning accentuate the perfectly preserved surfaces, although the coin appears brilliant at first glance. NGC ID# 27AP, PCGS# 94209

## EARLY HALF DIMES

1794 Half Dime, Original XF40  
Outstanding First-Year Type Coin  
Rare V-2, LM-2 Die Marriage

**3066** 1794 V-2, LM-2, R.5, XF40 PCGS. CAC. Many early copper collectors find 1793-dated coins uniquely alluring due to their status as the first issues of the new Mint in that metal, and the same is true of many early silver type collectors in regards to 1794-dated coinage. Interestingly, though, the 1794 half dimes were actually struck in early 1795 with outdated dies. The mintage total is included in the 86,416 pieces recorded for the calendar year 1795. This lightly circulated example displays original gunmetal-gray patina with blue, gold, and lilac accents throughout. The strike is sharp and even, and the motifs show just minor wear. Population: 2 in 40, 3 finer (6/15). PCGS# 38582 Base PCGS# 4250

1794 Half Dime, V-4, LM-4, AU Details  
Sharp First-Year Flowing Hair Example

**3067** 1794 V-4, LM-4, R.4 — Improperly Cleaned — NGC Details. AU. For an issue as challenging as is the 1794 half dime, a light cleaning such as is seen on this piece is a trivial distraction at best. This piece possesses a number of visual attributes, including a bold, even strike, an almost complete absence of perceptible wear, and a lack of detracting adjustment marks. Both sides show consistent steel-gray patina with hints of luster in the fields. PCGS# 38584 Base PCGS# 4250

## SEATED HALF DIME

1838-O No Stars Half Dime, MS62  
Famous Inaugural O-Mint Issue

**3068** 1838-O No Stars MS62 NGC. CAC. Half dimes and dimes were the first coins minted in New Orleans, and both are highly desirable today. Dies were shipped from Philadelphia before the decision was made to add 13 stars to the obverse. As a result, all 1838-O half dimes and dimes are from the earlier No Stars design. This deeply toned piece has lovely steel blue and iridescent patina with underlying satin luster. Census: 3 in 62, 8 finer (5/15).  
Ex: Dallas Signature (Heritage, 10/2008), lot 494; Long Beach Signature (Heritage, 2/2011), lot 3326. NGC ID# 232N, PCGS# 4314

## PROOF SEATED HALF DIMES

1856 Half Dime, Toned PR64  
Rare in Any Grade

- 3069 1856 PR64 PCGS. CAC.** This pre-1858 proof issue is seldom seen in any condition. The mintage was not recorded by the Mint, but it is probable that only a few dozen pieces were coined. The survival rate is somewhat lower; on average, we offer an example of this issue at a rate of only about one coin per year. This Choice representative displays bold detail with gleaming mirrored fields and modest cameo contrast. Bluish-purple and gold hues encompass each side. Population: 7 in 64, 2 finer (6/15). NGC ID# 235L, PCGS# 4434

1872 Seated Half Dime, PR67 Cameo  
Tied for Finest at PCGS

- 3070 1872 PR67 Cameo PCGS. CAC.** A fairly generous mintage of 950 proof Seated Liberty half dimes was accomplished in 1872 and this spectacular Superb Gem is among the finest survivors. The sharply detailed frosty design elements stand out boldly against the reflective fields and the impeccably preserved surfaces are blanketed in shades of pale gold and cerulean-blue toning. Population: 2 in 67 Cameo, 0 finer (6/15). PCGS# 84455

1873 Half Dime, PR67+ Cameo  
Exceptional Surface Quality

- 3071 1873 PR67+ Cameo NGC.** The final year of half dime production yielded only 600 coins, few of which survive in any Cameo grade, let alone the Superb Gem numeric level. This high-end representative is among the finest Cameos certified, and the eye appeal is simply impeccably, perfectly mirroring the outstanding technical quality. Sharp, frosty devices are starkly contrasted against the deeply mirrored fields, while a light golden hue graces each side. Even 10x magnification fails to reveal any mentionable surface flaws. Census: 4 in 67 Cameo (1 in 67+ Cameo, 1 in 67 ★ Cameo, 1 in 67+★ Cameo), 0 finer (5/15). PCGS# 84456

## EARLY DIMES

1796 Dime, JR-1, Fine 15  
Problem-Free and Original

- 3072 1796 JR-1, R.3, Fine 15 PCGS. CAC.** JR-1 is a distinctive variety, exhibiting a heavy rim cud below star 1 and a radial die crack through the E in AMERICA. This is a collectible mid-grade example, suitable for type or date purposes. The strike is even and both sides retain complete border dentils with strong central devices. Problem-free surfaces show deep gunmetal-gray and blue-tinted patina. PCGS# 38742 Base PCGS# 4461

1798 Small 8 Dime, JR-3, VF35  
First-Rate Color

- 3073 1798 Small 8, JR-3, R.5, VF35 PCGS.** The rarity JR-3 heightens the appeal of this Choice VF type coin. When acquiring circulated dimes from this period, collectors usually have to put up with at least minor problems, but not so with this coin. Wear is evenly applied and the central devices retain nearly XF sharpness. The obverse border dentils are complete and the reverse rim grows slightly weak only from 4 to 6 o'clock — the peripheral legends are clear throughout. Striking softness is seen over the upper-right reverse, as usual. This piece is beautifully toned in original gunmetal-blue, amber, and lilac-gray patina. PCGS# 38752 Base PCGS# 4467

1802 JR-4 Dime, XF40  
Smooth Surfaces, Evenly Toned

- 3074 1802 JR-4, R.4, XF40 PCGS.** A gunmetal-gray representative with glimpses of cream-white on the high points. Impressively unabraded and attractive. The centers show incompleteness of impression characteristic of JR-4. A better Heraldic Eagle date with a reported mintage of just 10,975 pieces. PCGS# 38761 Base PCGS# 4472

## SEATED DIMES

### 1837 Seated Dime, Large Date, MS67 Spectacular Early Die State Coin Prooflike Fields, Sharp Motifs

- 3075** 1837 No Stars, Large Date, F-101a, R.2, MS67 NGC. Gobrecht's Seated Liberty dime design, derived from conceptual sketches by artist Thomas Sully, went into production on June 30, 1837. The first coinage of the type, believed to be about 30 pieces, consisted of proofs, many of which survive today. The same dies were then employed for regular production where the obverse soon shattered and later clashed. Gerry Fortin lists three different die states for the circulation strike issue based on the advancement of the die deterioration.

This Superb Gem example was undoubtedly one of the first regular issue coins struck following the proof production, as both dies are still perfect. The earliest regular issue die state is usually seen with a thin crack beginning from the U in UNITED to the rim, a feature which is not yet present on this example. Moreover, this piece is beautifully prooflike on both sides and fully struck on the devices; the coin must have just missed a Prooflike designation from NGC, which has so-recognized four other, lower-grade pieces. Both sides show lovely amber-gold and pale lavender toning, with only a few faint hairlines discernible in the right obverse field. A truly special coin, and one of the hidden highlights of this sale. Census: 9 in 67 (2 in 67 ★), 0 finer (6/15). PCGS# 537635 Base PCGS# 4561

### 1838 No Drapery Dime, MS67 Superb Type Candidate

- 3076** 1838 No Drapery, Large Stars MS67 NGC. F-113, R.4. The Large Stars, or, more accurately, "normal-sized stars." Fortin-113 is one of two varieties that share this reverse which features an inchworm-like die flaw on the reverse below the N in ONE. The scarcity of the No Drapery type in high grade heightens the importance of this Superb Gem 1838 example. The strike is bold throughout the stars, wreath, and Liberty's figure. Close study with a lens fails to reveal any noteworthy flaws beneath the blended olive-gray and amber-gold toning. Census: 9 in 67 (1 in 67+), 2 finer (5/15). NGC ID# 237U, PCGS# 4568

### 1840 No Drapery Dime, MS65+ Satiny Mint Luster

- 3077** 1840 No Drapery, F-106, R.3, MS65+ PCGS. CAC. This final No Drapery Seated dime issue is rare in Gem or better condition, but examples are occasionally encountered in type cabinets. This piece is satiny with light champagne toning overall; a small grease streak (as struck) is observed on the reverse below the bow. The design elements show trivial weakness on the upper-left reverse, a characteristic of this die variety. Population: 8 in 65 (2 in 65+), 9 finer (5/15). PCGS# 537714 Base PCGS# 4573

**1873-CC Arrows Dime, Prized VF35  
Seldom Seen So Fine**

- 3078** 1873-CC Arrows, F-101, R.4, VF35 PCGS. CAC. LIBERTY is bold on this cream-gray Choice VF Arrows representative. Wear is even and moderate, and the only remotely mentionable mark is a thin line on the left (facing) thigh. Arrows were added in 1873 to denote a minor weight change to the metric standard. This change led to the rarest Carson City variety, the unique 1873-CC No Arrows dime, presumably saved from the smelter for the annual meeting of the Assay Commission. The 1873-CC is one of only two Carson City Arrows dates, and the other issue (the 1874-CC) is even rarer. A mere 18,791 pieces were struck, and most survivors are well circulated or impaired. Certified survivors average no better than midway between Fine 14 and VF20, making this Choice VF example a rare prize. Population: 8 in 35, 10 finer (6/15).

Ex: *Central States Signature* (Heritage, 4/2009), lot 2255, which brought \$10,350. PCGS# 538326 Base PCGS# 4666

**PROOF SEATED DIME**

**1891 Dime, PR66 Deep Cameo  
Stark Field-Motif Contrast**

- 3079** 1891 PR66 Deep Cameo PCGS. F-130, R.3. Ideal for type purposes, this final-year proof exhibits bold white-on-black contrast, with just a hint of golden color over the sharp, frosty relief elements. A few tiny strike-throughs are present, but contact marks and hairlines are essentially nonexistent. One of the finer-known survivors of a limited 600-coin proof mintage. Population: 2 in 66 Deep Cameo, 2 finer (5/15). PCGS# 94788

**BARBER DIMES**

**1892 Barber Dime, Pristine MS67+  
Formidable Registry Set Contender**

- 3080** 1892 MS67+ PCGS. CAC. With no coins certified higher than MS67 by either service, this example with the PCGS Plus designation (and with the CAC endorsement) must be considered among the "finest of the fine." Certainly, few rivals could claim more extraordinary toning or greater eye appeal. Brilliant mint luster bolsters vivid, royal-blue at the margins and peach-gold centers. The fields and devices are immaculately preserved and, as expected, fully struck. Population: 17 in 67 (2 in 67+), 0 finer (5/15). NGC ID# 23DK, PCGS# 4796

**1906 Barber Dime, MS67  
Delicately Toned, Ex: Hugon**

- 3081** 1906 MS67 PCGS. CAC. Ex: Lily Nicole Collection. Blazing mint frost with just a blush of faint blue-silver spans both sides of this formidable Superb Gem. The surfaces are splendidly preserved and reveal only faint hints of handling. The strike is decisive, aside from incompleteness on the 6 in the date. The 1906 Barber dime is surprisingly rare in MS66 and finer condition, despite a mintage of nearly 20 million coins. Population: 5 in 67, 0 finer (5/15). Ex: *John C. Hugon Collection* (Heritage, 1/2005), lot 4042; *Central States Signature* (Heritage, 4/2009), lot 220. NGC ID# 23EX, PCGS# 4838

**MERCURY DIMES**

**1916-D Mercury Dime, Unc Details  
Fully Struck Bands**

- 3082** 1916-D — Improperly Cleaned — NGC Details. Unc. This unworn 1916-D representative is deeply struck, with broad rims and full separation of the reverse bands, both horizontal and diagonal. Light hairlines, detected with a loupe, prevent a numeric grade from NGC, but the surfaces retain satiny luster with light golden toning. NGC ID# 23GY, PCGS# 4906

**1916-S Mercury Dime, MS67 Full Bands  
Tied for Finest Certified**

- 3083 1916-S MS67 Full Bands PCGS.** The 1916-S Mercury dime is many times rarer in MS67 Full Bands than its Philadelphia counterpart, and it is surprisingly not much more available in this grade than the key-date 1916-D. PCGS shows 21 examples of the 1916-S in MS67 Full Bands with none finer, and seven of the 1916-D, also with none finer (6/15). This coin displays bold design definition, with satiny luster and iridescent champagne and lavender-blue toning. NGC ID# 23GZ, PCGS# 4909

**1920-S Dime, Appealing MS65 Full Bands**

- 3084 1920-S MS65 Full Bands PCGS.** The stunning surfaces of this Gem Full Bands 1920-S dime show a wash of pale gold complementing ice-white areas in nearly equal proportions. There is no "fadeaway" on the last 0 in the date, pleasingly so, and only a few minor marks in the right reverse field appear to preclude an even finer grade. An extremely appealing example of this strike and condition rarity. Population: 34 in 65 (1 in 65+) Full Bands, 12 finer (6/15). NGC ID# 23HD, PCGS# 4933

**1927-S Mercury Dime, MS66+  
Sole Finest Non-Full Bands at PCGS**

- 3085 1927-S MS66+ PCGS. CAC.** The 1927-S Mercury dime is elusive in Mint State, and is rarely seen in Gem or finer condition. This high-end Premium Gem displays satiny gold-tinted luster with subtle highlights of lilac and ice-blue. Striking sharpness is far above average for the issue, with particular attention given to the central fasces bands, which are nearly delineated. The fields show extensive die striations, a characteristic shared by most quarter dollars from this date and mint; these are the product of aggressive grinding on the die face, usually to efface clash marks or rust. Population: 6 in 66 (1 in 66+), 0 finer (5/15). NGC ID# 23HW, PCGS# 4964

**1944-S Dime, MS68 Full Bands  
Registry Set Quality**

- 3086 1944-S MS68 Full Bands PCGS.** This exceptional condition rarity shares finest known status with just five others at PCGS (5/15). The strike is bold in most areas, including full definition on the horizontal and diagonal bands; trivial weakness is seen at the top of STATES. Radiant luster appears undisturbed as it cartwheels around each side beneath vivid aquamarine, gold, and pale rose toning. An eye-catching, Registry-quality blazer. NGC ID# 23KD, PCGS# 5055

**ROOSEVELT DIME**

**1951 Dime, MS68 Full Bands  
Vivid Obverse Toning**

- 3087 1951 MS68 Full Bands NGC.** This is a stellar Registry coin, among the three finest seen by NGC, and rivaled in this grade by just two others at PCGS. The strike is bold and the preservation equally impressive, but the chief visual attribute of this piece is its vibrant obverse toning which spans the color spectrum from sun-gold to deep pine-green, and including shades of lavender-blue, violet, and russet; the reverse is more evenly colored in rose-gold hues. Census: 3 in 68 (1 in 68 ★ Full Bands, 1 in 68+★) NGC ID# 23L2, PCGS# 85097

## PROOF ROOSEVELT DIME

1968 No S Roosevelt Dime, PR68  
Premier Modern Proof Rarity

**3088** 1968 No S PR68 PCGS. FS-501. All proof coin varieties with missing mintmarks are highly sought-after, but the 1968 No S proof Roosevelt dime is one of the rarest of all. During this period, working dies were made in Philadelphia and shipped to the branch mints, where their respective mintmarks were later added before coinage. The 1968 No S proof dime was created when the mintmark was omitted from a proof die. It is apparent that mint personnel quickly realized the error and changed out the die, as few examples of the No S dime are known to exist in any grade. PCGS and NGC combined have certified only 40 pieces (5/15), and even this low figure likely includes a number of resubmissions. In their *100 Greatest U.S. Modern Coins*, where the 1968 No S dime is ranked as high as number three, Scott Schechter and Jeff Garrett suggest as few as 24 examples are in the hands of collectors.

This piece is boldly struck, with deeply mirrored fields and outstanding preservation. A faint blush of light golden toning adds a degree of warmth to each side. Population: 10 in 68, 0 finer (5/15). NGC ID# 27F3, PCGS# 5245

## TWENTY CENT PIECE

1876 Twenty Cent, MS65  
Beautifully Clean Surfaces

**3089** 1876 MS65 NGC. BF-2, R.2. The 1876 is one of the more challenging dates in the twenty cent series, particularly in Gem or finer condition. This sharply rendered example shows uncommonly well-preserved surfaces with subtle areas of semiprooflike mirroring in the reverse fields near the eagle. A hint of light golden toning graces each side. Census: 38 in 65 (1 in 65+), 20 finer (6/15). NGC ID# 23R8, PCGS# 5299

## PROOF TWENTY CENT PIECES

1875 Twenty Cent, PR64 Cameo  
Light Peripheral Toning

**3090** 1875 PR64 Cameo PCGS. The first of just four proof issues in this easily pursuable series. This Choice Cameo is well-contrasted, despite a dusky gray patina that softens the impact of the sharp, frosty devices. Gold and sea-green framing surrounds the peripheries. No contact marks are present, and only a few stray lines in the fields limit the grade. Population: 20 in 64 Cameo, 13 finer (5/15). PCGS# 85303

1877 Twenty Cent, PR65  
Scarce This Fine

**3091** 1877 PR65 NGC. Although the 1876-CC is a roadblock in completing a circulation-strike date set of twenty cent pieces, the proof series consists of four collectible issues. The 1877 is a proof-only date with a mintage of 510 coins. This Gem example is boldly struck and deeply mirrored. Shades of olive, amber, and russet accent soft champagne-green patina overall. Census: 22 in 65, 22 finer (6/15). NGC ID# 27H4, PCGS# 5305

## BUST QUARTERS

### 1820 Medium 0 Quarter, B-3, MS63 Album-Toned Peripheries

- 3092 1820 Medium 0, B-3, R.3, MS63 PCGS.** Large Wide 0, or Medium 0, depending on the reference. B-3 is about in the middle of availability for the five 1820 die pairings, scarcer than B-2 and -4, but more frequently seen than B-1 and -5. This Select example is Condition Census quality, and strong for the grade. The strike is sharp and even, and soft luster glows amid the fields. Delightfully original surfaces yield deep russet and olive peripheral colors with lighter champagne-gold in the centers. Population (all varieties included): 7 in 63, 15 finer (5/15). PCGS# 38962 Base PCGS# 515284

### 1822 B-1 Quarter, MS62 Lightly Toned, Few Marks

- 3093 1822 B-1, R.2, MS62 PCGS.** A hint of butter-gold toning visits both sides, but this minimally marked Bust quarter is otherwise brilliant. Luster dominates the margins and motifs. The stars and claws show incompleteness, but the remainder of the strike is crisp. B-1 is the usually seen 1822 variety, easily distinguished from the rare B-2 by a normal, centered 25 C. PCGS# 38969 Base PCGS# 5332

### 1828 Quarter, MS62 Prooflike Deep-Mirrored Fields

- 3094 1828 B-1, R.1, MS62 Prooflike NGC.** Scarce in any Mint State grade from a mintage of 102,000 pieces, the 1828 quarter is seldom seen with prooflike qualities and NGC has certified just two others in prooflike format (5/15). Luminous, almond-gold toning covers the mirrored surfaces of this sharply struck quarter. The coin is minimally abraded with no significant marks or distractions for the grade. It is the B-1 variety, defined by the closeness of star 1 to Liberty's bust and several repunched obverse stars. A curled 2 is diagnostic as part of the denomination. PCGS# 38976 Base PCGS# 5342

### 1834 Quarter, B-2, MS64 Pleasing Original Toning

- 3095 1834 B-2, R.4, MS64 PCGS Secure. CAC.** A boldly struck example of this scarce variety, this Choice 1834 quarter also exhibits satiny luster beneath original toning in shades of champagne, olive, and lavender-gray. No major abrasions are present. As a date, this issue is only marginally scarce in MS64, but it is rarely encountered finer. Population, all varieties included: 49 in 64, 12 finer (5/15). PCGS# 38993 Base PCGS# 5353

## SEATED QUARTERS

### 1852 Seated Quarter, MS65 Impressive Strike and Surfaces

- 3096 1852 MS65 NGC. Briggs 2-B.** The 1852 Seated quarter is an elusive Philadelphia issue from the first part of the series, and is rarely seen in Mint State. This Gem example is sure to excite knowledgeable students of the series. Bold motifs and broad rims are accentuated by satiny luster with delicate rose-gold and lavender hues gracing each side. A lack of distraction abrasions confirms the lofty grade. Census: 5 in 65, 3 finer (5/15). NGC ID# 23T8, PCGS# 5419

**1855 Arrows Quarter, MS65  
Lightly Toned and Original**

- 3097 1855 Arrows MS65 NGC.** The 1855 is one of the more available dates in the short-lived No Motto, With Arrows type, but few are known in Mint State and Gem examples are rare. This piece displays sharp motifs and original, frosty luster. Both sides exhibit light champagne and mint-green toning. A few trivial contact marks on Liberty's figure determine the grade. Census: 8 in 65, 7 finer (6/15). NGC ID# 23U8, PCGS# 5435

**1859-S Quarter, AU Sharpness**

- 3098 1859-S — Improperly Cleaned — NGC Details. AU. Briggs 1-A.** The 1859-S Seated quarter is a better date with a mintage of only 80,000 pieces. Examples are scarce in any condition finer than VF, and none are certified in Mint State. This briefly circulated example is well-detailed, with medium battleship-gray patina that shows olive overtones in the fields. NGC notes old cleaning, although the evidence is hardly detracting. A couple small rim bumps are present and a few minor hits are seen on the lower eagle, Liberty's shin, and the upper obverse shield. NGC ID# 23TN, PCGS# 5450

**1871-CC Quarter, Good 6  
Collector-Grade Example**

- 3099 1871-CC Good 6 PCGS. Briggs 1-A.** The earliest issues from the Carson City Mint are some of the biggest key dates in the Seated Liberty quarter series. The 1871-CC had a mintage of only 10,890 pieces, and is seldom seen in any grade. This well-circulated example offers the enthusiast a moderately affordable example that retains strong borders and boldly outlined devices. The surfaces are nickel-gray with bluish accents in the fields. Some old marks on the reverse are not out of line for the grade. Population: 3 in 6, 28 finer (5/15). NGC ID# 23UN, PCGS# 5479

**1873-CC With Arrows Quarter, Good 6  
Rare in All Grades**

- 3100 1873-CC Arrows Good 6 PCGS. Briggs 1-A.** The 1873-CC With Arrows quarter is a major series rarity. From a mintage of 12,462 coins, it is estimated that only about 50 pieces survive in all grades. Acquiring any example is a landmark event for the series collector, and there is little room for being picky about condition. This well-circulated piece is a collector-grade example, one of only a handful of pieces known that won't break the bank. Both sides show golden-gray patina, with strong borders and well-outlined devices. Population: 5 in 6, 39 finer (5/15). NGC ID# 23VV, PCGS# 5492

**1877-CC Quarter, MS66+**

- 3101 1877-CC MS66+ PCGS. Briggs 10-J.** Large CC. The predominantly dove-gray centers display splashes of golden-brown toning, while the margins offer jade-green, electric-blue, and plum-red shades. Lustrous and well preserved with a crisp strike and impressive eye appeal. A remarkable Carson City type coin. Population: 18 in 66 (6 in 66+), 6 finer (6/15). NGC ID# 23V6, PCGS# 5505

**1877-CC Quarter, Vibrant MS67  
A Memorable, Old-Time Example**

**3102 1877-CC MS67 PCGS. CAC. Briggs 1-A.** In 1877, the fabled Carson City Mint produced a near-record 4.2 million quarters, second in quantity only to the 4.9 million pieces for the Centennial-year issue. Accordingly, collectors desiring a CC-mint quarter for type sets usually select either the 1876-CC or 1877-CC quarters to fulfill that purpose. The 1877-CC quarter production would be the Nevada facility's last million-plus-coin quarter emission, as the introduction of the Morgan or "Bland" silver dollar in the following year would reduce the manufacture of other silver coins to token levels in order to accommodate the flood of new cartwheels.

This splendid Superb Gem offers stunning, original amber-gold and cinnamon coloration on the obverse, with the reverse boasting peripheral tinges of ice-blue that contrast with lilac and golden centers. Despite the moderate intensity of the colors, there is much luster radiating forth, producing a visual treat and a coin of exceptional beauty. Housed in an old green label holder. Population: 6 in 67, 0 finer (5/15).

Ex: FUN Signature (Heritage, 1/2009), lot 3758; Baltimore Signature (Heritage, 3/2009), lot 1050; FUN Signature (Heritage, 7/2009), lot 469. NGC ID# 23V6, PCGS# 5505

**PROOF SEATED QUARTERS**

**1873 No Arrows Quarter, PR67 Cameo  
Beautifully Rendered Throughout**

**3103 1873 No Arrows PR67 Cameo NGC. Briggs 1-A.** The 600 proof No Arrows quarters struck in 1873 were produced with dies bearing the Closed 3 logotype in the date. Examples are generally available in the absolute sense, but few are known with distinct cameo contrast. This Superb Gem is lightly toned in rose-gold and aquamarine hues, but in such a way as to not hinder the field-motif contrast. The strike is full and the fields gleam when tilted beneath a light. Census: 3 in 67 Cameo (1 in 67 ★ Cameo), 1 finer (5/15). PCGS# 85572

**1886 Quarter, PR67+ Cameo  
Blatant Field-Device Contrast**

**3104 1886 PR67+ Cameo NGC.** Blatant field-device contrast appears due to the nicely frosted devices showing light rose-gold toning against deeply mirrored fields. The surfaces exhibit remarkable preservation throughout both sides, to the degree that singular marks are absent. The strike is uniformly full. The 6 is nearly closed and the base of the 1 is minutely recut, determinants separating proofs from prooflike business strikes. Census: 20 in 67 Cameo (3 in 67+ Cameo, 2 in 67 ★ Cameo), 1 finer (6/15). PCGS# 85587

## BARBER QUARTERS

### 1892 Barber Quarter, MS68 ★ Registry Set Essential

- 3105 1892 MS68 ★ NGC.** Type One Reverse. The 1892 Barber quarter is always in demand from first-year type collectors and its substantial mintage of 8.2 million pieces makes it a reasonably available issue. Few examples can match the high-technical quality and tremendous eye appeal of the present coin, however. This magnificent MS68 example is spectacularly toned in natural shades of violet, lavender-gray, and apple-green toning, with well-detailed design elements and vibrant mint luster underneath. The impeccably preserved surfaces are free of noticeable distractions and visual presentation is terrific. This coin is tied with one other piece with the star designation for finest-certified honors at NGC. Census: 6 in 68 (2 in 68 ★), 0 finer (5/15). NGC ID# 23XT, PCGS# 5601

### 1897-S Quarter, MS66 Gleaming Prooflike Fields

- 3106 1897-S MS66 NGC.** This is firmly one of the finest 1897-S quarters known. Not only are the surfaces beautifully preserved, but the design elements are needle-sharp throughout the typical weak areas and the gleaming fields display nearly full prooflike mirroring. Traces of light golden toning accentuate each side, and only a few faint lines on Liberty's cheek preclude an even finer grade from NGC. Census: 2 in 66, 3 finer (5/15). NGC ID# 23YC, PCGS# 5618

### 1913-D Quarter, MS67 Tied for Finest at PCGS, Ex: Eliasberg

- 3107 1913-D MS67 PCGS.** Frosty mint luster shines through light golden patina on each side, as small russet accents dot the periphery. The strike is sharp, the preservation excellent. This coin offers outstanding eye appeal. The nominal mintage of 1.4 million pieces makes the 1913-D one of the slightly better dates in the Barber series. Of course, like all other Barber quarters, the 1913-D is a condition rarity at the MS67 level. This coin was once a highlight of the famous Eliasberg Collection, and it will be a prize for the advanced collector or Registry Set enthusiast. Population: 2 in 67, 0 finer (5/15).

Ex: Louis E. Eliasberg, Sr.; Louis E. Eliasberg, Sr. Collection (Bowers and Merena, 4/1997), lot 1610; unknown intermediaries; acquired privately from John Feigenbaum at David Lawrence (11/2001). NGC ID# 23ZV, PCGS# 5665

### 1913-S Quarter, Dove-Gray Fine 12

- 3108 1913-S Fine 12 PCGS.** LIB and TY are clear, as well as part of R, on the obverse of this dove-gray key-date Barber quarter, and all of the motto is decipherable while not sharp on the reverse. No marks on either side are singularly mentionable, and much pleasing detail remains throughout. This attractive piece would fit nicely in a midgrade circulated Barber quarter set. NGC ID# 23ZW, PCGS# 5666

### 1913-S Quarter, VF30 Collector-Grade Example

- 3109 1913-S VF30 PCGS.** A problem-free mid-grade representative of this key Barber quarter issue, this well-detailed 1913-S is deeply toned on both sides in varying gunmetal-gray hues. LIBERTY is clear and the central devices exhibit strong detail in the leaves, feathers, and shield lines. This date's limited mintage of 40,000 pieces is the lowest in the series. NGC ID# 23ZW, PCGS# 5666

## PROOF BARBER QUARTERS

### 1899 Barber Quarter, PR67 Cameo Impressive Contrast

- 3110 1899 PR67 Cameo PCGS. CAC.** Few proof Cameos are certified at this lofty level, and even fewer still are CAC-endorsed therein. This gleaming coin exhibits impressive contrast on each side, with warm golden coloring that deepens slightly toward the borders and there interacts with a few deeper russet overtones. The fields are seemingly pristine, and light, swirling lines on the frosty motifs are a result of die polishing and should not be confused with hairline scratches. Population: 4 in 67 Cameo, 1 finer (5/15). PCGS# 85685

### 1901 Barber Quarter, PR68 Tied for Finest Known

- 3111 1901 PR68 NGC.** This virtually perfect Barber quarter is attractively toned in shades of greenish-gold and cerulean-blue on the obverse, while the reverse is more deeply toned. The design elements are sharply detailed, and deeply mirrored fields shine through the patina. Eye appeal is tremendous. Census: 7 in 68 (2 in 68 ★), 0 finer (6/15).  
Ex: The Eugene H. Gardner Collection (Heritage, 6/2014), lot 30445. NGC ID# 242G, PCGS# 5687

### 1905 Quarter, Seldom-Seen PR67 Cameo

- 3112 1905 PR67 Cameo PCGS.** The surfaces are largely frosty silver-white but show a trace of copper-gold patina near the rims. In concert with the high grade, mentionable contact marks are nonexistent, and even the right shield corner on the reverse shows only the most inconsequential strike softness, with a uniformly bold impression elsewhere. This proof issue is seldom seen so fine with a Cameo designation as well. Population: 6 in 67 Cameo, 1 finer (6/15). PCGS# 85691

### 1907 Barber Quarter, PR68 Cameo Elusive Contrasted Proof

- 3113 1907 PR68 Cameo NGC. CAC.** By the early 1900s, Cameo contrast on proof coins was a thing of the past, as officials at the new third Philadelphia Mint facility suppressed the appearance of frosted proof coinage. While today's collectors covet Cameo and Deep Cameo proofs, Mint officials found them unattractive.  
This amazing Superb Gem features excellent field-to-device contrast. The obverse has swirls of gold and iridescent toning, while the reverse is almost entirely untuned, save for delicate peripheral iridescence and a bluish slate-gray hue in the fields. NGC has certified three pieces in PR68 Cameo (one in PR68 ★ Cameo), one in PR69 Cameo, and one in PR68 ★ Ultra Cameo (5/15). PCGS# 85693

### 1913 Quarter, PR67 Cameo Superb Mirrors

- 3114 1913 PR67 Cameo NGC.** Fully mirrored fields and frosty devices boast stark contrast on this Superb Gem Cameo, accentuated by just a hint of light golden toning. A few stray lines are barely discernible with a loupe. The eagle's right (facing) talons and shoulder show weakness of strike, but the obverse stars and portrait are bold. Census: 8 in 67 Cameo (1 in 67+ Cameo), 6 finer (5/15). PCGS# 85699

## STANDING LIBERTY QUARTERS

### 1916 Standing Liberty Quarter, VG10 Pleasing Collector-Grade Example

- 3115 1916 VG10 PCGS.** This is just a lovely, lower-grade example of this widely sought 20th century key. Both sides display original lavender-gray patina that lightens noticeably over the relief elements. Strong borders and a readable date further contribute to this coin's attributes. A small, light scratch in the right reverse field is not immediately obvious. NGC ID# 242Y, PCGS# 5704

### 1917-S Type One Quarter, MS66 Full Head Smooth, Satiny Luster

- 3116 1917-S Type One MS66 Full Head PCGS. CAC.** The Type One 1917-S quarter is generally a plentiful issue, but not so in MS66 Full Head. Scarcely are sharp examples seen at this grade level, and finer pieces are rare. The present representative displays a light golden hue over satiny luster with the occasional glimpse of russet near the borders. The leading edge of the eagle's left (facing) wing is not fully brought up, but the strike is otherwise sharp. Population: 83 in 66 (4 in 66+) Full Head, 12 finer (5/15). NGC ID# 2433, PCGS# 5711

### 1923-S Quarter, MS66 Nearly Full Head Definition

- 3117 1923-S MS66 PCGS. CAC.** The 1923-S is a long recognized key in the Standing Liberty quarter series. Premium Gem examples are fairly evenly split between the Full Head and non-Full Head categories, both variants being scarce at this grade level. This example is far sharper than most non-Full Head coins, with Liberty's hair line being just a trifle ill-defined at the high point near the ear. Shield rivets 3 and 4, as well as the eagle's feathers, show some of the more typical weakness that is common to this San Francisco issue. This piece displays glowing, frosty luster with iridescent champagne and mint-green toning. Eye appeal is excellent. Population: 34 in 66 (1 in 66+), 5 finer (5/15). NGC ID# 243K, PCGS# 5744

### 1929-D Quarter, Incredible MS67 ★ Almost Incomparable Eye Appeal

- 3118 1929-D MS67 ★ NGC.** In Premium Gem condition, the 1929-D is one of the hidden gems in the Standing Liberty quarter series; in addition to the scarcity of Full Head examples, this date is rarely seen even in non-Full Head MS66; in MS67, the 1929-D is one of the rarest dates in the series, about on par at this level with the 1927-D and -S and the '26-D and -S, all of which are heralded for their rarity in high grades. NGC reports just two MS67 examples of the 1929-D (this piece in MS67 ★), with none finer; PCGS shows only one coin in this grade. Neither service has graded a Full Head example finer than MS66+ (6/15). This incredible coin is a highlight piece in the current offering of Standing Liberty quarters. In addition to the exceptionally clean surfaces, the luster is fresh and vibrant and the peripheries — particularly on the obverse — are aglow with vivid sun-gold, violet, pine-green, and russet-amber toning that beautifully frames the pale champagne and ice-blue interiors. Liberty's head and a couple shield rivets are trifle soft, but the magnificent aesthetic impact is unhindered. NGC ID# 2443, PCGS# 5774

## WASHINGTON QUARTERS

### 1932-S Quarter, Sharp MS65 Delicate Pastel Toning

- 3119 1932-S MS65 PCGS. CAC.** The 1932-S is one of the two "stoppers" in the Washington quarter series, particularly in MS65 or finer grades. This glowing Gem is razor-sharp and displays largely undisturbed, satiny luster. Interiors of pastel lavender and ice-blue fade to champagne and mint-green around the peripheries, giving this piece pleasing eye appeal. Only four coins are numerically finer at PCGS (5/15). NGC ID# 2449, PCGS# 5792

**1936-D Washington Quarter, MS67  
Exceptional Surface Quality**

**3120 1936-D MS67 PCGS. CAC.** Few 1936-D Washington quarters are certified at the MS67 grade level, and none are finer. This Registry-quality example is seemingly flawless in regards to both preservation and strike, and the frosty surfaces yield attractive pastel hues of lavender-gold and sky-blue. A visual treat in every respect. Population: 17 in 67 (1 in 67+), 0 finer (5/15). NGC ID# 244H, PCGS# 5801

**1943-S Quarter, Satiny MS68**

**3121 1943-S MS68 NGC.** Large S. A satiny and brilliant high-grade representative of this conditionally rare wartime issue. The obverse field exhibits vertical die polish lines, as coined, but contact is difficult to locate, even beneath a lens. Sharply struck at the centers with moderate blending on the peripheries. Census: 2 in 68 (1 in 68 ★), 0 finer (6/15). NGC ID# 2457, PCGS# 5822

**1943-S FS-101 Quarter, MS67  
Dramatically Doubled Die Obverse**

**3122 1943-S Doubled Die Obverse, FS-101, MS67 NGC.** Bold die doubling is present on all obverse lettering, most notably on IN GOD WE TRUST and the date. This is a well-known and popular Washington quarter variety, but is decidedly rare at the Superb Gem grade level. NGC has attributed only two examples in this grade, with none numerically finer (5/15). This lustrous and virtually pristine piece displays light lavender-red, aquamarine, and butter-gold toning. PCGS# 145154 Base PCGS# 5823

**1950-S/D Quarter, MS67  
FS-601, Key Overmintmark Variety**

**3123 1950-S/D FS-601 MS67 NGC.** One of only two overmintmarks in the Washington quarter series. The other (a 1950-D/S variety) was made the same year, which suggests inexperience on the part of an unknown Philadelphia Mint worker in 1950. The highly lustrous surfaces are gently toned in honey and ice-blue hues. There are no abrasions worthy of mention on either side. Census: 7 in 67 (1 in 67 ★), 0 finer (6/15).

Ex: St. Louis Signature (Heritage, 5/2005), lot 7833; Orlando FUN (Heritage, 1/2007), lot 4283; Orlando Signature (Heritage, 7/2013), lot 4085, which realized \$4,406.25. PCGS# 145639 Base PCGS# 5845

**PROOF WASHINGTON QUARTERS**

**1936 Quarter, PR67  
Registry Set Quality**

**3124 1936 PR67 NGC.** This is a gleaming Superb Gem proof, among the finest certified by either NGC or PCGS. Dusky light golden toning softens the reflectivity when studied beneath a light and masks a few stray lines that define the grade. Ideal for Registry Set purposes. Census: 25 in 67 (1 in 67 ★), 0 finer (5/15). NGC ID# 27HN, PCGS# 5975

**1939 Quarter, Lightly Toned PR68  
Registry-Grade Preservation**

**3125 1939 PR68 NGC.** An important Registry coin, this gleaming pastel-toned 1939 proof quarter is tied with 16 others as the finest at NGC, while PCGS lists only three pieces in this grade, also with none finer (5/15). This coin is deeply mirrored and boasts sharp design elements. Seemingly flawless surfaces confirm the outstanding preservation and heighten the eye appeal. NGC ID# 27HS, PCGS# 5978

## EARLY HALF DOLLARS

1794 Half Dollar, O-101a, VF25  
Beautiful Original Patina

**3126** 1794 O-101a, High R.3, VF25 PCGS. Half dollar production was delayed in 1793, due to the inability of certain Mint officials to pay the high security deposits of which the law required remittance before the coinage of precious metals could be entrusted to them. The deposits were lowered in 1794, but half dollars were not coined until late in the year as the Mint struggled with obtaining silver; that silver bullion which was acquired was of the improper fineness and needed to be refined, a slow and tedious process using the resources on hand during that period. By late October 1794, the Mint had on hand nearly 120,000 ounces of bullion, much of which was still undergoing to refining process at the hands of the assayer.

Half dollar production with 1794-dated dies amounted to only 23,464 pieces. Several die varieties are known, all of which are scarce to rare. O-101a (and its early die state counterpart, O-101), is the most frequently seen die pairing, ideal for date representation. This piece is lightly circulated, with beautifully original, problem-free surfaces. The central motifs are well-detailed and the border dentils are complete. Deep gunmetal-blue, olive, and golden-gray recesses highlight the battleship-gray relief elements. A few crisscrossing adjustment marks on the eagle are not bothersome, and the overall eye appeal is outstanding. PCGS# 39201 Base PCGS# 6051

1795 Two Leaves Half, O-107a, VF25  
Popular Cracked Reverse

**3127** 1795 2 Leaves, O-107a, R.5, VF25 PCGS. Both die stages of this Two Leaves variety are rare, although the late die state O-107a is the more intriguing of the two due to the magnificent crack that bisects the reverse diagonally from the rim just left of the A(MERICA) to the (UNI)T(ED). This example is from a very advanced state of this crack, with the origin near the A(MERICA) widened to encompass three dentils. Both sides are evenly worn, showing complete dentils around the borders and significant detail remaining in Liberty's hair. Original olive-gray patina lightens over the obverse portrait, creating a mild circulation-cameo effect. Problem-free, other than a small, mint-made planchet flaw above the 5 in the date, extending into the bust. PCGS# 39224 Base PCGS# 6052

---

## 1803 Large 3 Half Dollar, O-103, MS63

Bold Eye Appeal  
Condition Census Rarity

**3128 1803 Large 3, Large Reverse Stars, O-103, R.3, MS63 PCGS. CAC.** Draped Bust half dollars are highly sought-after in Mint State, but the vast majority of pieces in this grade range are from the 1806 or 1807 issues, and it is unusual to encounter an 1803 half in Uncirculated condition. Mintage figures contribute to this on a marginal level; the 1806 and 1807 boast the highest production totals of the type at nearly 840,000 and more than 300,000 pieces, respectively, while the 1803 was struck to the extent of just 188,234 coins. Moreover, most surviving 1803 halves are well-circulated, grading XF or lower; AU representatives are scarce only a handful of Mint State pieces are known.

The 1803 is divided into two chief varieties, differentiated by the size of the 3 in the date. The Large 3 variant is composed of three different die pairings (O-101, -102, and -103), all sharing the common obverse. The Small 3 variety is represented by just a single die marriage (O-104), and is thus somewhat scarcer by comparison. Of the three Large 3 varieties, O-103 is perhaps the most interesting. This variety matches the Large 3 obverse with the Large Stars reverse that is later employed for O-104, and is thus readily attributed. On this marriage, the obverse is clashed and lightly cracked through the top of LIBERTY, not surprising given this is the third and final use of this head die.

The present Select example is one of only six Mint State Large 3 examples at PCGS, including two MS62, three MS63, and a single MS64 finer; two Small 3 examples are recorded in MS62 and MS64, respectively. All varieties included, NGC shows only eight Mint State 1803 halves, the finest of which is a sole MS63 coin, also representing the O-103 variety (5/15). This ranks the currently offered coin well-within the upper range of the Condition Census, both for this variety and for the entire issue. The frosty surfaces show modest lavender-gray and champagne hues overall, with deeper pewter-gray overtones on the high points and a few vivid ocean-blue crescents on either side of the reverse; small amber accents further explore the interior fields. The coin is a trifle weak on some of the left-hand stars, but is otherwise well-struck and devoid of adjustment marks. This CAC-endorsed condition rarity will be a landmark acquisition for a lucky Draped Bust half collector. PCGS# 39273 Base PCGS# 6066

1806/5 Half Dollar, AU50  
O-103, Large Stars, Round Top 6

- 3129** 1806/5 Large Stars, O-103, R.2, AU50 PCGS. The overdate is clearly visible on both the 0 and 6, struck over a previous 0 and 5. An early die state — prior to formation of significant die cracks — with substantial mint luster remaining across the lightly toned golden-gray surfaces on both the obverse and the reverse. F in OF is missing its bottom right serif. The surfaces are only lightly abraded, and sharp detail remains on Liberty's hair, drapery, and the scroll. The eye appeal is outstanding. Population (all 1806/5 Large Stars varieties): 13 in 50, 25 finer (6/15). PCGS# 39299 Base PCGS# 6077

BUST HALF DOLLARS

1808 Half Dollar, O-102a, MS64+  
Highly Lustrous

- 3130** 1808 O-102a, R.2, MS64+ NGC. This is the typically seen late die state variant of O-102, showing a bisecting obverse crack from the 0 in the date, through the B in LIBERTY, to the rim at 12 o'clock. A jagged die crack on the reverse connects the eagle's left (facing) wing to the adjacent leg, and there is an unusual center dot at the upper-left corner of the shield. This Plus-graded Choice example displays vibrant silvery luster, with a few faint specks of toning over the obverse. The strike is soft on the right-hand stars and the eagle's head, but the design elements are otherwise well-defined. Census, all varieties included: 27 in 64 (2 in 64+), 22 finer (5/15). PCGS# 39363 Base PCGS# 6090

1809 O-103 Capped Bust Half, MS63 ★  
Vivid Multicolor Toning

- 3131** 1809 Normal Edge, O-103, R.1, MS63 ★ NGC. CAC. Ex: "Col." E.H.R. Green / Eric P. Newman Collection. Here is a Select Uncirculated example from 1809 with stunning eye appeal, well-deserving of the NGC star designation. Vivid shades of cobalt-blue and emerald-green toning surround the brilliant centers, typical of coins from old-time collections that were stored in Wayne Raymond albums. The piece is free of slide marks and displays vibrant mint luster throughout.  
Ex: "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ \$5.00; Eric P. Newman Numismatic Education Society. PCGS# 39392 Base PCGS# 6092

1809 O-109 Half Dollar, AU55  
Experimental III Edge

- 3132** 1809 III Edge, O-109, R.3, AU55 PCGS. CAC. Although a tiny rust mark is attached to the lowest curl, this is an early die state specimen with remnants of letters and embossed or raised segments through AMERICA. There is no evidence of the die crack that appears in later die states. This example retains considerable luster with lovely golden and pale bluish-gray toning. PCGS# 39386 Base PCGS# 6094

1811 Small 8 Half Dollar, O-110, MS64+  
Sharp and Lustrous

**3133** 1811 Small 8, O-110, R.1, MS64+ NGC. The available O-110 variety shares its obverse with the much rarer O-113, but the former is distinguished by the AM in AMERICA being joined at the bases — O-113 does not have this feature. This Plus-graded Choice example is struck just a trifle off-center toward 10 o'clock on the obverse and 8 o'clock on the reverse; the dentils remain complete, but are very thing through this area, whereas the rim is broad and wide along the opposite border. The stars, eagle's talons, and Liberty's hair curls all show sharp detail. Luster is satiny and free of major abrasions, showing medium olive-gold toning that lightens slightly toward the centers; russet overtones also appear around the peripheries. All varieties included, NGC has seen 35 finer 1811 halves (6/15). PCGS# 39434

1812/1 Small 8 Half, O-102a, MS64  
Condition Census Quality

**3134** 1812/1 Small 8, O-102a, R.2, MS64 PCGS. This *Guide Book* variety is one of two die pairings that employ an 1812/1 overdated obverse. The other variety, O-101, is rarely seen in any grade, making O-102 (and its late die state counterpart, O-102a, here offered), the ideal choice for date representation. This near-Gem example shows well-struck motifs and above-average sharpness on the peripheral stars. Satiny luster shines through a blanket of lavender-gold toning on each side with deeper ocean-blue and violet hues around the peripheries. Characteristic of the late die state, this piece shows prominent clash marks in the field above the date, and a thin die crack connects the second 1 in the date to the 2. Population: 6 in 64, 1 finer (5/15). PCGS# 39444 Base PCGS# 6101

**1815/2 Half Dollar, O-101, AU50  
Single Die Pair for the Year 1815**

- 3135** 1815/2 O-101, R.2, AU50 PCGS. CAC. This well-preserved example of the popular overdate and single-year variety (and one of only three denominations struck during the year; the others are the Bust quarter and the very rare half eagle) features predominantly cream-gray surfaces accented with rose-copper patina around the device edges. There is as yet little sign of the die crack through 50C that characterizes the later O-101a die state, but the underdigit 2 is bold, as is recutting on the 181 in the date. Some die clash marks are typical. Excellent eye appeal is the hallmark of this no-problem coin. Do not underestimate the importance of this lot: It has been nearly seven years since we offered a PCGS-CAC example in this grade at auction. PCGS# 39491 Base PCGS# 6108

**1830 Bust Half, MS65+  
Small O, O-103, Unabraded and Fully Struck**

- 3136** 1830 Small O, O-103, R.1, MS65+ NGC. Ex: "Col." E.H.R. Green / Eric P. Newman Collection. Rich caramel-gold encompasses this unabraded and satiny Gem. Hints of apple-green and steel-blue are also evident. The strike is magnificent. Every detail of the central devices is fully struck: the curls, drapery, wing feathers and claws. It is difficult to imagine a finer example of the date or die marriage. Ex: "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ \$3.00; Eric P. Newman Numismatic Education Society. PCGS# 39812 Base PCGS# 6156

**SEATED HALF DOLLARS**

**1839 Seated Half, MS64  
Semiprooflike With Drapery Example**

- 3137** 1839 With Drapery, WB-102, MS64 PCGS. The With Drapery 1839 Seated half is similarly elusive as its No Drapery counterpart, particularly in Mint State. This Choice example is deeply toned in gold, violet, and aquamarine, with noticeable semiprooflike mirroring in the fields. Liberty's forehead and the two adjacent stars are a trifle weak, but no other mentionable striking softness is observed. Population: 20 in 64, 3 finer (5/15). PCGS# 572001 Base PCGS# 6232

**1854 Arrows Half Dollar, MS66  
Obverse Struck-Through  
High Grade Two-Year Type Coin**

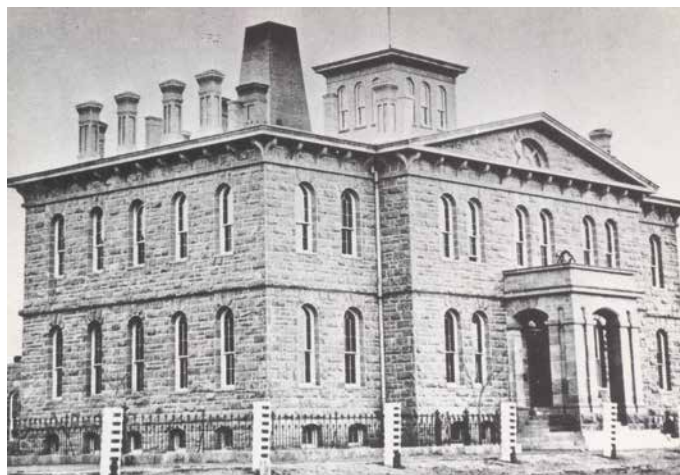

- 3138 1854 Arrows, WB-101 — Obverse Struck Through — MS66 NGC.** A remarkable example of the briefly issued Arrows, No Rays, No Motto subtype. The strike is close to full, and cartwheel luster rolls across the unabraded surfaces. Predominantly cream-gray, although the borders offer distributed minute tan freckles. Minor roller marks, as struck, are apparent on the field west of the eagle's beak. A shallow strike-through, irregularly shaped but approximately 4 mm x 8 mm in size, is noted on the lower right obverse field. Virtually unsurpassable from technical perspective, and certain to be appreciated by the specialist despite the as-made imperfection. Census: 2 in 66, 2 finer (6/15).

**1870-CC Half Dollar, VF25  
Elusive First-Year Carson City Issue**

- 3139 1870-CC WB-101, Die Pair 5, R.6, VF25 PCGS.** Four of the five die varieties of the 1870-CC half dollar are designated R.6, and the fourth is R.5 — a perfect representation of just how scarce this issue is in any grade. Bill Bugert estimates as few as 200 coins survive in total, many of which grade lower than Fine and show cleaning or other damage. This problem-free mid-grade example displays strong detail for the VF level, with medium lavender-gray patina that yields to deeper olive and gunmetal hues in the peripheral fields. Population: 5 in 25, 59 finer (5/15). PCGS# 572190 Base PCGS# 6328

*Carson City Mint*

1879 Half Dollar, Colorful MS67  
Top-Shelf Eye Appeal

- 3140** 1879 Closed Bud, WB-102, MS67 PCGS. Even in an already-rare series, the 1879, 1882, and 1884 were the lowest-mintage productions among the Seated halves from 1879 through 1887, struck in the amounts of 4,800 for the 1879 and 4,400 each for the 1882 and 1884. All of these dates are scarce, not rare, as they were conserved in considerable numbers at the time of issue by astute dealers and collectors, and they all can be had for a price up to the MS67-MS68 level. The 1879, being the first of the low-mintage issues, can be considered the “type coin” for the subset; it appears to have been saved in greater numbers than other dates, and more survive in MS67-MS68 than of any other issue in the timeframe. This beautifully lustrous Superb Gem offers pale olive-gray patina with light gold, lilac, blue and rose accents amid a bold strike and top-shelf eye appeal. Population: 17 in 67 (2 in 67+), 2 finer (6/15). PCGS# 572260 Base PCGS# 6361

1879 Half Dollar, Toned MS67 ★  
Ranked High Among the Finest Known

- 3141** 1879 Closed Bud, WB-102, MS67 ★ NGC. Only 4,800 circulation strike half dollars were produced in 1879. Randy Wiley and Bill Bugert attribute the low mintage to the implementation of the Bland-Allison Act of 1878, but another important factor was the glut of half dollars that were produced by all three mints in 1876 and 1877. A cumulative total of nearly 31.4 million half dollars was produced during the three years prior to 1879. This MS67 ★ example is nothing short of astounding in both its aesthetic and technical appeal. It displays partially prooflike fields that nicely offset the motifs. A medley of light cobalt-blue, yellow-gold, lavender, orange, and fuchsia-pink patina enriches impeccably preserved surfaces, and a decisive strike lends sharp definition to the design elements. Census: 11 in 67 (3 in 67 ★), 1 finer (5/15). PCGS# 572260 Base PCGS# 6361

### 1880 Seated Half, Reflective MS66+

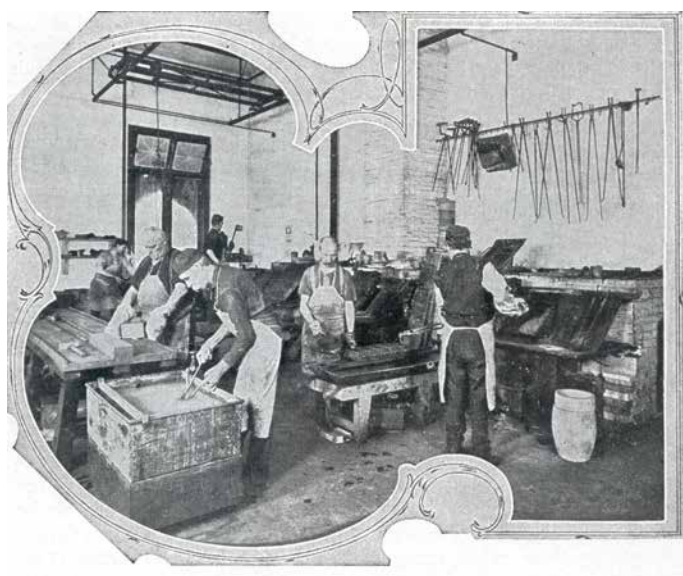

- 3142** 1880 Closed Bud, WB-102, MS66+ PCGS. CAC. The mintage of 8,400 pieces for the 1880 half dollars ensures that well-preserved examples such as this MS66+ PCGS example will show much prooflike reflectivity, even if it is unacknowledged. This untuned silver-white example shows only a couple of small ticks on Liberty's knee, amid a bold strike and lush eye appeal. Only one piece is technically finer at PCGS. Population: 21 in 66 (1 in 66+), 1 finer (5/15). PCGS# 572262 Base PCGS# 6362

### PROOF SEATED HALF DOLLARS

#### 1860 Half Dollar, PR66 Cameo Vivid Peripheral Toning

- 3143** 1860 PR66 Cameo PCGS. The proof 1860 half dollar, struck to the extent of 1,000 pieces, is a well-made issue, but few examples were produced with distinct field-device contrast. Cameo survivors are rare in any grade, but are most sought-after in Gem and finer condition. This Premium Gem Cameo is starkly contrast, with full mirrors and sharp, frosty design elements. Vivid ocean-blue and violet hues surround much of each periphery, and the central regions display just a hint of light golden color. There are no contact marks or distracting hairlines observed. Population: 5 in 66 (1 in 66+) Cameo, 3 finer (5/15). PCGS# 86414

*Melting Furnace*

**1863 Seated Liberty Half  
Low-Mintage, Scarce Gem Proof**

- 3144 1863 PR65 NGC.** Recent research by John Dannreuther suggests that 1860 was the year when the Mint first charged a premium for proof coins, adding 13 cents per coin for silver proofs and 25 cents per coin for gold proofs. Mintages were large in 1860 and 1861 in anticipation of the demand, but customers balked at paying the premiums. Proof mintages in 1862 and 1863 were reduced by more than half as a result. The rarity of these dates is more a function of Mint economics than the Civil War or other factors. This Gem example is one of the few high-grade proofs from 1863, when the Mint reduced the mintage to a more realistic level of 460 pieces struck. It displays attractive, multicolor iridescent toning and full details over deeply mirrored surfaces. The eye appeal is terrific. Census: 13 in 65, 8 finer (5/15). NGC ID# 27TP, PCGS# 6417

**1865 Half Dollar, PR66  
Needle-Sharp Motifs**

- 3145 1865 PR66 PCGS.** Proof half dollar coinage in 1865 was limited to only 500 pieces, few of which survive in Gem or finer condition. In PR66, this issue is a major rarity, with or without field-motif contrast. This piece might have garnered a Cameo designation were it not quite so deeply toned. The obverse shows a light wheat-gold overlay of color which does allow mild contrast, although the reverse, in addition to a similar light golden hue, exhibits deeper russet-gray overtones which preclude noticeable contrast. A full strike and Gem-quality surfaces conclude the visual attributes. Population: 9 in 66 (1 in 66+), 1 finer (5/15). NGC ID# 27TS, PCGS# 6419

**1871 Half Dollar, PR66 Cameo  
Beautiful Multihued Patina**

- 3146 1871 PR66 Cameo NGC.** Cameo examples of this otherwise collectible proof issue are rarely encountered, and Deep Cameos are prohibitively rare. This Premium Gem representative is deeply toned in concentric shades of mint-gold, champagne, ocean-blue, amber-orange, and pale rose, but the field-device contrast is not hindered. The sharp motifs and mirrored fields are free of any distracting contact marks or hairlines. Census: 4 in 66 Cameo, 2 finer (5/15). PCGS# 86429

**1884 Seated Half, PR66 Cameo  
875 Pieces Struck**

- 3147 1884 PR66 Cameo NGC. WB-101.** The availability of the 1884 proof half dollar benefits from the issue's 875-coin mintage — a fair total for the period — but Cameo representatives make up only a fraction of the surviving population. This Premium Gem example is sharply struck, with stark white-on-black contrast. A light golden halo around the peripheries is the only trace of toning. Census: 5 in 66 Cameo, 6 finer (6/15). PCGS# 86445

---

1888 Half Dollar, PR67  
Wonderfully Preserved Surfaces

- 3148** 1888 PR67 PCGS. CAC. Since all proof 1888 halves were struck from the same die pairing, all show the same curious mispunching: Part of a mispunched 1 from the date is seen just to the right of the shield point. Surprisingly few of the 832 proofs struck have survived in Superb condition today. This is a wonderfully preserved example that has brightly mirrored fields and golden-rose centers that are surrounded by deep blue at the margins. The striking details are strong overall with just the slightest softness on the head of Liberty and the eagle's plumage. We see no out-of-Mint flaws on either side of this Superb Gem proof. Population: 3 in 67 (1 in 67+), 0 finer (5/15). Ex: *Chicago Signature* (Heritage, 8/2011), lot 7198. NGC ID# 27UP, PCGS# 6449

---

BARBER HALF DOLLARS

1893-O Barber Half, Untoned MS66  
Tied for Finest at PCGS

- 3149** 1893-O MS66 PCGS. CAC. Given its larger mintage, the 1893-O Barber half dollar issue is not thought of in the same rarity rank as key coins such as the 1897-O and 1897-S, but in the Premium Gem grade of the present piece, it is, in fact, even rarer than its more-celebrated counterparts. Both the 1897-O and 1897-S can — occasionally, and for a price — be found even in MS67 grade at PCGS. The 1893-O cannot: This is one of only six submissions in MS66 at PCGS, and none are finer (5/15). CAC has given its green approval sticker to only two examples in this grade — this piece and one other, the ex: Dr. Duckor MS66 PCGS example, earlier in the James A. Stack and Dr. Thaine Price collections. The silver-white surfaces are untoned and show an exceedingly sharp strike, including most of the detail on the upper-right shield corner. The preservation is nothing short of extraordinary. The Duckor-Price-Stack example, a lovely toned coin, brought \$20,700 in our offering of the Duckor Collection (Heritage, 8/2010), lot 3177. Surely, five years later, this untoned example is worth even more. NGC ID# 24LL, PCGS# 6466
-

**1895-S Barber Half, MS65+  
Shimmering, Frosty Luster**

**3150 1895-S MS65+ NGC.** The 1895-S Barber half dollar is not notably scarce in the absolute sense, but in Gem or better condition it is significantly rarer than its Philadelphia counterpart. This Plus-graded Gem is frost-white with fresh, original luster. A few trivial grazes on Liberty's cheek are only visible due to the excellent, untouched frost on the coin. The eagle's right (facing) wing junction show just minor weakness. Census: 11 in 65 (1 in 65+), 6 finer (6/15). NGC ID# 24LU, PCGS# 6473

**1897 Half Dollar, MS66  
Conditionally Rare Type Coin**

**3151 1897 MS66 PCGS. CAC.** Any Barber half dollar certified at the Premium Gem grade level is worth getting excited about, as at this level even common dates become major condition rarities. This 1897 example is thickly frosted, with a sharp strike and clean surfaces. Many casual collectors would call this piece brilliant, though we note a light golden tinge to both sides. Population: 12 in 66 (1 in 66+), 2 finer (5/15). NGC ID# 24LY, PCGS# 6477

**1908-S Half Dollar, Frosty MS66  
Condition Rarity**

**3152 1908-S MS66 PCGS.** Were this coin a little more sharply struck, it might have garnered a Superb Gem grade. The surfaces are devoid of abrasions and display fresh, frosty luster with only the most trivial hints of light golden toning. Light, parallel roller marks stretch horizontally across the obverse due to deficient striking pressure which leaves the central eagle ill-defined. The 1908-S is a challenging date in Mint State, and at this grade level, any example is a rare acquisition. Population: 4 in 66 (1 in 66+), 2 finer (6/15). NGC ID# 24N7, PCGS# 6515

**1910 Half Dollar, MS66  
A Clear Condition Rarity**

**3153 1910 MS66 PCGS.** Both sides of this later-date Barber half are pale silver-gray with ample luster and occasional dots of toning. The strike is a trifle soft below the shield, though the eagle's talons are sharp. One of just 418,000 business strikes for the issue, and among the finest certified. Population: 7 in 66 (1 in 66+), 0 finer (5/15). NGC ID# 24NB, PCGS# 6519

**1912-D Barber Half, MS66  
Popular Mintmarked Type Issue**

**3154 1912-D MS66 PCGS.** This intensely lustrous Premium Gem displays shimmering mint luster and has a brilliant overall appearance. Close examination reveals areas of subtle toning in hues of soft gold and steel-green. The strike is a trifle soft at the eagle's right (facing) wing junction. Surviving examples are conditionally rare at the MS66 numeric level, and none are known finer. Population: 16 in 66 (1 in 66+), 0 finer (6/15). NGC ID# 24NH, PCGS# 6525

**1913 Half Dollar, MS65  
Better Philadelphia Issue**

**3155 1913 MS65 NGC.** The 1913 Barber half dollar is a better date overall, coming from a mintage of only 188,000 coins; Gem or finer representatives are rarely seen. This piece displays satiny luster with just a touch of light golden toning. Trivial weakness on the eagle's right (facing) talons and shoulder is not obtrusive. A few tiny ticks on Liberty's cheek and neck are all that preclude an even finer grade. Census: 9 in 65, 2 finer (5/15). NGC ID# 24NK, PCGS# 6527

**1914-S Barber Half Dollar, MS66  
Near-Brilliant Registry Set Coin**

**3156 1914-S MS66 PCGS.** Although overshadowed by the low-mintage 1914-P, the 1914-S Barber half is rare in its own right when found in the outstanding condition of this exceptional half dollar. Destined for the finest collection or Registry Set, the coin displays stunning luster over near-brilliant, semiprooflike surfaces.

Almond-gold accents at the rims and a pale ivory-gold sheen are the only hint of color. The motifs are fully struck. A tiny field mark near star 9 and another on the eagle's tail appear to be the only contact of any kind. For sheer visual impact, this gleaming coin outshines all others of this date we can recall. Population: 8 in 66 (1 in 66+), 0 finer (6/15). NGC ID# 24NP, PCGS# 6531

**1914-S Barber Half Dollar, MS66  
Tied for Finest at NGC**

**3157 1914-S MS66 NGC.** In MS66, all Barber half dollar issues become rare, including the 1914-S. This example is boldly struck on the eagle's talons and plumage, and shows crisp detail on the obverse stars. The surfaces are free of distractions and yield satiny luster with just a hint of light golden color. Census: 5 in 66, 0 finer (5/15). NGC ID# 24NP, PCGS# 6531

**1915 Barber Half, Frosty MS65  
Final-Year Issue**

**3158 1915 MS65 PCGS. CAC.** The 1915 Barber half was the third and last of a string of low-mintage Philadelphia issues that concluded the series. This Gem shows no more than a hint of color over radiant silver-white surfaces. The razor-sharp strike adds further to the appeal, despite a touch of softness at the usual area on the reverse. No marks of significance appear on either side. Population: 17 in 65 (1 in 65+), 4 finer (5/15). NGC ID# 24NR, PCGS# 6532

**1915-D Barber Half, MS66+  
One Finer Coin at NGC**

**3159 1915-D MS66+ NGC. CAC.** David Lawrence summed up this Denver issue in two words. "Comes nice." Other than that concise description, the most notable attraction to collectors is its status as the series final-year issue — an important factor for type purposes. The current coin is extremely frosty and lustrous, tinged by a slight hint of amber-gold toning, although otherwise brilliant. The surfaces show virtually no imperfections or marks other than a thin die crack that wanders from the ball of the 5 across the tip of the neck truncation and ends at star 13. The strike is bold but blends slightly at the upper right shield and wing junction. A condition rarity in this grade, with only one example numerically finer at either PCGS or NGC, and with this coin one of two examples receiving the NGC Plus designation. Census: 10 in 66 (2 in 66+), 1 finer (6/15). NGC ID# 24NS, PCGS# 6533

## PROOF BARBER HALF DOLLARS

### 1892 Half Dollar, Toned PR67 First-Year Type Example

- 3160 1892 PR67 NGC.** The first year of Barber half dollar production experienced the highest proof mintage of the series (1,245 coins), making this issue ideal for type representation. The present coin boasts a full strike and deep, glassy fields. Splashes of ocean-blue, turquoise, amber, and pale gold toning encompass much of each side, precluding a Cameo designation from NGC, but providing equally strong eye appeal. Census: 15 in 67, 2 finer (5/15). NGC ID# 24NU, PCGS# 6539

### 1892 Half Dollar, PR67 Cameo Toned Margins

- 3161 1892 PR67 Cameo NGC.** As the first-year issue, the proof 1892 Barber half is more available in Cameo grades than are many later dates, but such coins are nonetheless conditionally rare at the Superb Gem level. This piece is boldly struck, with deep mirrors and frosty motifs. amber-russet and green-gray toning around the margins leaves enough of the devices frost-white that the cameo contrast is not hindered by the patina. Census: 0 in 67 Cameo, 0 finer. PCGS# 86539

**3162** No lot.

### 1894 Barber Half, PR66 Exceptional Mirrors and Color

- 3163 1894 PR66 PCGS. CAC.** The deep-mirrored fields contrast boldly with frosted devices, although not to such an extent that PCGS grants the Cameo designation. Rather, this exceptional proof stands out for its impressive color and vibrant reflectivity. The patination is reminiscent of a richly toned copper kettle, with green, blue, and purple edges surrounding fire-red and copper-orange surfaces. The reverse is likewise deeply patinated, with golden margins framing a green, violet, and blue center. The coin is boldly detailed except at the right shield corner and wing junction. Population: 26 in 66, 10 finer (6/15). NGC ID# 24NW, PCGS# 6541

### 1908 Half Dollar, Toned PR67

- 3164 1908 PR67 NGC.** Regardless of date, proof Barber half dollars in Superb Gem condition are seldom encountered. This 1908 representative is a pleasing example, with gleaming mirrored fields and bold relief elements. Both sides show intermingled shades of violet, blue, and mint-green, with a swath of sung-gold across much of the reverse. Census: 16 in 67, 3 finer (5/15). NGC ID# 24PC, PCGS# 6555

### 1908 Half Dollar, Silver-White PR67 Cameo

- 3165 1908 PR67 Cameo PCGS.** The surfaces largely present as untoned silver-white, showing much contrast and no more than a hint of pale golden color near the rims on both sides. A loupe reveals a couple of thin, straight marks near the top of Liberty's head, and a part of her cap also shows the effects of die lapping. The strike is sharp in most areas, save for the eagle's right claw and the usually seen weak spot, the right shield top. Still an extremely attractive coin. PCGS# 86555

## WALKING LIBERTY HALF DOLLARS

### 1916 Walking Liberty Half, MS66+ Sharply Detailed First-Year Issue

- 3166 1916 MS66+ NGC. CAC.** The 1916 Walking Liberty half dollar claims a low mintage of 608,000 pieces, but contemporary collectors saved a number of high-quality specimens for their first-year novelty value. This high-end Premium Gem exhibits sharply detailed design elements and virtually pristine lustrous surfaces with outstanding eye appeal. Census: 60 in 66 (1 in 66+, 1 in 66 ★), 12 finer (6/15). NGC ID# 24PL, PCGS# 6566

1917-D Walking Liberty Half, MS65  
Reverse Mintmark

**3167 1917-D Reverse MS65 PCGS.** The Reverse Mintmark variant is the scarcer of the two 1917-D half dollar varieties, despite having a significantly higher mintage than the former issue (1.94 million versus just more than 765,000 pieces). The issue is marginally available through the MS64 grade level, but becomes notably scarce in Gem condition, and anything finer is a major rarity, out of reach for most collectors. This representative is boldly struck, with broad rims and full thumb separation on Liberty's branch hand. Matte-like luster accentuates the light golden hue that graces each side, and the overall eye appeal is significant. A couple small ticks on Liberty's right leg are the only abrasions of note. Population: 47 in 65, 5 finer (5/15). NGC ID# 24PS, PCGS# 6571

1919-D Half Dollar, MS64  
Denver Mint Condition Rarity

**3168 1919-D MS64 PCGS.** Elusive in higher grades, the 1919-D Walking Liberty half dollar is in high demand from series specialists when found in Select Uncirculated condition or finer. Gem examples are among the rarest in the series and are seldom seen, fetching up to six figures when they appear.

The present silver-white representative shows scattered purple-gray toning accents primarily on the obverse, with a lesser hint of reddish-gold tone on the reverse. Noticeable softness of strike exists through the central high points on both sides of the coin as is typical for the issue, although Liberty's head is reasonably struck for the grade. A few tiny abrasions appear on Liberty's cheek, though the coin is remarkably free from any other marks. Generous luster swirls throughout both sides of this original-looking Walker, with surfaces that are untouched and quite appealing. Population: 76 in 64 (3 in 64+), 12 finer (5/15). NGC ID# 24PZ, PCGS# 6578

**1921-D Half Dollar, MS63  
Important Key Issue**

**3169 1921-D MS63 PCGS.** The 1921-D Walking Liberty half boasts the lowest mintage of the series (208,000 coins), and is one of the most challenging dates in Mint State. Jeff Ambio, writing in his *Strategy Guide* for the series, states: "A 1921-D that grades even MS-62 or MS-63 represents an extremely important buying opportunity in any numismatic market." In Gem, this Denver issue is conditionally rare.

This Select example shows a soft golden-gray hue over each side, with only a few minor abrasions to limit the grade. Liberty's figure and the eagle's central feathers exhibit some of the usual softness, but partial thumb separation is nonetheless evident on Liberty's branch hand. NGC ID# 24R7, PCGS# 6584

**1934-S Walking Liberty Half, MS66+  
Sharp and Frosty**

**3170 1934-S MS66+ PCGS. CAC.** The 1934-S is similar in availability to the 1933-S; the date is scarce in MS66 and is rare as a Superb Gem. This Plus-graded example offers a balance between affordability and quality. Sharp thumb separation is a hallmark, but the chief visual attribute is the frosty, radiant luster that has just a suggestion of light golden toning. A few minute ticks on the highest points of Liberty's figure preclude a finer numeric grade. There are seven finer pieces at PCGS (5/15). NGC ID# 24RH, PCGS# 6594

**1946 Half Dollar, Vibrant MS66  
Doubled Die Reverse**

**3171 1946 Doubled Die Reverse, FS-801, MS66 PCGS.** This is one of the most popular doubled die varieties in the Walking Liberty half series, exhibiting bold doubling on the eagle, branch, and E PLURIBUS UNUM. The present example is a fairly late die state coin, with some erosion evident in the margins. Nonetheless, the doubling is clear. This piece shows vibrant, frosty luster with light golden toning overall. No major abrasions are observed. Population: 12 in 66 (1 in 66+), 0 finer (6/15). PCGS# 145152 Base PCGS# 6632

## FRANKLIN HALF DOLLARS

1948-D Half Dollar, MS67 Full Bell Lines  
Prime Registry Coin, Beautifully Toned

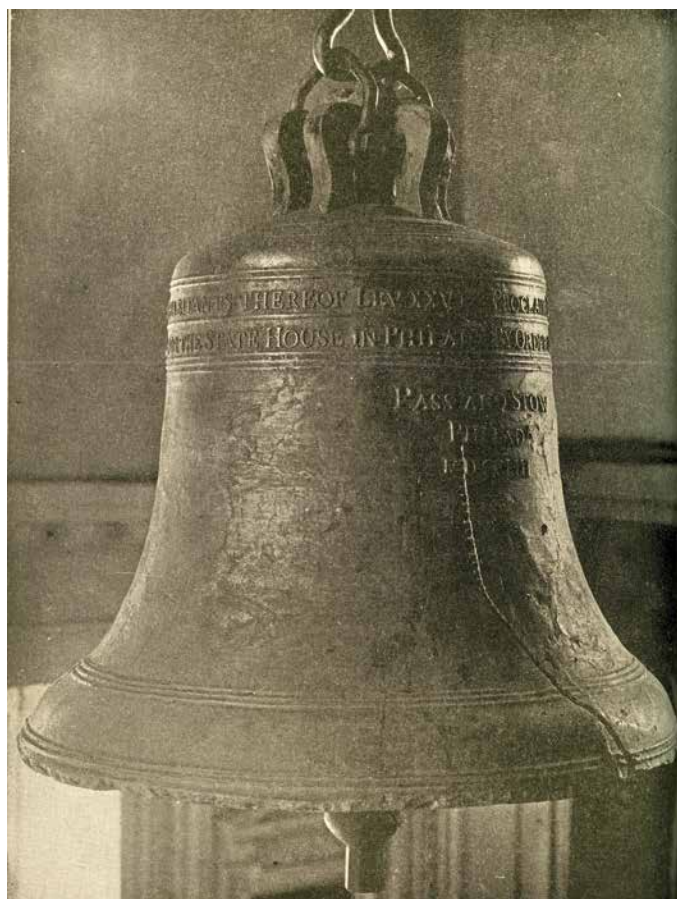

- 3172** 1948-D MS67 Full Bell Lines PCGS Secure. A superb offering for the Registry Set competitor, this Full Bell Lines 1948-D Franklin half is tied with just three others as the finest at PCGS, and ranks numerically equal to the example in the current highest-rated Registry Set; no Full Bell Lines representatives have received such a lofty grade at NGC (5/15). The surfaces of this coin exhibit glowing satin luster, accented by a light golden overlay on the reverse but enlivened by vivid multicolor toning on the obverse. Shades of pine-green, lavender, sun-gold, and amber over the right side yield to more uniform olive-gold and pale amber hues on the left. An eye-appealing and technically unsurpassed Registry coin. NGC ID# 24SS, PCGS# 86652 Base PCGS# 86652

1952 Franklin Half, MS67 Full Bell Lines  
Delicately Toned

- 3173** 1952 MS67 Full Bell Lines PCGS. CAC. The 1952 is one of the more available dates in the Franklin half dollar series in Full Bell Lines grades, but the vast majority of such pieces do not grade finer than MS66; this MS67 example is tied with just 14 others as the finest with Full Bell Lines at PCGS (6/15). Radiant, frosty luster is intensified by minor die erosion around the peripheries, illuminating shades of amber-gold, aquamarine, and peach toning. Seemingly perfect surfaces and bold motifs further contribute to the eye appeal. NGC ID# 24T3, PCGS# 86661 Base PCGS# 86661

1961 Franklin Half, MS66 Full Bell Lines  
Registry Set Essential

- 3174 1961 MS66 Full Bell Lines PCGS.** The 1961 Franklin half dollar is fairly challenging in high grade with full bell lines, and it is particularly rare with such in Premium Gem condition. This magnificent piece is one of only eight so-graded Full Bell Lines coins at PCGS (one in MS66+ Full Bell Lines), with none finer; NGC shows even fewer pieces in this grade, reporting four MS66 Full Bell Lines (one in MS66+ ★ Full Bell Lines), also with none finer (6/15). This piece is numerically equal to the coin in the current highest-rated PCGS Registry Set, and its acquisition is of high importance for a competitive ranking. Both sides are carefully preserved and display bold striking sharpness. Touches of olive, amber, and russet occasionally appear over iridescent lavender-gold and ice-blue surfaces. NGC ID# 24TN, PCGS# 86680 Base PCGS# 86680

PROOF FRANKLIN HALF DOLLARS

1950 Franklin Half, PR64 Cameo  
Scarce With Contrast

- 3175 1950 PR64 Cameo PCGS.** Cameo-designated examples of this first-year proof Franklin half issue are scarce in any grade. This near-Gem example boasts the best of both worlds, showing much field-device contrast and no overt contact on silver-white surfaces -- but the rims on each side, more prominently on the reverse, show a thin ring of lovely orange-copper patina. PCGS# 96691

1951 Franklin Half, PR66 Deep Cameo  
One Numerically Finer at PCGS

- 3176 1951 PR66 Deep Cameo PCGS.** The 1951 proof Franklin half dollar claims a small mintage of 57,500 pieces and examples with Deep Cameo surfaces are quite elusive. This spectacular Premium Gem offers razor-sharp definition on all design elements and the deeply mirrored fields contrast boldly with the frosty devices. The well-preserved surfaces show just a hint of pale gold toning. Population: 17 in 66 (1 in 66+) Deep Cameo, 1 finer (6/15). NGC ID# 27VB, PCGS# 96692

EARLY DOLLARS

1795 Flowing Hair Dollar, Appealing Fine 12  
B-9, BB-13, Two Leaves

- 3177 1795 Flowing Hair, Two Leaves, B-9, BB-13, R.4, Fine 12 NGC. CAC.** Die State I. The berry located on the outside of the wreath, between S and T in STATES identifies the BB-13 variety. This evenly worn example retains all important detail and both sides display pleasing silver-gray patina, with a few hints of gold. A minor rim bruise is noted at 9 o'clock on the reverse.  
Ex: Pittsburgh Signature (Heritage, 10/2011), lot 3823. PCGS# 39980 Base PCGS# 6853

**1795 Flowing Hair Dollar, VF30  
B-7, BB-18, Three Leaves**

- 3178** 1795 Flowing Hair, Three Leaves, B-7, BB-18, R.3, VF30 PCGS. Die State I, as usual. This piece is deeply and originally toned in shades of dark-olive and gunmetal-blue on the obverse, and light gray on the reverse. There are several crisscrossing adjustment marks on the lower eagle, otherwise there are relatively few distractions on the surfaces of the coin. Overall, a desirable mid-grade example of the Flowing Hair type.  
Ex: *FUN Signature* (Heritage, 1/2005), lot 8102; *Long Beach Signature* (Heritage, 9/2006), lot 2350. PCGS# 39973 Base PCGS# 6852

**1795 Flowing Hair Dollar, VF30  
Two Leaves, B-1, BB-21**

- 3179** 1795 Flowing Hair, Two Leaves, B-1, BB-21, R.2, VF30 PCGS. A charming midgrade example of the introductory and briefly issued Flowing Hair type. Pearl-gray devices exhibit slight contrast with the caramel-gold fields. Faintly hairlined but void of any noticeable post-strike abrasions. Moderate adjustment marks (as coined) are noted near Liberty's ear and the left obverse field. PCGS# 39986 Base PCGS# 6853

**1795 Draped Bust Dollar, Centered, XF45  
B-15, BB-52, Advanced Die State**

- 3180** 1795 Draped Bust, Centered, B-15, BB-52, R.2, XF45 PCGS. Die State VI, reverse cracked through RICA, obverse with die rust in the fields. This is a scarce late die state, listed as "Not seen" by Bowers. BB-52 is one of the two 1795 Draped Bust dollar varieties, differentiated from BB-51 by the centered bust on the obverse. This Choice XF example displays bold detail for the grade, with bright steel-gray patina that shows just a hint of light golden color. The strong borders are free of adjustment marks, although a few stray representatives are seen on the central portrait. PCGS# 39995 Base PCGS# 6858

**1796 B-2, BB-63 Dollar, VF20  
Small Date, Small Letters**

- 3181** 1796 Small Date, Small Letters, B-2, BB-63, R.4, VF20 PCGS. Sea-green and cream-gray endow this attractive Small Eagle dollar. The wings are nicely detailed. No marks are consequential except for a rod-shaped impression on Liberty's chin. B-2 is underrated relative to B-4 and B-5, the usually encountered 1796 die marriages. B-2 is also rarer than B-1, the other collectible Small Date, Small Letters variety. PCGS# 39998 Base PCGS# 6859

**1796 Draped Bust Dollar, XF40  
Large Date, Small Letters, B-5, BB-65**

- 3182** 1796 Large Date, Small Letters, B-5, BB-65, R.2, XF40 NGC. CAC. Bowers-Borckardt Die State IV. The BB-65 variety of the 1796 Draped Bust dollar is not difficult to locate in lower circulated grades, but it becomes elusive in AU condition. This attractive XF example retains most of its interior design detail and the pleasing gray surfaces are lightly abraded. The diagnostic die lump shows plainly between I and C in AMERICA. PCGS# 40002 Base PCGS# 6861

**1797 9x7 Stars Dollar, Original VF30  
Scarce and Popular B-2, BB-72 Variety**

- 3183** 1797 9x7 Stars, Small Letters, B-2, BB-72, R.4, VF30 PCGS. CAC. BB-72, Small Letters, has long been recognized as an elusive and important die variety, not only within the 1797 issue, but for the entire Draped Bust type. Bowers, writing in *The Encyclopedia of United States Silver Dollars 1794 - 1804*, states: "Of all varieties of 1797, the BB-72 is at once the rarest, best known, and most sought after. ... Without a doubt, it is the best known die variety of the 1796-7 years combined."

BB-72 is believed to survive to the extent of 200 to 300 coins, about twice as many as are reported on the certified population figures for this die marriage. Undoubtedly, a number of unattributed examples are known, both raw and certified. Most pieces grade in the XF or lower range. The finest example in Bowers' Condition Census grades just AU58, although single Mint State coin in MS64 is seen on the NGC *Census Report*.

This pleasing VF representative is consistently toned in varying olive, gold, and gunmetal-gray hues, with strong borders and problem-free surfaces. The obverse is boldly defined on the stars and central portrait, while the reverse is slightly weak in the center — a typical characteristic of this variety which was struck with a lapped tail die that showed a shallow impression of the design. This piece is actually stronger on the reverse than is often seen. PCGS# 40005 Base PCGS# 6866

**1799 8x5 Stars Dollar, Scarce AU53  
B-23, BB-159; Dramatic Old-Time Toning**

- 3184** 1799 8x5 Stars, B-23, BB-159, R.3, AU53 PCGS. Bowers Die State III. A glossy, show-stopping early dollar with deeply impressed hair detail on Liberty and vivid, variegated coloration across both sides. The toning is distinctive and dramatic, a sign of careful preservation in an old-time collection that would attract any early dollar collector. The fact that the coin is the 8x5 Stars variety entices a much broader audience for type purposes. While a late state of the dies produced this piece, neither strike nor surface quality suffer any ill effects. Die clashing is limited to the appearance of "waves" above the date, and the few faint die cracks cause minimal disturbance. The 8x5 Stars variety was either a die sinker error or an experiment gone wrong, since no other obverse repeats the configuration for the year or for the series. Population (for the 8x5 Stars variety): 7 in 53, 9 finer (6/15). PCGS# 40063 Base PCGS# 6881

**1799 Draped Bust Dollar, AU58  
B-6, BB-162**

**Lightly Toned, Lustrous Example**

- 3185** 1799 7x6 Stars, B-6, BB-162, R.4, AU58 NGC. Bowers Die State III. Nice luster remains across the silver iridescent surfaces of this near-Mint early dollar. The fields are somewhat reflective (especially on the reverse) with amber-gold accents at the margins and on the high points of the motifs. Lilac overtones enhance the attractive, lightly toned fields and devices.

Bold detail shows light wear on Liberty's portrait, although the hair strands are fully defined and lustrous except at the highest points. The eagle is a bit weak at UNUM. The nearby head, neck, breast, and wing feathers are soft as normally seen for the scarce BB-162 variety, which represents the only use of the reverse die. PCGS# 40053 Base PCGS# 6878

**1799 Bust Dollar, B-10, BB-163, AU55**  
Rare Terminal Die State

- 3186** 1799 7x6 Stars, B-10, BB-163, R.2, AU55 PCGS. Die State IV, rare; the reverse is extensively cracked, with the most notable characteristic being a heavy radial break through the O in OF. Overall, BB-163 is an available variety, but the vast majority of known representatives grade only VF or lower; XF coins are scarce and an AU representative is rare. This Choice About Uncirculated example displays a well-executed, even strike with complete border dentils and sharp devices. Evenly tan-gray in color, with no evidence of adjustment marks. PCGS# 40054 Base PCGS# 6878

**1799 Dollar, Toned AU53**  
B-17, BB-164, 7x6 Stars

- 3187** 1799 7x6 Stars, B-17, BB-164, R.2, AU53 PCGS. Die State III. This Large Eagle type coin is evenly struck and shows just trivial wear over the high points of the design. Both sides exhibit deep lavender-gray toning with the occasional glimpse of olive color. The stars are sharp and the border dentils are complete. No adjustment marks are observed. PCGS# 40055 Base PCGS# 6878

**1803 Small 3 Dollar, VF25**  
Peripherally Toned, B-5, BB-252

- 3188** 1803 Small 3, B-5, BB-252, R.3, VF25 PCGS. CAC. A band of rainbow toning encircles the outer edges of this coin, with the moderately, evenly worn interiors remaining in various shades of gray. A bit unevenly struck above the eagle's head, but well-defined on the obverse portrait. The surfaces are pleasing and unmarked for the grade.  
*Ex: Long Beach Signature (Heritage, 9/2006), lot 2423. PCGS# 40097 Base PCGS# 6900*

**GOBRECHT DOLLAR**

**1836 Gobrecht Dollar, PR25**  
Scarce Die Alignment II

- 3189** 1836 Judd-60 Original, Pollock-65, R.1, PR25 PCGS. Silver. Plain Edge. Die Alignment II (medallic alignment with the head of Liberty opposite ES). Because of significant wear, deep toning, and numerous field marks there is no evidence of the diagonal die clash mark above the eagle's wing or die cracking around the reverse periphery. Wear is even over the high points and each side shows deep blue and rose toning. Numerous contact marks are scattered throughout the fields on each side. PCGS# 11226

**SEATED DOLLARS**

**1847 Seated Dollar, MS64**  
Frosty Original Surfaces

- 3190** 1847 MS64 PCGS. An impressive and totally original Seated dollar, this Choice Mint State 1847 has lovely pewter-gray surfaces with delightful champagne and pale blue patina. Some weakness of the central motifs is evident, mostly along the upper edge of each wing on the reverse. Population: 11 in 64, 4 finer (6/15).  
*Ex: Long Beach Signature (Heritage, 2/2009), lot 1592. NGC ID# 24YJ, PCGS# 6934*

**1850 Seated Dollar, Multicolor MS61  
Low-Mintage Rarity, CAC Approval**

- 3191 1850 MS61 NGC. CAC.** A good light reveals wonderful multicolor iridescence —chiefly pale rose, gold, and ice-blue with grayish areas remaining — on this Mint State 1850 Seated dollar, a seldom-seen conditional rarity, given the issue's minuscule mintage of only 7,500 pieces for circulation. The illustrious nature of the 1850 Seated dollar is overshadowed by the series' more-famous 1851 and 1852 issues, but all three are low-mintage due to the rising prices of silver in the early 1850s, which in any case defeated the purpose of striking silver dollars for circulation. A few hair-thin marks and minor contact are consistent with the grade, but this coin offers eye appeal in spades. Census: 12 in 61, 19 finer (5/15). This is the sole example in this grade with the CAC green approval. NGC ID# 24YM, PCGS# 6937

**1859 Seated Dollar, Toned MS63  
Rare in Mint State**

- 3192 1859 MS63 NGC.** Despite a mintage in excess of 255,000 coins, the 1859 Seated dollar is seldom seen, and Mint State examples are noted rarities. This Select representative displays boldly struck design elements, with satiny luster and semiprooflike mirroring in the fields. The obverse is vividly toned in shades of amber, violet, forest-green, and russet-brown, while the reverse shows rose-gold peripheries around deep ocean-blue centers. Census: 8 in 63, 15 finer (5/15). NGC ID# 24YX, PCGS# 6946

**1871 Seated Dollar, MS63  
Ideal for Type**

- 3193 1871 MS63 PCGS.** No Seated dollar issues exceeded the million mintage mark until 1871, and the 1872 issue duplicated the feat, making those two Philadelphia dates the stalwarts among type coin collectors. This 1871 example is semiprooflike and faintly iridescent, with silver-gray surfaces and gleaming mint luster. A lack of notable marks confirms the Select Uncirculated designation. Population: 47 in 63 (1 in 63+), 48 finer (5/15). NGC ID# 24ZG, PCGS# 6966

**1872-CC Seated Dollar, VF25  
Carson City Key**

- 3194 1872-CC VF25 NGC.** The 1872-CC is one of the major keys to the Seated Liberty dollar series, and also draws significant demand simply as a challenging Carson City issue. This mid-grade example retains pleasing detail, with consistent tan-gray patina. Seldom is an example seen in this grade range without an array of surface problems, and the present piece should not be passed by. NGC ID# 24ZK, PCGS# 6969

**1872-CC Silver Dollar, XF40  
Collector-Grade Piece**

- 3195 1872-CC XF40 PCGS.** Just a little too worn to grade AU, but notably sharp for the XF level. This piece is uniformly patinated in gold-tinted steel-gray hues, and lacks any significant abrasions or other distractions. The 1872-CC Seated dollar is seldom seen in XF condition, and finer pieces are scarce. The budget-conscious collector will give this piece strong consideration. NGC ID# 24ZK, PCGS# 6969

---

1872-CC Seated Dollar, XF45  
Attractive, Evenly Toned Surfaces

- 3196** 1872-CC XF45 PCGS. Problem-free examples of this rare Carson City date are seldom seen (just 3,150 pieces were struck), and all survivors command extra attention — especially when originally toned and attractive such as this Choice coin. Thick, khaki-gold patina covers both sides. The strike is soft on the stars and Liberty's head, but nice detail prevails on the eagle. Mint luster remains visible beneath the toning, with flashes of gold and iridescence under a light. Population: 15 in 45, 61 finer (6/15). NGC ID# 24ZK, PCGS# 6969

---

1872-CC Dollar, Sharp AU Details

- 3197** 1872-CC — Cleaning — PCGS Genuine. AU Details. This briefly circulated example is about as sharp as most collectors typically see for the 1872-CC dollar, and an old, light cleaning does not overly detract. Hints of reflectivity are detected in the protected regions of the fields and each side displays a subtle golden hue. This is an excellent opportunity for the budget-conscious collector to acquire a pleasing, sharply detailed example of this key Carson City Seated dollar. NGC ID# 24ZK, PCGS# 6969

---

1872-S Seated Dollar, Original MS61  
Low-Mintage, Few Survive in Mint State

- 3198** 1872-S MS61 NGC. The 1872-S Seated dollar is the last S-mint in the series that is available to collectors (despite a reported production of 700 examples of the 1873-S, no examples are known to survive today). As such, the 1872-S issue offers a special cachet even beyond what the low mintage of 9,000 coins would indicate. Few examples of the 1872-S survive in Mint State, making the present MS61 NGC example a remarkably scarce coin. Most examples of the issue were either melted many years ago, or else they circulated extensively.

This example is fully lustrous and reflective — even somewhat prooflike in the fields, particularly on the reverse — beneath light patina in shades of gold, gray, and pale blue. A loupe reveals scattered signs of contact on each side, but the most obvious is a thin, straight scrape through the eagle's left (facing) wing. Census: 2 in 61, 11 finer (6/15). NGC ID# 24ZL, PCGS# 6970

---

## PROOF SEATED DOLLARS

### 1865 Seated Dollar, Reflective PR63

- 3199 1865 PR63 PCGS.** A melange of gold, rose-gray, copper, and light lilac covers the surfaces of this Select proof 1865 Seated dollar, complementing the generous luster remaining underneath the moderate patina. A curving mark through the upper shield area and Liberty's upper leg is among the few mentionable contact marks. The well-mirrored fields and uniformly sharp proof strike provide sterling eye appeal. The rarity of circulation strikes of this date in high grades makes proof survivors from the original 500-coin mintage doubly desirable. Population: 49 in 63, 66 finer (6/15). NGC ID# 252K, PCGS# 7008

### 1869 Seated Dollar, PR64 High-Quality for the Grade

- 3200 1869 PR64 NGC.** The 1869 is a less often seen date in the proof Seated dollar series, produced to the limited extent of just 600 pieces with few surviving in high grades. This Choice example is highly appealing, displaying bold design elements set against deeply mirrored fields. Modest cameo contrast is observed on each side, although a light overlay of russet-gold toning precludes such a designation from NGC. A few faint hairlines are detected in the fields upon close examination. Census: 51 in 64, 33 finer (5/15). NGC ID# 252R, PCGS# 7017

### 1872 Seated Dollar, PR65

Ex: Starr Collection  
Beautiful Iridescent Toning

- 3201 1872 PR65 PCGS.** As a date, the 1872 is among the more easily obtainable issues in the proof Seated Liberty dollar series, but it is rarely encountered in Gem grades. The present piece displays deeply mirrored fields with lightly frosted central devices, while iridescent blue and lavender hues emanate from beneath muted amber-gray patina overall. The surfaces are beautifully preserved and exhibit sharply struck design elements. An eye-appealing Gem representative of this sought-after proof variant. Population: 23 in 65 (1 in 65+), 1 finer (6/15).

Ex: Henry Chapman; Floyd T. Starr; Floyd T. Starr Collection (Stack's, 10/1992), lot 603. NGC ID# 252U, PCGS# 7020

## PROOF TRADE DOLLAR

1881 Trade Dollar, PR65  
Attractive Original Toning

- 3202 1881 PR65 PCGS. CAC. Many proof Trade dollars of this date were poorly stored or otherwise mishandled, and even non-Cameo examples are scarce in Gem or finer grades. This fully struck example exhibits deeply mirrored fields backlighting the softly frosted motifs. Both sides are vividly toned in mottled shades of amber, olive, golden-russet, and ocean-blue. Eye appeal is outstanding. Population: 37 in 65 (1 in 65+), 12 finer (6/15). NGC ID# 27YT, PCGS# 7061

## MORGAN DOLLARS

1879-CC Silver Dollar, MS62  
GSA Hoard

- 3203 1879-CC GSA MS62 NGC. The 1879-CC Morgan was one of the less well-represented Carson City issues in the GSA sales of the early 1970s; the total government holdings at that point were 4,123 coins, only about half of a percent of the original 756,000-coin mintage. This in contrast to other dates such as the 1885-CC, which was represented in numbers well-exceeding half of its original mintage. The GSA sales had such a significant impact on the modern-day availability of Carson City dollars that the 1885-CC is now regarded as plentiful, while the much higher-mintage 1879-CC is one of the keys to the Carson City short set. This example is certified by NGC in its original GSA hard plastic holder. There is trivial striking weakness on the eagle's breast and the hair above Liberty's ear, as well as a light abrasions that define the grade. Eye appeal is excellent, however, fueled by frosty, vibrant luster and just a hint of light golden color. PCGS# 518848 Base PCGS# 407086

1879-CC Dollar, MS63

- 3204 1879-CC GSA MS63 NGC. VAM-4. This semikey Carson City issue is elusive in a GSA holder. Brilliant and lustrous with a good strike and a number of individually minor facial marks. VAM-4 shows repunching on the second C of the mintmark, and a die chip on the left center of the 8 in the date. Accompanied by the box and certificate of GSA issue. PCGS# 518848 Base PCGS# 407086

1879-CC GSA Dollar, MS63  
Top 100 'Capped Die' VAM-3

- 3205 1879-CC Capped Die, VAM-3, GSA, MS63 NGC. A Top 100 Variety. Myriad minute die chips about the mintmark confirm the scarce "Capped Die" variety. Slightly dusky caramel-gold and silver-gray toning endows this lustrous and nicely preserved representative. The centers display moderate blending of impression. A semikey Carson City issue. A GSA box is included, without a certificate. PCGS# 533225 Base PCGS# 518848

**1879-S Dollar, MS68 Prooflike  
Tied for Finest Prooflike Certified**

- 3206 1879-S MS68 Prooflike PCGS. CAC.** As an available date in the absolute sense, the 1879-S Morgan dollar is often overlooked by rarity enthusiasts and key-date specialists, but if a collector's search is limited to the Prooflike category, this issue becomes notably scarce in high grade. In MS68, just three Prooflike coins are certified by PCGS, this in contrast to 102 non-Prooflike examples in the same grade (four in MS68+); no Deep Mirror Prooflike coins are finer than MS67 (6/15). This piece is also one of only two MS68 Prooflike examples awarded a CAC approval label. The design elements are fully struck and heavily frosted, delivering significant cameo contrast with the mirrored fields. Free of toning and seemingly pristine. NGC ID# 253X, PCGS# 7093

**1880-CC Morgan Dollar, MS67  
Among the Finest Certified**

- 3207 1880-CC MS67 NGC.** The *Guide Book* revised the mintage figures for the 1880-CC Morgan dollar in 2014, from a previous figure of 591,000 to a smaller total of 495,000 pieces. The coins were struck using two types of reverse dies, the Reverse of 1878 and the Reverse of 1879. The present coin features the more available Reverse of 1879, easily recognized by the slanting feather on the top arrow. This spectacular Superb Gem is sharply detailed in most areas, but shows just a touch of the usual softness on the hair strands above Liberty's ear. The surfaces are impeccably preserved and radiate vibrant frosty mint luster throughout. A few hints of golden-tan toning are evident and eye appeal is terrific. Census: 22 in 67, 0 finer (6/15). NGC ID# 2542, PCGS# 7100

**1880-S Silver Dollar, MS68  
Competitive Quality and Eye Appeal**

- 3208 1880-S MS68 PCGS. CAC.** Perfectly suited for type representation, the 1880-S Morgan dollar is one of only a couple dates in the series that can be acquired in MS68 without breaking the bank. This example showcases seemingly perfect surfaces, accentuated by modest semiprooflike mirroring in the fields. The design elements are razor-sharp and are beautifully illuminated by a vibrant cartwheel effect. This piece is largely brilliant, although a crescent of ocean-blue, violet, and sun-gold graces the right reverse margin, briefly spilling over onto the corresponding obverse periphery. PCGS lists five numerically finer examples (5/15). NGC ID# 2544, PCGS# 7118

**1880-S Silver Dollar, MS68 Prooflike  
Outstanding Preservation**

- 3209 1880-S MS68 Prooflike NGC.** Medium S. A highly desired San Francisco date in the finest grades because of its relative availability in Superb Gem or finer Mint State, but the issue is considerably scarcer with prooflike surfaces at the highest levels. This attractive example displays blaze of orange-gold toning that covers half of the portrait and all of the right obverse field. A ring of golden rim toning frames the brilliant-white reverse. The usual sharp strike against the motifs, and the fully prooflike fields show only a few light marks. No 1880-S is numerically finer at NGC as Prooflike. Census: 9 in 68 (1 in 68 ★) Prooflike, 0 finer (6/15). NGC ID# 2544, PCGS# 7119

**1881-CC Morgan, MS66+  
Intensely Frosted GSA Dollar**

- 3210 1881-CC GSA MS66+ NGC. CAC.** The 1881-CC is a popular date among GSA dollar collectors, found in an original GSA holder far less often than are the 1882-CC, 1883-CC, and 1884-CC. This Plus-graded Premium Gem is awash in vibrant, frost-white luster with only the faintest surface graze on Liberty's cheek near the nostril. The strike is full and the eye appeal is exceptional. NGC has seen only 32 finer examples in GSA plastic (5/15). PCGS# 518863 Base PCGS# 407126

**1882-O Morgan Dollar, MS66  
Exceptional Surface Quality**

- 3211 1882-O MS66 PCGS.** This is a blazing, frost-white example of this conditionally scarce New Orleans issue. The strike is uncommonly bold and there are no significant abrasions. Slivers of semiprooflike mirroring hug the fields around the obverse portrait, delivering a mild halo effect in comparison to the frosty texture of the margins. Population: 40 in 66 (3 in 66+), 6 finer (5/15). NGC ID# 254C, PCGS# 7136

**1885 Dollar, MS66+ ★ Deep Mirror Prooflike  
Spectacular Contrast and Eye Appeal**

- 3212 1885 MS66+ ★ Deep Mirror Prooflike NGC.** Few Morgans of any date can match the sheer eye appeal delivered by this magnificent golden cameo. The strike is bold and the frosty motifs are starkly contrasted against fully mirrored fields. Prairie-gold patina grows deeper around the peripheries and the underlying surfaces are devoid of any major abrasions. For the type collector on a budget, this high-end 1885 offers incredible aesthetic merit. Census: 54 in 66 (2 in 66+ Deep Mirror Prooflike, 2 in 66 ★ Deep Mirror Prooflike, 2 in 66+ ★ Deep Mirror Prooflike), 4 finer (6/15). NGC ID# 254R, PCGS# 97159

**1885-CC Morgan Dollar, MS67  
Elusive Quality**

- 3213 1885-CC MS67 PCGS.** Due to its low 228,000-coin mintage, the 1885-CC Morgan is a favorite issue in the Carson City short set, but seldom is a Superb Gem example encountered. This frosty blazer is aglow with brilliant luster that shows a narrow crescent of pale blue and golden-orange toning along the right obverse periphery. The design elements are sharp and there are no mentionable abrasions. Population: 68 in 67 (1 in 67+), 1 finer (5/15). NGC ID# 254S, PCGS# 7160

**1888 Silver Dollar, MS67  
Brilliant, Radiant Luster**

- 3214 1888 MS67 NGC.** The availability of the plentiful 1888 Morgan dollar begins to trail off at the Premium Gem grade level, and in MS67, this issue is conditionally scarce. The present example is frosty and brilliant, with outstanding surface preservation. The central motifs are fairly well defined, although the wreath leaves immediately to the left of the bowknot are a trifle soft. Census: 79 in 67 (3 in 67 ★), 1 finer (5/15). NGC ID# 2555, PCGS# 7182

1888 Morgan Dollar, MS67  
Registry-Grade Example

- 3215** 1888 MS67 NGC. The 1888 Morgan dollar is seldom seen as fine as MS67, and only a single MS68 coin is finer. This beautiful, untoned example shows a pristine cheek and seemingly untouched fields. The strike is full and the intense, satiny luster is fully gratifying. Light clash marks appear on both sides. Census: 79 in 67 (3 in 67 ★), 1 finer (6/15). NGC ID# 2555, PCGS# 7182

1889-CC Morgan Dollar, AU50  
Partially Lustrous

- 3216** 1889-CC AU50 NGC. This is a collectible example of this key Carson City issue, displaying light silver-gray color overall, with ample luster in the protected areas. This date is almost always seen in low grades, and an AU coin such as this piece is an important acquisition.  
Ex: FUN Signature (Heritage, 1/2004), lot 8901. NGC ID# 2559, PCGS# 7190

1889-CC Silver Dollar, Lustrous AU50

- 3217** 1889-CC AU50 PCGS. Regardless of the grade, the 1889-CC Morgan is one of the major key dates in the series. This AU example is visually pleasing, with gold-tinted surfaces that retain significant luster in the protected regions of the fields. A few scattered abrasions are present, not out of line for the grade. NGC ID# 2559, PCGS# 7190

1889-CC Morgan Dollar, AU58 Prooflike  
Limited Mintage, Heavily Melted Issue

- 3218** 1889-CC AU58 Prooflike NGC. After four years of inactivity the Carson City Mint renewed coining operations in October 1889, though production was limited to silver dollars and double eagles. Both issues claim typically low mintages for the facility, but the 350,000 dollars initially struck was reduced to somewhere between 25,000 and 100,000 coins after a majority of the mintage was melted for reasons that remain unknown, per Rusty Goe. With such a small quantity of survivors available to the vast number of Morgan dollar specialists, the 1889-CC is understandably one of the major keys to the series. It is also a conditionally challenging issue, seldom available in near-Mint condition. This is a highly attractive AU58 with flashy Prooflike fields on each side. The surfaces are lightly toned and both obverse and reverse are peppered with numerous small abrasions. NGC ID# 2559, PCGS# 7191

**1890-CC VAM-6 Dollar, MS62**  
**Challenging in GSA Holder**

- 3219 1890-CC GSA MS62 NGC. VAM-6.** The 1 in the date is lightly repunched north. Medium silver-gray toning visits this coruscating and crisply struck Carson City Morgan. The reverse is well preserved, while the obverse displays scattered minor abrasions. The black GSA holder has a moderate diagonal crack over the reverse, but the coin is unaffected. Included with the lot is the box and certificate of GSA issue. PCGS# 518878 Base PCGS# 407198

**1890-S Morgan Dollar, MS66**  
**Exceptional Surface Quality**

- 3220 1890-S MS66 PCGS. CAC.** The 1890-S Morgan dollar is a less often seen date in Premium Gem condition, and finer representatives are rare. This CAC-endorsed example displays radiant, frosty luster with noticeable semiprooflike mirroring in the reverse fields. The central design elements are sharply rendered and close study with a loupe fails to reveal any noteworthy abrasions. PCGS has seen seven numerically finer representatives (5/15). NGC ID# 255F, PCGS# 7202

**1892-S Silver Dollar, Lustrous AU55**

- 3221 1892-S AU55 PCGS.** The 1892-S is the second-rarest Morgan dollar issue in Mint State, trailing only the legendary 1893-S. As a result, pleasing AU representatives are highly sought-after. This Choice AU example is well-struck, with trivial high-point friction and just a touch of light golden toning overall. The fields exhibit pleasing cartwheel luster and surface abrasions are light and evenly distributed. NGC ID# 255P, PCGS# 7218

**1892-S Morgan Dollar, Sharp AU58 Example**

- 3222 1892-S AU58 NGC.** A single nick at the back corner of Liberty's mouth is the sole mentionable distraction on this otherwise-lovely near-Mint State 1892-S dollar. The 1892-S Morgan issue is a key date within the series, and attractive pieces verging on Uncirculated, such as this coin, are the subject of hot demand. The surfaces otherwise show only trivial contact and broad eye appeal, with no more than a hint of golden color and an extremely sharp strike. Note how well-preserved the reverse is. NGC reports only 48 submissions finer (5/15). NGC ID# 255P, PCGS# 7218

**1892-S Morgan Dollar, Mint State Sharpness**  
**Important Series Key**

- 3223 1892-S — Improperly Cleaned — NGC Details. Unc.** Thin hairlines show in the fields before Liberty's profile, on her cheek, and behind her head, all indicative of a past cleaning. A similar effect appears on the reverse. On the other hand, the rose-gold surfaces with violet accents show no mentionable rub on the high points and still retain a great deal of eye appeal. Given the celebrity of this sought-after issue in any Mint State grade, the present coin may offer opportunities for bidding to multiple potential acquirers.

1893-CC Morgan Dollar, MS64  
Final CC-Mint Issue

**3224 1893-CC MS64 PCGS.** Only 677,000 Morgan dollars were produced at the Carson City Mint in 1893, the last year of coinage operations for that famous facility. Many examples were held in government storage at the time of issue, but these coins were gradually paid out over the years and the 1893-CC was not heavily represented in the Treasury releases of the early 1960s. By 1964, the GSA had only one single specimen of the 1893-CC in its inventory. Circulated examples and heavily bagmarked specimens in lower Uncirculated grades can be found without much difficulty in today's market, but the issue is rare in grades above MS64.

This attractive Choice example exhibits sharply detailed design elements and vibrant mint luster on both sides. Unlike most examples seen, the surfaces are free of large or distracting flaws and eye appeal is quite strong. PCGS has graded only 13 numerically finer examples (6/15). NGC ID# 255S, PCGS# 7222

1893-CC Morgan Dollar, Untoned MS64+  
Exceptional Preservation and Eye Appeal

**3225 1893-CC MS64+ PCGS. CAC.** The last Morgan dollar issue from the Carson City Mint is a highly sought-after issue in the finer Mint State grades. In a better, purer world, the last Carson City silver dollar issue might have been a lasting, fitting legacy to the fabled facility. In reality, most of the 1893-CC survivors are either circulated or, if Mint State, usually poorly struck and heavily bagmarked.

But there are pleasing exceptions, such as this MS64+ PCGS-CAC example. Effulgent luster runs over both sides of this untoned silver-white example. The preservation is exceptional, with minimal abrasions on Liberty's cheek and a few unobtrusive marks above the eagle on the reverse. The strike is nicely executed, and the eye appeal top-notch. This piece deserves a home in an exceptional Morgan dollar collection. Population: 30 in 64+, 13 finer (5/15). NGC ID# 255S, PCGS# 7222

1893-CC Morgan, MS63 Prooflike  
Stark Cameo Appearance

**3226 1893-CC MS63 Prooflike ANACS.** This final-year Carson City issue is seldom seen with Prooflike contrast and such coins are genuinely rare in MS63 or finer condition. Deep Mirror Prooflike examples are rare in any grade. This coin is immediately appealing with frost-white devices and minimally marked, mirrored fields. Tinges of amber toning around the peripheries and clinging to the edges of the central devices heightens the impact of the cameo appearance. The centers are deficiently struck, a characteristic to which this issue is often prone. NGC ID# 255S, PCGS# 7223

1893-S Morgan Dollar, AU Details  
Attractive Surfaces

**3229 1893-S — Improperly Cleaned — NGC Details. AU.** The fields reveal light hairlines as the telltale sign of a past cleaning, although they are not terribly obvious. Scattered signs of contact, including reeding marks and other abrasions, appear on Liberty's cheek and in other areas, although, again, they are inconspicuous. The attractive, light patina and good amount of remaining detail will appeal to a wide range of potential bidders.

1893-O Silver Dollar, MS62  
Upper-End for the Grade

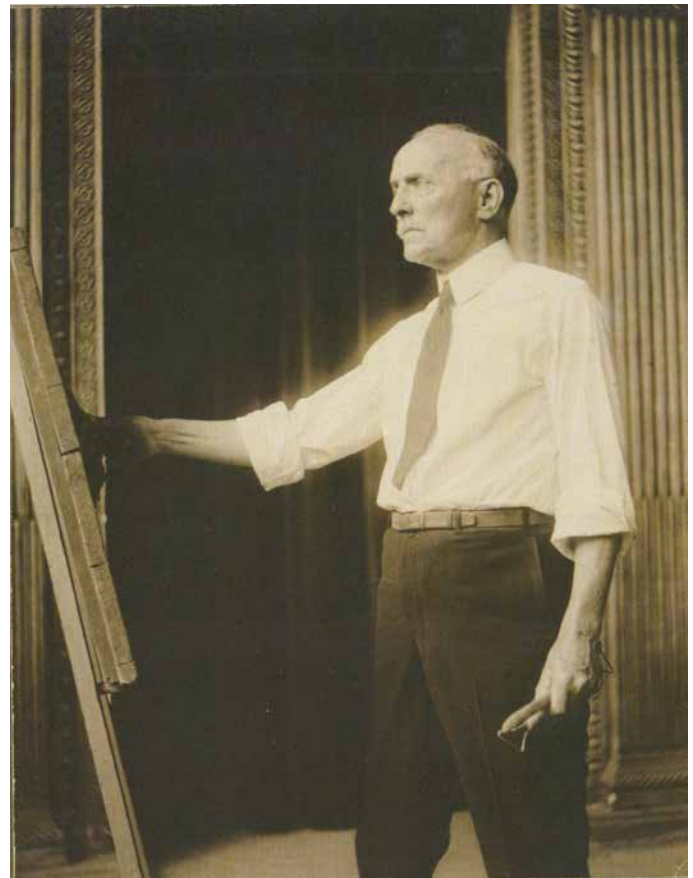

**3227 1893-O MS62 NGC.** This 1893-O Morgan dollar exhibits unusually frosty luster for the issue, accentuated by a light glaze of golden toning. The usual striking weakness is observed on the eagle's breast and the hair above Liberty's ear. Light abrasions limit the grade, but are primarily limited to the relief elements, with the fields largely undisturbed. NGC ID# 255T, PCGS# 7224

1893-S Morgan Dollar, Attractive VF25

**3228 1893-S VF25 NGC.** The surfaces show a rose-gray tint in the fields with ivory-white on the devices, and there are few marks appearing on either side, just the moderate wear expected for the VF25 grade. This attractive key-date 1893-S will fit nicely into a midgrade Morgan dollar set without breaking the bank. NGC ID# 255U, PCGS# 7226

*George T. Morgan*

---

1893-S Morgan Dollar, Magnificent MS63  
Cardinal Mint State Rarity  
Housed in an Old Green Label Holder

**3230 1893-S MS63 PCGS.** Michael Standish's narrative on the 1893-S Morgan dollar in his reference work, *Morgan Dollar — America's Love Affair With a Legendary Coin*, begins: "The 1895 Proof may be popularly referred to as the King of Morgan Dollars, but it's more steward than heir to the throne. The true king is the Mint State 1893-S."

The 1893-S is well-known to claim the series-low regular-issue mintage of only 100,000 coins, and its status as the paramount key to the series has never been questioned. Yet, it is easy to lose sight of what makes this issue so special, especially when healthy numbers of lower-grade circulated pieces are exchanged frequently among dealers and collectors. Simply, the 1893-S Morgan dollar is by a significant margin the rarest date in the series in Mint State.

All 100,000 examples were struck in January 1893, and the vast majority were released into circulation; others were likely melted as a result of the 1918 Pittman Act. It is apparent that no quantities of this date were reserved in government vaults. The only representatives that turned up in the early 1960s' Treasury releases were a few stray circulated coins, although about this same time, in Great Falls, Montana, a small group of 28 Mint State coins (or just 20, per Bowers) was discovered in a bag of 1894-S dollars. These coins make up a significant percentage of the surviving Uncirculated population of the 1893-S, and all others appear to have survived merely by chance.

Certified population totals are likely inflated by resubmissions, although they offer significant insight into the conditional rarity of this issue. In all Mint State grades, PCGS has seen just 37 coins, including just a single Prooflike specimen in MS62; NGC records 27 Uncirculated examples, with none in the Prooflike category (5/15). The only other issue that comes close to such a low survival rate in Mint State is the 1892-S, which has a combined certified population of 115 Mint State coins at PCGS and NGC — nearly twice that of the 1893-S. Mint State 1893-S Morgans have previously appeared in our auctions only 38 times in more than two decades. Of these, only seven appearances were for an MS63 example, and there were only five individual coins therein represented. For a Morgan dollar, this is an extremely infrequent appearance rate.

The last MS63 1893-S Morgan we offered was lot 80 in our April 2007 Dallas Signature sale, where it realized \$149,500. This piece is numerically equal to that coin, but is in some respects superior. Housed in an old green label holder, this coin displays exceptionally clean surfaces for the grade, particularly in the fields, with only a few light marks on Liberty's cheek worthy of mention. The luster is radiant and original, illuminating hints of light golden color on each side. Boldly rendered motifs further contribute to the eye appeal. An offering such as this coin represents a marquee event for the series specialist, and we anticipate intense interest in this King of the Morgan Dollars. Population: 10 in 63, 10 finer (5/15). NGC ID# 255U, PCGS# 7226

1894 Morgan, MS63  
No Major Distractions

**3231 1894 MS63 PCGS.** This better Philadelphia issue is frequently seen in lower grades, but becomes elusive in MS63 or better condition, particularly in comparison to the demand for it. This brilliant example displays softly frosted luster and well-struck motifs. Faint contact on the cheek limits the grade but hardly hinders the eye appeal. NGC ID# 255V, PCGS# 7228

1894 Morgan Dollar, MS64  
Key Philadelphia Business Strike

**3232 1894 MS64 PCGS. CAC.** A lovely Choice Mint State example that ranks among the finer 1894 Morgan dollars known, with only 27 higher grade pieces certified by PCGS (6/15). The 1894 is well-known as the key business strike of the series from the Philadelphia Mint, surviving from a mintage of only 110,000 coins. As Morgan dollars go, that is an extraordinary small mintage. The lowest mintage in the series belongs to the 1893-S, which tallies 100,000 coins. Vibrant surfaces are entirely void of toning, with strong design features including excellent hair detail over Liberty's ear and sharp breast feathers on the reverse. NGC ID# 255V, PCGS# 7228

1895-O Morgan Dollar, MS60  
Challenging Branch Mint Issue

**3233 1895-O MS60 NGC.** The 1895-O Morgan dollar claims a small mintage of 450,000 pieces and relatively few examples surfaced in the Treasury releases of the 1960s. In addition, the issue was not well-produced, and the typical example exhibits poor striking definition and insipid mint luster. As a result, the 1895-O is very scarce in all Mint State grades today.

Unlike most examples seen, this pleasing Mint State specimen is sharply detailed, with considerable mint luster. The surfaces show a minimum number of minor contact marks for the grade, with the reverse being particularly clean. The overall presentation is much better-than-average for the issue. NGC ID# 255Y, PCGS# 7236

---

**1895-O Silver Dollar, Elusive MS62**

- 3234 1895-O MS62 PCGS.** The 1895-O Morgan dollar issue is a key issue that is notably elusive in Mint State: Of the 450,000 pieces originally struck, most are well-circulated. PCGS shows only 43 submissions in the MS62 grade level with 39 higher (5/15). Many collectors would be delighted to own the present MS62 PCGS example, since the lightly toned surfaces offer booming luster and show fewer marks than most MS64 examples. A few thin marks appear on Liberty's lower cheek and chin, none overt. The strike is incomplete at the centers, usual for the issue, but the remainder of the design is bold. The surfaces are largely untoned, save for a faint hint of color at the rims. A small rim nick appears at 3:30 on the reverse. NGC ID# 255Y, PCGS# 7236
- 

---

**1895-S Morgan Dollar, MS63  
Vibrant Luster**

- 3235 1895-S MS63 PCGS.** In comparison to the demand for it, the 1895-S Morgan dollar is elusive in Select and finer Mint State grades. This satiny example is well-struck and shows brilliant luster with a lack of any major abrasions. Within the Morgan dollar series, the 1895-S dollar's mintage of 400,000 pieces is fairly minimal, and many were released into circulation. NGC ID# 255Z, PCGS# 7238
- 

---

**1896-S Silver Dollar, MS64  
Notable Surface Quality**

- 3236 1896-S MS64 NGC.** The 1896-S is a slightly better date in the Morgan dollar series, but it becomes particularly scarce finer than the MS64 grade level. This Choice example displays vibrant, brilliant luster with few noteworthy abrasions. This piece is well-struck and for the grade, the surface quality is impressive. NGC shows only 19 numerically finer pieces (5/15). NGC ID# 2564, PCGS# 7244
-

**1896-S Silver Dollar, MS65**  
Conditionally Challenging

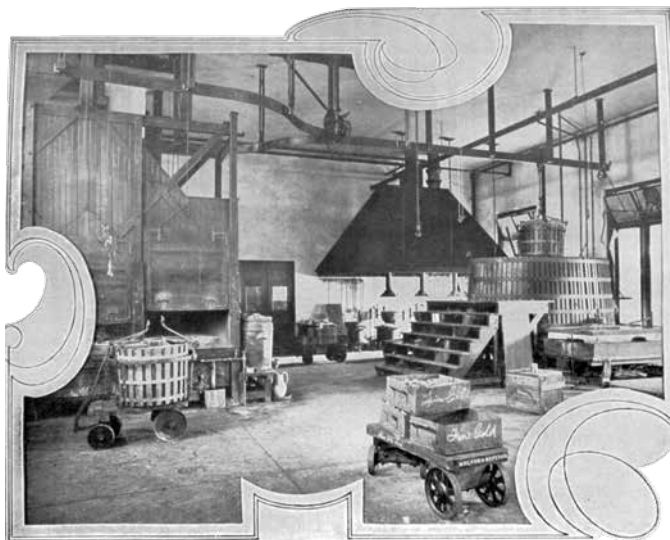

**3237 1896-S MS65 PCGS.** The 1896-S Morgan is well-known as an elusive issue in Mint State, with significant quantities of the date having been released into circulation at the time of issue and others melted. Still, Uncirculated examples are seen with mild frequency in MS64 and lower grades. At the Gem level, however, this date becomes genuinely scarce, and anything finer is a major rarity in the context of Morgan silver dollars. It is conceivable that at least some of the MS65 coins reported on the certified population charts are simply resubmissions of already graded coins. On average, we offer only about two Gem-grade representatives of this issue each year, with many just reappearances of previously seen coins.

This piece shows sharp design elements with vibrant, frosty luster that is devoid of toning. A few faint surface grazes on Liberty's cheek limit the grade, but hardly impede the eye appeal. Population: 74 in 65 (5 in 65+), 4 finer (5/15). NGC ID# 2564, PCGS# 7244

**1897 Silver Dollar, MS67**  
Among the Finest Known

**3238 1897 MS67 PCGS.** This Philadelphia issue is only marginally elusive in Premium Gem condition, but Superb Gems such as this example are genuinely rare. This piece displays sharp design elements illuminated by softly frosted mint luster. The centers are nearly brilliant, surrounded by soft gold and amber hues in the peripheries. Population: 30 in 67 (1 in 67+), 0 finer (5/15). NGC ID# 2565, PCGS# 7246

*Parting Room*

**1897-S Silver Dollar, MS67 Prooflike  
Among the Finest Prooflike Examples  
In a First Generation Holder**

- 3239 1897-S MS67 Prooflike PCGS. CAC.** The 1897-S Morgan dollar is an available issue in grades through MS65, but Superb Gems are rare and Prooflike examples in this grade are exceedingly so. This MS67 representative is deeply mirrored with boldly rendered design elements, differing from the majority of Prooflike examples which Bowers calls “lightly struck and with little eye appeal.” This piece shows competing hues of ice-blue, champagne, and amber-gold, while the underlying surfaces are almost completely devoid of significant abrasions — only a couple ticks below Liberty’s eye are of any mentionable merit. CAC-endorsed in a first generation holder. Population: 3 in 67 Prooflike, 0 finer (5/15). NGC ID# 2567, PCGS# 7251

**1901 Morgan Dollar, AU55  
VAM-3, ‘Shifted Eagle’**

- 3240 1901 Doubled Die Reverse, VAM-3, AU55 NGC. CAC.** A Top 100 Variety. This is the so-called “Shifted Eagle” variety, listed as Doubled Die Reverse in the *Guide Book*. The reverse is boldly die doubled, with the eagle and IN GOD WE TRUST shifted sharply upward. This example is lustrous with medium gold toning. Light wear affects only the high points of the motifs. PCGS# 133965 Base PCGS# 7302

**PROOF MORGAN DOLLARS**

**1880 Morgan Dollar, PR66 Cameo  
Stark Field-Device Contrast**

- 3241 1880 PR66 Cameo PCGS.** A beautiful white-on-black proof Cameo, this Superb Gem Morgan yields frost-white devices and fully mirrored fields. Each side is fully struck and completely untoned. The fields show a few trivial hairlines under a loupe, but these do not affect the eye appeal. A higher-end example from a healthy mintage of 1,355 proofs. Population: 26 in 66 (3 in 66+) Cameo, 16 finer (6/15). PCGS# 87315

---

1884 Dollar, PR66 Cameo  
Incredible Contrast

**3242** 1884 PR66 Cameo PCGS. The stark white-on-black contrast of this razor-sharp proof Morgan captivates the eye, while closer study with a loupe finds the surfaces beautifully preserved. The centers appear brilliant, although traces of lavender-gold color intrude from the peripheries. Population: 10 in 66 (3 in 66+) Cameo, 2 finer (5/15). PCGS# 87319

---

1885 Morgan Dollar, PR65  
Subtle Cameo Contrast

**3243** 1885 PR65 PCGS. Modest, undesignated contrast contributes to the eye appeal of this Gem 1885 proof Morgan. The devices are frosty and boldly rendered, and the fields exhibit full mirroring. A blush of burnt-golden toning grows deeper toward the peripheries. Population: 15 in 65, 18 finer (5/15). NGC ID# 27ZE, PCGS# 7320

---

PEACE DOLLARS

---

1925-S Peace Dollar, MS65  
Only One Premium Gem Finer

**3244** 1925-S MS65 NGC. The 1925-S is one of the biggest condition rarities in the Peace dollar series. In Gem condition, it is about on par with the 1928-S, and is significantly rarer than the more highly heralded 1928. Moreover, with only a single Premium Gem example known, the limited Gem population likely includes even a small number of resubmissions. This MS65 coin is well-struck, with satiny, brilliant luster that shows the occasional glimpse of gold when tilted in-hand. No major abrasions are present and the overall eye appeal is pleasing for the grade and issue. Census: 66 in 65 (2 in 65+), 1 finer (5/15). NGC ID# 257M, PCGS# 7366

---

**1928 Peace Dollar, MS66  
Few Known So Fine**

- 3245 1928 MS66 PCGS.** The high visibility of the 1928 Peace dollar as the series key results in a proportionately high submission rate at the third party graders, particularly in high grades; it is likely that the certified population totals in MS64 and MS65 reflect more coins than are actually in existence. In MS66, the 1928 emerges, without a doubt, a true rarity. Just 15 coins have received this paramount grade from PCGS, and NGC shows only four submissions this fine, also with none higher (5/15). The presently offered piece is every bit as impressive as the grade suggests, exhibiting frosty, largely clean surfaces and well-defined motifs. Medium champagne toning yields the occasional olive overtone, with the patina effectively masking a few trivial ticks that appear on the eagle's feathers. Population: 15 in 66, 0 finer (5/15). NGC ID# 257V, PCGS# 7373

**1934-S Peace Dollar, Frosty MS65  
VAM-3, 'Doubled Tiara'**

- 3246 1934-S Doubled Tiara, VAM-3, MS65 PCGS. CAC.** A Top 50 Variety. The 1934-S is widely regarded as the scarcest date in the series in Mint State, although a small number of Gem examples are available for the quality-conscious collector. This piece is beautifully preserved with frosty luster and light golden toning over each side. Die doubling on the upright's of Liberty's tiara identify this highly popular VAM variety. It is a rare occurrence that an example of this doubled die obverse is located in Mint State, let alone in Gem. The Condition Census for this variety lists three PCGS-attributed MS65 coins as the finest known; this unattributed example is now added to the tally. PCGS# 133782 Base PCGS# 7377

**PROOF EISENHOWER DOLLAR**

**1976-S Clad Type Two Ike, PR70 Deep Cameo  
Registry Set Essential**

- 3247 1976-S Clad, Type Two PR70 Deep Cameo PCGS.** The clad 1976-S Ike dollar proofs were made in both the bold-lettering, low-relief Type One style and the delicate-lettering, sharper-relief style of the Type Two coins, while the silver 1976-S proof Ikes were of the Type One variety only. Both clad types are extremely common in PR69DCAM grade, but this Type Two in PR70DCAM PCGS grade is one of only 16 to achieve this ultimate level at PCGS (6/15). The surfaces are problem-free as expected, with just an extremely pale hint of gold that is nearly subliminal. An essential for a top-shelf Registry Set. NGC ID# 258X, PCGS# 97435

## SACAGAWEA DOLLAR

2000-P Sacagawea Dollar, MS67  
FS-902, The 'Cheerios' Variety

**3248** 2000-P Cheerios, FS-902, MS67 PCGS. In 2000, General Mills conducted an advertising campaign, placing 5,500 2000-P Sacagawea dollars in random packages of Cheerios cereal products. Produced from a different reverse hub, the die had heightened definition of the eagle's tail feathers, including a raised central line, rather than the incuse one seen on regular issue pieces. Paul Gilkes wrote about the different reverse in *Coin World*, July 4, 2005. This variety was originally attributed by PCGS as FS-401; it was later listed as FS-901 in the *Cherrypickers' Guide*, fourth edition. It is now correctly listed in the fifth edition of the same as FS-902, and recognized as such by PCGS.

This Superb Gem exhibits lovely golden surfaces with reflective luster. An exact strike imparts exceptional design definition and the surfaces are beautifully preserved. Also included is a 2000 "Cheerios" Lincoln cent, MS64 Red PCGS, that was part of the same advertising campaign. The coins are accompanied by the original package that housed the Cheerios dollar inside the cereal box. (Total: 2 coins) PCGS# 147231 Base PCGS# 9584

## ERROR

2000 Lincoln Cent, MS66  
Struck Over a Sacagawea Dollar

**3249** 2000 Lincoln Cent — Struck on a Sacagawea Dollar — MS66 PCGS. A remarkable double denomination error. The first strike was normal, between Sacagawea dollar dies on a Sacagawea manganese alloy planchet. Somehow, despite the great disparity of diameter, the coin ended up between Lincoln cent dies, and was struck a second time. The collar die was either absent, or unable to rise above the anvil die due to the large dollar diameter. The cent strike is at 4:30 relative to the dollar strike, nestled just inside the dollar rim. The peach and sea-green surfaces appear pristine aside from dollar edge depressions at 11 and 5 o'clock, perhaps caused by the outskirts of other cent dies within the cent press. The date of the Sacagawea dollar was effaced by the subsequent cent strike, but since the series was introduced in 2000 and the cent is dated 2000, it is safe to presume that the dollar also bore that date.

## YEAR SET

### 1903 Year Set, All MS64, NGC-Certified Similarly Toned

**3250 1903 Six-Piece Year Set NGC.** This perfectly matched (all MS64) year set is all NGC-certified and includes:

**Indian Cent MS64 Red and Brown.** Subdued red-brown patina on the obverse is noticeably deeper at the top of that side. The reverse is even red with only slight mellowing.

**Liberty Nickel MS64.** Well-struck with even, slight patina present and satiny underlying mint luster.

**Barber Dime MS64.** Deep sea-green and rose toning covers both sides. A long strike-through or abrasion gives Liberty the appearance of having a mustache. Well struck.

**Barber Quarter MS64.** Similar to the dime, the surfaces are covered in rich sea-green and rose patination. Well defined.

**Barber Half MS64.** Bright, satiny mint luster enlivens the rose and sea-green toning seen over each side.

**Morgan Dollar MS64.** Variegated toning is seen on the obverse, while the reverse displays a much lighter center that is surrounded by deeper peripheral color. (Total: 6 coins)

## GOLD DOLLARS

### 1849 Open Wreath Gold Dollar, MS65+ ★ Semiprooflike, Bold Visual Attributes

- 3251 1849 Open Wreath, No L, Breen-6000, MS65+ ★ NGC.** This gleaming Gem is representative of the No L variety, lacking Longacre's initial "L" on the neck truncation of the obverse portrait. This *Guide Book* variety makes up only about a third of all known 1849 Open Wreath dollars, and is scarce in Gem condition. This Star-designated, Plus-graded representative is absolutely eye-catching, and at first glance could be mistaken for a presentation strike of some sort by the less-informed enthusiast. The coin is from circulation strike dies, but exhibits reflective, seemingly concave fields and razor-sharp relief elements. Yellow-gold in color, with a few faint lines in the fields all that are standing in the way of a full Premium Gem grade. Census: 25 in 65+\*, 17 finer (5/15). NGC ID# 25B7, PCGS# 7501

### 1851 Gold Dollar, MS66 Captivating Eye Appeal

- 3252 1851 MS66 PCGS.** The 1851 gold dollar is an ideal type coin, boasting a mintage in excess of 3.3 million coins, but Premium Gem or finer representatives are conditionally rare. This example displays intense yellow-gold luster with deeper orange-gold and apricot hues in the central regions. The strike is sharp and the overall eye appeal is exceptional. Population: 26 in 66, 11 finer (6/15). NGC ID# 25BK, PCGS# 7513

### 1852 Gold Dollar, MS66 Frosty Type One Representative

- 3253 1852 MS66 PCGS.** High-end examples of this Philadelphia issue are widely acquired for type representation, and the present piece is perfectly suited for this task. The design elements are razor-sharp and each side is awash in frosty yellow-gold luster, with almost no sign of coin-to-coin contact. Population: 16 in 66, 6 finer (5/15). NGC ID# 25BP, PCGS# 7517

### 1854-D Gold Dollar, AU58 Scarce Dahlonega Issue

- 3254 1854-D AU58 PCGS. Variety 6-H.** With a mintage of just 2,935 pieces, the 1854-D gold dollar is understandably scarce; only 100 to 125 pieces are believed known in all grades, mostly in XF or lower. This near-Mint example is weakly struck on Liberty's hair curls and the lower wreath, not unusual for the issue, with bright green-gold patina. The usual diagonal die lines are present in the reverse fields. Population: 8 in 58, 11 finer (6/15). NGC ID# 25BZ, PCGS# 7526

### 1854 Type Two Gold Dollar, Attractive MS63

- 3255 1854 Type Two MS63 NGC.** Sandy orange-gold and yellow-gold areas compete for territory on this Select 1854 Type Two gold dollar. Each side is boldly clashed as usually seen, but it is light field chatter rather than mentionable marks on each side that determines the grade. An attractive example of this elusive and in-demand gold type. NGC ID# 25C3, PCGS# 7531

1855 Gold Dollar, Frosty MS65  
Beautifully Colored Type Coin

**3256 1855 MS65 NGC.** Of the two available Type Two gold dollar issues (the 1854 and '55), the 1855 is the slightly scarcer coin in Gem condition. Both dates are highly sought-after by type and date collectors, but few Gems are extant to go around. As a result, the certified population of the 1855 gold dollar suggests the issue should be readily available in Choice grade and only marginally scarce in Gem, yet, the date is elusive in MS64 and MS65 coins are rarely seen due to so many being tightly held by collectors. Moreover, the certified population charts reflect multiple resubmissions. We have previously offered a Gem 1855 gold dollar only 11 times in the past two-plus decades, and such a coin never fails to excite bidders.

This glowing, frosty example is especially impressive due to its swirling hues of orange, rose, peach, and lilac-gold. The surfaces are free of even trivial abrasions, and the only mentionable striking weakness is seen on the first L in DOLLAR and the 8 in the date. Lightly clashed on both sides, as usual. This piece is a visual treat and an important acquisition for the type collector. Census: 31 in 65, 14 finer (6/15). NGC ID# 25C4, PCGS# 7532

1855-D Gold Dollar, AU Details  
Only Dahlonga Type Two Issue

**3257 1855-D — Cleaning — PCGS Genuine. AU Details. Variety 7-I.** A faintly hairlined and mildly subdued almond-gold example. The forehead curls and cotton leaves show only a trace of wear. The clashed fields are minimally marked aside from minor field marks near 8 o'clock on the reverse. The sole Dahlonga issue of the short-lived Type Two design, which placed the 8 in the date directly opposite the high point of Liberty's portrait. As a result, the 8 is usually lightly brought up, as seen on the present coin. Just 1,811 pieces were struck. NGC ID# 25C6, PCGS# 7534

**1856 Gold Dollar, MS66**  
**Conditionally Rare Upright 5 Variety**  
**Tied for Finest Certified**

- 3258 1856 Upright 5 MS66 PCGS.** The 1856 gold dollar is known with both a slanted and an upright logotype on the 5 in the date. Of the two, the Upright 5 variant is significantly scarcer. Few Uncirculated examples are known, and almost all grade just MS64 or lower; Gems are rare and the finest are a pair of MS66 coins, one each at PCGS and NGC (5/15). The PCGS example, here offered, delivers glowing satin luster with a warm straw-gold hue. Trivial striking weakness is apparent on the OL in DOLLAR and the wreath bow, but the definition is otherwise pleasing. No major abrasions are present. For the gold dollar specialist, this outstanding coin should not be passed by. PCGS# 7541

**1859-C Gold Dollar, AU55**  
**Final Charlotte Issue**

- 3259 1859-C AU55 PCGS. CAC. Variety 1.** The 1859-C is the final gold dollar issue from this Mint, and is elusive in all grades with fewer than 250 examples believed known. This date is also one of the most poorly struck in the Charlotte series, a characteristic that is evident to a certain extent on the present piece. The border dentils, the obverse portrait, and the central reverse lettering are weakly defined, as struck — actual wear is trivial, as the grade suggests. This piece displays medium olive-gold patina, with pleasing eye appeal for the issue. Population: 21 in 55, 26 finer (5/15). NGC ID# 25CM, PCGS# 7552

**1865 Gold Dollar, MS65**  
**Well-Struck, Vibrant Luster**

- 3260 1865 MS65 NGC.** The beautifully preserved fields and devices display tinges of peach patina. Dazzling luster and a precise strike further ensure the outstanding eye appeal. The quality is exceptional, even for the lofty MS65 level. Both sides are faintly clashed. Certified in a former generation holder. Census: 6 in 65 (2 in 65 ★), 8 finer (6/15). NGC ID# 25CZ, PCGS# 7564

1879 Gold Dollar, Semiprooflike MS67  
Tied for Finest Certified

- 3261 1879 MS67 PCGS. The Mint State population of the 1879 gold dollar is fairly evenly dispersed over most grades, but only a small number of pieces are certified as MS67, these being the finest seen by either service (6/15). This piece shows warm wheat-gold color with semiprooflike fields. A couple coppery toning splashes appear in the central reverse. The bowknot is soft, but the strike is otherwise well-executed. Population: 8 in 67, 0 finer (6/15). NGC ID# 25DH, PCGS# 7580

1883 Gold Dollar, MS68  
Immaculate Type Representative

- 3262 1883 MS68 PCGS. As with many gold dollars of the period, the 1883 had a relatively low production total (only 10,800 coins), but many examples were saved early on and the issue is remarkably more plentiful in high grades than it theoretically should be. This issue in particular is a gold mine for type collectors, as the certified population of MS67 examples numbers into the low hundreds; at the MS68 level, however, only 12 pieces have been certified by PCGS, with none finer (6/15).

This representative is awash in frosty mint bloom, with deep apricot and yellow-gold hues highlighting seemingly pristine surfaces on the obverse, and vibrant white-gold and rose colors seen across the reverse. Some striking irregularities observed around portions of the rims are normal for this issue, and the central devices are crisply impressed. NGC ID# 25DM, PCGS# 7584

1884 Gold Dollar, MS68  
Seemingly Unmatched Visual Appeal  
Recut Date

- 3263 1884 MS68 PCGS. All four date numerals are noticeably recut, with the widest spread seen on the 18. This interesting variety is unlisted in the *Cherrypickers'* reference, and is diagnostic of a proof die for this year. Breen suggested this proof die was retired to business strike production, and the existence of this piece seems to confirm that theory. As a date, the 1884 gold dollar is moderately plentiful in most grades, but is exceedingly rare at the lofty MS68 level. This piece showcases fully defined motifs and beautifully preserved semiprooflike fields. Shades of honey and apricot-gold color emblazon each side. Population: 7 in 68 (1 in 68+), 0 finer (6/15). NGC ID# 25DN, PCGS# 7585

## PROOF GOLD DOLLAR

1885 Gold Dollar, PR65  
Excellent Eye Appeal

- 3264 1885 PR65 PCGS. CAC. Fully struck and flashy with attractive olive-gold and peach toning. Although Mint records indicate 1,105 proofs were delivered, most were purchased by jewelers who converted them to love tokens or other adornments. Jewelers selected proofs since gold dollars failed to circulate after 1862. High grade proofs are rare. Housed in a green label holder. NGC ID# 25EV, PCGS# 7635

## EARLY QUARTER EAGLE

1802/1' Quarter Eagle, BD-1, VF35  
Pleasing Color and Surfaces

- 3265 1802/1' BD-1, R.4, VF35 PCGS. Bass-Dannreuther Die State b/c, cracked and clashed; there is a perfect outline of a star in the field in front of Liberty's neck and partial wing feathers from the eagle are impressed into the obverse behind Liberty's hair. BD-1 is the most plentiful of the three 1802 quarter eagle die pairings, although it is still itself scarce with only 90 to 120 examples believed extant. In the past, this issue was thought to be an 1802/1 overdate, although it is now understood to be a normal date with what is likely a die break or defective punch present within the loop of the 2. This example is evenly struck and only lightly worn, with medium honey-gold patina overall. A couple old, faint pinscratches in the right obverse field are not discernible to the unaided eye. Population: 6 in 35, 69 finer (5/15).  
From The Twin Peaks Collection. PCGS# 45506 Base PCGS# 7650

## CLASSIC QUARTER EAGLE

1839-O Quarter Eagle, Choice AU  
A Wealth of Design Detail

- 3266 1839-O AU55 NGC. Breen-6152, Variety 27, R.3. The Wide Fraction variety, one of only two known for this low mintage issue. The 1839-O is the only New Orleans Classic issue, and thus requisite for a type set from the Southern facility. As with other branch mint Classic varieties, the mintmark is on the obverse, above the date. The present straw-gold representative is impressively detailed and shows just one remotely mentionable mark, a thin field line above the arrowheads. NGC ID# 25G7, PCGS# 7701

## LIBERTY QUARTER EAGLES

1840-O Quarter Eagle, AU58  
Low Survival Rate

- 3267 1840-O AU58 PCGS. Variety 1. This is a scarce date; probably only 100 to 125 examples survive from a mintage of 33,580 pieces. The 1840-O was a widely circulated issue, and most known representatives are in VF or XF grades. This near-Mint example is conditionally rare and an important offering for the Southern gold specialist. The original surfaces display rich straw-gold patina with luster remaining in the protected peripheries. Significant weakness on the central eagle and the hair curls around Liberty's face is almost entirely due to a deficient strike, rather than wear. This issue is almost always seen with noticeable softness in the centers. Population: 8 in 58, 11 finer (6/15). NGC ID# 25GD, PCGS# 7720

**1844-C Quarter Eagle, Semiprooflike AU58  
Uncommonly Sharp Throughout**

- 3268 1844-C AU58 PCGS. Variety 1.** The 1844-C is one of the scarcer quarter eagles from this mint, with likely just 150 to 175 pieces extant, mostly in VF or XF grades. The date is also one of the most poorly struck in the Charlotte series. This Borderline Uncirculated representative is an exception, showing bold definition of the border dentils, Liberty's portrait, and most stars. The eagle exhibits minor weakness on the left (facing) leg feathers and the central shield, but the plumage is far sharper than typical. This coin is evidently a product of fresh dies, as seen by the semiprooflike fields that illuminate bright green-gold patina. Soft, amber toning over the high points of the eagle's feathers is the only evidence of circulation. Population: 18 in 58, 6 finer (5/15). NGC ID# 25GU, PCGS# 7735

**1849-D Two and a Half, AU58  
An Outstanding Example**

- 3269 1849-D AU58 NGC. Variety 11-M.** The 1849-D quarter eagle is a challenging issue in high grade; most of the 150 to 200 examples believed known grade in the VF to XF range. This near-Mint example is conditionally rare and uncommonly sharp. Hints of frosty luster reside around the peripheries and the interior fields are semiprooflike. The deep apricot-gold color of this piece further heightens its eye appeal. Census: 41 in 58, 11 finer (6/15). NGC ID# 25HF, PCGS# 7754

**1852-C Quarter Eagle, Great-Looking AU55**

- 3270 1852-C AU55 PCGS. Variety 1.** A single die pair was used to strike the small production of 9,772 1852-C quarter eagles. The average certified survivor grades nearly AU50. This Choice AU example shows considerable luster remaining on wheat-gold surfaces. The luster is thinned in the fields, consistent with the grade, but there are no singular marks. The usual strike weakness appears on the eagle's thighs and claws on the reverse. A great-looking, problem-free example of this midseries Charlotte Mint issue. Population: 14 in 55, 15 finer (6/15). NGC ID# 25HS, PCGS# 7764

**1856 Quarter Eagle, Lustrous MS65  
Conditionally Rare**

- 3271 1856 MS65 PCGS.** The peripheral elements are quite well-struck but there is moderate weakness on Liberty's hair on the obverse, and notable weakness on the left-side shield, the eagle's left (facing) leg and wing area on the reverse. On the other hand, beautiful luster complements surfaces that are nearly unmarked and display lovely reddish-orange patina. This issue is quite rare in so high a grade. Population: 6 in 65, 4 finer (6/15). NGC ID# 25J7, PCGS# 7777

**1857 Two and a Half, MS65  
Condition Rarity**

- 3272 1857 MS65 PCGS.** The 1857 is one of the more available quarter eagle issues of the period, but high-end Mint State examples are nonetheless rare. This Gem representative displays softly frosted honey-gold luster with minimal abrasions detected. The eagle's left (facing) leg is a little weak, but the overall strike is pleasing. Population: 2 in 65, 3 finer (5/15). NGC ID# 25JC, PCGS# 7782

1873 Open 3 Quarter Eagle, MS66  
Conditionally Elusive

**3273 1873 Open 3 MS66 NGC. CAC.** This Premium Gem quarter eagle could have earned its CAC approval on eye appeal alone, but its technical merit is deserving, too. The surfaces are fully struck and deeply frosted, allowing the coin to radiate amazing orange-gold patina and lilac highlights. The luster is intense, streaming across the obverse and bursting from behind the eagle on the reverse. A microscopic alloy spot appears under magnification on Liberty's neck truncation between the two lowest curls — the only possible blemish, but too small to be significant.

The year 1873 saw both Closed 3 and Open 3 varieties, the former struck earlier, with a little less than half the mintage of the Open 3 version. The issues are equally scarce in this high grade, however, with a grand total of eight pieces — split evenly between the varieties — at both services combined in MS66 and none numerically finer. NGC Open 3 Census: 2 in 66, 0 finer (6/15). NGC ID# 25KN, PCGS# 7817

1873-S Quarter Eagle, MS62  
Seldom Seen So Fine

**3274 1873-S MS62 NGC.** "In the 1990s, a client of Mid-American Rare Coins was working on a complete set of Liberty Head gold coins, and the 1873-S quarter eagle was one of the last two dozen issues on his want list. Like many San Francisco Mint coins of this period, this date is much more difficult to locate than one would think." So write Jeff Garrett and Ron Guth in the second (2008) edition of their *Encyclopedia* on gold coins. The 1873-S was struck to the small extent of 27,000 pieces, and most survivors are well-circulated.

This MS62 example shows a couple of small ticks on Liberty's cheek and chin, and the eagle's left (facing) thigh, wing top, and shield border are softly struck. The apricot-gold surfaces are nonetheless quite pleasing, and all of the peripheral devices are sharply struck up. Census: 6 in 62, 3 finer (6/15). NGC ID# 25KP, PCGS# 7820

1878 Quarter Eagle, Unabrased MS67  
Tied for Finest at PCGS

**3275 1878 MS67 PCGS.** Yellow- to golden-orange surfaces show top-notch preservation on this Superb Gem 1878 quarter eagle. Neither sides shows any marks, whether on the devices or in the fields, above the “abstruse” level. The strike is sharp in most areas, if not absolute in all. Despite the high mintage of more than 286,000 pieces, this issue is seldom seen above the Gem grade level: PCGS reports only seven Premium Gems (two MS66+), and this Superb Gem is one of only two such (6/15). This appears to be the first time we have offered an MS67 PCGS example at auction; an MS66+ PCGS-CAC example in our Long Beach Signature (Heritage, 6/2014), lot 4769, brought \$8,225. NGC ID# 25KY, PCGS# 7828

1890 Two and a Half, MS65  
Vibrant Wheat-Gold Surfaces

**3276 1890 MS65 PCGS. CAC.** A low mintage of 8,720 quarter eagles in 1890 ensures the elusiveness of this issue in Mint State, although the patient collector will find pieces in the MS62 and lower grades with little difficulty. Examples grading in the MS63 to MS64 range are genuinely scarce, and Gems are rare. In perspective, the 1890 is more plentiful in high grade than are most dates from the 1880s, but it is significantly scarcer than later 1890s issues. This piece is boldly struck with fresh, frosty luster. Hints of semiprooflike mirroring appear in portions of the fields when tilted beneath a light. Close study with a loupe reveals a few trivial ticks on each side, none discernible to the unaided eye. Population: 4 in 65, 1 finer (5/15). NGC ID# 25LE, PCGS# 7842

---

1897 Two and a Half, MS66  
Outstanding Type Coin

**3277 1897 MS66 NGC.** Peach-gold centers are framed by sea-green margins. An essentially immaculate example that boasts a razor-sharp strike and dynamic cartwheel sheen. Housed in a prior generation holder. The quality will satisfy even the most demanding numismatist. Census: 51 in 66 (2 in 66+, 1 in 66 ★), 19 finer (6/15). NGC ID# 25LM, PCGS# 7849

---

1898 Quarter Eagle, MS67  
Unsurpassed Quality

**3278 1898 MS67 PCGS.** A loupe finds the surfaces of this magnificent 19th century type coin almost flawlessly preserved, although even at a distance this coin's sheer quality is readily apparent. Fully definition of the hair curls, stars, and eagle's talons is accentuated by frosty green-gold luster. Tied with just 10 others for finest at PCGS (5/15). NGC ID# 25LN, PCGS# 7850

---

PROOF LIBERTY QUARTER EAGLES

1880 Quarter Eagle, PR65 Deep Cameo  
One Finer at PCGS

**3279 1880 PR65 Deep Cameo PCGS. CAC.** Stark, profound contrast appears between the frosted auburn-gold devices and the exceptionally well-mirrored orange-gold to reddish-gold fields on each side of this nicely preserved Gem proof 1880 quarter eagle. The devices in particular but the surfaces throughout are free of all but a couple of undistracting hairlines, contributing to the excellent preservation and Gem grade. Only 36 proofs of this issue were reportedly struck, and Deep Cameo survivors are understandably rare and seldom seen. The CAC green approval further separates this piece from its small cohort of survivors. PCGS reports only two submissions in PR65 Deep Cameo, with a single PR66 Deep Cameo finer (6/15). The last example we offered in this grade was in our Boston Signature (Heritage, 8/2010), lot 3430, which brought \$29,900 — and that piece lacked the CAC endorsement. NGC ID# 2883, PCGS# 97906

---

---

1905 Quarter Eagle, Two-Toned PR64

- 3280 1905 PR64 PCGS. CAC. Areas of blond-gold and copper-gold alternate to pleasing effect on this near-Gem proof 1905 quarter eagle. The visible contact that holds back an even finer grade is largely at the "magnification required" level. The reported proof mintage was 144 coins. This is a sharply struck and appealing coin in an opportune grade. Population: 23 in 64 (1 in 64+), 32 finer (6/15). CAC shows only seven in this grade level with the green approval sticker, and four finer. NGC ID# 288V, PCGS# 7931

---

INDIAN QUARTER EAGLES

---

1911-D Quarter Eagle, Sharp AU58  
Appealing Surfaces

- 3281 1911-D AU58 PCGS. The mintmark is bold on this example and the devices are sharply rendered; the only evidence as to grade-limiting wear is seen in the slightly muted luster of the fields. This piece is evenly orange-gold, and lacks any detracting abrasions. An ideal example for the budget-conscious collector seeking quality for the grade. NGC ID# 2894, PCGS# 7943

---

1911-D Quarter Eagle, Bold AU58  
Appealing Key Date

- 3282 1911-D AU58 PCGS. The nice sharp mintmark on this key-date quarter eagle is only one of many virtues. Others are the negligible wear confined to the absolute highest points, the lack of overt contact marks, and the especially appealing sandy-gold color. This piece would nestle down well in a mostly Mint State set. NGC ID# 2894, PCGS# 7943

---

1914 Quarter Eagle, MS64  
Excellent Quality for the Grade

- 3283 1914 MS64 PCGS. The 1914 is the second-rarest Indian quarter eagle in high grade. The present example is alive with rich reddish-gold color. Luster quality is well above average for the series, being mostly frosty with minimal granularity. There are remarkably few abrasions for the MS64 grade level, and the eye appeal is strong. Ex: *New York Signature* (Heritage, 7/2004), lot 8129. NGC ID# 2898, PCGS# 7946

---

1914-D Indian Quarter Eagle, MS65  
Notably Scarce in High Grades

**3284 1914-D MS65 NGC.** The 1911-D and the 1914-D have long been regarded as the keys to the Indian quarter eagle series, because of their low mintage and their scarcity even in lower grades. At the MS65 level, however, the 1914-D emerges as a notable condition rarity. Just 43 pieces have achieved the Gem grade at NGC, with a single MS67 coin finer (10/14), significantly fewer than so-certified of the 1911-D. Much of the reason for this is that the 1914-D “may well be the worst struck Indian Head Quarter Eagle,” according to Michael Fuljenz in his 2010 reference, *Indian Gold Coins of the 20th Century*. The present piece is crisply struck, however, and only thorough examination reveals a few tiny areas of softness within the headdress. The lustrous lemon-gold surfaces are largely unabraded except for a couple of tiny ticks near the U in UNITED.

Ex: *Long Beach Signature* (Heritage, 2/2005), lot 7706. NGC ID# 2899, PCGS# 7947

---

PROOF INDIAN QUARTER EAGLE

1910 Quarter Eagle, PR65  
Elusive Roman Gold Proof Issue

**3285 1910 PR65 NGC.** The reported mintage figure for the proof 1910 quarter eagle is an unusually high 682 pieces, the accuracy of which most researchers have long questioned. The combined NGC and PCGS certified population for this issue is only 169 examples in all grades, including resubmissions, a total which is similar to the surviving populations of most other dates in the proof series which have significantly lower mintages. If the 682-coin mintage report is accurate, most of these pieces were unsold and destroyed, as the 1910 proof is every bit as scarce as its peers.

This Gem example is boldly struck with a wire rim around much of the reverse. The Roman gold finish is largely undisturbed, although a few faint lines are observed when tilted beneath a light and viewed with a loupe. Medium straw-gold in color and suitable for a fine collection of proof Indian gold. Census: 24 in 65, 43 finer (5/15). NGC ID# 289J, PCGS# 7959

## THREE DOLLAR GOLD PIECES

---

### 1854-O Three Dollar Gold Piece, AU55 Sole New Orleans Issue of the Series

**3286 1854-O AU55 PCGS. CAC. Variety 2.** Ex: Newman. Had the three dollar gold denomination debuted a few years earlier when the New Orleans Mint was consuming large amounts of California gold, the Louisiana facility might have produced the issue in more substantial quantities. However, the 1854-O is the only three dollar piece struck at this mint (only 24,000 pieces). While not as scarce as its D-mint counterpart of the same year, the 1854-O is challenging in high grades and is actively pursued by Southern gold specialists. This Choice AU example displays deep olive-gold patina with rich coppery-orange overtones in the recesses. Wear is only slight, and the eye appeal is outstanding for the collector who appreciates old-time coloration. Mint State examples of this date are rare in all grades.

Ex: Eric P. Newman Numismatic Education Society. NGC ID# 25M5, PCGS# 7971

### 1855 Three Dollar, Appealing MS63

**3287 1855 MS63 NGC.** Although it is overshadowed by the debut 1854 date, the 1855 three dollar gold issue had a fairly generous mintage of 50,000-plus coins that makes it available up through the Select Mint State level; higher-graded coins are seldom found. This MS63 NGC example displays honey-gold surfaces with exceptional eye appeal. A single, glancing scrape below the 55 in the date is the only singular mark. Radiant luster emanates from both sides. Census: 37 in 63 (2 in 63+), 24 finer (6/15). NGC ID# 25M6, PCGS# 7972

---

1863 Gold Three Dollar, Semiprooflike MS67  
Showcase-Worthy Rarity

**3288 1863 MS67 NGC.** This magnificent 1863 gold three dollar piece is a member of the Condition Census Superb Gems that Bowers and Winter refer to as “showpieces” in the opening comments of their narrative on this issue in *The United States \$3 Gold Pieces*. As few as 30 to 40 examples of this date are believed to survive in Mint State, with a significant portion of these residing in MS62 and lower grades. Examples are rare in MS63 through MS66, and anything finer is the centerpiece of a marquee event when offered at auction. NGC records just three submissions of this date in MS67 (one in MS67 Star), with two MS68 coins finer (one in MS68 Star); PCGS contributes a single MS67 coin and an MS68 piece finer (5/15). Given the inflation of the certified population data for this issue in lower grades, it is conceivable that even these paltry Superb Gem figures include one or more resubmissions.

The 1863 gold three dollar piece had a scant mintage of 5,000 coins, mirroring the low production totals of most gold denominations for this period. In the East, gold coins generally did not circulate during this period due to economic uncertainties centered on the most pivotal periods of the Civil War. Most examples of the 1863 gold three dollar issue that were absorbed by private hands were either melted for their bullion or tightly hoarded. Remarkably few examples were set aside with care, and today, most known survivors grade in the upper XF to AU range, showing evidence of careless handling.

Our Permanent Auction Archives show only 24 previous appearances of this issue in any Mint State grade over the past two decades, and only two of these offerings were for an MS67-quality coin. The most recent of these was a die-clashed MS67 PCGS CAC example offered as lot 5386 in our 2014 FUN Signature sale where it garnered \$211,500. The present NGC coin is, in some respects, superior to that example - the surface quality is comparable, but this piece is noticeably sharper on the wreath bow and its semiprooflike fields are joyously devoid of clash marks. The latter characteristic is of major importance for this issue, as Bowers and Winter state: “All examples seen by the authors have clash marks on both sides.” As if it weren’t obvious by the sheer quality of the die impression and the boldness of the motifs, this coin is nothing other than a beautiful early strike, one of the finest known from an aesthetic perspective. Seemingly flawless surfaces display warm wheat-gold luster. With only a few dozen Superb Gem three dollar gold pieces known for the entire series, the importance of this 1863 representative cannot be overstated. NGC ID# 25MJ, PCGS# 7984

1874 Three Dollar, MS65  
Superior Color and Eye Appeal

**3289 1874 MS65 PCGS.** Peach-red and apple-green alternate across this beautifully toned and exceptionally preserved Gem. The strike is good despite minor blending on the date and the knot of the wreath. The 1874 has a fairly high mintage by three dollar standards, yet is surprisingly rare at the MS65 level, especially relative to the 1878. Presumably, the proof-only 1875 and 1876 dates whetted contemporary collector appetites for subsequent dates, since a larger percentage of their mintages were set aside, with the exception of the rare 1877. Encapsulated in an old green label holder. Population: 13 in 65, 3 finer (6/15). NGC ID# 25MX, PCGS# 7998

Key 1877 Three Dollar, AU58  
Conditionally Rare, Great Surfaces

**3290 1877 AU58 PCGS.** The 1877 three dollar gold is a key issue in the Indian Princess series, even rarer than its meager mintage of 1,468 pieces for circulation would indicate. The financial downturn that began in the United States in 1873 was, by 1877, exacerbated by a great strike nationwide among railroad workers and an ensuing collapse of the lumber market. Unemployment had been widespread for years, and the economic gloom deepened. Many of the people who might otherwise have been able to afford to squirrel away a nice current-year three dollar gold piece appear not to have done so. David Bowers, in his reference to the series, estimates that no more than 60 to 100 circulated coins are known.

This 1877 three dollar gold is one of nine submissions in this grade at PCGS, which shows 11 finer (5/15). The average certified survivor is AU55. This near-Mint State PCGS-certified representative shows top-notch eye appeal via its generous luster on surfaces ranging from orange-gold to yellow-gold. The minor circulation appears as a thinning of the luster in the fields rather than as notable contact marks. High-point wear is perceptible but slight. A nicer example would be difficult to find. NGC ID# 25MY, PCGS# 7999

---

**1878 Three Dollar Gold, MS64+  
Mint-Fresh Luster**

- 3291 1878 MS64+ PCGS. CAC.** The popularity of the 1878 three dollar gold piece as a type coin stems from a combination of availability and characteristically strong eye appeal. This Plus-graded example delivers bountifully in regards to the latter aspect, showcasing frosty rose-gold luster that shimmers over the well-preserved surfaces. The wreath bowknot is weakly defined, but the design elements are otherwise well brought up. NGC ID# 25MZ, PCGS# 8000

---

**1878 Three Dollar Gold, MS65  
Outstanding Eye Appeal**

- 3292 1878 MS65 PCGS.** While the surface quality, strike, and sun-gold coloration are all of Gem quality, the booming frosty luster gives this three dollar gold piece extraordinary eye appeal. High wire rims capture the mint bloom in coruscating waves. Slight weakness at the bow knot and a few tiny ticks seem a fair trade-off for the strong visual allure. NGC ID# 25MZ, PCGS# 8000

---

**1878 Three Dollar, MS66+  
A Gorgeous Type Coin**

- 3293 1878 MS66+ PCGS.** The 1878 is chronologically last of three generally accepted type issues for the three dollar gold series, an issue that saw more than 82,000 pieces produced despite a staggering lack of economic demand in most prior years. For the collector who wants a single gorgeous type representative, this MS66+ beauty is an excellent choice. The obverse is bright yellow with the issue's characteristic swirling luster, while the peripheral reverse adds just a hint of copper alloy for character. Preservation is marvelous even by Premium Gem standards, hence the Plus grade. Population: 70 in 66 (4 in 66+), 7 finer (5/15). NGC ID# 25MZ, PCGS# 8000
-

**1879 Three Dollar Gold, MS64  
Shimmering Luster**

- 3294 1879 MS64 NGC.** For this moderately elusive issue, MS64 is about as fine as is typically available; Gems are scarcely seen and anything finer is rare and prohibitively expensive. This example displays bold design elements amid warm orange-gold luster that yields to semiprooflike mirroring in the fields. No major abrasions are present, only a few faint lines in the fields which are revealed by the reflectivity. NGC shows 20 numerically finer representatives (5/15). NGC ID# 25N2, PCGS# 8001

**1880 Three Dollar Gold, Semiprooflike MS62**

- 3295 1880 MS62 PCGS.** The 1880 three dollar piece boasts a low mintage of only 1,000 coins, but enough Mint State examples were saved at the time of issue that the date is marginally available in the lower end of that range. This MS62 coin displays gleaming semiprooflike fields, with notably sharp design elements. Bright yellow-gold surfaces show light, scattered abrasions. NGC ID# 25N3, PCGS# 8002

**1889 Three Dollar Gold, MS64  
Final Three Dollar Issue**

- 3296 1889 MS64 PCGS.** The 1889 is the final-year issue for the three dollar gold series with a business strike production of 2,300 coins, and an additional proof mintage of 129 pieces. Apparently few actually entered circulation, and survivors are more readily available in Mint State grades than in circulated grades. Nearly three times as many Mint State coins have been certified by PCGS, than circulated pieces. This brilliant example has lustrous light yellow surfaces and above-average design details, with scattered light marks that are consistent with the grade. NGC ID# 25NC, PCGS# 8011

**1889 Three Dollar, Orange-Gold MS64  
Well-Preserved and Appealing**

- 3297 1889 MS64 PCGS. CAC.** This last-year three dollar gold issue features great eye appeal on well-struck surfaces showing attractive orange-gold color. A couple of nicks appear on Liberty's neck, with one scrape extending out into the left obverse field, but they are among the few noticeable marks on surfaces that overall are well-preserved. Population: 66 in 64 (2 in 64+), 42 finer (6/15). This is one of only 12 in this grade with the CAC green approval. NGC ID# 25NC, PCGS# 8011

**1889 Three Dollar, Attractive MS65  
Sharply Struck and Lustrous**

- 3298 1889 MS65 NGC.** The final three dollar piece is an elusive, low-mintage issue, with a total production of only 2,300 business strikes and 129 proofs. Although the overall survival rate is high, exceptional examples are elusive, and NGC and PCGS have combined to grade just 47 Gems with only 20 finer examples. An amazing Gem, this piece displays satin luster with bold design motifs and reflective fields. Both sides offer brilliant yellow-gold surfaces with rose overtones, showing violet and blue accents. A highly appealing example for a date or type set. Census: 17 in 65, 8 finer (6/15). NGC ID# 25NC, PCGS# 8011

## EARLY HALF EAGLES

1795 Small Eagle Five, AU Sharpness  
Popular BD-6, S Over D Variety

**3299** 1795 Small Eagle, S Over D, BD-6, R.5 — Obverse Tooled — NGC Details. AU. Bass-Dannreuther Die State b/c. BD-6 is a rare variety with only 60 to 80 pieces extant, many not gradable due to minor problems. Still, it is the more plentiful of the two die pairings that employ this blundered reverse, which shows the second S in STATES punched over an errant D, with numerous heavy die lines (or spikes) protruding from the dentils. The previous use of this tail die, BD-5, is extremely rare, with fewer than a dozen examples believed known.

This BD-6 representative is sharply struck, particularly on the eagle's breast, the peripheral stars, and Liberty's central hair curls. The only discernible wear is briefly visible on Liberty's shoulder, the high point of the cap, and the eagle's head and right (facing) leg. Light tooling in the obverse fields — an attempt to efface scattered abrasions — precludes a numeric grade from NGC, but the protected areas of the fields exhibit semiprooflike mirroring. Bright yellow-gold in color overall.

1798 Large Eagle Five, AU53  
BD-3, 14 Stars Reverse  
Terminal Die State

**3300** 1798 Large Eagle, Large 8, 14 Stars Reverse, BD-3, R.5, AU53 NGC. Bass-Dannreuther Die State a/d, terminal. BD-3 falls about in the middle of the 1798 Large Eagle five varieties in terms of rarity, with a low surviving population of no more than 35 to 50 pieces in all grades. Harry W. Bass, Jr. owned four examples of this issue, not because it was available, but because the 14 Stars Reverse was intriguing. This design anomaly earns BD-3 a separate *Guide Book* listing, and continues to draw collector attention today.

The obverse is undamaged in this marriage and is later employed for the more available BD-4 variety. The reverse, however, is seen here in its only use, as it quickly cracks; in this terminal state, the tail die is shattered, with a network of bold breaks evident to the naked eye. Bass had an example of this die state (lot 290 in Part III of the Bass Collection, offered by Bowers and Merena in May 2000), and another is found in the Smithsonian Institution; additional representatives are seldom seen at auction.

This piece is evenly struck, with strong borders and slight wear over the central devices. The olive-gold surfaces show deeper russet and coppery-red overtones in the recesses, contributing to the excellent eye appeal. A loupe reveals several threadlike strike-throughs on each side, the only individually mentionable being a circular impression at the NIT in UNITED.

From *The Twin Peaks Collection*. PCGS# 507323 Base PCGS# 8080

1798 Large Eagle Five, BD-4, MS62  
High-End 13 Stars Reverse Example

**3301** 1798 Large Eagle, Large 8, 13 Stars Reverse, BD-4, High R.4, MS62 NGC. Bass-Dannreuther Die State d/e, terminal. Listed in the *Guide Book* as the Large 8, 13 Stars reverse, BD-4 is the most plentiful 1798 Large Eagle five variety. Nonetheless, only 80 to 100 examples are known in all grades. Harry W. Bass, Jr. owned two examples of this issue, one of which was retained for the Core Collection, and the other offered as lot 726 in Part II of the Bass Collection (Bowers and Merena, 10/1999), where it realized \$16,100 as PCGS MS61.

The deterioration of the dies on BD-4 must have begun fairly early in their usage, as the terminal die state is the most often seen on the market. The obverse was previously employed for the BD-3 pairing, but did not crack until this usage; the reverse is seen here in its only use.

The present representative is superior to the Bass coin offered in the 1999 Part II catalog, showing satiny yellow-gold luster with remarkably few abrasions. The strike is evenly executed, although minor weakness is left on the central hair curls and the upper portion of the shield, as usual. Two small rim cud marks along the upper reverse border are consistent with the die state and serve as a quick identifier of the variety. All Large 8, 13 Stars Reverse varieties included, NGC has seen only six submissions in this grade, with three MS63 coins finer (5/15).

From *The Twin Peaks Collection*. PCGS# 507324 Base PCGS# 8078

1800 Half Eagle, BD-2, AU55  
Attractive Semiprooflike Fields

**3302** 1800 BD-2, High R.3, AU55 PCGS. Bass-Dannreuther Die State c/d. BD-2 is one of the most plentiful 1800 half eagle varieties, comparable in availability to BD-5. John Dannreuther estimates this die pair struck possibly 7,500 to 12,500 coins before the reverse was retired and the obverse was paired to a different reverse to coin the BD-3 variety. It is believed that 175 to 250 examples are extant; while this survival rate is fairly high in the context of early half eagles, it is still a scarce issue, and seldom is a problem-free example offered.

This Choice AU representative is evenly struck and well-defined, with only minor friction evident over the high points of the design. A few faint adjustment marks on the eagle's neck are almost inconsequential. Scattered, trivial abrasions accompany the grade, but none are individually bothersome. Eye appeal is significant, particularly due to semiprooflike mirroring in the fields and pleasing straw-gold color throughout. PCGS# 45592 Base PCGS# 8082

1800 Half Eagle, BD-2, Unc Sharpness  
Semiprooflike Fields

- 3303** 1800 BD-2, High R.3 — Tooled — PCGS Genuine. Unc Details. Bass-Dannreuther Die State c/d. BD-2 is one of the more plentiful 1800 half eagle varieties, ideal for date representation; as many as 175 to 250 pieces are believed to survive. This unworn example displays significant semiprooflike mirroring in the fields amid bright yellow-gold patina. Trivial softness is seen on the eagle's neck and Liberty's central hair curls, but the strike is otherwise well-executed and the eye appeal is notably strong. A few insignificant tool marks are seen on the top of Liberty's cap and near the L in LIBERTY, hardly a concern for the unaided eye. Faint remnants of a few adjustment marks appear briefly along the lower-left obverse border. PCGS# 45592 Base PCGS# 8082

1806 Knob 6 Five Dollar, BD-6, Unc Details  
Frosty, Attractive Surfaces

- 3304** 1806 Knob 6, 7x6 Stars, BD-6, R.2, — Scratch — PCGS Genuine. Unc Details. Bass-Dannreuther Die State d/e. BD-6 is the most plentiful 1806 half eagle variety, and is one of the most plentiful varieties for the Draped Bust type, ideal for date representation. This unworn example displays frosty straw-gold luster with a few faint amber overtones in the fields. Minor striking softness is seen on the obverse stars and on the reverse shield and arrows, although the overall eye appeal is pleasing. The scratch mentioned by PCGS is small and circular in the field adjacent to the U in UNITED.

1808/7 Half Eagle, BD-2, Rare MS62  
Terminal Die State

- 3305** 1808/7 Close Date, BD-2, High R.4, MS62 NGC. Bass-Dannreuther Die State c/c, terminal. The obverse is cracked from star 2, between the ER in LIBERTY, to the rim above the cap; also from the rim, through star 11, and into the hair curls; a third, lighter crack extends downward from Liberty's throat toward the tip of the bust. The Mint State status of this overdate representative is confirmed by the frosty yellow-gold luster in the fields, while trivial chatter on the portrait and the in interior fields is all that limits the grade. Striking softness is seen on the eagle's head and the highest hair curls.

BD-2 is one of two 1808 half eagle varieties that comprise the 1808/7 *Guide Book* listing. Two different obverse dies were employed for these two issues, although they share a common reverse — leftover from the BD-8 1807 die marriage. The tail die was further used for the BD-3 1808 die marriage, although this is the only use of this head die. Mint State examples of this overdate are rare, and primarily reside in MS60 or MS61; both varieties included, NGC has seen only six pieces in this grade and three finer (5/15). From *The Twin Peaks Collection*. PCGS# 45637 Base PCGS# 8103

1810 Half Eagle, MS61  
BD-4, Large Date, Large 5

- 3306** 1810 Large Date, Large 5, BD-4, R.2, MS61 NGC. Bass-Dannreuther Die State a/a; the dies are perfect except for a raised area near star 4 caused by an obverse die depression of unknown origin. The 1810 half eagle comes with three different date logotypes and three different logotypes for the 5 in the denomination. Although BD-1 and BD-2 are both considered Small Date varieties, the 0 punch is clearly larger on BD-2 than on BD-1. BD-3 and -4 both share the common Large Date obverse, here represented. Both sides are yellow-gold with pleasantly smooth surfaces. The strike is exacting save for incompleteness on the claws and arrow fletchings. Luster illuminates the devices and legends. A desirable early half eagle that will fulfill a difficult obligation within an advanced gold type set.

*Ex: Long Beach Signature (Heritage, 9/2008), lot 3601.*

*From The Twin Peaks Collection. PCGS# 507598 Base PCGS# 8108*

1811 Half Eagle, BD-1, AU58  
Original Patina

- 3307** 1811 Tall 5, BD-1, High R.3, AU58 NGC. Bass-Dannreuther Die State b/d, lightly clashed. By a small margin, BD-1 is the scarcer of the two 1811 half eagle varieties, with fewer than 250 examples believed known in all grades. The Tall 5 in the denomination readily differentiates this die pairing from BD-2, which shares that same obverse. This Borderline Uncirculated example shows slight friction over the high points of the design, while retaining frosty orange-gold luster in the protected regions of the fields. Evenly struck and sharply detailed, with a couple small ticks near stars 6 and 7 being the only mentionable abrasions. *From The Twin Peaks Collection. PCGS# 507600 Base PCGS# 8110*

## LIBERTY HALF EAGLES

1843-O Half Eagle, Original AU58  
Scarce This Fine

- 3308** 1843-O Large Letters AU58 NGC. Variety 1. A late die state example, with lapping evident in portions of the peripheral legends. The design elements are well-struck and hints of luster remain in the peripheral recesses. Medium bronze-gold with coppery overtones. A couple old, thin scratches appear near the upper-left reverse rim. The Large Letters 1843-O half eagle had a mintage of 82,000 pieces, but survivors are scarce. Census: 34 in 58, 21 finer (6/15). NGC ID# 25T6, PCGS# 8216

**1845 Half Eagle, Appealing MS64  
Tied for Finest**

**3309 1845 MS64 PCGS.** Gold collector *par excellence* Harry W. Bass, Jr. had a particular fondness for this date, amassing 10 examples in all, of which three were graded MS64 — now, as then, the highest certified grade, where PCGS has seen eight examples and NGC six (6/15). This sandy-gold near-Gem boasts excellent eye appeal by way of its sharp strike, lack of mentionable abrasions or other problems, and the attractive color. Despite the generous reported mintage of more than 417,000 coins for the 1845 issue, survivors today generally are no better than AU to Choice AU, making an eye-appealing example such as this a rare find for collectors. NGC ID# 25TB, PCGS# 8223

**1892 Half Eagle, Sharp MS66**

**3310 1892 MS66 NGC.** High-grade examples of the 1892 half eagle are scarce despite the mintage of about three-quarters of a million coins. This reddish-orange Premium Gem shows a sharp strike on Liberty's hair, the beads, the star centers, and throughout the reverse. Abrasions are minimal, in concert with the grade. Census: 21 in 66 (1 in 66 ★), 8 finer (6/15). NGC ID# 25Y6, PCGS# 8379

**1895 Half Eagle, Frosty MS66  
Conditionally Rare**

**3311 1895 MS66 NGC.** The availability of the 1895 half eagle plummets at the Gem grade level; MS66 coins are decidedly rare and anything finer is almost unobtainable. This Premium Gem example displays rich, frosty luster in honey-gold hues with sharp design elements and outstanding preservation. Census: 8 in 66, 3 finer (6/15). NGC ID# 25YH, PCGS# 8390

**1896-S Five Dollar, MS63  
Radiant Luster**

**3312 1896-S MS63 PCGS.** The 1896-S half eagle is a better date in Mint State and is rarely seen as fine as this Select representative. This piece is boldly struck, with frosty yellow-gold luster and outstanding eye appeal for the grade. A few stray lines on the obverse, seen when tilted at just the right angle beneath a light, preclude a finer grade, but hardly impede the visual impression. Population: 7 in 63, 5 finer (5/15). NGC ID# 25YL, PCGS# 8393

**1901/0-S Five Dollar, MS65  
Scarce 20th Century Overdate**

**3313 1901/0-S FS-301 MS65 PCGS.** The upper-right curve of the underdigit 0 is evident near the peak of the second 1 in the date. This example is well-preserved and lustrous with faint lime-green toning. This is one of the final overdate varieties caused by punching a date logotype into an earlier dated die. Later overdates (from 1909, 1918, and 1942) were hubbing errors. Population: 20 in 65 (1 in 65+), 3 finer (5/15).  
Ex: Houston Signature (Heritage, 12/2009), lot 1698. PCGS# 145720 Base PCGS# 8403

1901/0-S Five Dollar, MS66  
Last of the True Overdates  
Tied for Finest Known

**3314** 1901/0-S FS-301, R.5, MS66 PCGS. The date logotype for 1901 was punched into a leftover die from 1900, creating one of the boldest overdates on a U.S. gold issue. It is also the final true, unchallenged overdate in the entire Federal series. Later overdates were hubbing errors such as those seen on the 1909/8 double eagle, the 1918/7 quarter, and the 1942/1 dime, where working dies were prepared with hubs of two different dates.

Remnants of an underdigit 0 are visible with the unaided eye beneath the final 1 in the date, and to a lesser extent at the top-right inside curve of the primary 0. The frosted, medium-gold surfaces display cartwheel mint luster and only minuscule marks anywhere on the smooth surfaces. The motifs are fully struck. Just three examples of the overdate have been seen by PCGS at the Premium Gem level and four pieces by NGC, with none finer (5/15). Listed on page 265 of the 2016 *Guide Book*. PCGS# 145720 Base PCGS# 8403

## PROOF LIBERTY HALF EAGLE

1906 Half Eagle, Nicely Preserved PR64+  
Modest Cameo Contrast

**3315** 1906 PR64+ PCGS. CAC. This 20th century proof issue from the tail end of the Liberty half eagle series has a mintage amounting to just 85 proof coins. Few of those coins are as well-preserved as this piece, and few show any level of cameo effect, so the modest contrast visible on this sun-gold example comes as a pleasant surprise. The strike is characteristically sharp, and the overall eye appeal is great for a classic gold proof of the brilliant era. A small lump on the rim to the left of the date is as issued, though the minor yet grade-defining hairlines to the left of the portrait are not. Population: 12 in 64 (2 in 64+), 7 finer (5/15). CAC shows only three PR64 with the green approval sticker.

Ex: *Central States Signature* (Heritage, 4/2011), lot 5402. NGC ID# 28DC, PCGS# 8501

## INDIAN HALF EAGLES

### 1909-O Half Eagle, Appealing XF45 Avidly Pursued Key Date

- 3316 1909-O XF45 PCGS. Variety 1**, sole dies for the issue. The orange-gold surfaces of this key-date half eagle show a modicum of wear consistent with the Choice XF grade, but both the fields and device high points show a noteworthy absence of mentionable marks, front and back. The mintmark is nice and bold for the issue, and the eye appeal is generous despite the 15 points of wear. The low-mintage 1909-O, the last gold-coin issue from the antiquated New Orleans Mint, is popular and widely pursued. NGC ID# 25ZK, PCGS# 8515

### 1909-O Half Eagle, AU Details

- 3317 1909-O — Improperly Cleaned — NGC Details. AU.** Brief circulation on this 1909-O half eagle is masked by a light cleaning which gives the surfaces a uniform straw-gold hue, although close study with a glass reveals minor friction over the high points of the design. The mintmark and most details are clear. This date is significant as the only New Orleans issue of the Indian Head type and the final half eagle struck at that facility. NGC ID# 25ZK, PCGS# 8515

### 1913-S Five Dollar, MS62 Better San Francisco Date

- 3318 1913-S MS62 NGC.** As expected for the grade, this piece is moderately abraded, but the disturbances are uniformly dispersed so as to cause minimal distraction. The design elements are well-defined and the surfaces yield satiny straw-gold luster. The 1913-S Indian half eagle is a better date in the series, particularly scarce in grades finer than MS62, with just 40 such coins certified by NGC (6/15). NGC ID# 25ZP, PCGS# 8526

## EARLY EAGLES

### 1795 Eagle, AU Details Rare BD-5 Variety

- 3319 1795 13 Leaves, BD-5, R.5, — Tooled, Polished — ANACS. AU Details, Net XF40.** A large die lump between OF and AMERICA identifies this rarely seen die marriage. Although clearly far from perfect, this should prove to be a highly desired example as a type or date set coin. The surfaces are extensively marked, the rims have several bruises, and both sides have been lightly polished. It is possible that this is a former jewelry piece. In any event, current market forces suggest that the 1795 eagle, the first of its kind, is always in high demand. This example, while still substantially valued, should prove to be a relatively affordable example for the level of detail present. Ex: Long Beach Signature (Heritage, 6/2005), lot 7871; ANA Signature (Heritage, 7/2005), lot 10371. PCGS# 45713 Base PCGS# 8551

1799 Ten Dollar, AU Details  
Small Obverse Stars, BD-2

- 3320 1799 Small Obverse Stars, BD-2, High R.5 — Obverse Damage — NGC Details. AU. Bass-Dannreuther Die State d/c. A richly detailed example with hints of orange-red toning in protected areas. The open fields and high points are yellow-gold. The obverse is moderately hairlined and has a few small roundish digs on the portrait. The obverse field has brief, faded scratches near the I in LIBERTY and stars 4, 8, and 12. Cursive initials, perhaps JEG, are pinscratched on the upper reverse field. Among 1799 eagles, BD-2 is a rare variety relative to the usually encountered BD-7 and BD-10 marriages. PCGS# 45725 Base PCGS# 98562

1799 Eagle, BD-10, Mint Sharpness  
Large Stars Obverse

- 3321 1799 Large Obverse Stars, BD-10, R.3 — Repaired — PCGS Genuine. Unc Details. Bass-Dannreuther Die State b/b. BD-10 is the most plentiful 1799 eagle variety, and is one of only two die pairings seen with any degree of frequency. For date collectors, this is often the variety chosen, and it is also seen on occasion in type specialists' cabinets. As many as 300 to 400 examples are known, although it is seldom that an unworn representative is encountered. This piece is sharply detailed and evenly struck. Remnants of adjustment marks appear along the lower-right obverse border and weaken stars 11 through 13; star 3 on the reverse is also ill-defined, but the motifs are otherwise bold. Tool marks in the fields, particularly on the obverse, are evident with a loupe, while the unaided eye sees bright, yellow-gold surfaces. This piece is in an early stage of this later die state, lapped on the reverse but not yet cracked on the obverse. Harry W. Bass, Jr. owned another BD-10 example in this early stage of die state b/b, sold as lot 581 in Bowers and Merena's November 2000 sale of the Bass Collection, Part IV. PCGS# 45723 Base PCGS# 8562

**1800 Eagle, BD-1, AU Details  
Pleasing Type Coin**

- 3322 1800 BD-1, High R.3 — Smoothed — PCGS Genuine. AU Details.** Bass-Dannreuther Die State b/c, cracked. BD-1 is the only die variety of the 1800 eagle, although not all examples of this issue were struck in the same press run. Due to the failure of the first 1801 obverse, this 1800 die pair was reused in that year. The present coin is a product of the 1800 production period, as affirmed by the die state. The surfaces show relatively smooth, honey-gold patina, with the fields lightly smoothed to remove abrasions and other distractions. Some striking weakness is noted only along the left-hand peripheries, where remnants of light adjustment marks are also present on the reverse. PCGS# 45732 Base PCGS# 8563

**LIBERTY EAGLES**

**1852 Eagle, Attractive MS61  
Rare in Mint State, Seldom Seen Finer**

- 3323 1852 MS61 NGC.** Scattered abrasions throughout both sides, including a couple of larger scrapes and ticks, and noticeable field chatter determine the grade on this early eagle issue, one far more elusive in Mint State than the mintage exceeding 263,000 coins would lead one to believe. AU coins are scarce and Mint State coins rare, according to Garrett and Guth. The surfaces show good luster and attractive orange-gold color with a light overlay of smoke-gray haze. Moderate strike weakness on the central high points is typical of the issue. Census: 21 in 61, 5 finer (6/15). NGC ID# 263C, PCGS# 8608

**1862 Liberty Eagle, AU53  
Elusive Low-Mintage Issue**

- 3324 1862 AU53 NGC.** A meager mintage of 10,995 Liberty eagles was struck in 1862, certainly a small total in absolute terms, but about average in the context of the series. This AU53 example shows a trace of wear on the hair and coronet but the pleasing orange-gold surfaces are lightly abraded and the overall presentation is quite attractive. Census: 19 in 53, 39 finer (6/15). NGC ID# 2649, PCGS# 8635

**1866-S Ten Dollar, XF45  
Scarce With Motto Issue**

- 3325 1866-S Motto XF45 NGC.** This inaugural With Motto San Francisco issue is scarce in all grades with likely only 60 to 80 pieces known, and none are in Mint State. This Choice XF example is among the finest typically seen by collectors. Olive-gold surfaces show scattered, grade-consistent abrasions, but the design elements retain strong detail. Census: 10 in 45, 25 finer (5/15). NGC ID# 264K, PCGS# 8650

**1868 Eagle, Appealing AU58  
Low-Mintage Issue**

- 3326 1868 AU58 NGC.** This 1868 eagle shows only light circulation but there are a few heavy marks on the surfaces, notably a dig below Liberty's hairbun and a few smaller marks on the cheek, chin, and neck. One straight scrape also shows on the reverse, beneath UNI. Both sides are sharply struck and offer attractive orange-gold color. Die lapping shows on the scroll above IN. The low mintage of 10,665 pieces ensures that few survive so fine as this coin. Census: 32 in 58 (1 in 58+), 6 finer (6/15). NGC ID# 264N, PCGS# 8653

**1868-S Ten Dollar, Original AU55  
Underrated High-Grade Rarity**

- 3327 1868-S AU55 PCGS.** The 1868-S eagle had a mintage of only 13,500 coins; survivors are scarce in any grade and none are certified in Mint State. The Smithsonian coin grades just VF30, per Garrett and Guth. This Choice AU example is sharply detailed, with deep orange-gold patina. Semiprooflike mirroring highlights the protected regions of the fields. Population: 7 in 55, 3 finer (6/15). NGC ID# 264P, PCGS# 8654

**1871 Ten Dollar, AU50  
Scarce, Underrated Date**

- 3328 1871 AU50 PCGS.** The 1871 Liberty eagle is a significantly scarce and underrated issue, surviving to the extent of only 60 to 75 coins in all grades. The typical example is well-circulated with significant abrasions, and nice AU coins are about as fine as is obtainable; only a single Mint State piece is reported by the certification services, an MS60 PCGS coin. This About Uncirculated representative displays medium orange-gold patina with hints of luster remaining in the protected regions. A few stray allow specks appear on the obverse. Population: 8 in 50, 14 finer (5/15). NGC ID# 264W, PCGS# 8660

**1872 Eagle, Original XF45  
Only 40 to 60 Pieces Believed Known**

- 3329 1872 XF45 PCGS.** With a scant mintage of just 1,620 pieces, it is little wonder that the 1872 eagle is rare in all grades, but the date is also underrated in comparison to many branch mint issues of the period. This Choice XF example is one of only 40 to 60 1872 eagles believed known in all grades. The surfaces display original orange-gold patina with remnants of semiprooflike mirroring in the recesses. Lightly circulated with the expected minor abrasions, but well-detailed and eye-appealing nonetheless. Population: 7 in 45, 17 finer (5/15). NGC ID# 264Z, PCGS# 8663

**1893-CC Eagle, AU55  
Popular Carson City Issue**

- 3330 1893-CC AU55 NGC. Variety 1-A.** This final-year Carson City issue is marginally available in circulation condition, but Mint State examples are rarities. This Choice AU representative displays smooth yellow-gold surfaces with hints of luster remaining in the peripheral recesses. The strike is sharp and there is just trivial wear over the high points of the design. Census: 52 in 55, 55 finer (5/15). From The Twin Peaks Collection. NGC ID# 2672, PCGS# 8726

**1893-CC Ten Dollar, Lustrous AU58**

- 3331 1893-CC AU58 NGC. Variety 1-A.** The final year of eagle production at the Carson City Mint amounted to only 14,000 pieces, most of which experienced extensive circulation. This issue is scarce in properly graded AU, and Mint State examples are decidedly rare. This near-Mint piece is boldly struck with just a trace of friction evident over the high points of the design. The surfaces exhibit significant straw-gold luster and there are fewer abrasions than expected for this grade level. Census: 41 in 58, 14 finer (5/15). NGC ID# 2672, PCGS# 8726

**1903-S Eagle, Impeccable MS66**

- 3332 1903-S MS66 NGC.** This Premium Gem 1903-S eagle displays impeccable preservation on both sides. The orange-gold surfaces are drenched in satin luster swirling around fully defined devices. There are no singularly mentionable abrasions, but a lone, well-concealed alloy spot over the eagle's left (facing) talon is noted. The 1903-S is a more difficult issue to locate than the common 1901-S. Census: 36 in 66, 6 finer (6/15). NGC ID# 267X, PCGS# 8754

## INDIAN EAGLES

1907 No Periods Indian Ten, MS66  
Ideal Type Coin

**3333 1907 No Periods MS66 PCGS.** The No Periods 1907 Indian eagle is widely regarded as the most plentiful No Motto issue in the series, a favorite among type collectors. Yet, its availability declines significantly in MS66, and finer representatives are rarely seen. This Premium Gem example is among the finest within the financial reach of many collectors. The motifs are well-defined and the surfaces display satiny orange-gold luster. No major abrasions are observed, and trivial contact on the high points of the devices is imperceptible to the unaided eye. NGC records only 31 numerically finer representatives, PCGS just 10 (5/15). The sole finest example of this issue is in the Smithsonian Institution and grades MS69, per Garrett and Guth. NGC ID# 28GF, PCGS# 8852

1908 With Motto Ten, MS66  
Impressively Well-Preserved

**3334 1908 Motto MS66 PCGS.** Compared to its No Motto counterpart, the With Motto 1908 Indian eagle appears moderately plentiful. However, its availability declines in MS64, and this date is infrequently seen at the Gem level; MS66 coins are genuinely scarce. Even so, Mike Fuljenz suggests this date is, in the context of the series, more plentiful in Premium Gem condition than it theoretically should be, possibly benefiting from a small hoard. Nonetheless, in the absolute sense, the number of high-end pieces to go around is quite limited and the certified population reports likely include a small number of resubmissions. This beautifully preserved, glowing example displays thick, satiny luster and boldly struck design elements. Close study with a glass fails to reveal any mentionable abrasions, and the overall eye appeal is exceptional. Population: 34 in 66, 9 finer (5/15). NGC ID# 28GJ, PCGS# 8859

**1909-S Ten Dollar, MS62**  
**Rich Apricot-Gold Luster**

- 3335 1909-S MS62 PCGS.** The 1909-S Indian ten is usually available in circulated grades, but in Mint State it is one of the more challenging issues in the series. This example is lightly abraded, as the grade suggests, but there are no singularly obtrusive flaws. The satiny orange-gold luster is pleasing to the eye, and the design elements are well-defined. NGC ID# 28GP, PCGS# 8864

**1910-D Eagle, MS65**  
**High-Mintage Type Issue**

- 3336 1910-D MS65 NGC.** The 1910-D eagle is a high-mintage issue of more than 2.3 million pieces that is nonetheless seldom seen in the finer Mint State grades. Some examples, however, such as the present piece, appear with good luster and a bold strike. Scattered ticks consistent with the grade are more prominent on the reverse. This would be a great candidate for a mintmarked type set. NGC reports only 49 in finer numeric grades (6/15). NGC ID# 28GS, PCGS# 8866

**1910-S Eagle, MS63**  
**Series Condition Rarity**

- 3337 1910-S MS63 PCGS.** Deep reddish-orange patina amid copious luster is the hallmark of this Select 1910-S eagle, showing some scattered ticks on the profile of Liberty on the reverse and a couple of luster grazes on the reverse that determine the grade. Forget the mintage figure for this issue — most were melted, and it is conditionally scarce this fine. PCGS reports only 31 submissions numerically finer (6/15). NGC ID# 268D, PCGS# 8867

**1911 Indian Eagle, MS65**  
**Lovely Early Series Type Coin**

- 3338 1911 MS65 NGC.** Gem examples of this moderately available Philadelphia issue are only infrequently seen, and finer coins are scarce. This piece displays sharply struck devices and satiny yellow-gold luster. Close study with a glass reveals a few trivial grazes here and there, but none are out of line for the grade. There are 57 numerically finer examples at NGC, with some resubmissions likely included (6/15). NGC ID# 28GT, PCGS# 8868

**1911-D Eagle, Well-Preserved AU58**

- 3339 1911-D AU58 NGC.** Slight high-point rub, visible on the eagle's forward wing and brow, and on Liberty's cheek and jawline on the obverse, combines with minor thinning of the field luster to account for the grade on this attractive key-date eagle. The 1911-D eagle is hands-down rarer than its quarter eagle and half eagle counterparts, although all three stand out due to low mintages — a meager 30,100 coins in the case of the 1911-D ten. Both sides of this piece are remarkably free of mentionable abrasions. NGC ID# 28GU, PCGS# 8869

**1912 Ten Dollar, MS65**  
**Vibrant Original Luster**

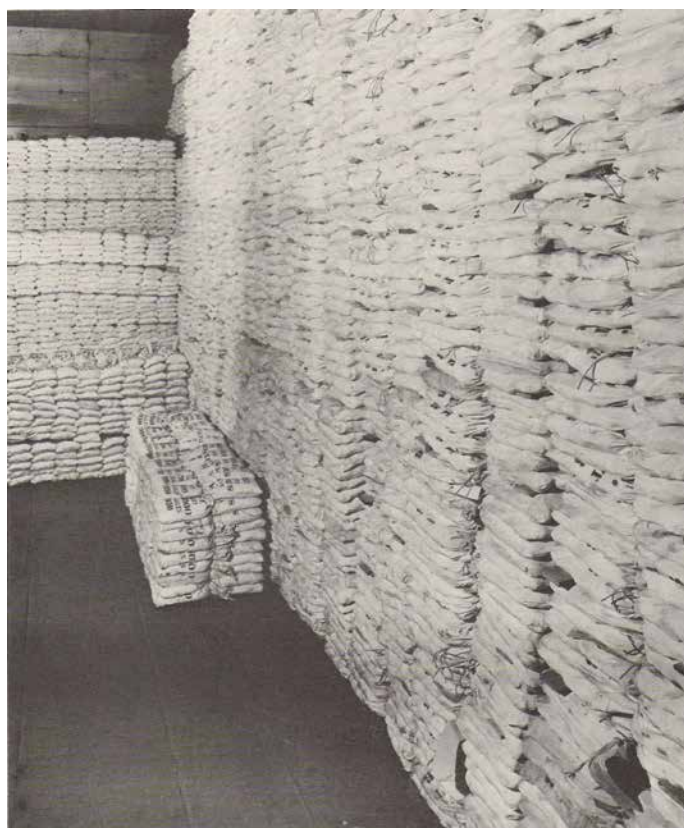

- 3340 1912 MS65 PCGS.** Mint-fresh, frosty luster glows over each side of this Gem 1912 Indian eagle, revealing shades of rose, lilac, and mint-gold. The design elements are sharply brought up and the only noticeable abrasion is a small tick on Liberty's cheek — the surfaces are otherwise seemingly pristine. This Philadelphia issue is readily available through the Choice grade level, but the certified population plummets in Gem condition and finer pieces are rare. Population: 31 in 65 (1 in 65+), 13 finer (5/15). NGC ID# 28GW, PCGS# 8871

**1912-S Eagle, Reddish-Orange MS63  
Better Series Date**

- 3341 1912-S MS63 PCGS.** Deep, ruddy reddish-orange surfaces on this Select 1912-S eagle show light, scattered smoke-gray accents and a couple of copper alloy spots on the reverse. A few contact marks appear on each side, but none of them are singular or overt. The 1912-S is a much better date within the series, of about median rarity in MS63 and MS64 and seldom seen in Gem condition. Population: 83 in 63 (3 in 63+), 85 finer (6/15). NGC ID# 28GX, PCGS# 8872

*192 Mint-sealed bags of 1930-S Eagles*

**1914 Eagle, Flashy MS65  
Underrated Philadelphia Issue**

- 3342 1914 MS65 NGC.** The honey-gold surfaces on this Gem 1914 ten dollar are flashy and lustrous, showing few mentionable abrasions (other than a few small facial ticks) amid the bold strike and generous eye appeal. The reverse shows a couple of minor ticks on the eagle's upper wing and a small luster graze in the right field.

The 1914 eagle issue is scarce and underrated in Gem condition, with the certified population figures likely including a small number of resubmissions; finer examples are genuinely rare. Mike Fuljenz calls this issue "harder to obtain in Mint State than most other Indian Eagles from this mint, [and] it typically comes very heavily abraded and bagmarked." This Gem representative is thus an important acquisition. Census: 44 in 65, 8 finer (6/15). NGC ID# 28H2, PCGS# 8875

**1914-S Ten Dollar, MS63**  
Elusive in Finer Grades

- 3343 1914-S MS63 NGC.** The 1914-S eagle usually appears in AU55-AU58 condition and is one of the rarest series issues in Gem grade. This Select Mint State example is among 53 such at NGC, and only 43 are finer (5/15). The honey-gold surfaces boast glowing luster and a decent strike, but there are a few too many small contact marks for the near-Gem level. An attractive and scarce coin. NGC ID# 28H4, PCGS# 8877

**1916-S Eagle, Sharp MS63**  
Deep Reddish-Orange Patina

- 3344 1916-S MS63 PCGS.** This Select 1916-S eagle is far finer than the average survivor of this better-date issue. Deep reddish-orange patina complements surfaces that are free of major marks, although a couple of small ticks on Liberty's face and neck are in accord with the grade. The headdress feathers are nicely struck up, as are the high points on the reverse. PCGS reports only 61 at the near-Gem grade level or finer (6/15). NGC ID# 28H7, PCGS# 8880

**1926 Indian Ten, MS66**  
Vibrant Luster and Eye Appeal

- 3345 1926 MS66 NGC.** This otherwise available Philadelphia issue becomes conditionally scarce at the Premium Gem grade level and is unknown finer. The Smithsonian Institution houses four examples of this issue, the finest of which grade MS65, per Garrett and Guth. The 1926 Indian eagle is prone to having small marks on the cheek which limit the grade, and an eye-appealing MS66 coin such as the currently offered example is a significant find. This piece is well-struck, with frosty orange-gold luster and minimal abrasions. Notably appealing and luminous. Census: 51 in 66 (1 in 66+, 2 in 66 ★), 0 finer (5/15). NGC ID# 28H9, PCGS# 8882

**LIBERTY DOUBLE EAGLES**

**1851 Double Eagle, MS62**  
Elusive in Mint State

- 3346 1851 MS62 PCGS.** The 1851 is a high-mintage issue from the inaugural period of the double eagle denomination, but few examples survive in Mint State, and this date is rare finer than MS62. In 1850 and '51, approximately 250,000 ounces of gold (mostly dust) was being mined monthly in California, with limited options available to miners and bankers for converting it into usable coin. Various private coiners and later the United States Assay Office in San Francisco consumed part of the ore, but the majority was either shipped abroad or transported via steamship to New Orleans and Philadelphia for coinage, mostly into double eagles. The San Francisco branch mint was not authorized until mid-1852, and did not become operational until April 1854. Thus, the double eagle mintages at Philadelphia in 1850 through '53 were unusually high, and these dates are among the more plentiful Liberty double eagle issues from the period.

This 1851 representative is well-struck, with softly frosted, green-gold luster. No major abrasions are present, and we instead note just light chatter in the fields that limits the grade. Struck from mildly rotated dies. Population: 64 in 62, 16 finer (5/15). NGC ID# 268H, PCGS# 8904

1854-S Double Eagle, AU53  
Debut San Francisco Twenty

**3347 1854-S AU53 NGC.** Small Date, Large S, Broken A in STATES. The surfaces of this coin show light, even chatter without any offensive abrasions. The design details retain a good appearance despite some wear, with pleasing deeper yellow color. Rotating the coin in-hand reveals remnants of luster hidden in the reverse fields.

This inaugural San Francisco issue had a mintage of 141,468 pieces, a somewhat stunted figure compared to later issues due primarily to two factors: the branch mint did not begin operations until April 1854, and afterward, coinage was frequently interrupted by shortages of the refining acids needed to work raw ore into coinable alloy. Most of those pieces that were struck experienced extensive circulation; even pieces primarily retained in the banking sector of the economy were carelessly handled and traded. Many of the higher-grade pieces known today originated in a cache of about 200 to 300 examples recovered from the wreck of the *S.S. Yankee Blade*. This is an old-time example.

Ex: *Long Beach Signature* (Heritage, 10/2001), lot 8496. NGC ID# 268U, PCGS# 8913

1855-S Double Eagle, MS61  
Frosty Original Luster

**3348 1855-S MS61 NGC.** The second San Francisco double eagle issue, like the first, experienced heavy circulation; Mint State survivors were very rare in any grade until the discovery of nearly 100 Uncirculated examples among the thousands of double eagles recovered from the *S.S. Central America*. Nonetheless, Mint State examples remain scarce and are rarely seen finer than MS62. This MS61 example is quite appealing for the grade, with well-defined motifs and swirling luster that enliven the yellow-orange surfaces. A lack of major abrasions heightens the visual merit and only trivial chatter on the obverse precludes a finer grade. Census: 29 in 61, 49 finer (5/15). NGC ID# 268X, PCGS# 8916

**1856 Double Eagle, AU58**  
**Lustrous, Original Surfaces**

- 3349 1856 AU58 PCGS. CAC.** The 1856 double eagle was not an issue that heavily benefited from shipwreck finds or foreign bank hoards, and Mint State coins rarely appear. This near-Mint example is among the finest typically seen, and as a plus, possesses original olive-gold patina with remnants of luster in the protected areas. Light chatter on each side accompanies the grade, but the design elements are sharply detailed. Population: 17 in 58 (1 in 58+), 27 finer (5/15). NGC ID# 268Y, PCGS# 8917

**1857-S Double Eagle, Vibrant MS63**  
**Ex: S.S. Central America**

- 3350 1857-S MS63 PCGS. CAC. Variety 20C. Ex: S.S. Central America, SSCA 0909.** The Narrow Serif variety, named after the left serif of the U in UNITED. This is one of more than 5,000 examples of this Type One San Francisco issue that were recovered from the S.S. *Central America*, which sank in September 1857 in a hurricane off the coast of the Carolinas. For the grade, this frosty piece is visually impressive, and technical merit is equally high. The bold design elements are illuminated by radiant rose-gold luster that deepens to apricot and peach around the peripheries. NGC ID# 2696, PCGS# 8922

**1859-S Double Eagle, AU55**  
**Elusive Any Finer**

- 3351 1859-S AU55 NGC. CAC.** The 1859-S is a typical double eagle issue of the period, accessible in circulated grades but conditionally scarce in Mint State. This Choice About Uncirculated example retains significant luster in the fields, with well-detailed devices and bright yellow-gold color. A couple old abrasions to the right of the mintmark are the only singularly noticeable surface flaws. There is a faint dash below the 1 in the date, similar to that seen on many 1880-CC Morgan dollars. NGC ID# 269C, PCGS# 8928

**1861 Double Eagle, MS61**  
**Boldly Struck Type One Representative**

- 3352 1861 MS61 PCGS.** The surfaces on this piece show deep orange-gold color and a bold strike, producing full detail on all star radials and most of Liberty's hair and coronet. A mix of small and some larger abrasions on each side determines the grade but does not defeat the considerable eye appeal. The 1861 double eagle had the highest mintage of the denomination until 1904, coming in at nearly 3 million pieces. NGC ID# 269G, PCGS# 8932

**1861 Double Eagle, MS62**  
**Pleasing for the Grade**

- 3353 1861 MS62 PCGS.** Excessive marks and abrasions are always the worry for double eagles in this grade, but the present coin is especially pleasing in that regard. Only minor marks are widely dispersed, and none stand out as particularly bothersome. The strike is needle-sharp on the devices. Cartwheel luster radiates from the centers and imbues the thickly frosted surfaces with a satiny, rich-gold appeal. PCGS shows just 50 examples in a higher grade (5/15). NGC ID# 269G, PCGS# 8932

1864-S Double Eagle, Seldom-Seen MS61  
Excellent Color and Luster

**3354 1864-S MS61 PCGS.** Small S. Even though nearly 800,000 1864-S double eagles were struck, relatively few survive in Mint State; this was an issue that circulated extensively in the hard-money West of the era, like most early S-mint coinage. The average certified survivor is somewhere between XF45 and AU50. An example such as this Mint State coin shows many charms, despite a scattering of small marks and a couple of larger ones on the obverse, with the reverse fairly unabraded. Generous luster runs over both sides, complementing beautiful orange-gold color and a decent strike, save for softness on a couple of the left-side stars on the obverse and the right side of the escutcheon on the reverse. The 1864-S double eagle was virtually unknown in Mint State until the 1993 recovery of the *S.S. Brother Jonathan* steamship, which sank in 1865, yielded a small number of examples. Whether this piece ultimately hails from that source is unknown but certainly possible. Population: 22 in 61, 16 finer (5/15). NGC ID# 269T, PCGS# 8942

1865-S Liberty Twenty, MS63  
Ex: *S.S. Brother Jonathan*

**3355 1865-S MS63 NGC.** Ex: *Brother Jonathan*. The *S.S. Brother Jonathan* sank in late July 1865, off the coast of California near Crescent City. The wreck was located and salvaged in the 1990s, yielding a cache of more than 500 1865-S double eagles, most of which were in Mint State. This Select example bears the frosty, shimmering luster and characteristic eye appeal of the coins recovered from the wreck of the mid-19th century paddle steamer. The devices are well-struck and surface abrasions are minimal. Prior to the discovery of the *S.S. Brother Jonathan* (as well as the *S.S. Republic*, which yielded nearly 250 examples of this issue, also largely in Mint State), the 1865-S double eagle was rare in Uncirculated condition. The Smithsonian Institution contains three examples, all acquired before the shipwreck salvages, the finest of which grades just AU50, per Garrett and Guth. NGC ID# 269V, PCGS# 8944

**1866-S No Motto Twenty, AU50  
Challenging in All Grades**

- 3356 1866-S No Motto AU50 NGC.** The addition of the motto IN GOD WE TRUST to the double eagle in 1866 went into effect in Philadelphia immediately, although the new With Motto tail dies did not arrive at the San Francisco Mint until 120,000 No Motto pieces had already been coined. The latter issue is elusive and highly sought-after in all grades, with most known examples residing at the VF and XF levels; About Uncirculated coins are scarce and Mint State pieces are extremely rare, with the finest grading just MS62. This AU example is well-detailed, with deep olive-gold patina that shows remnants of luster in the protected regions. Scattered abrasions are present, as expected for an S-mint twenty in this grade. Census: 23 in 50, 58 finer (5/15). NGC ID# 269W, PCGS# 8945

**1867-S Twenty Dollar, AU58  
Conditionally Elusive S-Mint**

- 3357 1867-S AU58 PCGS. CAC.** Most 1867-S double eagles were lost to circulation or were melted, and high-end survivors are scarce. Most examples offered at auction are in the lower end of the AU grade range; Mint State coins are rarely seen. This nearly Uncirculated representative displays medium rose-gold luster in the fields, with just trivial friction over the high points of the design. Light, scattered abrasions accompany the grade. Population: 61 in 58, 17 finer (5/15). NGC ID# 26A2, PCGS# 8952

**1867-S Double Eagle, AU58  
Original and Lustrous**

- 3358 1867-S AU58 PCGS. CAC.** The collector who appreciates old-time patina will love this nearly Uncirculated 1867-S twenty. The original surfaces exhibit substantial luster in the protected regions, highlighting olive-gold overtones. A little light chatter does not detract and overall adds to the character of the coin. Moreover, this piece is among the finest 1867-S double eagles typically available, as Mint State coins are rare. Population: 60 in 58, 17 finer (5/15). NGC ID# 26A2, PCGS# 8952

**1867-S Double Eagle  
Lovely, Near-Mint Surfaces**

- 3359 1867-S AU58 NGC. CAC.** The 1867-S follows a general pattern laid out by most San Francisco double eagle issues from this period, being available in the XF and lower AU grade range, but conditionally rare in Mint State. As a result, near-Mint representatives are the finest typically available. This CAC-endorsed example displays attractively original, honey-gold patina with significant luster remaining in the fields. Minimally abraded with just a trace of wear over the high points of the design. NGC shows only 26 Mint State coins finer (5/15). NGC ID# 26A2, PCGS# 8952

**1867-S Liberty Double Eagle, MS61  
Type Two, Mint State Rarity**

**3360 1867-S MS61 PCGS.** Small Squat S. The 920,750-piece mintage suggests that this is an available San Francisco date, and on the one hand, it is. The issue is readily available in AU or lesser grades, with virtually the entire mintage obviously released into the channels of commerce or used in the foreign trade. On the other hand, extremely few Uncirculated examples exist.

This lustrous, piece is a step above most of the known Mint State coins. Original and frosted, the natural orange-gold surfaces display olive-gold accents and cartwheel mint luster. The strike ranges from sharp to bold, although Liberty's hair detail is a bit soft. Fewer marks are seen than typical for the roughly handled San Francisco twenties, with a handful of abrasions on the obverse and two minor grease marks near the coronet. Population: 5 in 61, 4 coins finer, all in MS62 (5/15). NGC ID# 26A2, PCGS# 8952

**1869-S Double Eagle, AU58  
Lustrous, Original Surfaces**

**3361 1869-S AU58 PCGS.** Original mint luster glows in the fields of this near-Mint 1869-S double eagle, while olive overtones denote light friction over the high points of the design. Light, scattered abrasions are not obtrusive. This San Francisco issue is seen with frequency in the lower AU grade range, but less often so in AU58 and scarcely Mint State. NGC ID# 26A6, PCGS# 8956

*San Francisco Mint*

1871-CC Double Eagle, XF40  
The 'Other' Carson City Key

- 3362 1871-CC XF40 PCGS. Variety 1-A.** After the highly heralded 1870-CC, the 1871-CC is the rarest double eagle from the famous Carson City Mint, and is the only other true “stopper” in the Carson City short set. Moreover, the certified population reports are skewed by resubmissions, particularly in the upper AU grades. The typically seen example of this date grades VF or XF at best, and it is a scarce occurrence when an About Uncirculated piece is offered; even the coin in the Smithsonian Institution grades just XF45, per Garrett and Guth. Mint State examples are prohibitively rare, numbering at just eight coins on the certified population reports, including resubmissions. The sole finest is a single MS64 NGC coin — the finest by three grade points — which we auctioned in our April 2008 Central States Signature sale for a record-setting \$414,000.

The present XF coin displays deep orange-gold patina with hints of semiprooflike mirroring evident in the protected peripheral recesses. Minor wear is present, although the motifs are unusually bold for this grade level. An old mark on Liberty’s chin is the only abrasion of note, and the overall eye appeal is beyond what is expected for an XF40 Carson City coin. Population: 20 in 40, 75 finer (5/15).

*From The Twin Peaks Collection. NGC ID# 26AB, PCGS# 8961*

1872-CC Double Eagle, AU55  
Better Carson City Issue

- 3363 1872-CC AU55 NGC. Variety 1-A.** This is a scarcer variety, with the mintmark narrowly spaced and the date set close to the dentils. As a date, the 1872-CC twenty is a better Carson City issue, seldom seen in AU and rare in Mint State. Its low mintage of only 26,900 pieces ensures its scarcity and the issue ranks as one of the semikey dates in the Carson City short set in high grade. This Choice About Uncirculated representative displays only trivial friction over the high points of the design and retains noticeable yellow-gold luster in the recesses. Light, scattered abrasions accompany the grade, but none are individually obtrusive. Overall, this is a pleasing, upper-end example of this elusive Type Two Carson City issue.

*From The Twin Peaks Collection. NGC ID# 26AE, PCGS# 8964*

1873-CC Double Eagle, AU53  
Smooth Surfaces

**3364 1873-CC AU53 NGC. Variety 1-A.** Doug Winter notes a few small hoards of this issue that turned up in the 1990s, although the high-grade scarcity of the date was not significantly affected. Most examples of the 1873-CC double eagle grade only VF or XF; AU coins are scarce and Mint State pieces are rarely seen. The sole finest example known is a single MS63 PCGS coin, and only two MS62 pieces are seen on the certified population reports; this substantiates Winter's claim, stating: "I have seen only two that I would grade higher than Mint State-60." Even the Smithsonian example grades just XF40, per Garrett and Guth.

This still-lustrous AU representative displays bright yellow-gold surfaces with few of the significant abrasions that typically mar the surfaces of gold coins in this grade range. The strike is well-executed and wear is trivial.

From The Twin Peaks Collection. NGC ID# 26AJ, PCGS# 8968

1874 Double Eagle, Frosty MS62  
Rarely Seen This Fine

**3365 1874 MS62 PCGS.** In Mint State, the 1874 double eagle is seldom available, and most such coins are heavily abraded, grading no finer than MS61; finer pieces are rare and anything better than MS62 is exceedingly so. The coin in the Smithsonian Institution grades just AU55, per Garrett and Guth. The present piece is attractively frosty with original yellow-gold luster and well-defined motifs. Grade-limiting abrasions are primarily restricted to the obverse, the most noticeable being a vertical cut on Liberty's throat. The rarity of finer examples makes this piece an ideal acquisition for the quality-seeker. Population: 33 in 62, 7 finer (5/15). NGC ID# 26AN, PCGS# 8970

---

1874-CC Liberty Twenty, AU53  
Original Surfaces

3366 1874-CC AU53 PCGS. Variety 4-A. Original surfaces yield some yellow-gold luster in the fields with deeper apricot-gold hues encircling the periphery. This piece is only minimally worn, but shows moderate abrasions over each side, as expected for the grade. The 1874-CC double eagle is marginally available in AU grades, but Mint State examples are scarce. NGC ID# 26AP, PCGS# 8971

---

1875-CC Double Eagle, AU58  
Pleasing for the Grade

3367 1875-CC AU58 PCGS. Variety 1-A. For a Carson City twenty in AU condition, this near-Mint 1875-CC is notably eye-appealing. The wheat-gold surfaces show soft, frosty luster which reveals only light abrasions, none of which stand out to the unaided eye. The coin is well-struck and the design elements are only slightly worn. An excellent Carson City type coin. NGC ID# 26AT, PCGS# 8974

---

1875-CC Liberty Twenty, MS62  
Vibrant, Frosty Luster

3368 1875-CC MS62 PCGS. Variety 1-B. Double eagles from the Carson City Mint form a popular, heavily collected subset within the Liberty Head series, similar to that formed by the Morgan silver dollars from this facility. This short subset contains only 19 individual issues, including one of the greatest rarities of all United States gold coins, the 1870-CC. By contrast, the 1875-CC represents the other end of the spectrum, a date that is usually obtainable, albeit for a price. However, most known examples grade only in the XF and AU range; Mint State coins are seldom encountered and are genuinely rare finer than MS62, the grade of the currently offered piece. The Smithsonian Institution contains three representatives, the finest of which is AU53, per Garrett and Guth. This coin is sharply struck and displays vibrant orange-gold luster over frosty surfaces. Light, scattered abrasions limit the grade, but none overly hinder the eye appeal. PCGS has seen only 30 pieces numerically finer (5/15).  
*From The Twin Peaks Collection. NGC ID# 26AT, PCGS# 8974*

**1875-S Double Eagle, Vibrant MS63+  
Notably Rare This Fine**

- 3369 1875-S MS63+ NGC. CAC.** A handful of 1875-S double eagles discovered in the Saddle Ridge Hoard essentially had no effect on the scarcity of this issue in the finer Mint State grades. From a mintage more than 1.2 million pieces, only a matter of several hundred coins are known in Mint State, almost all of which grade just MS60 to MS62. Many of these survived in overseas hoards, and their bagmarked condition is attributed to poor storage and having been frequent jostled in loose sacks. Pieces grading MS63 or finer are rare. Out of nine coins in the Smithsonian Institution, the finest grade just MS61, per Garrett and Guth. This Plus-designated Select representative is a visual treat, displaying razor-sharp motifs and vibrantly frosty, wheat-gold luster. A few light, scattered grazes determine the grade, but are far less significant than the deep abrasions seen on lower-grade pieces. The CAC green label confirms the outstanding quality. Census: 14 in 63 (3 in 63+), 2 finer (5/15). NGC ID# 26AU, PCGS# 8975

**1876-CC Twenty Dollar, AU55  
Popular Carson City Issue**

- 3370 1876-CC AU55 PCGS. Variety 2-C.** The 1876-CC double eagle is seen with mild frequency in circulated grades, but the scarcity of Mint State examples heightens demand for higher-end AU representatives. This Choice AU example displays smooth, yellow-gold surfaces with hints of luster in the protected regions. Well-struck with just trivial high-point wear.  
*From The Twin Peaks Collection. NGC ID# 26AW, PCGS# 8977*

**1876-CC Double Eagle, AU58  
Some Luster Remaining**

- 3371 1876-CC AU58 PCGS. Variety 2-C.** There is partial semiprooflike mirroring in the fields of this near-Mint 1876-CC double eagle, accentuating the medium yellow-gold luster that remains around the peripheries. A few coppery-red allow spots are located in the recesses of the well-defined relief elements. Light, scattered abrasions do not detract. This issue is one of the more available Carson City twenties, ideal for the collector seeking a single piece from this mint. NGC ID# 26AW, PCGS# 8977

**1878-CC Double Eagle, XF40  
Difficult Carson City Issue**

- 3372 1878-CC XF40 PCGS. Variety 1-A.** All Carson City double eagles are scarce relative to their San Francisco counterparts, but the 1878-CC is much more elusive than its 1874-CC, 1875-CC, and 1876-CC predecessors. This example has ample luster, particularly on the reverse, and is problem-free aside from light obverse hairlines and a pair of thin marks near obverse star 13.  
*Ex: FUN Signature (Heritage, 7/2010), lot 4858.*  
*From The Twin Peaks Collection. NGC ID# 26B4, PCGS# 8986*

**1879-CC Double Eagle, Sharp AU55  
Semiprooflike Fields, Warm Color**

- 3373 1879-CC AU55 NGC. Variety 1-A.** An early die state example, with strong tailfeathers on the eagle and substantial semiprooflike mirroring in the fields. The design elements are sharply defined and exhibit little friction; only light chatter overall attests to brief circulation, and warm, straw-gold luster delivers a high degree of eye appeal.

The 1879-CC is a better date in the Carson City short set, defined by a low mintage of 10,708 coins and a high attrition rate. This issue is typically seen only in VF or XF grades, and occasionally in the lower AU range. Choice AU examples are scarce, and this date becomes genuinely rare on the plus side of the Mint State threshold. A single coin in the Smithsonian Institution grades just XF40, per Garrett and Guth. The present example is undeniably one of the more appealing representatives known.  
*From The Twin Peaks Collection. NGC ID# 26B7, PCGS# 8989*

**1882-CC Double Eagle, Lustrous AU55**

- 3374 1882-CC AU55 NGC. Variety 1-A.** A touch of high-point wear precludes Mint State status on this Carson City type coin, but leaves significant honey-gold luster in the fields. The design elements are well-struck and retain notable sharpness, while light chatter in the fields is to be expected at this grade level. The 1882-CC had a moderately low mintage of only 39,140 pieces.  
*From The Twin Peaks Collection. NGC ID# 26BF, PCGS# 8997*

**1882-CC Double Eagle, AU58  
Semiprooflike Reverse**

- 3375 1882-CC AU58 PCGS. Variety 1-A.** A scarce variety of this popular Carson City issue with the first C in the mintmark entered slightly higher than the second. This Borderline Uncirculated 1882-CC twenty has a distinct two-sided appearance characterized by frosty wheat-gold luster on the obverse and semiprooflike fields on the reverse. The strike is sharp and wear is trivial. Subtle machine doubling is seen on the peripheral reverse legends. NGC ID# 26BF, PCGS# 8997

**1883-S Double Eagle, MS63  
Rarely Encountered Finer**

- 3376 1883-S MS63 PCGS.** As no circulation strike double eagles were coined in Philadelphia in 1883, and the Carson City issue is scarce in Mint State, the 1883-S is the ideal candidate for date representation. This Select example is among the finer-known survivors, displaying sharp design elements and radiant yellow-gold luster, with minimal surface contact. PCGS lists only 13 numerically finer representatives (5/15). NGC ID# 26BJ, PCGS# 9000

---

1890-CC Twenty Dollar, AU53

- 3377** 1890-CC AU53 PCGS. Variety 1-A. A honey-gold double eagle with partly lustrous and moderately abraded fields and devices. The eye appeal is significant. The usually encountered late, lapped die state with incomplete tail feathers. The 1890-CC is often selected to represent the denomination within Carson City type sets. NGC ID# 26BY, PCGS# 9014

---

1890-CC Double Eagle, MS60  
Semireflective Fields

- 3378** 1890-CC MS60 NGC. Variety 1-A. This is a late die state example, showing the eagle's outer tailfeathers partially effaced by die lapping. The design elements are sharply rendered and the surfaces display vibrant green-gold luster. Scattered abrasions determine the grade, although this is a minor complaint on a Mint State Carson City twenty.  
*From The Twin Peaks Collection.* NGC ID# 26BY, PCGS# 9014

---

1890-S Double Eagle, MS64  
Ex: Saddle Ridge Hoard

- 3379** 1890-S Saddle Ridge Hoard MS64 PCGS. A well struck and flashy sun-gold near-Gem that boasts smooth fields and a precise strike. The cheek exhibits minor contact. The Saddle Ridge Hoard was discovered in early 2013 buried in eight rusted tin cans on a California ranch, and marketed as "the greatest buried treasure find in U.S. history." The 1890-S was an important conditional rarity at the MS64 level prior to encapsulation of the holding. The hoard contained 10 examples as MS64, another 10 as MS64+, and 14 in higher grades. Included with the lot is a wooden gray Saddle Ridge box and a booklet entitled *The Saddle Ridge Hoard Treasure*. PCGS# 109015 Base PCGS# 9015
-

**1891-CC Double Eagle, AU55  
Only 5,000 Coins Struck**

**3380 1891-CC AU55 NGC. Variety 1-A.** The 1891-CC double eagle is an enticing Carson City issue with a scant mintage of only 5,000 coins, but it is not so rare as to be uncollectible. As with most Western branch mint issues of this period, some 1891-CC twenties were exported for trade, and the occasional small quantity has surfaced in that past few decades. Most known examples grade in the XF to AU range; very few are known in lower grades, as the issue never circulated extensively, and Mint State examples are rare, with almost all showing moderate abrasions.

This Choice AU representative displays medium yellow-gold patina with significant mint luster remaining in the protected regions of the fields. Sharply struck design elements exhibit only trivial high-point friction, while a scattering of minor abrasions are not unexpected for the grade. NGC ID# 26C3, PCGS# 9017

**1891-S Double Eagle, MS64  
Nearly Unobtainable Any Finer  
Scarce Minute S Mintmark**

**3381 1891-S Minute S, MS64 NGC. CAC.** The Saddle Ridge hoard contained 23 examples of this San Francisco date, but all of the coins were in lesser grades, so the issue remains conditionally scarce in near-Gem state and rare any finer. This example is frosty and lustrous with olive-gold accents over medium-gold surfaces. Minor marks and scuffs are widely scattered except for a series of tiny ticks in front of Liberty's nose, visible with a glass. The coin is fully struck on the stars, Liberty's hair, and the reverse elements (except for the scarce Minute S mintmark, which is filled as always). Census: 61 in 64 (1 in 64+), 2 finer (5/15). NGC ID# 26C4, PCGS# 9018

**1892 Double Eagle, Unc Details  
Scarce Philadelphia Issue**

**3382 1892 — Improperly Cleaned — NGC Details. Unc.** This is a popular Philadelphia issue with an enticingly low mintage of only 4,430 pieces. Examples are scarce in all grades and Mint State pieces are genuinely rare. This is an unworn, yellow-gold representative with a bright patina imparted by light cleaning. Scattered abrasions appear on the sharply struck devices and to a lesser extent in the fields. NGC ID# 26C5, PCGS# 9019

---

1892-CC Double Eagle, AU53  
Lustrous and Colorful

- 3383** 1892-CC AU53 NGC. The reverse has a single small splash of charcoal toning. Otherwise there are no distracting imperfections on either side. Considerable luster is still present in the protected areas. This wonderful piece has attractive light yellow surfaces with iridescent toning splashes.  
From *The Twin Peaks Collection*. NGC ID# 26C6, PCGS# 9020

---

1892-CC Double Eagle, AU58  
Better Carson City Date

- 3384** 1892-CC AU58 PCGS Secure. CAC. Variety 1-A. The 1892-CC double eagle is a challenging Carson City issue, fueled by a low mintage of only 27,265 pieces. Mint State survivors are scarce and the single coin in the Smithsonian Institution grades just AU50, per Garrett and Guth. This CAC-approved near-Mint example displays original olive-gold patina with warm luster remaining in the fields. The design elements are sharply rendered and there is only trivial high-point friction. NGC ID# 26C6, PCGS# 9020

---

1893-CC Double Eagle, MS62  
Final Carson City Issue

- 3385** 1893-CC MS62 PCGS. A popular double eagle issue, struck during the final year of operation at the Carson City Mint. This issue is not noticeably better-made than preceding dates, and it is possible that mint employees were not aware that this would be the final issue produced. Small quantities of Mint State coins survived by chance, but no high-end examples are deliberately saved. By the time collectors began pursuing double eagles on a date and mintmark avenue, scattered MS62-quality coins were usually the finest obtainable.

This lovely example has frosty light yellow luster with traces of pink patina on each side. The surfaces are lightly abraded, consistent with the grade, and the reverse has a small dark stain on the scroll near the final A in AMERICA. PCGS has seen only 21 numerically finer submissions (5/15).

Ex: *Houston Signature* (Heritage, 12/2008), lot 2530.

From *The Twin Peaks Collection*. NGC ID# 26C9, PCGS# 9023

---

**1898-S Liberty Twenty, MS65  
One Finer Coin at PCGS**

- 3386 1898-S MS65 PCGS.** Plentiful up to and including Choice condition, the 1898-S becomes more challenging at the Gem grade level. PCGS shows a staggering 92% decrease in the certified population from MS64 to MS65. Finer coins are extremely rare. Rose accents complement peach-gold color overall. Coruscating mint frost cartwheels over each side, and the strike is typically strong. High-end for the grade, there are just a few wispy marks in the left obverse field that prevent a Premium Gem assessment. PCGS reports one numerically finer submission (6/15). NGC ID# 26CL, PCGS# 9034

**1905 Liberty Twenty, MS62  
Better Philadelphia Issue**

- 3387 1905 MS62 NGC.** A better date, the 1905 double eagle had a limited mintage of only 58,919 pieces, few of which survive in pleasing Mint State condition. This MS62 example is mildly abraded, but no singularly significant distractions are observed. The coin is sharply struck and displays frosty yellow-gold luster. Only 19 coins are numerically finer at NGC (5/15). NGC ID# 26D2, PCGS# 9047

**1905 Twenty Dollar, MS62  
Upper-End for the Grade**

- 3388 1905 MS62 PCGS.** The 1905 double eagle claims the second-lowest mintage of the 20th century Liberty double eagles, just 58,919 pieces. This Mint State example is well-struck, with glowing orange-gold luster and fewer major abrasions than are expected for the grade. PCGS rates 60 pieces finer (5/15). NGC ID# 26D2, PCGS# 9047

**1905-S Twenty Dollar, MS64+  
Bountiful Luster**

- 3389 1905-S MS64+ PCGS.** Bountiful luster flows over orange-gold surfaces that are well-struck and essentially free of mentionable marks, save for one scrape left of the mintmark on the reverse. This lovely S-mint twenty is appealing throughout, showing top-notch eye appeal that puts it close to the Gem grade level. Population: 15 in 64+, 12 finer (6/15). NGC ID# 26D3, PCGS# 9048

**HIGH RELIEF DOUBLE EAGLE**

**MCMVII High Relief Twenty  
Wire Rim, Uncirculated Details**

- 3390 1907 High Relief, Wire Rim — Cleaning — PCGS Genuine. Unc Details.** A sharply struck and satiny lemon-gold representative of the famous and low mintage High Relief type. Mildly bright from a cleaning, and the left obverse field is lightly abraded. A lint mark is noted through the first M in MCMVII. Devoid of wear, and always in demand for its scarcity and numismatic significance. NGC ID# 26F2, PCGS# 9135

**SAINT-GAUDENS DOUBLE EAGLES**

**1908-S Twenty Dollar, AU50  
Low-Mintage Saint-Gaudens Issue**

- 3391 1908-S AU50 NGC.** The 1908-S issue had a memorably low production figure of only 22,000 coins, a remarkably low number for a series as popular as the Saint-Gaudens twenties. This collectible example shows light wear on the orange-gold surfaces with scattered moderate abrasions and a couple of heavier ones in the rays on either side of Liberty. The reverse is nicely preserved and problem-free, and both sides are well-struck. NGC ID# 26FA, PCGS# 9149

**1908-S Twenty Dollar, AU53  
Low-Mintage S-Mint Issue**

**3392 1908-S AU53 PCGS.** The San Francisco Mint managed a double eagle production of only 22,000 coins in 1908, making this issue scarce in Mint State and a popular date in any grade. This AU representative displays bright yellow-gold surfaces with satiny luster in the fields. Minor wear over the high points of the eagle and Liberty's figure does not impede the detail. NGC ID# 26FA, PCGS# 9149

**1908-S Twenty Dollar, Sharp AU58**

**3393 1908-S AU58 NGC.** This near-Mint State 1908-S twenty is a tad above the average certified grade for this low-mintage issue of only 22,000 coins, but it shows to good advantage the satiny luster and bold strike the issue is well-known for. One noticeable hit appears on Liberty's lower-left (facing) thigh, but the orange-red surfaces are commendable throughout and highly attractive. NGC ID# 26FA, PCGS# 9149

**1909/8 Double Eagle, MS63  
Sole Series Overdate**

**3394 1909/8 FS-301 MS63 PCGS.** The 1909/8 Saint-Gaudens double eagle is a widely popular *Guide Book* variety, the only overdate in the series. This Select example is sharply struck, with satiny orange-gold luster and minimal abrasions — only light contact on the high points of Liberty's figure limits the grade. Finer representatives are infrequently seen. NGC ID# 26FC, PCGS# 9151

**1909/8 Double Eagle, MS64+  
Conditionally Scarce**

**3395 1909/8 FS-301, MS64+ PCGS. CAC.** Many of the Mint State survivors of this *Guide Book* variety originated in European hoards. The 1909/8 is the only overdate in the Saint-Gaudens double eagle series, and also the only major variety therein. Examples are usually available in grades through MS63, but the certified population declines in MS64 and Gems are rare. This Plus-graded near-Gem is well-struck, with satiny apricot-gold luster. Contact on the high points of the figure of Liberty precludes a full Gem grade, but the fields are pleasantly well-preserved. PCGS lists only 25 finer representatives (6/15). NGC ID# 26FC, PCGS# 9151

**1909 Double Eagle, Sharp MS64  
Infrequently Seen Any Finer**

**3396 1909 MS64 PCGS.** Very few 1909 double eagles can be located above the near-Gem level, as the two major services have seen only 35 examples numerically finer (6/15). Frosty yellow-gold luster cascades over the yellow-gold surfaces of this sharply struck example. A few small marks determine the grade, the most noticeable being a couple of grazes below the eagle's beak. NGC ID# 26FB, PCGS# 9150

**1909-D Double Eagle, MS64+  
Rarely Encountered Finer**

**3397 1909-D MS64+ PCGS.** The popularity of this early Denver issue is heightened by a combination of a low mintage (just 52,500 coins), and significant scarcity in the finer Mint State grades. Most Uncirculated coins known originated in European hoards, where they waited out the gold melts of the mid-1930s. Yet, the significant majority of these are heavily abraded, having been subject to poor storage in loose bags. Even the coin in the Smithsonian Institution grades just MS62, per Garrett and Guth. This Plus-graded Choice example is among the finest obtainable by most collectors. The design elements are sharp and the satiny surfaces display appealing orange-gold luster. Light, scattered ticks limit the grade, but do not intrude upon the eye appeal. PCGS lists 24 numerically finer representatives (5/15). NGC ID# 26FD, PCGS# 9152

**1909-S Double Eagle, MS66  
Conditionally Rare**

**3398 1909-S MS66 PCGS.** The 1909-S Saint-Gaudens double eagle stands out from its peers with a mintage in excess of 2.7 million pieces, and the novice may not be aware that this issue is actually quite rare in high grade. In MS66, the 1909-S twenty is about on par with the Philadelphia and Denver issues of this period in regards to rarity, and the date is almost unknown finer. This example is boldly struck on the eagle and Liberty's figure, with vibrant wheat-gold luster that is largely devoid of mentionable abrasions — only a few light contact marks on the high points of the motifs preclude a Superb Gem grade. This is a rare opportunity to acquire such a high-end example of this early San Francisco issue. Population: 11 in 66, 1 finer (5/15). NGC ID# 26FE, PCGS# 9153

**1913 Double Eagle, MS64**  
**Rich, Satiny Luster**

- 3399 1913 MS64 PCGS. CAC.** This satiny 1913 twenty is strong for the grade, with the only mentionable abrasions restricted to the high points of Liberty's figure. Pleasantly clean fields display rich apricot-gold luster. The 1913 is a notable condition rarity above the Choice grade level, and only 19 MS64 examples have been awarded a CAC endorsement. The Smithsonian Institution contains two pieces, the finest of which grades just MS62, per Garrett and Guth. PCGS shows only 13 examples numerically finer than the present coin (5/15). NGC ID# 26FN, PCGS# 9161

**1922-S Double Eagle, MS64**  
**Rare Any Finer**

- 3400 1922-S MS64 PCGS.** The 2.65 million-piece mintage of the 1922-S double eagle suffered tremendously from the massive meltings of the 1930s, according to Garrett and Guth. The peach-gold surfaces of this Choice example glimmer with traces of mint-green that light up satiny luster. Well-defined even on the periphery, unusual for the issue.  
*Ex: Dallas Signature (Heritage, 4/2007), lot 2149; The Dr. Robert S. Wilson Collection (Heritage, 10/2012), lot 6401. NGC ID# 26G4, PCGS# 9174*

**1922-S Double Eagle, MS64+**  
**Seldom Seen in Finer Grades**

- 3401 1922-S MS64+ PCGS.** Flowing golden luster and minimal marks separate this piece from most of its surviving cohort. The surfaces are uniformly sharply struck, and there are only minor ticks scattered about. The 1922-S is a former great rarity, and even today is remains popular and scarce in high grades such as this. Population: 38 in 64+, 16 finer (6/15). NGC ID# 26G4, PCGS# 9174

**1928 Twenty Dollar, MS66+**  
**Mint-Fresh Appeal**

- 3402 1928 MS66+ PCGS. CAC.** For type purposes, this Premium Gem 1928 Saint offers substantial visual merit. As affirmed by the Plus designation, the frosty, mint-fresh surfaces are almost devoid of any noticeable abrasions, with only a few tiny ticks on the high points of the figure limiting the grade. Each side shows a radiant blend of rose, wheat, and lilac-gold hues, and the coin's outstanding quality even passes close scrutiny with a loupe. The 1928 is the final relatively available issue in the Saint-Gaudens double eagle series, but is seldom seen finer than this piece. NGC ID# 26GK, PCGS# 9189

**COMMEMORATIVE SILVER**

**1893 Isabella Quarter, MS66**  
**Potent Luster, Sharp Strike**

- 3403 1893 Isabella Quarter MS66 PCGS. CAC.** Potent luster illuminates this virtually immaculate Premium Gem. Narrow bands of blue-green and tobacco-brown endow the borders while the remainder of the coin remains stone-white. A sharply struck and desirable example of this early and conditionally rare commemorative type. Housed in a green label holder. NGC ID# 28HR, PCGS# 9220

**1893 Isabella Quarter, Gold-Toned PR64  
Seldom Seen in Proof Format**

- 3404 1893 Isabella Quarter PR64 NGC.** The Mint State Isabella quarters are available and appear to have been well-handled at the Columbian Exposition where they debuted — unlike their half dollar counterparts, many of which were blatantly mishandled. Mint State Isabella quarters can be had for a price up to MS67 and, occasionally, MS68. But few examples of the Isabella quarter are certified as proofs — currently around four dozen at NGC and a meager handful at PCGS. This well-mirrored near-Gem proof NGC example shows high, squared-off inner rims and uniformly sharp details throughout, on surfaces lightly tipped in gold and grayish-green. The mirrored triangular field left of the staff on the reverse is also a diagnostic. A prize for an advanced silver commemorative collector. Census: 17 in PR64, 12 finer (6/15). PCGS# 9221

**1900 Lafayette Dollar, MS65  
A Highly Appealing Type Coin**

- 3405 1900 Lafayette Dollar MS65 PCGS. DuVall 3-D.** This is a scarcer Lafayette dollar variety, identified in part by recutting on the AT in STATES. Overall, this Gem is well-struck and displays soft, satiny luster. Lavender-gold toning is almost swallowed up by deeper orange-gold overtones in the central regions, while olive and mint-gold peripheral hues are left undisturbed. A couple small ticks on Washington's forehead are the only abrasions of note. NGC ID# 28N8, PCGS# 9222

**1921 Alabama 2x2 Half, MS66+  
Lightly Toned**

- 3406 1921 Alabama 2x2 MS66+ PCGS. CAC.** Overall, the 2x2 Alabama Centennial half dollar and is slightly scarcer than its "plain" counterpart, although the two varieties are relatively similar in rarity in MS66 and finer grades. This Plus-designated piece shows sharp details and satiny luster. Both sides exhibit blended lilac-gray and olive-gold toning, with a few trivial grazes on the obverse portraits being all that limit the grade. PCGS has seen seven finer examples (6/15). NGC ID# 28HS, PCGS# 9225

**1922 Grant Half Dollar, MS65  
Scarcer With Star Variant**

- 3407 1922 Grant With Star MS65 PCGS.** This commemorative issue, struck to recognize the centennial of Ulysses S. Grant's birth year, saw the production of two distinct varieties: the With Star and the No Star. This type, with an incuse star added to the obverse design, directly above the N in GRANT, had a minuscule distribution of 4,256 pieces and is much scarcer than its No Star counterpart, distributed to the tune of 67,405 coins. This untuned Gem example is boldly rendered and highly lustrous, with typical swirling die polish lines noted in the obverse fields. Both sides are blemish-free. NGC ID# 28KC, PCGS# 9307

1922 Grant Memorial Half, MS66+  
Popular With Star Variant

1922 With Star Grant Half, MS66+  
Conditionally Rare Key Commemorative

**3408 1922 Grant With Star MS66+ PCGS. CAC.** The Grant Memorial half dollar was coined in two different varieties, including those with a small incuse star in the right obverse fields and those without this star. The purpose of the star, if there initially was one, is generally agreed to have been purely for market gain, a tactic thought to boost sales by forcing collectors to purchase two coins, rather than one. Both the With Star and No Star halves were initially offered at a cost of \$1 each, although in December 1922, the price for the No Star variant fell to 75 cents, and that of the With Star variety rose to \$1.50. This reflected the lower available supply of the With Star issue.

By January 1st, when sales were discontinued, only 4,250 With Star examples had been distributed (not counting six additional assay coins), while the No Star version had been distributed to the extent of 67,350 coins (plus 55 assay pieces). As a result, the With Star Grant Memorial half is significantly scarcer than its No Star counterpart today, and high-end examples are scarcely seen. This Plus-graded Premium Gem displays rich, satiny luster beneath dusky lavender-gray, ice-blue, and amber-brown toning, blended over each side. The high point of Grants head is a trifle soft, but the eye appeal is unhindered. Population: 40 in 66 (7 in 66+), 5 finer (5/15). NGC ID# 28KC, PCGS# 9307

**3409 1922 Grant With Star MS66+ PCGS. CAC.** Overall, the With Star Grant Memorial half dollar is about three times scarcer than its No Star counterpart, but this gap widens even further in the finer levels of Mint State. The With Star issue is scarce in MS66, and anything finer is genuinely rare. In his *Commemorative Encyclopedia*, Dave Bowers calls this issue the rarest commemorative half dollar in Mint State. Coinage totaled only 5,000 pieces (plus six additional coins for assay purposes), but 750 pieces were unsold and later melted. The net distribution of 4,256 coins, including assay pieces, is lower than that of any preceding classic commemorative half dollar. This Plus-graded Premium Gem is carefully preserved with satiny luster that shows the usual faint die striations in the fields. Pale champagne and lavender-blue hues encompass much of each side, while deep olive and sun-gold overtones appear around the peripheries. The strike is a trifle soft on Grant's hair and the tree trunk to the left of the cottage door. Population: 40 in 66 (7 in 66+), 5 finer (6/15). NGC ID# 28KC, PCGS# 9307

**1935 Hudson Half Dollar, Rare MS67  
Vivid Border Toning**

- 3410 1935 Hudson MS67 PCGS.** Struck to commemorate the 150th anniversary of the founding of Hudson, New York, the Hudson Sesquicentennial half dollar was fairly well-received by collectors, despite the moderate obscurity of the event celebrated. The initial purchase price from the Mint was \$1 per coin (plus postage), but this did not last long as a sellout occurred just four days after the opening of sales. Less than a month later, examples could be purchased from dealers for twice their original Mint cost.

Congress authorized the coinage of 10,000 examples, all of which were struck, plus eight additional pieces for assay purposes. All were sold. Surviving examples are moderately available in grades through MS65, but the population thins at MS66 and anything finer is a notable rarity. This Superb Gem is among the finest known. Well-struck and satiny, the central regions show dusky champagne-gray color, while the peripheries show vivid crimson, amber, and forest-green toning from the original cardboard distribution holder. Population: 14 in 67 (1 in 67+), 0 finer (6/15). NGC ID# 28KE, PCGS# 9312

**1925 Lexington-Concord Half, MS67  
Revolutionary War Commemorative**

- 3411 1925 Lexington MS67 PCGS.** The 150th anniversary of the battles of Lexington and Concord, fought in 1775, was the occasion for this commemorative half dollar. Examples are usually available through MS66, but Superb Gems such as the present coin are rare. This piece is sharply rendered. Both sides show dusky champagne toning and satiny luster. Population: 22 in 67 (3 in 67+), 1 finer (6/15). NGC ID# 28KK, PCGS# 9318

**1926 Sesquicentennial Half Dollar, MS66  
Among the Finest Certified**

- 3412 1926 Sesquicentennial MS66 NGC.** An uncommonly well-produced example of this conditionally rare half dollar, which is among the most challenging commemoratives to find in Premium Gem condition. The flatness of John R. Sinnock's design at the centers resulted in difficult execution of the strike, as did the legends climbing the dishd walls of the rims. More than 85% of the 1 million-piece mintage was melted as unsold. This excellent example is both attractive and well-struck for the issue, with light, golden-lilac toning and glimpses of iridescence on the margins. Washington's cheek and hair are well brought up, and the Liberty Bell is bold. No numerically finer examples have been seen by either service. Census: 21 in 66 (6 in 66 ★, 1 in 66+★), 0 finer (5/15). NGC ID# 28LM, PCGS# 9374

**1936 Texas Half Dollar, MS68  
Bold Peripheral Toning**

- 3413 1936 Texas MS68 PCGS.** The 1936 Texas Independence Centennial half dollar is typically only available in MS66 or lower grades, although the occasional MS67 piece is offered. This MS68 coin ranks with just eight others as the finest at PCGS (5/15), and is an important condition rarity for the classic commemorative enthusiast. The strike is well-executed and the overall surface quality is excellent. Much of each side displays satiny champagne-gray toning, although the right-hand peripheries exhibit deeper amber, bronze, and olive-green. NGC ID# 28LU, PCGS# 9386

**1946-D Booker T. Washington Half, MS68 ★  
Beautiful Glowing Patina**

- 3414** 1946-D Booker T. Washington MS68 ★ NGC. CAC. This is an outstanding, Registry-quality Booker T. Washington half with bold forest-green, lemon-gold, and amber-red toning on the obverse and lighter lilac-gray and champagne over much of the reverse. The strike is sharp and a few trivial marks appear on the cheek, as usual. This piece is one of only eight MS68 examples seen by NGC (four MS68 ★, one MS68+), with a single MS69 ★ finer; the finest at PCGS are a few MS67+ coins (6/15). NGC ID# 28M8, PCGS# 9405

**1947 Booker T. Washington Half, MS67  
Among the Finest Certified**

- 3415** 1947 Booker T. Washington MS67 PCGS. CAC. The 1947 Booker T. Washington half dollar is moderately plentiful in the absolute sense, but its availability plummets considerably at the MS67 numeric level, and none are known finer. This example displays radiant mint luster and sharply rendered design elements. The obverse is attractively mottled with amber-red and forest-green toning, while the reverse displays olive and russet peripheral hues around a pale champagne center. Population: 8 in 67, 0 finer (5/15). NGC ID# 28MA, PCGS# 9408

**1952-S Washington-Carver Half, MS67+  
Conditionally Rare**

- 3416** 1952-S Washington-Carver MS67+ NGC. The 1952-S Washington-Carver half dollar had a distribution of 8,000 pieces (plus six coins for assay purposes), these being sold in three-coin sets along with an example each of the Philadelphia and Denver issues of this year. This Plus-graded Superb Gem is radiantly lustrous beneath a blanket of olive-gold, violet-gray, and sea-green toning. Well-struck and carefully preserved. Census: 15 in 67 (2 in 67+, 3 in 67 ★), 1 finer (6/15). NGC ID# 28MX, PCGS# 9436

**COMMEMORATIVE GOLD**

**1903 Jefferson Gold Dollar, MS67  
Louisiana Purchase Exposition Memento**

- 3417** 1903 Louisiana Purchase, Jefferson, MS67 PCGS. CAC. Exceptional surface quality on this frosty Louisiana Purchase, Jefferson Head gold dollar accentuates the intermingled rose and orange-gold hues that blanket each side. The HA in PURCHASE is a little soft, but the design elements are otherwise bold. Housed in a green label holder. Population: 94 in 67 (2 in 67+), 0 finer (5/15). NGC ID# 26HA, PCGS# 7443

**1904 Lewis and Clark Gold Dollar, MS66+  
Exceptional Visual Appeal, Scarce Any Finer**

- 3418** 1904 Lewis and Clark MS66+ NGC. CAC. This is an unusually radiant, nearly flawless example of this popular early gold commemorative. Rich golden luster engulfs each side, with razor-sharp design definition throughout. A touch of the usual surface roughness is seen in the fields around the border legends, but this is undetectable to the naked eye. NGC has encapsulated only 28 numerically finer representatives (6/15). NGC ID# 26HC, PCGS# 7447

1915-S Pan-Pac Two and a Half, MS67  
Tied for Finest at PCGS

**3419** 1915-S Panama-Pacific Quarter Eagle MS67 PCGS. The 1915-S Panama-Pacific quarter eagle is popular on at least two fronts: One is its unusual design; another is its reputation as the largest gold commemorative from the Panama-Pacific Exposition that most collectors can actually *afford*. The massive fifty dollar octagonal and round pieces are simply out of reach of most collectors. The present Superb Gem PCGS quarter eagle shows the swirling mint luster that the issue is well-known for on surfaces that are free of any mentionable contact; a stray luster graze or two in the fields is consistent with the grade. A small spot of copper-orange color appears in the second O in EXPOSITION. Population: 38 in 67, 0 finer (5/15). NGC ID# 26HK, PCGS# 7450

---

1915-S Panama-Pacific Fifty Dollar, MS61  
Commemorative Token of Wisdom and Industry

3420 1915-S Panama-Pacific 50 Dollar Round MS61 NGC.

Neoclassicism was a dominant influence on many United States coin designs, particularly in the decades immediately following the turn of the 20th century, but perhaps no single design was as bold in this regard as that of the Panama-Pacific fifty dollar commemoratives, struck in San Francisco in 1915. Robert Aitken's representation of the Roman goddess Minerva and an owl was strongly symbolic of America's outlook on the triumph of completing the Panama Canal and the advancement in industry which it represented, as well as the rebirth of San Francisco following the devastating earthquake of 1906. Minerva, the Roman equivalent to the Greek goddess Athena, was the goddess of wisdom, arts, trade, and strategy, or, per the official description, "The Goddess of Wisdom, Skill, Contemplation, Spinning, Weaving and of Agriculture and Horticulture." The war strategist aspect of Athena was not as heavily worshipped in Roman mythology as it was in Greek, although Minerva's typical depiction with a shield and/or a spear characterizes the protective aspect of her nature. Whether or not an intention of Aitken's at the time, this symbolism was well-suited for the period leading up to America's entrance into the World War.

Minerva's consistent association with an owl identifies her most strongly with the quality of wisdom, which was intended to represent the Panama-Pacific International Exposition's theme of wisdom and industry, or, in the words of Aitken, to express "the larger meaning of the Exposition, its appeal to the intellect." Aitken's association was fitting, particularly due to the location of the Exposition in San Francisco, California and the history of that state. The Great Seal of the State of California, adopted in 1849, portrays Minerva as symbolic of California's acceptance directly into Statehood without first being a U.S. territory — in Roman mythology, Minerva sprang from Jupiter's head fully matured and armed with weapons and knowledge. This was no doubt also part of the thinking involved when the goddess and her sacred owl were depicted on various Confederate currency notes in the South in the 1860s. Minerva later appeared on the California Pacific International Exposition half dollars of 1935 and 1936, accompanied by the grizzly, the state emblem, which is also depicted on the 1925 Diamond Jubilee half dollar.

The rich symbolism of the Pan-Pac fifties, combined with their scarcity and sheer heft (comparable in size to the fifty dollar "slugs" issued by the United States Assay Office during the Gold Rush) ranks them among the most sought-after commemoratives ever issued by the United States Mint. Moreover, collectors have two different varieties from which to choose. The round variant, here offered, is slightly scarcer than its octagonal counterpart, with a distribution of only 483 coins. This piece is well-struck and displays satiny honey-gold luster. Minor evidence of handling limits the grade, but there are no distracting abrasions.

The Renaissance of American Coinage produced some of the most beautiful circulating coin designs ever issued by the United States, but the commemoratives of this period are equally rich in neoclassical symbolism and artistic merit. However, perhaps none so much as Aitken's fifty dollar gold piece. NGC ID# 26HM, PCGS# 7451

1926 Sesquicentennial Quarter Eagle, MS66  
Frosty, Delicate Surfaces

- 3421 1926 Sesquicentennial MS66 PCGS. The high surface quality of this Premium Gem Sesquicentennial quarter eagle holds true even upon close scrutiny with a loupe. The devices are well-struck and the frosty surfaces display a lovely blend of rose and yellow-gold hues. This classic commemorative is seldom seen at this grade level, and finer pieces are unknown at PCGS (5/15). NGC ID# 26HL, PCGS# 7466

MODERN BULLION COINS

1995-W American Silver Eagle  
Key Issue, PR70 Ultra Cameo

- 3422 1995-W Silver Eagle PR70 Ultra Cameo NGC. The 1995-W became the “backdoor key” to the American Silver Eagle issues when collectors were forced by the Mint bureaucracy to order them as part of the four-piece American Gold Eagle sets celebrating the 10th anniversary of the initiation of the American Eagle bullion programs. The prospect was met with a collective yawn until, in hindsight, the small number actually distributed made it far and away the lowest-mintage issue of the series. This perfect example is optimally and profoundly contrasted on untuned silver-white surfaces. NGC ID# 28WZ, PCGS# 9887

**1995-W Silver Eagle, PR70 Ultra Cameo  
Low-Mintage Series Key**

**3423** 1995-W Silver Eagle PR70 Ultra Cameo NGC. From a small mintage of 30,125 pieces, the 1995-W proof Silver Eagle is the acknowledged key to the silver bullion series. The reason for the limited production total is clear, the 1995-W was only offered as part of a 10th anniversary set of bullion coins that also included examples of all four gold denominations for the year. The issue price of \$999 was prohibitively expensive for most collectors and sales lagged accordingly. The 1999-W proof Silver Eagle is listed as number 4 in the *100 greatest U.S. Modern Coins*.

This magnificent specimen displays Adolph Weinman's iconic Walking Liberty design to great effect. The design elements are fully struck and richly frosted, creating intense cameo contrast with the deeply mirrored fields. The brilliant surfaces are technically perfect and eye appeal is terrific. NGC ID# 28WZ, PCGS# 9887

**2009 One-Ounce Ultra High Relief Twenty  
Fully Rendered MS70 Prooflike**

**3424** 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 Prooflike PCGS. This is a fully struck, attractively mirrored example of this modern representation of the classic 1907 Ultra High Relief pattern struck on an extra thick, reduced diameter planchet. The preservation is flawless, and this piece is among a limited number Prooflike examples certified by PCGS at this unsurpassable grade level. PCGS# 506602

**TERRITORIAL GOLD**

**C. Bechtler Five, XF45  
134 G, Star, Kagin-20**

**3425** (1837-42) C. Bechtler Five Dollar, 134G, With Star XF45 PCGS. K-20, R.4. This green-gold example has original color, unlike the many brightened Bechtler pieces. Glimpses of luster outlined protected areas. No marks are relevant, although a small edge nick is seen near the R in BECHTLER. Struck from rotated dies, and listed on page 382 of the 2016 *Guide Book*. Population: 8 in 45, 49 finer (6/15).  
Ex: *Baltimore Signature* (Heritage, 7/2008), lot 3453. PCGS# 10097

**August Bechtler Gold Dollar, MS61  
27 G., 21 C., K-24**

**3426** (1842-52) A. Bechtler Dollar, 27G. 21C., Plain Edge MS61 NGC. K-24, R.3. The centers display subtle lime-green toning, while the broad margins are apricot-gold. Luster illuminates the legends, and the strike is consistent throughout. Minimally abraded for the MS61 level, since a loupe reveals only a few faded, delicate field marks above 27 G, along with depressions on the reverse rim near 2 and 5 o'clock. Listed on page 382 of the 2016 *Guide Book*. PCGS# 10040

1851 Humbert Fifty, VF Details  
K-5, 800 Thous, Reeded Edge

**3427** 1851 Humbert Fifty Dollar, Reeded Edge, 880 Thous., K-5, Low R.5 — Tooled — PCGS Genuine. VF Details. The fifty dollar “slugs” struck by the United States Assay Office in 1851 under Moffat & Company were produced with both a lettered and reeded edge. The Lettered Edge pieces were the first produced, showing the denomination 50D C below the eagle and nothing in margins. The Reeded Edge variant, here represented, shows the denomination elevated and spelled out (FIFTY DOLLARS) with the date below; in the margin is the inscription: AUGUSTUS HUBERT UNITED STATES ASSAYER OF GOLD CALIFORNIA.

This K-5 representative is lightly worn, but the eagle remains bold and the peripheral legends are clear, save for the upper-left obverse which is faded as a result of moderate tooling in the fields. An as-made planchet lamination is seen at 3:30 on the obverse and each side shows bright yellow-gold patina with scattered minor abrasions. Listed on page 385 of the 2016 *Guide Book*. PCGS# 10211

1852 Humbert Fifty, Fine 12 Details  
K-11, 887 Thous.

**3428** 1852 Humbert Fifty Dollar, Reeded Edge, 887 Thous., K-11, R.5 — Damaged — ANACS. Fine 12 Details. The fifty dollar “slugs” were the first gold issues produced by the United States Assay Office in 1851, and were struck under contract by Moffat & Company until early 1852, after which Curtis, Perry, and Ward took over the government contract. This piece, struck under Moffat & Company, has had a hard life, but will serve well in the collection of an eager territorial gold enthusiast who finds higher-grade pieces to be out of reach. This example is bright yellow-gold with moderately granular surfaces, but the main design elements remain clear. Several rim bumps appear around the peripheries. Listed on page 385 of the 2016 *Guide Book*. PCGS# 10217

---

1852 K-11 Humbert Fifty, XF Details  
Linchpin of Gold Rush Commerce

3429 1852 Humbert Fifty Dollar, Reeded Edge, 887 Thous., K-11, R.5 — Rim Repair — NGC Details. XF A dubious reaction by the public to the earliest fifty-dollar octagonal gold “ingots” was soon replaced by widespread acceptance, and before long the pieces were instrumental to West Coast trade. Although the coins were originally produced as a temporary measure, by 1852 the ingots were an enduring symbol of California gold coinage. In many ways, the gold slugs remain equally endearing today.

The 1852 Reeded Edge issue was the final production of fifty-dollar gold with the Augustus Humbert nameplate. Later in the year, octagonal ingots were issued in the name of the United States Assay Office of Gold. This example of the K-11 Humbert fifty is net-graded for rim repairs, which are visible near the date and elsewhere along the rim. The most egregious dents and rim bumps were filled and smoothed. Other small knocks and cuts are visible on the exposed edges, typical of these heavy pieces that spent any time in circulation. The yellow-gold surfaces are otherwise free of major marks and abrasions, with only small nicks scattered about the fields. Listed on page 385 of the 2016 *Guide Book*.

---

1852 Humbert Fifty Dollar, 887 Thous., AU55  
K-11, Struck Under Moffat & Company  
Hefty Gold Rush Memento

**3430** 1852 Humbert Fifty Dollar, Reeded Edge, 887 Thous., K-11, R.5, AU55 NGC. The fifty dollar gold “slugs,” as they became known, were the first gold pieces produced by the United States Assay Office in San Francisco in 1851, and were, at the time, the smallest denomination authorized by Congress; higher-value gold bars were also authorized and are known to have been issued in values of \$500 and \$1,000. Ten and twenty dollar gold pieces were authorized later in December 1851, in response to a shortage of “small change” coins in the Gold Rush region.

The fifty dollar pieces were designed by Charles C. Wright, an engraver on contract with the United States Mint. Per a letter in the National Archives, the obverse of the octagonal ingots represented “an Eagle in an attitude of defiance with the usual United States Shield resting upon a rock representing the Constitution - In the claws of the Eagle are the Olive Branch and the Arrows.” The reverse was given an intricate “Engine Turning” pattern, thought to be sufficient in thwarting counterfeiting.

The octagonal fifties were accepted for all customs duties and were well-received by the public over the glut of under-weight private issues of inferior fineness then dominating the economy, but in technical terms, the ingots were not officially legal tender, as the government maintained that it was “under no obligation to receive them [as money].” As Don Kagin explains in *Private Gold Coins and Patterns of the United States*, this was necessary to avoid the provisions of the 1837 legislation which mandated fixed alloy ratios for all federally-issued coins. Moreover, it affirmed the reality that the United States Assay Office in San Francisco was only intended to serve in a provisional mint capacity until such time as an official branch mint could be authorized and erected - something which was far more difficult to pass in Congress than a meager assay office.

The U.S. Assay Office was initially operated under the firm Moffat & Company, a private coiner that petitioned for and acquired the government coining contract. Augustus Humbert, a watchmaker from New York, served as Assayer. Early in 1852, Moffat sold his interests in the enterprise to Curtis, Perry, and Ward, who took over the government contract. The fifty dollar ingots of that year were produced under the auspices of both managers, but are easily differentiated due to a change in the obverse design. Those pieces struck under Moffat & Company bear the peripheral inscription: AUGUSTUS HUMBERT UNITED STATES ASSAYER OF GOLD CALIFORNIA 1852; those produced under Curtis, Perry, and Ward were inscribed: UNITED STATES ASSAY OFFICE OF GOLD SAN FRANCISCO CALIFORNIA 1852. Both varieties are rare and highly sought-after in any grade.

This Choice AU example, struck under Moffat & Company, displays clear legends with glossy olive-gold patina. Light, scattered, ticks and grazes are expected for a gold piece of this nature, and none are individually noteworthy. Light wear is primarily evident on the high points of the eagle, although the major elements are well-defined. A pleasing example of one of the staples of the Gold Rush economy. Listed on page 385 of the 2016 *Guide Book*. Census: 7 in 55 (1 in 55+★), 13 finer (5/15).

From The Twin Peaks Collection. PCGS# 10217

1852 U.S. Assay Office Ten, K-12a(1), MS63  
.884 THOUS, Under Curtis, Perry, and Ward  
Rare This Well-Preserved

3431 1852 Assay Office Ten Dollar, K-12a(1), R.4, MS63 PCGS. CAC. The United States Assay Office ten and twenty dollar gold pieces are among the most widely recognized and collected of all territorial gold issues. The U.S. Assay Office was established by Congress in September 1850, in response to requests for a federal branch mint in San Francisco that would relieve the uncertainties and fluctuations of privately coined gold. The Assay Office was intended to act as a provisional mint only until an actual branch of the United States Mint could be authorized and erected, and it operated in that capacity until the close of 1853; the San Francisco Mint began operations in early 1854.

Moffat & Company petitioned for and received the coining contract for the U.S. Assay Office, and produced those federal gold issues until early 1852. In that year, Moffat sold his interests in the company to Curtis, Perry, and Ward, seemingly to pursue mining interests. Curtis, Perry, and Ward took over the government coining contract and operated the U.S. Assay Office in that capacity through December 14, 1853, after which preparations for transfer of coining operations to the new San Francisco branch mint were commenced.

The 1852 ten dollar gold pieces produced by the U.S. Assay Office under Moffat & Company are easily differentiated from those struck under Curtis, Perry, and Ward by the reverse inscription. The earlier pieces read: "AUGUSTUS HUMBERT. / UNITED STATES ASSAYER / OF GOLD. CALIFORNIA. / 1852." Although Humbert continued as Chief Assayer after the takeover of Curtis, Perry, and Ward, the reverse inscription was changed to read: "UNITED STATES ASSAY / OFFICE OF GOLD / SAN FRANCISCO / CALIFORNIA 1852."

This example of the latter issue is sharply detailed, with pleasant, yellow-gold luster. Light chatter in the fields limits the grade, but the overall eye appeal is excellent. A few light die cracks are present in the peripheral regions, but the beads are strong. PCGS lists 19 examples of this issue in Mint State, including three in this grade and just one MS64 coin finer (5/15). An opportunity to acquire a California gold piece of this caliber is seldom encountered. Listed on page 387 of the 2016 *Guide Book*. PCGS# 10001

---

1855 Wass, Molitor & Co. Twenty, K-7, AU53  
Small Head, Rare in All Grades

**3432** 1855 Wass Molitor Twenty Dollar, Small Head, K-7, High R.5, AU53 NGC. Operating in a coinage capacity in 1852 and 1855, Wass, Molitor & Company produced gold coins of an extremely high intrinsic value, consistently the highest of any private gold issues struck during the Gold Rush period. This factor aided in the firm's ability to compete with the United States Assay Office, notwithstanding the fact that Wass, Molitor & Company also paid off their depositors significantly sooner than did the government office (two days versus eight days). Samuel Wass and Agoston Molitor were well-educated in the trades of mining, assaying, melting, and refining, having been highly trained in such things in Hungary before being exiled to California during their country's war for independence, and their refining and assaying equipment, procured from the United States and London, was of the highest quality. Wass, Molitor & Company initially started simply as an assay office, but a shortage of small denomination gold coins in 1851 ultimately prompted the firm to acquire coinage dies and begin filling this void in early 1852. Wass, Molitor & Company's gold pieces were of slightly inferior fineness compared to those of the U.S. Assay Office, which also began producing small denominations during this period, but they were also slightly heavier overall, with the result that these private issues could easily compete with their federal rivals.

Most private coinage operations in the San Francisco region were dissolved after the San Francisco Mint became operational in April 1854, even those of the United States Assay Office, which was intended to exist in a provisional capacity only until the federal branch mint could take over. However, steady coinage at the new federal facility was periodically interrupted in 1854 and 1855 by shortages of the refining acids needed to work gold dust and copper alloy into coinable metal. This was a problem for bankers and gold interests who were deeply involved in the fast-moving cash-flow business of the period. To alleviate tensions, in 1855, Wass, Molitor & Company produced a brief issuance of ten, twenty, and fifty dollar gold pieces which were readily accepted by the banking sector and were tradable on par with the federal issues when their steady coinage was later resumed. Today, all of these issues are rare, with the ten dollar piece being extremely so.

The Wass, Molitor & Company twenty dollar gold piece of 1855 was produced in two different types, differentiated by the size of the obverse Liberty Head portrait. The Large Head variety, similar in appearance to the federal double eagle, is almost uncollectible today, although the Small Head variant (here offered) can be obtained with patience. This example shows light, consistent wear, with the usual array of scattered abrasions that is characteristic of private gold issues from this period and region. The surfaces are olive-gold in color and there are no significant distractions. Weakness on the eagle's feathers is seen on all examples of this issue, and should not be mistaken for wear. Overall, this is a highly appealing example of one of the final gold issues produced by one of the most successful Gold Rush-era private coiners. Listed on page 394 of the 2016 *Guide Book*. Census: 2 in 53, 13 finer (5/15).

1855 Kellogg & Co. Twenty, AU55  
Rare K-3a Variety

**3433** 1855 Kellogg & Co. Twenty Dollar, Medium Arrows, K-3a, R.6, AU55 NGC. Kellogg & Company was in operation from December 1853, through 1855, beginning business right after the close of the United States Assay Office on December 14, 1853. The U.S. Assay Office ceased operations to prepare for the opening of the San Francisco Mint, which was to occupy the same structure. The federal branch mint did not become operational until April 1854, and during the interim, Kellogg & Company filled the needs of bankers and gold depositors as a private coiner and assayer. However, the firm continued in operation well into 1855. During this later period, the San Francisco Mint's coinage operations were intermittent due to shortages of the refining and parting acids needed to convert raw bullion into the federal coinage alloy. Kellogg & Company (as well as Wass, Molitor & Company) supplied provisional gold issues and assaying services to the city, alleviating the financial stress of the banking sector which otherwise would not have had sufficient gold coin to pay depositors.

Of all the twenty dollar gold pieces produced by Kellogg & Company from 1854 to 1855, K-11 is the rarest. The design is similar to that of the U.S. Assay Office twenty dollar pieces produced in 1853 under Curtis, Perry, and Ward, and it is possible that the same reverse dies were used by Kellogg & Company, since John G. Kellogg was previously an employee of the U.S. Assay Office until its closure in 1853 — it is possible that he brought the dies with him to his own firm. This Choice AU example of K-11 is sharply detailed, with bright green-gold color. A few scattered abrasions are present, but none are individually detracting. Listed on page 395 of the 2016 *Guide Book*.

From *The Twin Peaks Collection*. PCGS# 10225

1860 Clark, Gruber Five, Semiprooflike MS61  
K-2, Pikes Peak Gold Reverse

**3434** 1860 Clark, Gruber & Co. K-2, R.4, Five Dollar MS61 NGC. A well-produced example from the first year of operations at the private mint. Clark, Gruber & Co. was one of the few private minters of gold coinage in Colorado, and it was the largest and most respected business of its kind in Jefferson Territory. Compared to many of the other private minters in California, the quality of Clark, Gruber coinage was far above average, and the gold content consistently exceeded standard.

This first-year five-dollar issue was one of the early efforts of the mint, featuring the PIKES PEAK GOLD DENVER reverse legend and CLARK & CO. on the obverse coronet. Prooflike fields flash nice luster across the green-gold surfaces with orange accents at the borders. As noted by the Kagin reference, the strike is a bit weak at the obverse and reverse centers, but coin is sharp elsewhere. Abrasions and marks are limited to widely scattered ticks and a few faint lines. Listed on page 398 of the 2016 *Guide Book*. Census: 9 in 61, 26 finer (5/15).

From *The Twin Peaks Collection*. PCGS# 10136

1860 K-3 Clark, Gruber Ten Dollar  
Near Mint State, Pikes Peak Design

**3435** 1860 Clark, Gruber & Co. Kagin-3, R.5, Ten Dollar AU58 NGC. Always a popular Territorial gold issue for the volcano-shaped image of Pike's Peak, although the rendition does not do justice to Colorado's most-famous mountain that rises more than 14,000 feet. In 1861, the design was changed to a more traditional federal style with the depiction of Liberty's portrait on the obverse.

This still-lustrous Territorial gold ten displays a collector-friendly grade of AU58 and attractive, minimally marked surfaces. Well-produced by the private minter Clark, Gruber & Co. from silver-laden Colorado gold, the yellow-gold coloration shows a hint of olive-gold patina that adds to the eye appeal. A small dig above the period after TEN D is the most noticeable mark. Clark, Gruber had a reputation for honesty and accuracy in their coinage. Colorado gold was more extensively alloyed with silver than the federal standard, which was adjusted by including 23 grains more of gold than the United States ten-dollar coins. The total gold value was the same as the federal issues, with an "additional 1 percent added for the silver alloy." Listed on page 398 of the 2016 *Guide Book*. Census: 21 in 58 (1 in 58+★), 23 finer (5/15).  
From *The Twin Peaks Collection*. PCGS# 10137

1861 Clark, Gruber Quarter Eagle, XF40  
Popular K-5a Variety

1861 Clark, Gruber Quarter Eagle, MS61  
K-5, Orange-Gold Patina

**3436** 1861 Clark, Gruber & Co. Quarter Eagle, K-5a, R.4, XF40 PCGS. The Colorado Gold Rush, also known as the Pike's Peak Gold Rush, followed a similar pattern to the California Gold Rush, occurring less than a decade later. The discovery of gold in Colorado happened in 1849, but word spread only in 1857-58, and by 1858 a boom had started in the region around Pike's Peak. This 1861 quarter eagle has the initial eye appeal of a much higher grade, with clean-looking yellow-gold surfaces and no visible distractions. A loupe reveals the typical weak strike through the centers, along with a couple of minor scrapes. Minor recutting shows on star 7. Listed on page 399 of the 2016 *Guide Book*. Population: 5 in 40, 58 finer (6/15).

Ex: Long Beach Signature (Heritage, 6/2010), lot 1980. PCGS# 10139

**3437** 1861 Clark, Gruber & Co. Quarter Eagle, K-5, R.4, MS61 NGC. Prior to establishment of their private mint, the banking house of Clark, Gruber & Co. was one of the largest purchasers of gold dust in Colorado. The firm would ship accumulated gold dust to the Philadelphia Mint either by pony express or by stage coach. The dangerous trip required a payment of 5% of value for insurance, plus another 5% for the transportation. The loss of available funds was between three weeks to three months depending on circumstances of the delivery and turnaround at the Mint, making the idea of a local mint not only feasible, but in practical terms a necessity.

Clark, Gruber quarter eagles, half eagles, eagles, and double eagles were minted in both 1860 and 1861, with some die modifications between the two years. The major changes on the quarter eagle from 1860 to 1861 were the coronet (CLARK & CO. changed to PIKES PEAK) and the reverse legend (PIKES PEAK GOLD DENVER changed to CLARK GRUBER & CO. DENVER). The Donald Kagin reference notes the issue is "Weak on Liberty cheek and above ear and on corresponding shield." This example shows a soft strike in those areas. A couple of small planchet depressions are visible with a glass on the obverse. The coin displays nice luster and orange-gold coloration. Listed on page 399 of the 2016 *Guide Book*. Census: 10 in 61, 15 finer (5/15). From *The Twin Peaks Collection*. PCGS# 10139

1861 Clark, Gruber Ten, K-7  
Near-Mint Colorado Gold Issue

- 3438** 1861 Clark, Gruber & Co. K-7, R.4, Ten Dollar AU58 NGC. The Clark, Gruber & Co. venture into privately made gold coinage seemingly lasted for just two years (1860 and 1861), although there is no confirmed date of when they stopped issuing coins. The firm continued to issue gold bars, and E.H. Gruber mentioned in a 1904 interview with the *Denver Times*: “In 1862 we did not coin very much money, as the conditions were changed and the government greenbacks did not fluctuate as they did in the first years of the war. Instead of putting the dust into coins this year we molded it into small bars...”

This 1861-dated eagle is an attractive example what may have been the final year of Clark, Gruber ten-dollar production. The fields remain lustrous on both sides of this near-Mint coin, and the strike is sharp except on Liberty's descending curls, the eagle's head, and at the right talon. A light, greenish-gold patina covers both sides with faint orange-gold highlights at the margins. There are no significant abrasions to mention. A die crack from the edge through the date and a few reverse cracks indicate aging of the dies, diagnostic of the Kagin-7 variety. Listed on page 399 of the 2016 *Guide Book*. Census: 28 in 58, 14 finer (5/15).  
From The Twin Peaks Collection. PCGS# 10141

## COINS OF HAWAII

1881 Pattern Hawaii Nickel, Original  
Medcalf 2CN-1, KM-2

- 3439** 1881 Hawaii Five Cents, Medcalf 2CN-1, KM-2, — Mount Removed — PCGS Genuine. The PCGS number ending in 98 suggests “Damage” as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an AU specimen that has rim damage where the mount was removed and shows signs of cleaning. The presence of the cross above the crown on the reverse confirms this is an original pattern striking, and not a restrike, with soft-gray color and sharp remaining detail.

Struck two years before the more-familiar, official 1883 Hawaiian coinage, the five cent issue was a pattern and not an official issue. The obverse legend was struck in error, calling Kalakaua KING OF SANDWICH ISLANDS instead of Hawaii (the Sandwich Islands was the European name for Hawaii). Nevertheless, 200 patterns were struck dated 1881 and while few were saved, others became pocket pieces or jewelry items such as this “mount removed” coin. A rare and important Hawaiian pattern issue.

## PATTERN

1856 Flying Eagle Cent Pattern, PR60 Details  
Extremely Rare Judd-185, Pollock-221

**3440** 1856 Flying Eagle Cent, Judd-185, Pollock-221, High R.7 — Obverse Tooled — ANACS. PR60 Details. Judd-185 is an extremely rare pattern, likely produced circa 1858 for sale to collectors. Survivors number as few as three or four pieces, per USPatterns.com, although Pollock listed six examples in his 1994 roster. Interestingly, despite the issue's rarity, there were two representatives offered in New York Coin & Stamp Company's June 1890 sale of the Lorin G. Parmelee Collection; the specimens were described as "rare" and realized \$4.50 each, a substantial sum for the period.

The present example is the first entry in Pollock's Judd-185 roster, and is plate-matched to the coin in Superior's June 1977 sale of the Dr. Walter Lee Crouch Collection, earlier from Federal Brand's Million Dollar Auction Sale at the 1963 FUN Convention, where it was also plated. A small spot in the C in AMERICA and a couple others along the upper-right reverse border serve as pedigree identifiers. A few light, localized pinscratches tucked in the field near the F in OF and the first A in AMERICA preclude a numeric grade from ANACS, but pose little distraction to the remainder of the coin, which is sharply struck and blanketed in coppery-red, auburn, and olive-gold hues. The rarity of this variety alone would be cause for excitement, although the present piece also comes with a recorded pedigree going back more than half a century.

Ex: Million Dollar Auction Sale / FUN (Federal Brand Enterprises, 1/1963), lot 104; Dr. Walter Lee Crouch Collection (Superior, 6/1977), lot 35, which realized \$1,250. PCGS# 11810

## WASHINGTONIA

Original Washington Before Boston Medal  
MS63 Brown, Baker-47B, Julian MI-1b

**3441** (1790) Washington Before Boston Medal MS63 Brown NGC. Baker-47B, Betts-542, Julian MI-1b. The 1999 Rulau-Fuld revision of Baker states "only 20 to 30 known." All diagnostics of the originals are present, such as the die chips near the E in ADSERTORI, a round O in PRIMO, four legs below the belly of Washington's horse, and the specific alignment of the reverse exergue legends. A charming chocolate-brown example with minimal contact on the fields and only a hint of friction on the hip of Washington's horse. The Washington Before Boston medal celebrates the city's evacuation by British troops on March 17, 1776. Among the best known of all Washington medals.

**End of Session One**

## SESSION TWO

### COLONIALS

**3442** (1670-75) St. Patrick Halfpenny Good 6 NGC. Vlack 4-E, Breen-204. Breen's Small Letters variety, which he described as "very rare." The reverse legend is worn but the types are apparent. The brass splasher is large and mostly south of the crown, its intended target. The chocolate-brown surfaces show one thin vertical mark west of St. Patrick's head. Listed on page 41 of the 2016 *Guide Book*. PCGS# 46

**3443** 1766 Pitt Halfpenny Fine 12 ANACS. Betts-519, W-8350, R.3. William Pitt the Elder was a leader in the British House of Commons, praised on both sides of the Atlantic for his success in repealing the hated Stamp Act. Copper tokens were struck in his honor and circulated in England and the colonies. This is an unblemished chocolate-brown piece. Struck a few degrees off center toward 3 o'clock, affecting the right-side legends. Listed on page 50 of the 2016 *Guide Book*. PCGS# 236

**3444** 1766 Pitt Halfpenny, Silvered, Betts-519, Breen-251, W-8350, R.3 — Environmental Damage — PCGS Genuine. XF Details. This is a well-detailed example of this popular token, with most of the original tin plating intact. Mild granularity on portions of each side prevents a numeric grade assessment. The coin is largely gunmetal-gray, with lighter silvery accents visible near the borders. This issue is also known struck in brass and tin, although the copper variant (both plain and silvered), is the only readily collectible variety. Listed on page 50 of the 2016 *Guide Book*. PCGS# 239

#### Rhode Island Ship Token, AU55 Brass, No Wreath, Betts-562

**3445** 1778-1779 Rhode Island Ship Token, No Wreath, Brass AU55 PCGS. Betts-562, W-1730, R.3. The intermediate variety of the Rhode Island Ship medal, with VLUGTENDE removed from the obverse exergue, and without a wreath below the ship. The left obverse and central reverse are golden-brown, while the remainder of the medal is deep gunmetal-gray. A lightly circulated and minimally abraded example. Listed on page 50 of the 2016 *Guide Book*. PCGS# 588

**3446** 1787 CONNECT Mailed Bust Left Connecticut Copper, M. 15-F, W-2900, R.3, AU55 NGC. This is a challenging variety, but not out of reach for most pursuers of Connecticut coppers. This piece is well-detailed on the devices and shows consistent reddish-brown surfaces with a few areas of minor granularity near the borders. Planchet laminations occur on the obverse, first along the lower-right border, then at 9 o'clock, and two more on the portrait's forehead and chin, respectively. Aside from the upper-right reverse, which is weak, all peripheral legends are discernible. Listed on page 61 of the 2016 *Guide Book*. PCGS# 367

**3447** 1788 Connecticut Copper, Mailed Bust Right, M. 2-D, W-4405, R.1, XF45 PCGS. Middle Die State. The obverse is cracked from the top of the head to the rim, and there is a heavy die break on the border at 7 o'clock. The die crumbling seen in the latest state of this variety is not yet present. This piece is well-struck and only briefly circulated. Both sides show medium brown patina with mild granularity in the fields. AUCTORI reaches to the very edge of the plan. Population: 4 in 45, 6 finer (6/15). PCGS# 397

**3448** 1788 New Jersey Copper, Running Fox Before Legend, VF30 PCGS. M. 75-bb, W-5520, R.4. A medium brown state copper with generally pleasing surfaces. A couple of lightly brought up areas on the reverse retain the striated texture of the planchet. The "Running Fox" is at 7:30 on the reverse. The left obverse and right reverse borders exhibit bold die breaks, customary for this popular die marriage. Listed on page 71 of the 2016 *Guide Book*. PCGS# 524

#### 1785 Nova Constellatio Copper Small Date, Pointed Rays AU Details, Crosby 2-A

**3449** 1785 Nova Constellatio Copper, Pointed Rays, Small Date — Scratch — PCGS Genuine. AU Details. Crosby 2-A, W-1885, High R.4. The 1785 Small Close Date is a semikey variety of the Nova Constellatio series. The present example retains noticeable luster about the olive-green fields and chocolate-brown high points. The centers show incompleteness of strike, characteristic of the variety. Both sides display a few moderate abrasions, most apparent near the B and R in LIBERTAS. Listed on page 54 of the 2016 *Guide Book*. PCGS# 823

**3450** 1787 Fugio Cent, Club Rays, Rounded Ends, N. 3-D, W-6680, R.3 — Environmental Damage — NGC Details. XF. An affordable example of the less often seen Club Rays type. This lightly circulated piece shows well-defined central devices and clear peripheral legends. Medium brown patina blankets each side, although some granularity is observed in the fields. A faint planchet lamination extends upward from the center of the obverse. The coin is evenly struck and well-centered. Listed on page 88 of the 2016 *Guide Book*. PCGS# 904

**3451** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays MS61 Brown PCGS. N. 12-X, W-6820, R.3. Faded red outlines design elements, although the high points and open fields are brown. The planchet quality is excellent and no abrasions are apparent. Moderate spots are noted on each side near 10:30. Listed on page 87 of the 2016 *Guide Book*. PCGS# 883

**3452** 1787 Fugio Cent, STATES UNITED, Raised Rim, N. 19-Z, W-6975, R.5, VF25 PCGS. This is a rare Fugio copper variety, characterized in part by raised rims on the STATES UNITED label. This piece is moderately circulated, but shows even wear and smooth, light brown surfaces. Mild weakness is seen along the lower obverse border, opposite a small rim bump on the reverse. A similar rim bump also appears at 6 o'clock on the reverse. BUSINESS is a little weak in the middle, but the legends and motifs are otherwise clear. Listed on page 88 of the 2016 *Guide Book*. PCGS# 895

**3453** 1783 Washington & Independence Cent, Draped Bust, No Button, Copper Restrike, Engrailed Edge PR65 Red and Brown PCGS. Baker-3, W-10370, R.5. A precisely struck specimen with broad orange-red margins. The centers are olive-brown, powder-blue, and lilac. The obverse is pristine and the reverse field exhibits a few small marks. Fuld and Rulau attribute these well made circa-1860 restrikes to London dealer W.S. Lincoln. Listed on page 80 of the 2016 *Guide Book*. PCGS# 686

**1783 Unity States Washington Cent  
Baker-1, MS63 Brown**

- 3454** 1783 Washington Unity States Cent, Baker-1, W-10130, R.1, MS63 Brown PCGS. Struck circa 1820 in copper with a plain edge. This example is well-struck, with glossy, medium brown surfaces. A small carbon speck on the lower edge of the drapery above the date does not detract. Mild granularity on the obverse and remnants of parallel roller marks on the reverse are as made and not unusual for the issue. A pleasing example of this popular variety. Listed on page 80 of the 2016 *Guide Book*. PCGS# 689

## HALF CENTS

- 3455** 1794 Normal Head, Small Letters Edge, C-3a, B-5b, R.5, VG10 PCGS. CAC. Both lettering types of the 1794 C-3 die pairing are rare, although C-3a is the more frequently seen. This piece shows even circulation with primarily auburn-brown surfaces. The fields are mildly granular, mostly on the reverse. The central devices and all border legends are clear. Dentils are sharp around the reverse but grow weak along the lower obverse rim. Our EAC grade Good 6. PCGS# 35030 Base PCGS# 1003

- 3456** 1802/0 Reverse of 1802, C-2, B-2, R.3, Good 6 PCGS. CAC. Manley Die State 2.0. LIBERTY, the date, OF AMERICA, and the fraction are bold. UNITED STATES shows only minor weakness, and the left portion of HALF CENT is indistinct. The deep brown surfaces are pleasing despite a hair-thin diagonal mark through the left border of the wreath. Our EAC grade Good 4. PCGS# 35125 Base PCGS# 1057

- 3457** 1804 Spiked Chin, C-8, B-7, R.1, AU58 PCGS. CAC. Manley Die State 2.0. The "Spiked Chin" variety was created when a bolt or similar metal object injured the obverse die between Liberty's chin and bust tip. This pleasing chocolate-brown representative has satin luster, smooth surfaces, and a good strike. Our EAC grade XF45. PCGS# 35167 Base PCGS# 1075

**1804 Half Cent, MS63 Brown  
Spiked Chin, C-8**

- 3458** 1804 Spiked Chin, C-8, B-7, R.1, MS63 Brown PCGS. CAC. Manley Die State 2.0. The borders display glimpses of light golden-brown while the centers are deeper medium brown. Nicely struck and minimally abraded with good luster and pleasing eye appeal. The final Cohen variety for the hardy Spiked Chin obverse die, which had earlier coined C-5, C-7, and C-6. Our EAC grade AU55. *Ex: Long Beach Signature (Heritage, 9/2012), lot 3369, which realized \$3,525.* PCGS# 35167 Base PCGS# 1075

- 3459** 1804 Crosslet 4, Stems, C-10, B-9, R.1, AU58 PCGS. CAC. Manley Die State 3.0. A charming near-Mint representative that offers substantial satin luster and a good strike. The golden-brown and olive-green surfaces are only incidentally marked. Our EAC grade XF40. PCGS# 35158 Base PCGS# 1069

**1804 C-12 Half Cent, MS62 Brown  
No Stems, Crosslet 4**

- 3460** 1804 Crosslet 4, No Stems, C-12, B-11, R.2, MS62 Brown PCGS. Traces of faded mint red outline the letters and devices, but most of the present piece is medium brown. Unabraded aside from a solitary faint diagonal line on the portrait near the ear. The usual die state with clash marks near the hair ribbon and an orange-peel texture on the obverse field, all as made. Our EAC grade AU50. PCGS# 35173 Base PCGS# 1072

**1811 Half Cent, C-2, VF25  
Pleasing Surfaces**

- 3461** 1811 Close Date, C-2, B-2, Low R.3, VF25 PCGS. Manley Die State 3. This collector-grade 1811 half cent is well-detailed for the VF level, and displays uniform chocolate-brown patina, with a lack of environmental impairments. Evenly struck, although the reverse rim grows slightly weak along the upper-left periphery. A few light marks are present on the obverse. Our EAC grade Fine 15. Population: 15 in 25, 58 finer (5/15). PCGS# 35242 Base PCGS# 1135

- 3462** 1855 C-1, B-1, R.1, MS66 Brown NGC. An unabraded type coin with intermingled olive-brown, ebony, and faded red color on each side. The strike is bold except for the obverse dentils and right-side stars. Our EAC grade AU50. *Ex: Fort Worth Signature (Heritage, 3/2010), lot 78.* PCGS# 35333 Base PCGS# 1233

## LARGE CENTS

- 3463** 1794 Head of 1794, S-21, B-5, R.3 — Cleaning — PCGS Genuine. AU Details. Luster is apparent throughout the motifs and legends, and wear is chiefly confined to the curl over the ear. The medium brown and aquamarine surfaces are unabraded but moderately granular. Our EAC grade VF30. PCGS# 35528 Base PCGS# 901374

- 3464** 1797 Reverse of 1795, Grippled Edge, S-120b, B-2b, R.2, Fine 15 PCGS. One of two Sheldon marriages (the other is S-121b) with a gripped or reeded edge. Plain edge and lettered edge cents were also struck that year. Struck a few degrees off center toward 3 o'clock. A moderately glossy dark brown representative that has a hint of granularity and a few ticks on the central reverse. Our EAC grade VG10. *Ex: Long Beach Signature (Heritage, 5/2008), lot 1780.* PCGS# 35900 Base PCGS# 1416

**3465 1800/79 Style Two Hair, S-192, B-6, R.4, VF25 NGC.** Relative to the plentiful S-196, S-192 is a better die marriage of the 1880/79, Style Two *Guide Book* variety. The present example displays extensive hair detail and has glossy deep brown surfaces. Occasional unimportant marks include a depression in the hair beneath the B in LIBERTY. Our EAC grade Fine 12. PCGS# 36155 Base PCGS# 1455

**3466 1801 S-222, B-16, R.1 — Improperly Cleaned — NGC Details. AU Details.** This inaugural 19th century Draped Bust type coin is sharply detailed, with mildly glossy medium brown patina. A loupe reveals minute granularity over each side, which NGC attributes to an old cleaning, rather than environmental damage. Our EAC grade VF20.

### 1802 S-231 Cent, Choice AU No Stems, Exemplary Surfaces

**3467 1802 No Stems, S-231, B-9, R.1, AU55 NGC.** Breen Die State VIII. A pleasing chocolate-brown example that displays the many cracks and clashes usual for the variety. The strike is crisp throughout, and the leaves show only slight wear. No marks or spots are remotely consequential. Although S-231 is available in well circulated grades, it is surprisingly scarce at the Choice AU level, and a great rarity any finer. Our EAC grade XF40. PCGS# 36344 Base PCGS# 1476

**3468 1820 Large Date, N-13, R.1, MS65 Brown PCGS. CAC.** A beautiful chocolate-brown Gem. Devoid of marks, and only a single small spot is detected, relegated to the inner border of the wreath to the west of the ribbon loop. The stars show inexactness of strike, but the centers are sharply impressed. Our EAC grade MS60. PCGS# 36673 Base PCGS# 1615

**3469 1820 Large Date, N-13, R.1, MS65 Red and Brown NGC.** Medium brown fields and high points are accompanied by numerous indications of mint red near the letters, date, and stars. Smooth aside from faint field grazes near star 2 and a subtle spot beneath the O in OF. The popular Randall Hord variety identified by a triple-punched L in LIBERTY. Certified in a former generation holder. Our EAC grade MS60. PCGS# 36674 Base PCGS# 1616

**3470 1820 Large Date, N-13, R.1, MS65 Red and Brown PCGS.** Mint red is fairly plentiful on the obverse though a decided minority on the reverse. Lustrous and carefully preserved. The usually encountered Gem quality 1820 variety, and almost certainly once part of the famous Randall Hord. Certified in an old green label holder. Our EAC grade MS62. PCGS# 36674 Base PCGS# 1616

**3471 1837 Head of 1838, N-9, R.1, MS64 Red and Brown PCGS.** Noyes Die State F with numerous lengthy obverse cracks. Brick-red outlines the letters and stars. The portrait and open fields are brown. Well struck except for star 1. An exceptionally nice representative. Our EAC grade MS62. PCGS# 37133 Base PCGS# 1730

**3472 1851 N-21, R.3, MS65 Red and Brown PCGS.** Grellman Die State b. Scattered tiny die lumps on the portrait of Liberty combine with die lines through the ME in AMERICA to attribute the Newcomb marriage. This coruscating Gem shows plentiful obverse fire-red, although the reverse is chiefly steel-gray. Virtually void of contact. Our EAC grade MS62. PCGS# 406714 Base PCGS# 1893

**3473 1853 N-18, R.1, MS66 Brown NGC. CAC.** This piece displays a blend of coppery-red luster and auburn-brown and plum overtones, although the surfaces are weighted toward the latter hues and thus the Brown color designation from NGC. The strike lacks sharpness only on the upper stars, and the surfaces are beautifully free of abrasions. Our EAC grade MS63. PCGS# 406021 Base PCGS# 1901

## FLYING EAGLE CENTS

**3474 1857 MS64 PCGS.** This Choice Mint State type coin is boldly struck, with satiny olive-brown patina that shows hints of gold when tilted beneath a light. No major abrasions are present, although we note a single carbon speck at the tip of the right wreath branch. NGC ID# 2276, PCGS# 2016

**3475 1857 MS64 PCGS. CAC.** A high-end coin for the grade, this Choice 1857 Flying Eagle cent is fully struck throughout the wreath and the eagle, and displays noticeably semiprooflike fields. Warm bronze-gold patina yields overtones of auburn and amber-red, while the underlying surfaces are free of almost all flaws, save for a small planchet depression below the eagle's neck. CAC-approved in a green label holder. NGC ID# 2276, PCGS# 2016

**3476 1857 MS64 PCGS. CAC.** Satiny surfaces show tinges of bronze-gold luster underneath consistent tan-brown toning over each side of this Choice Flying Eagle type coin. The design elements are well-struck and neither side exhibits any notable visual distractions. NGC ID# 2276, PCGS# 2016

### 1857 Snow-9 Flying Eagle Cent, MS63 Obverse Clashed With Seated Half

**3477 1857 Obverse Die Clash With Seated Half, Snow-9, FS-402, MS63 PCGS.** Eagle Eye Photo Certificate. The Snow-9 clashed Flying Eagle cent against a Seated half is the only variety among the various dual-denomination die-clashed coins that is occasionally available. The variety shows the obverse of an 1857 Flying Eagle (in the "anvil die" or bottom position in the coin press) clashed with the obverse of an 1857 Seated half dollar in the "hammer die" position. These are fascinating coins, and Rick Snow's recently published, greatly expanded two-volume set of *The Flying Eagle & Indian Cent Attribution Guide* does an excellent job throwing light on the coins and current thinking behind their creation.

The clash marks are bold as expected on this Select 1857 cent, showing good luster with little sign of post-Mint contact, although there is one small dark fleck at the rim above the T in UNITED. Another appears inside the loop of the O in ONE on the reverse, but much eye appeal is present. Population: 6 in 63, 13 finer (5/15). PCGS# 37375

### 1858 Flying Eagle Cent, Sharp MS65

**3478 1858 Small Letters MS65 PCGS.** Sharp design elements are illuminated by satiny, bronze-gold luster, with hints of peach and rose revealed when the semiprooflike fields are tilted against a light source. A couple tiny specks are invisible to the unaided eye, and the preservation is outstanding. The Small Letters issue is moderately elusive in Gem condition, and is rarely seen finer. Population: 73 in 65, 9 finer (5/15). NGC ID# 2279, PCGS# 2020

## INDIAN CENTS

- 3479 1859 MS65 NGC.** A sharply struck, bronze-gold Gem, this satiny 1859 Indian cent is free of carbon spotting or noticeable marks, and is quite simply eye-appealing. This issue is scarce in MS65 and finer grades, and is also widely popular at this level due to its status as a one-year type. NGC has encapsulated only 11 numerically finer representatives (5/15). NGC ID# 227E, PCGS# 2052
- 3480 1861 MS65 PCGS. CAC.** This Gem copper-nickel type coin is boldly struck, with satiny olive-gold luster that yields rich undertones of peach and bronze. A couple microscopic ticks on Liberty's cheek are all that preclude an even loftier grade. NGC ID# 227G, PCGS# 2061
- 3481 1864 Copper-Nickel MS65 PCGS. CAC.** Overall, the copper-nickel 1864 Indian cent is scarcer in high grade than its later bronze counterpart, and the issue is genuinely rare finer than the present Gem example. This piece is boldly struck, with satiny bronze-gold luster. Close examination finds the surfaces uncommonly well-preserved for the grade — only a few stray lines in the left obverse field limit PCGS' assessment. PCGS has seen 24 numerically finer representatives (5/15). NGC ID# 227K, PCGS# 2070

### 1865 Indian Cent, MS65 Red Vibrant Mint Luster

- 3482 1865 Fancy 5 MS65 Red PCGS. CAC.** Eagle Eye Photo Seal, card not included. Struck with worn dies, this Gem 1865 Indian cent is a trifle soft on some of the finer portrait details, as well as the reverse bowknot, but the overall definition is nonetheless gratifying. Radiant coppery-orange luster shows deeper rose hues in the centers, and grade-limiting abrasions are almost nonexistent. A few small specks are present on each side. Population: 44 in 65 (1 in 65+) Red, 10 finer (5/15). NGC ID# 227N, PCGS# 2084
- 3483 1867 MS64+ Red PCGS. Snow-5b.** The 18 in the date is boldly recut on this moderately available variety. This example is satiny with bronze-gold luster. A few light specks appear in inconspicuous areas. The strike is sharp, although die lapping has reduced the relief of the central headdress feathers. Population: 73 in 64 (2 in 64+) Red, 22 finer (6/15). NGC ID# 227R, PCGS# 2090
- 3484 1869 MS65 Brown NGC.** An eye-appealing Gem example of this conditionally elusive Indian cent issue, showing tinges of coppery-red in the protected regions of the fields. The strike is bold and there are no distracting abrasions. Census: 36 in 65 Brown, 4 finer (6/15). NGC ID# 227T, PCGS# 2094
- 3485 1871 MS63 Red and Brown NGC.** Bold N in ONE. The apricot-gold color is moderately mellowed but still closer to Red than Brown. Well struck and satiny with minimal carbon and no evident abrasions. NGC ID# 227V, PCGS# 2101
- 3486 1872 MS64 Red and Brown NGC.** Bold N in ONE. A variegated sun-gold and steel Choice semikey cent. Lustrous and well preserved. The strike is good despite incompleteness on the date. Strike-throughs below the MER in AMERICA are of mint origin. NGC ID# 227W, PCGS# 2104

- 3487 1877 VF30 PCGS.** The N in ONE is weak at the bottom, a diagnostic of genuine 1877 Indian cents. This key date is often seen in extremely low grades, and is occasionally available in Mint State, but pleasing mid-grade representatives are seldom offered. This piece is well-detailed, with medium chocolate-brown patina. NGC ID# 2284, PCGS# 2127

### 1877 Indian Cent, MS60 Brown Struck From Proof Dies

- 3488 1877 MS60 Brown NGC. Snow-PR3.** Struck from proof dies, per the NGC insert. This sharply struck 1877 Indian cent is an exact match to Rick Snow's PR3 proof die pair. In his *The Flying Eagle and Indian Cent Attribution Guide*, third edition, Snow writes: "Pieces struck from this die pair are usually substandard ... Most have weak denticles and their mirrors are very shallow. Edges on many are more beveled than [sic] typical proofs. These pieces are proofs, but were only struck once. Pieces that have lost their original surface may be difficult to attribute as proofs except by using the die diagnostics given here." Snow also notes that some of the coins from this die pair circulated.
- NGC has attributed this piece as a genuine circulation strike that was struck with the proof die pair. The fields lack any semblance of proof mirroring, and instead display an almost matte-like texture; the fine metal flow lines that produce conventional mint luster are not present. The devices are sharply rendered, and the patina is a blend of auburn, olive, and medium-brown hues. NGC ID# 2284, PCGS# 2127

- 3489 1878 MS65 Red PCGS.** Deep coppery-orange hues illuminate the well-preserved surfaces of this Gem full Red 1878 Indian cent. A few faint flecks appear near the upper-right obverse border. The strike is a little soft on the wreath bow, but the obverse portrait is crisp. Population: 51 in 65 Red, 16 finer (5/15). NGC ID# 2285, PCGS# 2132
- 3490 1879 MS65 Red PCGS. CAC.** The Gem grade is fully warranted on this satiny copper-red 1879 Indian cent. Shades of peach and orange highlight the fields and there are just a few faint specks seen upon close examination. This beautiful piece is just a whisper away from Premium Gem quality. Population: 56 in 65 (1 in 65+) Red, 18 finer (5/15). NGC ID# 2286, PCGS# 2135

### 1887 Indian Cent, MS65 Red Glowing Surfaces

- 3491 1887 MS65 Red PCGS. CAC.** A Gem grade is fitting for this beautifully preserved 1887 Indian cent, showing satiny copper-orange and amber-red patina with boldly rendered design elements. This available Philadelphia issue becomes conditionally scarce in this level of preservation, and finer examples are rarely seen. Population: 60 in 65 Red, 22 finer (5/15). NGC ID# 228F, PCGS# 2159

**3492 1893 MS66 Red NGC.** This radiant fiery-orange Premium Gem shows splashes of bronze-gold on the obverse portrait and in the upper-right reverse field. The strike is sharp and the frosty luster is mint-fresh. The 1893 Indian cent is conditionally rare at this lofty grade level. Census: 27 in 66 (1 in 66+) Red, 2 finer (6/15). NGC ID# 228M, PCGS# 2186

**3493 1894 MS65 Red PCGS. CAC.** Blazing bronze-gold and apricot-orange hues encompass the frosty surfaces of this Gem 1894 Indian cent. The strike is bold and the only abrasions are a few tiny grazes on Liberty's cheek. A couple tiny specks are present near the reverse rim to the right of the shield. PCGS lists 30 finer full Red examples (5/15). NGC ID# 228N, PCGS# 2189

**3494 1899 MS66 Red PCGS.** This heavily frosted Premium Gem type coin displays a rich array of coppery-red, amber-orange, and olive-gold hues, with sharp design elements and a lack of detracting abrasions. A single, tiny speck of carbon is barely discernible behind the lowest hair curl. There 13 Superb Gems finer at PCGS (5/15). NGC ID# 228U, PCGS# 2204

**3495 1902 MS66 Red PCGS.** This plentiful 20th century date becomes conditionally scarce in Premium Gem full Red condition, and finer pieces are rare. This example displays frosty copper-red luster and well-defined relief elements. A few faint specks are only discernible with a loupe. Population: 54 in 66 (3 in 66+) Red, 9 finer (5/15). NGC ID# 228X, PCGS# 2213

**3496 1904 MS66 Red PCGS. CAC.** This glowing Premium Gem type coin showcases bold details amid vibrant coppery-orange and peach-gold colors. Moderate die erosion in the fields contributes to the luminous appearance of the surfaces which is fully enlivened when rotated beneath a light. Population: 68 in 66 (1 in 66+) Red, 5 finer (5/15). NGC ID# 228Z, PCGS# 2219

**3497 1905 MS66 Red PCGS.** This attractive Premium Gem displays well-preserved original red surfaces and vibrant mint luster on both sides. The design elements are well-detailed and overall visual appeal is outstanding. Population: 52 in 66 (3 in 66+) Red, 1 finer (6/15). NGC ID# 2292, PCGS# 2222

**3498 1907 MS66 Red NGC.** The original red surfaces of this spectacular Premium Gem display vibrant mint luster on both sides. No mentionable distractions are evident and the design elements are sharply detailed throughout. Census: 13 in 66 Red, 1 finer (5/15). NGC ID# 2294, PCGS# 2228

**3499 1909 MS66 Red PCGS.** The 1909 Indian cent is always popular as the last year of the design. This attractive Premium Gem displays sharply detailed design elements and well-preserved original red surfaces that radiate vibrant mint luster. PCGS has graded five numerically finer examples (6/15). NGC ID# 2297, PCGS# 2237

## PROOF INDIAN CENTS

**3500 1862 PR66 NGC.** From a small mintage of 550 pieces, the 1862 proof Indian cent is seldom encountered in Premium Gem condition, and finer coins are very rare. The present coin offers sharply detailed design elements and well-preserved copper-red surfaces, with moderately reflective fields. Census: 37 in 66 (6 in 66+, 1 in 66 ★), 4 finer (6/15). NGC ID# 229C, PCGS# 2259

**3501 1862 PR66 Cameo NGC.** The Philadelphia Mint produced at least 550 proof Indian Cents in 1862. With at least half of the original mintage believed extant, this issue is the only readily obtainable copper-nickel Indian in proof. A simply gorgeous specimen, the surfaces of this delightful Premium Gem shimmer with well-mirrored fields. The otherwise tan colored features reveal rich pinkish-lilac highlights over certain peripheral areas. Powerfully struck, and even more carefully preserved. Census: 20 in 66 Cameo (2 in 66 ★ Cameo), 7 finer (6/15). PCGS# 82259

## 1865 Indian Cent, PR66 Red and Brown Low-Mintage Proof, Rare in This Grade

**3502 1865 PR66 Red and Brown PCGS. Snow PR1.** Plain 5. The 1865 proof striking is scarce as an issue (just 500 pieces struck), and examples are verifiably rare in Premium Gem condition. The current coin is more red than brown, with fire-orange mirrored fields deepening to full red at the margins. Purple overtones cover the central devices. Red and Brown proofs in MS66 number a mere 17 pieces by both PCGS and NGC combined, and no coins are certified finer by either service. PCGS Population: 8 in 66 Red and Brown, 0 finer (6/15). NGC ID# 229H, PCGS# 2283

## 1882 Indian Cent, Sharp PR66 Red

**3503 1882 PR66 Red PCGS.** With only two Cameos at PCGS, high-end Red examples of this proof Indian cent issue are about the finest obtainable by most collectors. This Premium Gem is boldly struck, with satiny devices and reflective fields. Coppery-orange surfaces yield hints of olive and rose throughout. No carbon spotting is observed. Population: 16 in 66 Red, 4 finer (6/15). NGC ID# 22A3, PCGS# 2335

**3504 1887 PR64+ Red PCGS.** This high-end Choice proof exhibits razor-sharp definition on all design elements and the fields are deeply mirrored throughout. The original red surfaces show a few hints of lilac and only minor signs of contact. Population: 13 in 64 (1 in 64+) Red, 10 finer (6/15). NGC ID# 22A9, PCGS# 2350

**3505 1902 PR66 Red PCGS.** From a proof mintage of 2,018 pieces, this delightful Premium Gem exhibits fully struck design elements and deeply reflective fields throughout. The well-preserved orange-red surfaces are free of mentionable distractions. Population: 31 in 66 Red, 9 finer (6/15). NGC ID# 22AR, PCGS# 2395

### 1903 Cent, PR67 Red

- 3506 1903 PR67 Red NGC.** The obverse is primarily yellow-gold, while the reverse displays cherry-red and apricot. The portrait high points show hints of deep ruby-red. The strike is precise, and the glassy surfaces are undisturbed. Fully Red proofs in high numerical grades are very elusive. Certified in a former generation holder. Census: 3 in 67 Red, 2 finer (5/15).  
Ex: FUN Signature (Heritage, 1/2005), lot 5270. NGC ID# 22AS, PCGS# 2398

## LINCOLN CENTS

- 3507 1909-S VDB MS62 Brown NGC.** Sharply struck throughout, the surfaces are almost completely brown except for a splash of original red on the upper-right portion of the reverse. A few scattered contact marks and microscopic carbon spots are visible, mostly on the reverse. NGC ID# 22B2, PCGS# 2426
- 3508 1909-S VDB MS62 Red and Brown NGC.** The obverse shows deep-red coloration with a freckling of brown accents, while the reverse is unevenly toned with the same deep red patina over half of the coin and a streaky diagonal segment of bright orange. NGC ID# 22B2, PCGS# 2427
- 3509 1909-S VDB MS64 Red and Brown NGC.** Well-preserved with satiny luster that displays shades of amber, gold, and olive toning. A few scattered specks are not overly distracting, particularly amid the exceptionally smooth surfaces. A collector-grade Mint State example of this popular key issue. NGC ID# 22B2, PCGS# 2427

### 1909-S VDB Cent, MS65 Red and Brown Old Green Holder

- 3510 1909-S VDB MS65 Red and Brown PCGS.** A richly lustrous, satiny Gem example of this series key, displaying sharp design elements and well-preserved surfaces. Significant coppery-orange luster glows beneath an overlay of thinly mottled auburn toning, giving this piece a distinct red and brown appearance. There is a single tiny speck in the field near Lincoln's eyebrow. Housed in an old green label holder. NGC ID# 22B2, PCGS# 2427
- 3511 1909-S VDB MS65 Red PCGS.** Always in demand, the 1909-S VDB Lincoln cent is challenging in full Red grades finer than MS65. This piece is devoid of noticeable abrasions, and also exhibits bold design definition. Glowing orange-gold, bronze, and pale olive hues encompass each side, with a few faint specks scattered over the upper reverse. A pleasing example of this key Lincoln cent issue. NGC ID# 22B2, PCGS# 2428

- 3512 1913-D MS64+ Red PCGS. CAC.** Well-struck, despite minor die erosion in the fields on each side. Luster is satiny with a pale coppery-gold glow, and a few faint specks are not distracting. Abrasions are at a minimum for the grade, as affirmed by the Plus designation. NGC ID# 22BE, PCGS# 2464

- 3513 1914-S MS65 Red and Brown PCGS.** The olive-green and lilac surfaces are only minimally separated from a full Red designation. A few pinpoint flecks are of little import. Housed in a first generation holder. NGC ID# 22BJ, PCGS# 2475

- 3514 1915-S MS65 Brown PCGS. CAC.** Were it not for the mintmark, this bold, matte-like 1915-S Lincoln cent might pass off for a proof. The rich luster displays medium auburn toning, with flashes of violet and coppery-red underlying the patina on each side. Population: 13 in 65 Brown, 1 finer (5/15). NGC ID# 22BM, PCGS# 2483

- 3515 1915-S MS64 Red and Brown PCGS.** This is a boldly struck and well-preserved example of this conditionally elusive San Francisco issue, retaining significant mint red color over matte-like luster. A few subtle plum overtones on each side confirm the color designation, with a faint partial print in the left obverse field. PCGS lists 21 numerically finer Red and Brown examples (5/15). NGC ID# 22BM, PCGS# 2484

- 3516 1916-D MS65 Red PCGS.** The 1916-D Lincoln cent's mintage of nearly 36 million coins does not allude to the scarcity of Gems with original Red coloration. This representative offers satiny luster and well-struck devices over copper-orange surfaces. The obverse fields show some flowlines from die fatigue, along with scattered charcoal color. Population: 53 in 65 (2 in 65+) Red, 16 finer (5/15). NGC ID# 22BP, PCGS# 2491

- 3517 1916-D MS65 Red PCGS.** Early branch mint Lincoln cents with full mint Red surfaces are hard to come by. This Gem 1916-D representative displays strong luster and intense brick-red coloration over each side. The strike detail is remarkably bold, as many coins were struck from widely spaced and worn dies. Population: 53 in 65 (2 in 65+) Red, 16 finer (5/15). NGC ID# 22BP, PCGS# 2491

### 1918-D Lincoln Cent, MS65 Red Sharply Detailed Example

- 3518 1918-D MS65 Red PCGS.** The eye appeal of this Gem 1918-D cent is considerable for the issue, with needle-sharp design definition and deep satiny, copper-orange mint luster. No carbon spots are observed on the reverse, and the surfaces are free of major abrasions. A small area of dulled luster behind Lincoln's head is noted and a few related flecks at LIBERTY. Population: 30 in 65 Red, 8 finer (6/15). NGC ID# 22BW, PCGS# 2509

- 3519 1919-S MS65 Red and Brown PCGS. CAC.** The original red surfaces of this spectacular Gem have mellowed to light brown in some areas, but both sides radiate vibrant mint luster, with minimal signs of contact. The design elements are sharply rendered and eye appeal is quite strong. Population: 29 in 65 Red and Brown, 0 finer (5/15). NGC ID# 22C2, PCGS# 2520

**3520 1922 No D, Strong Reverse, FS-401, VF35 PCGS.** Die Pair 2. An inoffensively marked medium brown Choice VF example of this famous die variety. No mintmark is apparent, and the bold second 2 in the date provides further confirmation. PCGS# 37676 Base PCGS# 3285

**3521 1927 Doubled Die Obverse, FS-101, MS65 Brown PCGS.** The left obverse legends are die doubled, most apparent on the base of the L in LIBERTY. Smooth and coruscating with a crisp strike and iridescent olive-green, powder-blue, and rose-red undertones. As of (5/15), PCGS has certified 24 examples in all grades, but only the present piece attains the MS65 level. PCGS# 37694 Base PCGS# 2576

**3522 1929-D MS66 Red NGC.** Glowing coppery-red luster illuminates beautifully preserved, frosty surfaces on this Premium Gem Registry coin. The strike is sharp, despite some die erosion behind Lincoln's portrait. Census: 5 in 66 Red, 0 finer (6/15). NGC ID# 22CV, PCGS# 2599

**1929-S Cent, MS66 Red  
Tied for Finest at PCGS**

**3523 1929-S MS66 Red PCGS.** The coppery-orange surfaces of this Premium Gem 1929-S Lincoln cent display a soft, glowing appearance when rotated beneath a light, a product of having been struck with mildly worn dies. Definition of the devices is nonetheless sharp, and there are no obvious abrasions. Population: 26 in 66 Red, 0 finer (5/15). NGC ID# 22CW, PCGS# 2602

**3524 1934 MS67+ Red PCGS. CAC.** The Plus designation denotes the superior surface quality of this piece compared to most other MS67 examples of the 1934 Lincoln cent, ideal for Registry purposes. This coin is boldly rendered, despite moderate die erosion in the recesses, and displays rich coppery-orange luster. A few stray, microscopic specks are not discernible to the unaided eye. Nine coins are finer at PCGS (5/15). NGC ID# 22D9, PCGS# 2635

**3525 1936-S MS67 Red PCGS.** A sharply detailed Superb Gem Lincoln cent, with original red surfaces that radiate vibrant mint luster and show no mentionable distractions. Eye appeal is tremendous. Population: 54 in 67 (1 in 67+) Red, 0 finer (6/15). NGC ID# 22DG, PCGS# 2656

**3526 1941-S MS67+ Red PCGS. CAC.** It would be difficult to argue with the grade on this beautiful Superb Gem Registry coin. The only interruptions in the silky-smooth luster — and they are faint — are a few microscopic strike-throughs on the highest points of the portrait, a result of metal debris in the crevices of the die. The design elements are boldly struck. This is one of only nine MS67 Red examples at PCGS awarded a Plus designation, with none finer (6/15). It also trumps the coin in the current highest-rated Registry Set, which grades MS67 Red. NGC ID# 22DY, PCGS# 2701

**3527 1942-D MS67+ Red PCGS.** The Plus designation sets this Superb Gem 1942-D Lincoln cent apart from almost all other MS67 Red examples, and ranks it nearly half a grade point finer than the coin in the current highest-rated Registry Set. Only two MS68 Red examples are finer at PCGS (6/15). Both sides show satiny orange-gold luster with sharp motifs. There are no obvious signs of carbon. NGC ID# 2200, PCGS# 2707

**3528 1944-D MS67+ Red PCGS. CAC.** An eye-catching Registry coin, this Plus-graded Superb Gem is seemingly pristine, with vibrant coppery-orange luster and boldly rendered motifs. A couple tiny specks in the left obverse field are not distracting. PCGS lists only two MS68 Red coins finer (6/15). NGC ID# 22EC, PCGS# 2725

**3529 1946 MS67 Red PCGS.** Rich copper-red and rose hues blend across the radiant obverse, while the reverse showcases strong copper-gold luster. Virtually free of carbon and abrasions, this beautiful Superb Gem is tied with 22 others as the finest certified at PCGS (5/15). NGC ID# 22EK, PCGS# 2743

**3530 1948 MS67 Red NGC.** A Registry-grade example, among the finest seen by either service. This Superb Gem 1948 Lincoln cent displays rich coppery-red luster over satin surfaces. A few trivial specks do not detract. Census: 60 in 67 (1 in 67+) Red, 0 finer (6/15). NGC ID# 22ES, PCGS# 2761

**1954 Cent, MS67 Red  
Deep Red, Glowing Surfaces**

**3531 1954 MS67 Red NGC.** Only a handful of full Red 1954 Lincoln cents have been certified as fine as MS67, including 13 at NGC and five at PCGS, with none finer (5/15). This blazing Registry coin displays frosty copper-red luster and boldly rendered design elements. Neither side shows any detracting abrasions. NGC ID# 22FC, PCGS# 2815

**1955 Double Die Obverse Cent  
Visually Outstanding MS64 Brown**

**3532 1955 Doubled Die Obverse, FS-101, MS64 Brown PCGS. CAC.** This vastly sought *Guide Book* variety is seldom found with pleasing eye appeal, as the typical coin is poorly struck and deeply toned brown. This Choice Mint State representative is far and away one of the more visually pleasing pieces in the Brown color category. Both sides exhibit fresh mint luster beneath a soft plum-brown patina that allows significant reddish color to shine through. The strike is sharp and there are no major abrasions. PCGS# 37910 Base PCGS# 2825

**3533 1960 Large Date MS67 Red PCGS.** This is an essential Registry Set contender, tied with just 10 others as the finest Large Date 1960 cent at PCGS (5/15). Both sides are vividly illuminated in satiny copper-red luster, and the design elements are sharply impressed. A few tiny specks do not detract. NGC ID# 22FW, PCGS# 2860

**1960 Small Date Lincoln Cent, MS67 Red  
Vivid Luster and Rich Red Color**

**3534 1960 Small Date MS67 Red PCGS.** Those who spent untold hours searching roll upon roll of 1960 Lincoln cents searching for the elusive Small Date variety may have located a few examples, but likely none that could equal the Superb Gem surfaces of this cherry-red cent. Immaculate fields are essentially spot-free with blazing mint luster. Neither PCGS nor NGC have certified a numerically finer Red example. PCGS Population: 11 in 67 Red, 0 finer (6/15). NGC ID# 22FV, PCGS# 2863

**3535 1983 Doubled Die Reverse, FS-801, MS67 Red NGC.** All reverse design elements are strongly die doubled north. Sharply struck and lustrous with a practically pristine appearance. Predominantly fire-red, although the reverse border offers olive-green. This *Guide Book* variety is conditionally rare as a Superb Gem. PCGS# 38063 Base PCGS# 3056

**3536 2009-D Formative Years MS67 Red PCGS.** This Registry-grade coin ranks as the *sole finest* 2009-D Formative Years cent at PCGS (6/15) — a strong example of mintage having little to do with the availability of high-grade coins. The strike is bold and the unabraded surfaces yield vibrant coppery-red luster. NGC ID# 22KE, PCGS# 407841

## PROOF LINCOLN CENTS

**3537 1913 PR66 Red and Brown PCGS.** Fully struck, with thick matte luster and broad rims. This Premium Gem proof cent is mostly peach-gold on the obverse with auburn overtones along the lower margin; the reverse is more vividly colored in violet and plum hues with orange-gold luster around the periphery. Population: 25 in 66 (1 in 66+) Red and Brown, 4 finer (6/15). NGC ID# 22KW, PCGS# 3316

**3538 1913 PR65 Red PCGS. CAC.** Broad rims and thick matte luster confirm the proof status of this razor-sharp 1913 Lincoln cent. Free of contact marks, each side is aglow with peach-orange luster. A few specks in the central reverse are not obtrusive to the unaided eye. Population: 46 in 65 Red, 39 finer (6/15). NGC ID# 22KW, PCGS# 3317

**1916 Lincoln Cent, PR65 Red and Brown  
Stunning Coloration**

**3539 1916 PR65 Red and Brown PCGS.** Distinctive coloration gradates from vivid purple hues to burnt-orange and umber tones, with hints of forest-green on the obverse. Similar shades of orange, green, and umber cover the reverse. The 1916 final matte proof issue was struck to an extent of 1,050 pieces, but possibly not all were distributed based on the number of known survivors. This example is tack-sharp, benefiting from a new master hub that was introduced for the year. Lincoln's hair and beard are especially sharp. Three or four minuscule pinprick spots are seen with a strong glass, but do not disturb the rich patination in the least. Population: 54 in 65 (1 in 65+) Red and Brown, 19 finer (6/15). NGC ID# 22KZ, PCGS# 3325

**1936 Satin Proof Cent, PR65 Red  
Appealing Surfaces**

**3540 1936 Type One — Satin Finish PR65 Red PCGS. CAC.** The 1936 was the first proof issue in the Lincoln cent series after the failed matte proof experiment of 1909 to 1916. This date was produced in both a satin and a brilliant finish, although the former is by far the scarcer of the two. This Gem full Red example displays sharp motifs and semiprooflike fields. Amber-red and orange-gold overtones accentuate the bright, coppery-pink surfaces. Population: 60 in 65 (1 in 65+) Red, 29 finer (5/15). NGC ID# 22L2, PCGS# 3332

**3541 1936 Type Two — Brilliant Finish PR65 Red PCGS. CAC.** A subtle cameo appearance is discernible on this Gem Red proof, although the level of contrast is not bold enough to warrant such a designation from PCGS. This piece is deeply mirrored with warm orange-gold color; a few deeper rose and olive hues are also present along the upper-left obverse periphery. NGC ID# 22L3, PCGS# 3335

1937 Cent, PR67 Red  
Ex: Richmond Collection

- 3542** 1937 PR67 Red NGC. A prominently mirrored and intricately struck Superb Gem. The apricot-gold surfaces show only a couple of microscopic flecks. The second year of revived proof set production, and seldom encountered in the present quality.

Ex: Richmond Collection, Part II (David Lawrence, 11/2004), lot 1098. NGC ID# 22L4, PCGS# 3338

- 3543** 1950 PR68 Red Cameo NGC. A magnificent orange-red representative. Fully struck and flashy without a hint of carbon or contact. An opportunity for the advanced Registry collector. Census: 4 in 68 Cameo, none finer (6/15). NGC ID# 22LA, PCGS# 83359

- 3544** 1956 PR68 Ultra Cameo NGC. This magnificent Lincoln cent exhibits fully detailed frosty design elements that contrast dramatically with the deeply mirrored fields. The original red surfaces are impeccably preserved. Census: 10 in 68 Ultra Cameo, 2 finer (6/15). NGC ID# 22LG, PCGS# 93377

- 3545** 1957 PR68 Red Ultra Cameo NGC. An unsurpassable specimen whose glassy apricot-gold fields and frosted razor-sharp motifs combine for exemplary eye appeal. One minute fleck is present beneath the stem of the right wheat ear. None are certified finer by either leading service. Census: 5 in 68 Ultra Cameo, 0 finer (6/15). NGC ID# 22LH, PCGS# 93380

## TWO CENT PIECES

- 3546** 1864 Small Motto, FS-401, MS62 Brown PCGS. Both sides show considerable brick-red, although gunmetal-blue fills a majority of this sharply struck example. Study beneath a lens reveals occasional unimportant marks. A scarce and ephemeral introductory subtype. PCGS# 38232 Base PCGS# 3579

- 3547** 1865 Plain 5 MS65 Red PCGS. A coruscating pumpkin-gold Gem. Devoid of contact, and the strike is sharp except for blending on the wreath periphery. Perusal beneath a loupe reveals inoffensive carbon. Certified in a first generation holder. PCGS# 38249 Base PCGS# 3584

- 3548** 1866 MS65 Red PCGS. The issue is scarce in Gem condition are rare any finer, making this MS65 coin an ideal candidate for the series specialists. Fire-orange surfaces flash bright mint luster, and peach-orange shades intermingle on the reverse. The strike is diamond-sharp. A few darker freckles do not distract. Population: 49 in 65 (2 in 65+) Red, 8 finer (6/15). NGC ID# 274R, PCGS# 3590

## PROOF TWO CENT PIECES

1866 Two Cent Piece, PR66+ Red and Brown  
Exceptional Eye Appeal

- 3549** 1866 PR66+ Red and Brown NGC. Neither NGC nor PCGS have certified any proof 1866 two cent pieces at the Superb Gem grade level, making high-end Premium Gems the finest obtainable. This Plus-designated Red and Brown coin shows bold striking definition and deep reflectivity in the fields. Both sides show consistent bronze-gold color with subtle overtones of deeper burgundy that preclude a full Red color designation, but make for an exceptionally attractive Red and Brown example. Census: 16 in 66 (1 in 66+) Red and Brown, 0 finer (6/15). NGC ID# 274V, PCGS# 3631

1869 Two Cent, PR66 Red and Brown  
Vibrant Toning, Deep Mirrors

- 3550** 1869 PR66 Red and Brown PCGS. CAC. The in-hand charisma of this deeply mirrored, colorfully toned proof two cent piece is undeniably impressive. Vivid coloration reveals shades of cherry-red, lime-green, and fiery orange that blanket both sides, with only slight evidence of brown where the colors merge. The strike is equally compelling, with full details throughout the motifs that contrast with the boldly reflective fields. Just 600 proofs were produced, and it is certain few survivors can compete with the exceptional eye appeal and overall quality of this Premium Gem. CAC endorsed. Population: 20 in 66 Red and Brown, 2 finer (6/15). NGC ID# 274Y, PCGS# 3640

**1870 Two Cent, Pristine PR67 Brown  
Important Top-Grade Example**

- 3551 1870 PR67 Brown NGC.** The pristine surfaces of this Superb Gem proof reveal no trace of distraction on surfaces showing alternating rose-lilac and medium-blue patina throughout both sides, a beautiful coin. A few trivial, tiny flecks show only under a loupe, barely worth mentioning. Die lapping has lightened some details on the shield ornament beneath WE and the juncture of the vertical and horizontal shield lines beneath. This is an important and beautiful example for series specialists, one of only two in PR67 Brown at NGC and tied with two such at PCGS (5/15). NGC ID# 274Z, PCGS# 3642

**THREE CENT SILVER**

- 3552 1851 MS66 PCGS.** The 1851 silver three cent is one of the most plentiful issues in the series, ideal for the collector assembling an affordable type set. Nonetheless, its availability plummets above the MS66 grade level. This Premium Gem representative exhibits above-average sharpness for the issue, with frosty luster shining through soft olive-gray and champagne hues. Only 14 coins are numerically finer at PCGS (5/15). NGC ID# 22YX, PCGS# 3664
- 3553 1851 MS66 NGC.** A sharply detailed Premium Gem from the first year of the denomination, this coin displays vibrant satiny mint luster and well-preserved surfaces with a few hints of delicate pink patina. Census: 85 in 66 (8 in 66+, 1 in 66 ★), 10 finer (6/15). NGC ID# 22YX, PCGS# 3664
- 3554 1851-O MS64 PCGS.** As the sole branch mint issue of the series, this New Orleans date is always in demand. Dappled heather and gold toning covers both sides of this frosty near-Gem, with a typical strike for the worn O-Mint dies where the reverse periphery is weak. Struck from a composition of 75% silver, 25% copper as were all Variety One three cent silver issues (1851 to 1853) to discourage hoarding and melting. NGC ID# 22YY, PCGS# 3665

**1851-O Silver Three Cent, MS65+  
Smooth, Satiny Surfaces**

- 3555 1851-O MS65+ PCGS. CAC.** The only branch mint issue in the series, scarce in Gem or better grades. This Plus-graded example displays satiny lavender-gray and pale champagne hues, with a lack of any mentionable abrasions. Considerable weakness is evident on the reverse, a product of die wear. Population: 48 in 65 (1 in 65+), 29 finer (5/15). NGC ID# 22YY, PCGS# 3665

- 3556 1852 MS66 NGC.** This is a beautiful example with gleaming, essentially brilliant surfaces that betray a bit of speckled green-gray peripheral patina on each side. Clear die clash marks are noted over the central regions. Virtually pristine and free of post-striking distractions. NGC lists 19 numerically finer examples (5/15). Ex: *Central States Signature* (Heritage, 5/2007), lot 1358. NGC ID# 22YZ, PCGS# 3666

- 3557 1856 MS64 PCGS. CAC.** Lightly toned gold and dotted blue over pale silver surfaces. Broadly swirling luster makes for an appealing near-Gem, though peripheral details are soft. Ex: *CSNS Signature* (Heritage, 4/2007), lot 1361; *Summer FUN* (Heritage, 7/2007), lot 240. NGC ID# 22Z5, PCGS# 3672

**1858 Three Cent Silver, MS66  
Final-Year Type Two Issue**

- 3558 1858 MS66 PCGS. CAC.** A frosty, richly toned Premium Gem three cent silver with remarkable quality for a Type Two issue. The strike is needle-sharp at the centers, and only some irregularity and rounding on several reverse stars prevents a full strike designation. Soft mint luster peaks through the olive-gold patina flattered by copper-red accents. Scarce any finer, and verifiably scarce despite the 1.6 million-piece mintage. CAC endorsed. Population: 39 in 66, 11 finer (5/15). NGC ID# 22Z7, PCGS# 3674

- 3559 1862/1 FS-301, R.3, MS65 PCGS. CAC.** A lustrous, Gem example of the overdate, with an underdigit 1 visible beneath the 2 under magnification, and a diagnostic die crack travels from the edge through the first 1 to the star. A spinelike die line runs from the point of the star to the top of 6 in the date. This is a popular war issue, with 343,000 pieces struck despite the fact that silver coinage was hoarded and did not circulate to any extent. The devices are sharply impressed except for a few of the reverse star centers. Attractive gunmetal-blue, rose, and gold toning flashes over essentially mark-free surfaces. CAC endorsed. NGC ID# 22ZC, PCGS# 3681

- 3560 1862 MS66 PCGS.** This Premium Gem is fully lustrous and shows frosty surfaces. Parts of both sides are medium champagne-gold with the balance of each side toned in various rainbow colors. Machine doubling is visible at the date and elsewhere on the obverse. Weakness of strike is noted at the center on each side. PCGS lists only 15 numerically finer representatives (5/15). Ex: *Central States Signature* (Heritage, 4/2006), lot 761. NGC ID# 22ZB, PCGS# 3680

- 3561 1862 MS66 PCGS. CAC.** Brilliant, untuned silver luster beams from the surfaces of this whiter-than-white Premium Gem. There are no distracting marks from handling or transport, although die clashing is prominent on both sides of the coin. Slight blending is noted on the arrow fletchings and at various areas of the shield outline. PCGS has certified just 15 pieces in a higher numeric grade. A CAC endorsed example. NGC ID# 22ZB, PCGS# 3680

- 3562 1868 AU58 PCGS.** With only 3,500 pieces struck, the 1868 silver three cent is scarce in any Mint State grade. This near-Mint example presents the budget-conscious collector with an attractive, sharply detailed acquisition. The design elements are fully rendered and show just a brush of friction. Prooflike mirroring in the fields is accentuated by tinges of amber-gold color around the peripheries. Population: 8 in 58, 30 finer (5/15). NGC ID# 22ZJ, PCGS# 3688

## PROOF THREE CENT SILVER

- 3563 1859 PR64+ NGC.** This high-end Choice specimen exhibits well-detailed design elements and a few clash marks on the central reverse. Shades of golden-brown, lavender, and violet toning enhance the well-preserved surfaces, with reflective fields underneath. Census: 43 in 64 (1 in 64+, 1 in 64 ★), 34 finer (6/15). NGC ID# 27C6, PCGS# 3708
- 3564 1864 PR65 NGC.** From a limited mintage of only 470 pieces, this Gem proof 1864 silver three cent is deeply toned in shades of amber, gold, olive, and gunmetal-gray. The design elements are fully rendered and the fields gleam when tilted beneath a light. A couple tiny contact marks to the right of the date limit the grade. Census: 39 in 65, 24 finer (5/15). NGC ID# 27CA, PCGS# 3714
- 3565 1864 PR66 NGC.** Attractive shades of lavender-gray, champagne-gold, and cerulean-blue toning blanket the well-preserved surfaces of this sharply detailed Premium Gem. The fields are deeply reflective under the toning and eye appeal is quite strong. From a low mintage of 470 pieces. Census: 15 in 66 (1 in 66 ★), 9 finer (6/15). NGC ID# 27CA, PCGS# 3714
- 3566 1866 PR65 Cameo PCGS.** This delightful Gem exhibits sharply detailed design elements throughout, and the deeply mirrored fields contrast boldly with the frosty devices. No mentionable distractions are evident and eye appeal is terrific. Population: 9 in 65 Cameo, 18 finer (6/15). PCGS# 83716

### 1870 Silver Three Cent, PR66 Cameo Sharp, Beautifully Toned

- 3567 1870 PR66 Cameo PCGS. CAC.** The field-device contrast prevails, despite a blanket of rose-gold, mint, and lavender-blue toning that accentuates the mirrors on each side. Design definition is razor-sharp and there are no detracting marks or hairlines. This proof silver three cent issue is seldom found in any Cameo grade, and pieces as fine as the current example are genuinely rare. Population: 12 in 66 Cameo, 2 finer (5/15). PCGS# 83721

## THREE CENT NICKELS

### 1873 Open 3 Nickel Three Cent, MS65 Extremely Rare Any Finer

- 3568 1873 Open 3 MS65 PCGS.** The Open 3 logotype is plain on this Gem example. Both sides are softly lustrous with satiny, nickel-gray surfaces that show just a hint of champagne toning. The design elements are well-defined and the only grade-limiting factor is faint contact on Liberty's cheek, not obvious to the unaided eye. Population: 39 in 65 (1 in 65+), 2 finer (5/15). PCGS# 3740

### 1874 Three Cent Nickel, MS66+ Only One Finer Example at PCGS

- 3569 1874 MS66+ PCGS. CAC.** While the silver three cent pieces were discontinued in 1873, the three cent nickel soon stepped in with a mintage of 789,300 pieces in 1874. Numismatic conservation was not a priority in those financially troubled times, and few Uncirculated examples of the first-year issue were saved. This high-end Premium Gem is one of the finest survivors, with lustrous untuned surfaces and an impeccable strike. Just a single coin is certified finer by either service. CAC endorsed, and this is the sole MS66 coin at PCGS with the Plus designation. PCGS Population: 12 in 66 (1 in 66+), 1 finer (6/15). NGC ID# 2759, PCGS# 3742

- 3570 1879 MS66 PCGS.** The 1879 nickel three cent is a slightly better date, boasting a low mintage of only 38,000 coins. A few light ticks on the portrait are all that keep this frosty Premium Gem from an even higher grade, although none are obvious without the aid of a loupe. The design elements are sharply struck and the nickel-gray surfaces show just a hint of light golden color overall. Population: 36 in 66, 10 finer (5/15). NGC ID# 275B, PCGS# 3747

- 3571 1883 MS62 PCGS.** With a mintage of only 4,000 coins, the 1883 nickel three cent is a sought-after, elusive issue in all grades. This is a rare Mint State example, with satiny nickel-gray luster that shows just a tinge of light golden coloring over modestly semiprooflike fields. A well-struck example, devoid of major abrasions. Population: 13 in 62, 28 finer (5/15). NGC ID# 275E, PCGS# 3751

### 1885 Nickel Three Cent, XF45 Collector-Grade Example

- 3572 1885 XF45 PCGS.** The 1885 is the key date in the nickel three cent series, boasting the lowest mintage therein of just 1,000 coins. This example offers the budget-conscious collector with an affordable, yet, visually pleasing entry into this challenging issue. The surfaces are uniformly battleship-gray, and the design elements remain bold despite light wear. Population: 20 in 45, 70 finer (5/15). NGC ID# 275G, PCGS# 3753

- 3573 1889 MS66 PCGS. CAC.** Jewel-like silver luster ripples across untuned surfaces of this exquisite Premium Gem. An exceptionally well-produced and preserved example, with thick mint frost and almost no evidence of contact. An important type coin as the final year of the denomination with terrific eye appeal. Population: 29 in 66 (2 in 66+), 15 finer (6/15). NGC ID# 275J, PCGS# 3758

## PROOF THREE CENT NICKELS

- 3574 1868 PR66 Cameo NGC.** A brilliant Premium Gem proof with light gray surfaces and excellent contrast, although just shy of an Ultra Cameo proof. This piece would be a nice starter coin towards a wonderful set of quality Cameo proofs. Census: 31 in 66 Cameo (1 in 66+ Cameo, 5 in 66 ★ Cameo, 2 in 66+★ Cameo), 12 finer (5/15).

Ex: Long Beach Signature (Heritage, 9/2002), lot 5717; Houston Signature (Heritage, 12/2008), lot 558. PCGS# 83764

- 3575 1869 PR65 Deep Cameo PCGS. CAC.** Bold design elements yield frosty, gold-tinted luster against glass-black fields that are fully mirrored on this Gem Deep Cameo proof. Trivial contact on Liberty's cheek is all that limits the grade. Population: 18 in 65 Deep Cameo, 12 finer (5/15). PCGS# 93765

- 3576 1870 PR66 NGC.** This sharp Premium Gem shows modest field-motif contrast, although not boldly enough to warrant a Cameo designation. The mirrored fields and frosty devices show hints of light golden color, with a few tiny strike-throughs noted for accuracy. Census: 20 in 66 (1 in 66 ★), 1 finer (6/15). NGC ID# 275R, PCGS# 3766

- 3577 1872 PR66 Cameo PCGS.** Cameo examples of this proof issue are seldom seen in high grade. This Premium Gem representative boasts pleasing contrast and sharp, frosty devices. Devoid of contact marks, with a light golden hue over each side. Population: 10 in 66 (1 in 66+) Cameo, 0 finer (6/15). PCGS# 83768

- 3578 1876 PR66 ★ NGC.** A sharply detailed Premium Gem from a proof mintage of 1,150 pieces, this coin displays well-preserved surfaces with a few hints of pale gold toning and deeply mirrored fields. Census: 31 in 66 (2 in 66 ★), 4 finer (6/15). NGC ID# 275W, PCGS# 3772

- 3579 1878 PR66+ Cameo PCGS. CAC.** One of three proof-only issues from the three cent nickel series, joining the 1877 and 1886 dates for that distinction. Just 2,350 pieces were struck for distribution to collectors — apparently all in proof sets. This example is nicely cameoed with a faint hint of gold patina over the mostly untuned surfaces. Sharply struck and CAC endorsed. Population: 10 in 66+ Cameo, 25 finer (5/15). PCGS# 83774

## SHIELD NICKELS

- 3580 1866 Rays MS65 PCGS.** The hard nickel alloy caused the Mint no end of problems and die attrition was atrocious. More than 14.7 million Rays nickels were struck, many of which with compromised quality from the hard planchets. The present Gem shows numerous obverse die cracks and doubling of all four digits in the date (and other obverse elements) to the northeast. A few dark specs are microscopic on the frosty, untuned surfaces. NGC ID# 22NX, PCGS# 3790

- 3581 1866 Rays MS65+ NGC.** This lavender-gold Gem displays satiny luster and unabraded fields. The reverse stars are not fully brought up, but the remaining design elements are well-defined. A few stray die cracks occupy the peripheral regions. NGC shows only 23 finer representatives (5/15). NGC ID# 22NX, PCGS# 3790

- 3582 1866 Rays MS65 PCGS. CAC.** The 1866 Shield nickel represents the first year of the denomination and the short-lived Rays design type. This impressive Gem offers well-detailed design elements and vibrant mint luster, under attractive shades of pale gold toning. PCGS has graded 40 numerically finer examples (6/15). NGC ID# 22NX, PCGS# 3790

### 1866 Rays Shield Nickel, MS66 Lightly Toned in Pastels

- 3583 1866 Rays MS66 PCGS.** Premium Gem 1866 Shield nickels are only infrequently seen, but are the finest examples of the issue known. This piece is notably well-preserved, although significant striking softness is observed on the peripheral elements. The earliest issues in this series are typically seen with the widest range of striking quality, as the Mint was still perfecting the process of coining the hard nickel alloy. Light lathe lines are evident in the lower shield recesses. Both sides are consistently lavender-blue in color, with a blush of mint-gold around the lower obverse and upper reverse borders. Population: 39 in 66 (2 in 66+), 0 finer (5/15). NGC ID# 22NX, PCGS# 3790

### 1866 Shield Nickel, MS66 Popular Rays Design

- 3584 1866 Rays MS66 PCGS.** A delightful Premium Gem from the first year of the denomination, this coin exhibits sharply detailed design elements and a number of interesting die cracks on the obverse. Subtle shades of pale gold toning visit the lustrous, well-preserved surfaces. Population: 40 in 66 (2 in 66+), 0 finer (6/15). NGC ID# 22NX, PCGS# 3790

- 3585 1867 No Rays MS66+ NGC.** Outstanding surface quality is the hallmark of this No Rays type coin, warmed by a light golden hue over each side. The stars and the horizontal shield lines are not absolutely full, but the sharpness is above-average for the issue. This piece shows the usual die cracks around the peripheries on each side, although the reverse also exhibits a pair of thin rim cud at 12 o'clock. NGC ID# 22NZ, PCGS# 3794

- 3586 1873 Open 3 MS66 NGC.** An extensive network of minor die cracks is evident on the obverse of this attractive Premium Gem. The design elements are strongly impressed, but some detail is lacking in the arrows, due to die polishing. The well-preserved surfaces radiate vibrant mint luster. Census: 9 in 66, 0 finer (6/15). NGC ID# 276C, PCGS# 3800

- 3587 1879 MS63 PCGS.** The obverse of this piece displays semiprooflike fields, but the wreath leaves lack full definition, and the reverse is soft and satiny, characteristics that are in harmony with an upper-end circulation strike. Hints of light olive-gold toning grace the nickel-gray surfaces, and any grade-limiting abrasions are well-hidden. NGC ID# 276D, PCGS# 3808

**1879 Shield Nickel, MS65  
Challenging Issue in High Grade**

- 3588 1879 MS65 PCGS.** Only 25,900 business-strike Shield nickels were struck at the Philadelphia Mint in 1879 and examples in MS65 condition are quite elusive. This attractive Gem displays sharply detailed design elements and lustrous, well-preserved surfaces that show highlights of pale gold and lavender toning. Population: 29 in 65 (1 in 65+), 27 finer (6/15). NGC ID# 276D, PCGS# 3808

**PROOF SHIELD NICKELS**

- 3589 1869 PR66 PCGS.** From a small proof mintage of 600 pieces, this delightful Premium Gem exhibits sharply detailed design elements and reflective fields throughout. The well-preserved surfaces show a few hints of pale gold and ice-blue toning. Population: 26 in 66 (1 in 66+), 2 finer (6/15). NGC ID# 276K, PCGS# 3823
- 3590 1870 PR66 Cameo NGC.** This untoned Premium Gem Cameo 1870 Shield nickel shows silver-gray fields with lighter silver-white high points amid surfaces that are virtually unmarked throughout, quite appealing and high-end for this elusive proof issue. These Shield nickel proofs seem considerably underrated at today's market levels. Census: 14 in 66 Cameo, 3 finer (5/15). PCGS# 83824

**1872 Shield Nickel, PR67 Cameo  
Doubled Die Obverse**

- 3591 1872 PR67 Cameo PCGS.** The obverse is die doubled north, similar to the FS-101 *Cherrypickers'* variety, but the spread is a trifle wider on this piece. The design elements are boldly struck and contrast against fully mirrored fields. Light golden toning adds a degree of warmth to the overall eye appeal. Tied with three others for finest at PCGS (6/15). PCGS# 83826

**1873 Shield Nickel, Closed 3, PR67  
Repunched Date**

- 3592 1873 Closed 3 PR67 PCGS.** The date is minutely repunched north, with the underdigit most obvious on the 1. This variety is unlisted in the *Cherrypickers'* reference of die varieties for this date. The 3 is most certainly of the Closed 3 logotype, a characteristic which is sometimes difficult for the novice to discern on this issue. This coin is sharply struck and mirrored in the fields, with a glistening array of delicate rainbow toning blended over both sides. Population: 4 in 67, 0 finer (6/15). NGC ID# 276P, PCGS# 3827

- 3593 1876 PR66 Cameo NGC.** The mirrorlike fields contrast boldly with the frosted devices. Spidery die cracks are seen in the upper-left obverse field and among the letters of IN GOD WE TRUST — an unusual occurrence on a proof. Untoned and sharp, this pleasing Premium Gem displays excellent eye appeal. Census: 47 in 66 Cameo (2 in 66+ Cameo, 3 in 66 ★ Cameo), 7 finer (6/15). PCGS# 83830

- 3594 1876 PR66 Cameo NGC.** This fully struck Cameo displays significant field-device contrast, warmed on each side by a veil of light golden toning. No contact marks or obtrusive hairlines are present. Census: 47 in 66 Cameo (2 in 66+ Cameo, 3 in 66 ★ Cameo), 7 finer (5/15). PCGS# 83830

- 3595 1878 PR66+ PCGS. CAC.** The striking quality of this Premium Gem proof is superior to many examples of this issue, displaying unusually reflective fields and sharply defined motifs. Iridescent surfaces are seemingly devoid of contact marks or bothersome hairlines, and the overall impression is excellent. Only 16 pieces are finer at PCGS (5/15). NGC ID# 276V, PCGS# 3832

- 3596 1878 PR66 Cameo PCGS. CAC.** Some argue that proofs from this year are really prooflike business strikes, but the grading services do not agree and by appearances of this coin, neither do we. The Mint reports 2,350 proofs struck for the year and no business strikes. On the present coin, the high-contrast devices are thickly frosted and the surrounding fields show medium mirrors. Sharply struck throughout. Population: 21 in 66 (1 in 66+) Cameo, 4 finer (6/15). PCGS# 83832

**1878 Shield Nickel, PR67 Cameo  
Problem-Free Example**

**3597 1878 PR67 Cameo NGC.** The 1878 Shield nickel often resembles a business strike more than a conventional proof, but the issue was nevertheless marketed by the Mint as proofs, and thus they are known as such. This reflective example does justice to both its proof format and its Superb Gem condition, with mirrored areas between the shield lines and around the central devices. The reverse dies were more incompletely polished, with satiny, semiprooflike luster. This is a fully struck example from an early state of the dies, as indicated by a lump or similar artifact in the lower loop of the second 8. Census: 5 in 67 Cameo, 0 finer (5/15). PCGS# 83832

**3598 1881 PR67 PCGS.** Pastel rainbow hues encompass each side of this Superb Gem proof, although pale indigo and sky-blue are by far the dominant shades. The motifs are sharp and subtle cameo contrast is observed, primarily on the obverse. Population: 25 in 67, 0 finer (5/15). NGC ID# 276X, PCGS# 3836

**3599 1881 PR67 Cameo PCGS. CAC.** This Superb Gem Cameo proof displays considerable nickel-white-on-black contrast. Both sides are sharply struck and carefully preserved. Great eye appeal. Population: 25 in 67 Cameo, 0 finer (5/15). PCGS# 83836

**3600 1883 PR67 Cameo PCGS.** Filling shows in many of the peripheral obverse letters and both 8s in the date on this Superb Gem Cameo proof 1883 Shield nickel, an attractive example of this last-year-of-the-series issue. Thick mint frost, fine preservation, and considerable field reflectivity account for the grade. The year 1883 was the "three-nickel year" in which one Shield and two Liberty nickel types were struck. This is a great type coin. Population: 11 in 67 (1 in 67+) Cameo, 0 finer (6/15). PCGS# 83838

## LIBERTY NICKELS

**3601 1885 AU50 PCGS.** Olive and lavender-gray surfaces have distinct peach overtones on this lightly circulated key-date Liberty nickel. Better-defined than usually seen, particularly on the stars and the lower wreath.

*Ex: Long Beach Signature (Heritage, 6/2010), lot 354; Pittsburgh Signature (Heritage, 10/2011), lot 3369. NGC ID# 2773, PCGS# 3846*

**3602 1886 MS62 PCGS.** A collectible Mint State example of this key Liberty nickel issue, unusually appealing for the grade with minimal marks and vibrant luster. Light golden toning graces each side. This piece shows minor weakness on the corn ear to the left of the wreath bow, but the overall sharpness is above-average for the issue. NGC ID# 22PK, PCGS# 3847

**3603 1888 MS65 PCGS. CAC.** A couple minute ticks below Liberty's eye appear to be all that keep this Gem 1888 Liberty nickel from an even finer grade. This piece is softly lustrous beneath blended lavender-gray and champagne hues. The lower-left portion of the wreath and the corresponding obverse stars show minor striking softness. Population: 71 in 65 (2 in 65+), 21 finer (5/15). NGC ID# 2774, PCGS# 3849

**3604 1892 MS66 PCGS.** Each side displays a pale sliver of nickel-gray at the left, with increasing depth of gold color as the eye tracks to the right. This piece offers sharply struck surfaces complementing the fantastic eye appeal — an amazing Premium Gem. The ear of corn to the left of the ribbon bow is fully detailed, and powerful mint luster swirls on both sides of the coin. PCGS has seen only 24 submissions at the MS66 level and none finer. NGC has graded 12 MS66 and none finer (6/15).

*Ex: Dale Friend Collection / FUN Signature (Heritage, 1/2010), lot 482; The Eugene H. Gardner Collection (Heritage, 10/2014), lot 98149. NGC ID# 2777, PCGS# 3853*

## 1892 Nickel, Frosty MS66

**3605 1892 MS66 PCGS. CAC.** The 1892 is an available date in the absolute sense, but Premium Gem examples are seldom available. This CAC-endorsed representative displays frosty nickel-gray luster with a hint of gold throughout. The surfaces are free of any significant abrasions. Striking sharpness is far above average, particularly on the corn ear to the left of the bowknot. Population: 24 in 66 (4 in 66+), 0 finer (6/15). NGC ID# 2777, PCGS# 3853

**3606 1893 MS66 NGC.** The economic condition of the nation may have influenced the number of 1893 nickels put aside in high grades. Financial panic and depression were of primary concern during the year, and the fiscal malaise lingered for several years thereafter. This gleaming Premium Gem nickel was somehow preserved with attractive, frosty luster and pale golden-tan accents. The strike is sharp throughout. Just four coins are certified finer by both services combined. NGC Census: 14 in 66, 3 finer (6/15). NGC ID# 2778, PCGS# 3854

**3607 1895 MS65 NGC.** Abrasions on this 1895 Liberty nickel are pleasantly minimal for the grade, and each side is aglow in frosty mint luster that shows some minute erosion in the peripheral recesses. The stars and the lower-left portion of the wreath are boldly rendered. Soft nickel-gray surfaces deepen to pale olive-gold on the obverse. Census: 43 in 65 (2 in 65 ★), 13 finer (5/15). NGC ID# 277A, PCGS# 3856

**3608 1895 MS65 PCGS.** *Ex: Friend.* Gem-quality, satiny surfaces display blended shades of champagne, mint-gold, and lavender-gray toning. Above-average sharpness is seen on the lower-left portion of the wreath, and the obverse stars are well-defined. The 1895 nickel is available in the absolute sense, but few pieces survive in Gem or better condition. Population: 65 in 65 (3 in 65+), 21 finer (5/15). NGC ID# 277A, PCGS# 3856

**3609 1895 MS66 PCGS Secure. CAC.** The design elements of this attractive Premium Gem are sharply detailed, unusual on the 1895 issue, which is often seen softly struck. The well-preserved surfaces are blanketed in shades of golden-tan and lavender-gray toning with soft mint luster shining through. Population: 19 in 66 (2 in 66+), 1 finer (6/15). NGC ID# 277A, PCGS# 3856

**3610 1907 MS66 PCGS. CAC.** This is a Registry-quality example featuring light-gold toning overall with touches of peach on the reverse. Vibrant luster radiates over the clean surfaces of this sharply struck Premium Gem Liberty nickel. Population: 29 in 66 (2 in 66+), 1 finer (5/15). NGC ID# 277J, PCGS# 3868

**3611 1912-D MS65 NGC.** This attractive Gem displays well-preserved lustrous surfaces under shades of lavender-gray and champagne-gold toning. The design elements are well-detailed, with a touch of the usual softness on the lower wreath. Census: 99 in 65 (3 in 65+, 1 in 65 ★), 26 finer (6/15). NGC ID# 277P, PCGS# 3874

- 3612 1912-D MS65 PCGS.** The issue was the first nickel coined at the Denver Mint, where nearly 8.5 million pieces were struck. This example is extremely attractive and lustrous with vivid orange and lilac toning. The satiny surfaces are well-struck except at the ear of corn and some of the hair strands at the Liberty's temple. A small planchet defect above the eye is visible with a glass. NGC ID# 277P, PCGS# 3874

**1912-S Nickel, MS65  
Vibrant Mint Luster**

- 3613 1912-S MS65 PCGS.** This delightful Gem represents the final year of business-strike production for the Liberty Head design, and the San Francisco Mint struck only 238,000 pieces. The devices are sharply detailed and the surfaces display vibrant mint luster under attractive shades of champagne-gold and lavender toning. PCGS has graded only 23 numerically finer examples (6/15). NGC ID# 277R, PCGS# 3875

**1912-S Nickel, Toned MS65  
Rarely Encountered Finer**

- 3614 1912-S MS65 NGC.** This Gem 1912-S Liberty nickel displays the expected satin luster, but is here accentuated by dusky lavender-gold and pale olive-gray toning. No detracting abrasions are observed, and the only notable striking weakness is found in its usual place on the corn ear to the left of the bowknot. Only 12 examples are numerically finer at NGC (5/15). NGC ID# 277R, PCGS# 3875

**1912-S Liberty Nickel, MS65  
First S-Mint Nickel**

- 3615 1912-S MS65 PCGS.** The 1912-S Liberty nickel is always popular as the first nickel five cent issue struck in San Francisco (the facility had struck silver five cent or half dime pieces in previous decades). The Gem level is the highest usually obtainable, as finer coins are rare. The present coin displays attractive pinkish-gray color on surfaces that are well-struck overall, save for the lower-left ear of corn on the reverse. Marks are minimal. PCGS has graded 23 numerically finer examples (6/15). NGC ID# 277R, PCGS# 3875

**PROOF LIBERTY NICKELS**

- 3616 1883 No Cents PR66 Cameo PCGS. CAC.** A beautifully preserved Cameo, one of three different nickel types struck in 1883. This No Cents Premium Gem is starkly contrasted beneath a pale golden overlay of toning, and the corn ear to the left of the bowknot is unusually well-defined. PCGS lists 18 numerically finer Cameos (5/15). PCGS# 83878

- 3617 1883 No Cents PR67 Cameo NGC.** A brilliant No Cents proof, fully struck and attractive with untuned surfaces and strong white-on-black cameo contrast. A shallow planchet depression near Liberty's chin is the only mark of consequence. Census: 22 in 67 Cameo (1 in 67 ★ Cameo), 0 finer (6/15). PCGS# 83878

- 3618 1886 PR66 PCGS. CAC. Breen-2542.** The 86 in the date is repunched. Light to medium peach-red toning evenly adorns this flashy and fully struck specimen. A small spot near the L in LIBERTY is the sole imperfection. Minor retained laminations (as made) are noted on the lower right obverse field. Considered a semikey due to the low mintage of the accompanied business issue. NGC ID# 277U, PCGS# 3884

- 3619 1891 PR66+ Cameo PCGS. CAC.** The Mint struck 2,350 proof nickels in 1891, but remarkably few survive in Premium Gem or finer condition, with or without cameo contrast. This Plus-designated Cameo is boldly struck with stark contrast and just a hint of light golden toning. Population: 28 in 66 (5 in 66+) Cameo, 4 finer (5/15). PCGS# 83889

- 3620 1893 PR66+ Cameo PCGS. CAC.** Fully struck and carefully preserved, with only a few trivial stray lines precluding a full PR67 grade. This stark Cameo is toned in blended shades of lavender, ice-blue, and champagne. Population: 36 in 66 (5 in 66+) Cameo, 17 finer (6/15). PCGS# 83891

**1893 Liberty Nickel, PR67 Cameo  
Tied for Finest Certified**

- 3621 1893 PR67 Cameo PCGS. CAC.** Significant white-on-black contrast provides strong visual appeal for this untuned, silver-white proof nickel. A Superb Gem, the strike is uniformly full on each of the elements and the only overt marks are on the holder...not on the coin. Deeply mirrored fields appear unblemished and free of hairlines even under magnification, surrounding the frosty devices with glassy brilliance. CAC endorsed, with no numerically finer examples at either service. Population: 17 in 67 (1 in 67+) Cameo, 0 finer (6/15). PCGS# 83891

- 3622 1894 PR66 Cameo PCGS.** The 4 in the date is recut north. This is a boldly contrasted proof with deep mirrors and richly frosted devices. The strike is sharp on both sides, with full details evident on the central elements. The coin displays brilliant silverlike color and a mere whisper of gold on the rims. A few milky freckles and a tiny hit on the cheek are the only marks of any note (and they are minor). A beautiful, lustrous Superb Gem nickel. Population: 21 in 66 (4 in 66+) Cameo, 8 finer (6/15). PCGS# 83892

- 3623 1897 PR66 Cameo PCGS. CAC.** A fairly plentiful proof issue overall, but scarcely seen with cameo contrast. This Premium Gem example displays tack-sharp definition and distinct field-device contrast. Pale amber-gold toning stretches across each side in thin ribbons of color. Population: 31 in 66 (6 in 66+) Cameo, 20 finer (6/15). PCGS# 83895

- 3624 1897 PR66+ Cameo PCGS. CAC.** Stark cameo contrast complements razor-sharp details of this high-end Premium Gem. The surfaces exhibit excellent preservation and are largely untuned, save for a faint golden tint around the rims. Population: 31 in 66 (6 in 66+) Cameo, 20 finer (6/15). PCGS# 83895
- 3625 1899 PR67 PCGS. CAC.** Lemon-gold and sea-green patina invigorate both sides of this fully struck and thoroughly lustrous Superb Gem. A desirable and seemingly pristine proof type coin. Ex: *Troy Wiseman Collection (Heritage, 9/2006)*, lot 933, which realized \$3,737.50. NGC ID# 2789, PCGS# 3897
- 3626 1900 PR67 NGC. CAC.** Beautiful lemon-gold and powder-blue patina embraces this satiny and needle-sharp Superb Gem. Devoid of carbon, and encased in a former generation holder. Ex: *Long Beach Signature (Heritage, 9/2008)*, lot 695, which realized \$1,495. NGC ID# 278A, PCGS# 3898
- 3627 1903 PR67 PCGS.** This spectacular Superb Gem exhibits razor-sharp definition on all design elements and the fields are deeply mirrored throughout, creating modest, but unacknowledged, cameo contrast with the frosty devices. The impeccably preserved surfaces show a few hints of champagne-gold toning. Population: 20 in 67 (1 in 67+), 0 finer (6/15). NGC ID# 278D, PCGS# 3901

#### 1903 Liberty Nickel, Pastel-Toned PR68

- 3628 1903 PR68 NGC.** The pristine surfaces of this Superb Gem proof are awash with vivid-yet-pastel patina. Greenish-gold, rose, ice-blue, and lilac graces the obverse, with deeper copper-rose, pale blue, and gold on the reverse, amid a bold strike and excellent preservation throughout both sides. Even the challenging lower-left ear of corn is well brought up. Census: 6 in 68 (1 in 68 ★), 0 finer (5/15). NGC ID# 278D, PCGS# 3901
- 3629 1905 PR66 Cameo PCGS.** Shimmering surfaces and an intricate strike are among the attributes this Premium Gem exhibits in addition to pleasing Cameo contrast. A few minuscule as-made strike-throughs appear on the obverse, including one to the right of the date. Both sides reveal a few tiny spots. Population: 9 in 66 (2 in 66+) Cameo, 2 finer (5/15). PCGS# 83903
- 3630 1906 PR66 Cameo PCGS.** The well-detailed, frosty design elements of this impressive Premium Gem contrast boldly with the deeply reflective fields to produce a startling cameo effect. No mentionable surface flaws are evident and eye appeal is terrific. Population: 30 in 66 (4 in 66+) Cameo, 22 finer (5/15). PCGS# 83904
- 3631 1906 PR66 Cameo PCGS. CAC.** From a proof mintage of 1,725 pieces, this impressive Premium Gem exhibits sharply detailed frosty design elements that contrast dramatically with the deeply mirrored fields. Well-preserved surfaces add to the outstanding eye appeal. Population: 30 in 66 (4 in 66+) Cameo, 22 finer (6/15). PCGS# 83904
- 3632 1906 PR66+ Cameo NGC. CAC.** This high-end Premium Gem exhibits razor-sharp definition on all design elements and the deeply mirrored fields contrast boldly with the frosty devices. A few hints of pale gold toning enhance the flawless surfaces. Census: 13 in 66 Cameo (2 in 66+ Cameo, 2 in 66 ★ Cameo), 13 finer (6/15). PCGS# 83904

- 3633 1906 PR67 Cameo NGC.** Sharply detailed design elements and deeply mirrored fields with bold cameo contrast are the calling cards of the delightful Superb Gem. The brilliant surfaces are impeccably preserved. Census: 13 in 67 Cameo (1 in 67+ Cameo), 0 finer (6/15). PCGS# 83904
- 3634 1907 PR66 Cameo PCGS. CAC.** Fully struck and about as contrasted between the fields and devices as is ever seen on this 1907 proof nickel issue. This piece is beautifully preserved and displays warm champagne toning. Population: 19 in 66 (1 in 66+) Cameo, 5 finer (6/15). PCGS# 83905
- 3635 1909 PR67 Cameo PCGS. CAC.** A specimen with wonderful visual appeal on both sides, this Superb Gem exhibits splendid toning in addition to pronounced Cameo contrast. Subtle hues of frosty, pale blue and peach yield the occasional glimpse of lilac. Bold at the centers, although portions of the outer devices display incompleteness, including several of the stars and the left ear of corn. Population: 27 in 67 (3 in 67+) Cameo, 1 finer (5/15). PCGS# 83907

## BUFFALO NICKELS

- 3636 1914-S MS65 PCGS.** Impeccably preserved surfaces display warm golden toning on this Gem 1914-S nickel, while the devices are uncommonly sharp. The reverse is satiny with traces of die erosion in the peripheral recesses, while the obverse exhibits almost matte-like luster. PCGS has seen 37 numerically finer pieces (5/15). NGC ID# 22R6, PCGS# 3926

#### 1915 Buffalo Nickel, MS67 Beautiful, Glowing Surfaces

- 3637 1915 MS67 PCGS.** A blazing Superb Gem, among the finest certified of this issue. The devices are boldly rendered and the champagne-tinted surfaces exhibit satiny, almost matte-like luster. Just the faintest hints of die erosion in the recesses set this piece apart from many proof examples of this date. Population: 45 in 67 (3 in 67+), 0 finer (6/15). NGC ID# 22R7, PCGS# 3927
- 3638 1916 Doubled Die Obverse, FS-101, AG3 PCGS.** The date is almost completely worn off this well-circulated battleship-gray example, but the 6 is faintly discernible. Moreover, the Indian's profile and the feathers show clear die doubling. This is one of the most affordable examples known of this elusive *Guide Book* variety. PCGS# 145628 Base PCGS# 3931
- 3639 1916-D MS65 PCGS.** The 1916-D Buffalo nickel frequently comes poorly struck, a characteristic exhibited by the current piece on the bison's shoulder and the hair above the Indian's braid. Nonetheless, the surfaces are well-preserved and satiny, and each side shows an attractive blend of lavender, champagne, and rose toning. PCGS lists 18 numerically finer representatives (5/15). NGC ID# 22RB, PCGS# 3932

**1916-S Buffalo Nickel, MS65**  
Scarce This Nice

**3640 1916-S MS65 PCGS. CAC.** Essentially, the 1916-S nickel is a strike rarity, with numerous repercussions from worn, eroded, and clashed dies that limit the number of high-grade Mint State coins. The current example is not immune to such challenges, although it is clearly more crisply struck than many of its counterparts. The feather tips are reasonably complete, and the bison's tail shows some detail. Die clashing shows "chin whiskers" at the neck junction and beneath E PLURIBUS UNUM. Die erosion at the top reverse rim shows a double border, which is more of an interesting anomaly than a detriment. The coin is untoned with nice satin luster — a scarce Gem and CAC endorsed, with only 38 coins certified finer by PCGS (6/15). NGC ID# 22RC, PCGS# 3933

**3641 1917-S MS64 PCGS. CAC.** An attractive Choice example of this early series issue, with sharply detailed design elements and satiny mint luster, under low-intensity shades of golden-tan toning. The 1917-S becomes scarce in grades above the MS64 level. NGC ID# 22RF, PCGS# 3936

**1918-D Buffalo Nickel, MS65**  
Struck From Fresh Dies

**3642 1918-D MS65 PCGS.** The 1918-D Buffalo nickel is frequently found poorly struck, and this characteristic is evident to a moderate extent on the present piece — on the bison's shoulder and on the hair above the Indian's braid. The surfaces are nonetheless well-preserved, exhibiting a modestly iridescent champagne-gold hue. Population: 71 in 65 (1 in 65+), 26 finer (5/15). NGC ID# 22RH, PCGS# 3938

**3643 1918-S MS63 PCGS.** The 1918-S is one of the genuinely elusive S-mint Buffalo nickel issues in Uncirculated grades, comparing favorably in rarity to all but the 1926-S. Both sides of this Select example display the usual incomplete strike, while a lovely golden-tan color covers both obverse and reverse. Well-preserved with moderately clean surfaces overall.  
Ex: *Central States Signature (Heritage, 5/2005)*, lot 6132. NGC ID# 22RK, PCGS# 3940

**1919-S Buffalo Nickel, MS64**  
Elusive Issue in Higher Grades

**3644 1919-S MS64 PCGS.** The 1919-S Buffalo nickel is not difficult to locate in grades up to the MS64 level, but finer examples are quite elusive, especially with a sharp strike. This attractive Choice example exhibits much better-than-average striking details, with fine definition on the bison's fur. The lustrous surfaces show a few hints of champagne-gold toning, with outstanding eye appeal. PCGS has graded 34 numerically finer examples (5/15). NGC ID# 22RN, PCGS# 3943

**1920-D Buffalo Nickel, MS65**  
Unusually Sharp

**3645 1920-D MS65 NGC.** The 1920-D Buffalo nickel is frequently seen with a deficient strike, which makes the bold rendering of the present Gem example especially notable. This piece is lightly toned in iridescent champagne and lavender-gray hues, with only a few trivial abrasions. Numerous, spidery die cracks are seen on each side, and the reverse is also clashed below E PLURIBUS UNUM. Census: 30 in 65, 3 finer (5/15). NGC ID# 22RR, PCGS# 3945

**1920-S Buffalo Nickel, MS64**  
Seldom Encountered Any Finer

**3646 1920-S MS64 PCGS.** From a substantial mintage of more than 9.6 million pieces, the 1920-S Buffalo nickel was not a well-produced issue. Even Mint State examples tend to show weak striking details and lackluster surfaces. This attractive Choice example is a happy exception, with a above average strike and well-preserved lustrous surfaces. PCGS has graded 20 numerically finer examples (6/15). NGC ID# 22RS, PCGS# 3946

**1921 Buffalo Nickel, MS66  
Two Feathers Variety, FS-401**

- 3647 1921 Two Feathers MS66 PCGS. FS-401.** The obverse die was polished extensively, resulting in the removal of the innermost feather and creating the popular “Two Feathers” variety. This delightful Premium Gem exhibits sharply detailed design elements and well-preserved lustrous surfaces, under shades of pink, ice-blue, and champagne-gold toning. Population, for the variety: 1 in 66, 0 finer (6/15). PCGS# 38451

- 3648 1923-S MS64 PCGS.** The satiny surfaces have a steel-gray cast on the obverse that changes to champagne-gray on the reverse. The striking details are very bold throughout. An interesting planchet anomaly near 1 o'clock on the obverse rim is undoubtedly mint-made. Post-striking marks are not seen on either side.

Ex: *Long Beach Signature* (Heritage, 2/2007), lot 2655. NGC ID# 22RW, PCGS# 3950

- 3649 1923-S MS64 PCGS. CAC.** Nicely struck if just a tad soft on the bison's head and shoulder, and on LIBERTY. The surfaces show iridescent golden toning with satin luster and minimal surface marks. The '23-S is scarce in Mint State, and especially so above MS64.

Ex: *Long Beach Signature* (Heritage, 5/2007), lot 526. NGC ID# 22RW, PCGS# 3950

**1924-S Nickel, MS64  
Low-Mintage Semikey**

- 3650 1924-S MS64 NGC.** The 1924-S is one of the lowest mintage issues of the series. Among regular issues, only the key 1926-S is rarer in Mint State. The present near-Gem has a bold mintmark. The tail and LIBERTY show softness but the remainder of the strike is good. Lustrous and unabraded with pastel lime-green and gunmetal toning. Struck from a rusted obverse die, and certified in a prior generation holder. NGC ID# 22RZ, PCGS# 3953

- 3651 1925-S MS63 PCGS.** This is a pleasing Select Mint State 1925-S nickel, with luminous gray-gold patina over the satiny surfaces. The devices have more definition than usual, though the bison's shoulder and the high points of the Indian's hair are somewhat soft.

Ex: *Dallas Signature* (Heritage, 10/2006), lot 549. NGC ID# 22S4, PCGS# 3956

- 3652 1926-D MS64 PCGS.** This 1926-D Buffalo nickel is a classic example of the mint using a tail die well-beyond its normal life expectancy. The obverse is relatively sharp, while the reverse shows extensive die erosion and resulting peripheral weakness. Both sides are satiny and display iridescent golden-gray toning. Struck from mildly rotated dies. NGC ID# 22S6, PCGS# 3958

**1926-D Buffalo Nickel, MS65  
Conditionally Rare in Finer Grades**

- 3653 1926-D MS65 PCGS.** The 1926-D Buffalo nickel is an elusive issue in grades above the MS65 level, especially with a sharp strike. This delightful Gem exhibits sharply detailed design elements and well-preserved lustrous surfaces throughout. A few subtle hints of ice-blue and champagne-gold toning add to the outstanding eye appeal. PCGS has graded 27 numerically finer examples (5/15). NGC ID# 22S6, PCGS# 3958

**1926-S Nickel, Mildly Lustrous AU55**

- 3654 1926-S AU55 PCGS.** The 1926-S Buffalo nickel is the only issue in the series with a mintage below 1 million pieces (970,000 coins), and is consistently elusive in Mint State. This Choice AU representative is a well-detailed, more affordable alternative. Both sides retain satiny luster beneath rich olive-gold patina. Trivial weakness on the bison's shoulder and the hair above the Indian's braid is from a combination of brief circulation and a mildly insufficient strike. NGC ID# 22S7, PCGS# 3959

- 3655 1936-D 3 1/2 Legs, FS-901, VF20 PCGS.** A golden-gray tint shows on both sides, while the design elements retain good definition, and about two-thirds of the horn is visible. The surfaces are relatively clean, though an old pinscratch on the bison is mentioned for complete accuracy. This is an elusive and popular *Guide Book* variety.

Ex: *Long Beach Signature* (Heritage, 2/2008), lot 3442; *Central States Signature* (Heritage, 4/2012), lot 3663. PCGS# 38471 Base PCGS# 93978

- 3656 1937-D Three-Legged, FS-901, AU58 PCGS. CAC.** This Borderline Uncirculated representative is sharply detailed and shows only minor friction over the bison's body and the high points of the obverse portrait. The glossy surfaces display mildly iridescent golden-gray patina. The usual die erosion is fairly minimal on this piece. PCGS# 38475 Base PCGS# 3982

**1938-D Buffalo Nickel, MS68  
Attractive Multicolor Toning**

- 3657** 1938-D MS68 NGC. The 1938-D Buffalo nickel is the most plentiful issue in the series, ideal for type collectors. Nonetheless, enthusiasts seeking a “finest-known” example will find MS68-quality coins rare. This piece is beautifully toned in concentric shades of sun-gold, mint, sky-blue, and lavender, with well-struck devices and unsurpassed surface quality. Census: 18 in 68 (9 in 68 ★), 0 finer (5/15). NGC ID# 22SZ, PCGS# 3984

**PROOF BUFFALO NICKELS**

**1913 Type Two Buffalo Nickel, PR66+  
Sharp, Lightly Toned Matte Proof**

- 3658** 1913 Type Two PR66+ NGC. CAC. A beautiful matte proof of the Type Two design type, fully struck and carefully preserved. Each side displays the thick, soft luster of the matte finish, with warm sun-gold toning that lightens modestly toward the centers. The Type Two 1913 proof had a mintage of 1,514 pieces, almost identical to that of its Type One counterpart at 1,520 coins; both issues are comparably scarce in Premium Gem or finer grades. NGC ID# 278S, PCGS# 3990

- 3659** 1936 Type Two — Brilliant Finish PR65 NGC. CAC. Ex: Highland Collection. This delightful Gem was struck later in the year, with the Brilliant finish that replaced the less popular Satin type. The design elements exhibit razor-sharp definition and the deeply reflective fields show no mentionable distractions. NGC ID# 278Y, PCGS# 3995

**1936 Buffalo Nickel, Lightly Toned PR67  
Brilliant, Type Two Finish**

- 3660** 1936 Type Two — Brilliant Finish PR67 PCGS. Mirrored fields highlight the razor-sharp, satiny devices of this Superb Gem Brilliant proof. Each side shows a modest blend of pastel blue, lavender, and champagne toning, and the underlying surfaces are devoid of contact marks or distracting hairlines. PCGS has seen seven numerically finer representatives (5/15). NGC ID# 278Y, PCGS# 3995

**1936 Buffalo Nickel, PR67  
Brilliant Finish**

- 3661** 1936 Type Two — Brilliant Finish PR67 PCGS. Beautifully reflective fields frame the sharp, satiny devices of this Superb Gem Brilliant proof, while each side is delicately toned in soft shades of lavender-blue and pale champagne. There no detracting marks or hairlines and the eye appeal is outstanding. Only seven pieces are numerically finer at PCGS (5/15). NGC ID# 278Y, PCGS# 3995

- 3662** 1937 PR66 PCGS. CAC. Both the technical quality and the visual appeal of this Premium Gem brilliant proof are excellent. Glassy, deeply mirrored fields surround fully detailed motifs. Icy silver-blue surfaces display fleeting gold highlights and there are no marks, hairlines, or other distractions visible in hand or under magnification. NGC ID# 278Z, PCGS# 3996

## JEFFERSON NICKELS

### 1943/2-P Nickel, MS67 Scarce World War II Overdate

- 3663 1943/2-P Doubled Die Obverse, FS-101 MS67 PCGS.** As with other World War II overdate issues, the 1943/2-P was created when working hubs of different dates were used to make a working die. A thoroughly lustrous Superb Gem that has mark-free surfaces and a hint of gold toning. The high points of Jefferson's portrait show minor flan chatter, as struck.  
Ex: *Long Beach Signature (Heritage, 2/2013)*, lot 4152, which realized \$4,112.50. PCGS# 38499 Base PCGS# 4018

### 1943/2-P Nickel, MS66 Full Steps Important Guide Book Variety

- 3664 1943/2-P Doubled Die Obverse, FS-101, MS66 Full Steps PCGS. CAC.** This is blazing, frost-white Premium Gem example of this popular *Guide Book* variety, showcasing bold relief elements and impeccably preserved surfaces. This issue is conditionally scarce in MS66, and finer representatives are rarely seen. The currently offered piece is notably eye-appealing for the grade, as affirmed by the CAC green label. Population: 38 in 66 (2 in 66+ Full Steps), 4 finer (5/15). PCGS# 38500 Base PCGS# 84019
- 3665 1943-P Doubled Die, FS-106, MS66 Full Steps PCGS.** The popular "Doubled Eye" *Guide Book* variety, showing a complete, secondary impression of Jefferson's eye immediately below the primary. Die doubling is also plain on the peripheral lettering. This piece is boldly struck, with frosty, gold-tinted luster. Population: 17 in 66 (1 in 66+) Full Steps, 3 finer (5/15). PCGS# 84174
- 3666 1943-D MS67+ Full Steps PCGS.** This iridescently toned '43-D nickel is nearly half of a grade point finer than the coin in the current highest-rated Registry Set, and ranks second to only three finer coins at PCGS (5/15). The design elements are boldly struck and the eye appeal is excellent. NGC ID# 22TS, PCGS# 84020
- 3667 1944-D MS67+ Full Steps PCGS.** Jefferson's portrait is seemingly pristine on this high-end Superb Gem, and only a couple insignificant luster grazes above Monticello preclude a full MS68 grade from PCGS. This piece is boldly struck and the frosty surfaces display shades of mint-gold, champagne, lilac, and ice-blue toning. Only four coins are finer at PCGS (5/15). NGC ID# 22TV, PCGS# 84023
- 3668 1944-D MS67+ Full Steps PCGS.** Fittingly, this Plus-designated Superb Gem 1944-D nickel is completely devoid of any visual distractions, and the eye appeal is seemingly unsurpassable. Both sides are awash in frosty luster that illuminates partially blended, pastel rainbow hues, with the deeper colors seen primarily around the peripheries. Only four coins are finer (5/15), making this piece ideal for a high-end Registry Set. NGC ID# 22TV, PCGS# 84023

- 3669 1944-S MS67 Full Steps PCGS.** Iridescent lavender-gold toning emits occasional glimpses of ice-blue and lilac on this beautifully preserved Registry coin. The strike is bold and the surfaces display fresh, frosty luster. Population: 45 in 67 (9 in 67+) Full Steps, 0 finer (5/15). NGC ID# 22TW, PCGS# 84024

### 1948-S Nickel, Rare MS67 Full Steps Tied With Two Others for Finest at PCGS

- 3670 1948-S MS67 Full Steps PCGS.** Essentially brilliant centers yield to warm golden peripheral toning on this boldly struck, well-preserved Superb Gem. PCGS and NGC combined have certified only four Full Steps pieces in this lofty grade (three at PCGS and one at NGC), with none finer (5/15). As one of the finest known of the date, this coin ranks a full grade point finer than the piece represented in the current highest-rated Registry Set. NGC ID# 22UA, PCGS# 84036

## PROOF JEFFERSON NICKELS

- 3671 1956 PR67 Deep Cameo PCGS.** This spectacular Superb Gem exhibits fully struck design elements with a rich coat of mint frost that creates profound cameo contrast with the deeply mirrored fields. The flawless surfaces show a few hints of pale gold toning. Population: 13 in 67 Deep Cameo, 6 finer (6/15). NGC ID# 22YG, PCGS# 94188

### 1956 Nickel, PR69 Ultra Cameo Significant Registry Coin

- 3672 1956 PR69 Ultra Cameo NGC.** A sensational Registry Set candidate, this near-perfect Jefferson nickel is fully brilliant with highly lustrous and frosty devices within a frame of deeply mirrored fields. There is no evidence of toning on either side. As one of just three similarly graded pieces, the coin is tied for the finest 1956 Deep Cameo proof at NGC while PCGS has yet to certify a single MS69 example in Deep Cameo. NGC Census: 3 in 69 Ultra Cameo, 0 finer (6/15).  
Ex: *Fort Worth Signature (Heritage, 3/2010)*, lot 550; *ANA Signature (Heritage, 3/2011)*, lot 3292; *Pittsburgh Signature (Heritage, 10/2011)*, lot 3426. NGC ID# 22YG, PCGS# 94188
- 3673 1971 No S PR68 Deep Cameo PCGS.** This *Guide Book* variety is scarce in Deep Cameo grades, and rare as fine as the PR68 level. This Registry-quality example displays stark white-on-black contrast, with fully rendered motifs and seemingly perfect surfaces. Population: 11 in 68 Deep Cameo, 5 finer (5/15). NGC ID# 22YN, PCGS# 94204

**1975-S Jefferson Nickel, PR70  
Lovely Deep Cameo Example**

- 3674 1975-S PR70 Deep Cameo PCGS.** The 1975-S Jefferson nickel boasts a well-produced proof-only mintage of 2.8 million pieces, and the issue is quite rare in the ultimate grade of PR70 Deep Cameo. This tremendous example offers fully struck frosty design elements and deeply mirrored fields, with stunning cameo contrast. The technically perfect surfaces add to the terrific eye appeal. Population: 17 in 70 Deep Cameo, (6/15). NGC ID# 27AN, PCGS# 94208

**BUST HALF DIMES**

- 3675 1832 V-12, LM-4, R.4, MS64 PCGS.** Light to moderate golden-russet toning adorns the margins of this coruscating and crisply struck near-Gem. Nearly devoid of evident abrasions, and the eye appeal is exceptional. PCGS# 38666 Base PCGS# 4279

**1833 Half Dime, MS65+  
V-1, LM-10, Rich Green Patina**

- 3676 1833 V-1, LM-10, R.1, MS65+ PCGS.** Beautiful forest-green and olive-gold toning encompasses this coruscating and intricately struck Gem. A desirable Capped Bust type coin. A "Scarface" variety with a vertical crack across Liberty's cheek and neck. The reverse exhibits numerous slender cracks, along with breaks in both loops of the second S in STATES. PCGS# 38701 Base PCGS# 4280

**SEATED HALF DIMES**

- 3677 1837 No Stars, Large Date (Curl Top 1) MS64 PCGS. V-1, Flynn MPD-001.** Fully patinated in rich cobalt-blue, plum-red, and cream-gray. Lustrous and minimally abraded. The strike is crisp except on portions of the dentils. The date is repunched south. A short-lived subtype.

*Ex: Dallas Signature (Heritage, 10/2008), lot 490, which realized \$1,725. NGC ID# 232M, PCGS# 4311*

- 3678 1837 No Stars, Large Date (Curl Top 1) MS65 PCGS. CAC. V-1, Flynn MPD-001.** The date is obviously repunched south. A beautiful Gem bathed in medium lime-green, dove-gray, and wheat-gold patina. Lustrous and well struck. The first and last date of No Stars Philadelphia production, although New Orleans also omitted stars on the 1838-O. NGC ID# 232M, PCGS# 4311

- 3679 1837 No Stars, Small Date (Flat Top 1) MS64 PCGS. CAC.** The design elements are boldly brought up on this Choice No Stars type coin, while the satiny surfaces are pleasantly free of any major abrasions. The central regions show a mixture of olive-gold and amber toning, with deeper russet and aqua-green overtones in the margins. Population: 49 in 64 (1 in 64+), 40 finer (5/15). NGC ID# 232M, PCGS# 4312

- 3680 1839 No Drapery MS65 PCGS. CAC.** Suitable for type purposes, this No Drapery 1839 half dime is boldly struck with satiny mint luster. Both sides display medium champagne toning with hints of lilac and powder-blue. Population: 22 in 65, 29 finer (6/15). NGC ID# 232S, PCGS# 4319

**1844 Half Dime, MS67  
Boldly Struck and Beautifully Toned**

- 3681 1844 MS67 PCGS.** Normal Date. A high-end example of the Normal Date variety, seen less frequently than the Repunched Date variant of this issue. Beautiful pink and blue patina complements the pristine preservation and a nice bold strike on this Superb Gem, one of only 11 such in this lofty grade at PCGS (6/15). NGC ID# 2335, PCGS# 4333

**1853 Seated Half Dime, MS66  
Scarcer No Arrows Type**

- 3682 1853 No Arrows MS66 PCGS.** From a mintage of 135,000 pieces, the 1853 No Arrows half dime is much more difficult to locate than its With Arrows counterpart. This spectacular Premium Gem offers sharply detailed design elements and well-preserved lustrous surfaces, under shades of gray, pink, and amber toning. Population: 10 in 66 (2 in 66+), 2 finer (6/15). NGC ID# 233M, PCGS# 4351

- 3683 1853 Arrows MS66+ NGC.** The 1853 is the most plentiful of this short-lived With Arrows type, ideal for the budget-conscious collector seeking a high-quality type coin. This Plus-graded MS66 example displays sharp motifs and frosty luster with mottled amber-gold, olive, and pale russet toning. The bold clash marks on each side are not uncommon for the issue. Census: 49 in 66 (3 in 66+, 1 in 66 ★), 23 finer (5/15). NGC ID# 233Y, PCGS# 4356

- 3684 1855 Arrows MS65 PCGS.** The 1855 is the scarcest of the With Arrows Philadelphia issues from this early period, and it is particularly elusive in Gem or finer grades. This example is well-preserved and shows splashes of amber, gold, and aqua-blue toning over much of each side. Lightly struck on the border dentils and the high points of the motifs, with faint parallel roller marks (mint-made) still in evidence. Population: 27 in 65, 16 finer (5/15). NGC ID# 2344, PCGS# 4360

**1855 Arrows Half Dime, MS66  
High Surface Quality for the Grade**

**3685 1855 Arrows MS66 PCGS.** It is difficult to discern any abrasions on this 1855 half dime that might have precluded a full Superb Gem grade, although minor striking weakness around the borders, as well as on the bow and Liberty's head may have contributed to the PCGS assessment. Semiprooflike fields are seemingly devoid of flaws. Each side shows iridescent golden-gray toning with hints of olive and lavender throughout. Population: 16 in 66, 0 finer (5/15). NGC ID# 2344, PCGS# 4360

**3686 1856 MS66 NGC.** This spectacular Premium Gem displays sharply detailed design elements and vibrant satiny mint luster on both sides. The lightly toned, well-preserved surfaces add to the outstanding eye appeal. Census: 38 in 66, 6 finer (6/15). NGC ID# 233P, PCGS# 4363

**3687 1857 MS67 NGC.** An available date for type purposes, the 1857 half dime becomes a notable condition rarity at the Superb Gem level. This piece is delicately toned with luminescent ocean-blue and violet hues around the peripheries and light golden color in the centers. The right-hand stars are slightly soft, as is the upper-left portion of the reverse, but the strike is otherwise pleasing. Census: 16 in 67 (5 in 67+), 1 finer (6/15). NGC ID# 233S, PCGS# 4365

**3688 1860 MS67 PCGS.** V-3b, Flynn RPD-001. The date was initially entered with an upward tilt, then corrected. Repunching is obvious below the 1 and above the 0. Light silver-gray and straw-gold toning adorns this lustrous and fully struck high grade Seated dime. Population: 42 in 67 (1 in 67+), 4 finer (6/15). NGC ID# 2347, PCGS# 4377

**3689 1863 MS66 PCGS.** The lofty Premium Gem grade is affirmed by close study with a loupe which finds the frosty surfaces of this 1863 half dime devoid of obvious contact. Dusky olive-gold and gray toning blankets each side, with deep russet overtones seen in the obverse peripheries. Population: 15 in 66, 19 finer (6/15). NGC ID# 234C, PCGS# 4382

**3690 1864 MS64 NGC.** Only 48,000 business-strike Seated Liberty half dimes were struck in 1864 and few examples were saved by contemporary collectors. This attractive Choice example exhibits well-detailed design elements and lightly marked prooflike surfaces, under shades of champagne-gold and cerulean-blue toning. Census: 6 in 64, 20 finer (6/15). NGC ID# 234E, PCGS# 4384

**3691 1869 MS65 PCGS.** A nicely balanced and reflective Gem with sky-blue peripheries and pinkish-gold centers that emit flashy mint luster. The fields are semiprooflike and provide contrast for the lightly frosted devices. Conditionally scarce, with a surprisingly low population despite the moderate mintage of 208,000 pieces. Population: 11 in 65 (1 in 65+), 15 finer (6/15). NGC ID# 234R, PCGS# 4394

**3692 1872-S Mintmark Above Bow MS66+ NGC.** In Mint State, the Mintmark Above Bow 1872-S half dime is somewhat scarcer than its Mintmark Below Bow counterpart. This Plus-designated Premium Gem is boldly struck, with original, satiny luster illuminating tinges of champagne, olive, and lilac-gray toning. No major abrasions are observed. Census: 13 in 66 (1 in 66+), 4 finer (6/15). NGC ID# 234Z, PCGS# 4402

**PROOF SEATED HALF DIMES**

**1865 Half Dime, PR66 Cameo  
Pleasantly Toned**

**3693 1865 PR66 Cameo PCGS.** Sharp, frosty devices provide ample contrast with the mirrored fields, while lightly mottled lavender toning adds a degree of cheery color to each side. The coin has broad, wire rims, and a light lint mark beneath the ES in STATES is the only mentionable surface interruption. Population: 11 in 66 (1 in 66+) Cameo, 2 finer (5/15). PCGS# 84448

**3694 1866 PR64 Cameo NGC.** CAC. V-1, Flynn RPD-001. The base of the 1 is repunched north. A lovely golden-brown specimen that boasts smooth, flashy fields and a sharp strike. Both sides appear void of any detractors. A scant 725 proofs were issued. PCGS# 84449

**1867 Seated Half Dime, PR66 Cameo  
Vivid Multicolor Toning**

**3695 1867 PR66 Cameo PCGS.** CAC. Richly toned on both sides, this Premium Gem Cameo proof displays shades of gold, copper, orange, red, and sea-green on the obverse, while the reverse includes hues of copper, teal, and violet. A vertical toning streak appears on the reverse. A sharp strike adds to the appeal. A tiny mark and edge nick are present near 6 o'clock on the obverse. Population: 10 in 66 (2 in 66+) Cameo, 1 finer (6/15). PCGS# 84450

**1868 Half Dime, PR65 Deep Cameo  
Pleasant Multicolor Toning**

**3696 1868 PR65 Deep Cameo PCGS.** Interiors of lilac and sun-gold accentuate the vividness of the peripheries which show ocean-blue, mint-green, and amber-red toning. The cameo contrast is strongest on the obverse. This lovely Gem proof is a trifle weakly struck on the upper-left portion of the wreath, but is otherwise sharply rendered. Population: 3 in 65 (1 in 65+) Deep Cameo, 3 finer (5/15). PCGS# 94451

- 3697 1869 PR66 Cameo PCGS.** Only 600 proofs were struck of this Legend Obverse half dime. Of that number, surprisingly few have survived in high grade and with cameo contrast. The fields seen here are brightly mirrored, but each side is covered with a significant amount of deep reddish patina accented by sky-blue. Population: 3 in 66 Cameo, 1 finer (6/15). PCGS# 84452

**1870 Seated Half Dime, PR67  
None Certified Finer at PCGS**

- 3698 1870 PR67 PCGS.** Ex: Teich Family Collection. PCGS has seen just three Superb Gem proofs at PR67 and none finer, and it is possible this number includes at least one resubmission. However, few survivors can match the high technical quality and outstanding eye appeal of the present coin. This magnificent Superb Gem displays razor-sharp definition on all design elements and deeply mirrored fields under shades of champagne-gold and cerulean-blue patina. Population: 3 in 67, 0 finer (5/15).  
Ex: George O. Walton Collection (*Stack's*, 10/1963), lot 514. NGC ID# 2367, PCGS# 4453

- 3699 1872 PR65 PCGS. CAC.** Spectacular shades of golden-brown and cobalt-blue toning enliven the well-preserved surfaces of this delightful Gem, with deeply reflective fields and sharply detailed design elements. Population: 21 in 65, 10 finer (6/15). NGC ID# 2369, PCGS# 4455

**1873 Seated Half Dime, PR66 Cameo  
Spectacular Toning**

- 3700 1873 PR66 Cameo PCGS. CAC.** The obverse rings of rainbow iridescence include amber-pink, russet, magenta, and bright blue, while the reverse color breaks down into mottled multicolor flecks. Much contrast appears between fields and devices despite the intense color, and contact marks are simply a nonissue. Population: 8 in 66 Cameo, 3 finer (6/15). PCGS# 84456

## EARLY DIME

**1807 JR-1 Dime, AU55  
In-Demand Type Coin**

- 3701 1807 JR-1 AU55 NGC.** Traces of original mint luster remain on this virtually untoned, silver-white example, as does much of the detail from a strike that was marginal (at best) for the entire mintage. The reverse die coined not only the 165,000-piece dime production, but also quarter eagles dated 1805, 1806/4, 1806/5, and 1807. While all representatives of the date come from a single die pair and show weakness at the peripheries, the elements are all present here. A tiny rim nick at 2 o'clock on the obverse and nearby die clashing at Liberty's neck are the most notable marks. PCGS# 38770 Base PCGS# 4480

## BUST DIMES

**1814 Large Date Dime, JR-3, MS64  
Pleasing Originality**

- 3702 1814 Large Date, JR-3, R.2, MS64 PCGS. CAC.** JR-2 is fairly available in circulated grades, but it becomes scarce in the finer Mint State levels. This Choice example is well-preserved with original olive-gold toning that shows overtones of russet and amber on portions of each side. Weakly struck on the eagle's right (facing) wing tip, as well as the corresponding obverse stars. The reverse is extensively cracked, although surprisingly, this tail die was later used for JR-4. CAC-approved in a green label holder. Population, all Large Date varieties included: 25 in 64, 5 finer (5/15). PCGS# 38775 Base PCGS# 4488

- 3703 1829 Curl Base 2, JR-10, FS-301, R.6 — Scratch — PCGS Genuine. AG Details.** PCGS estimates that only 40 examples of the rare 1829 Curl Base 2 dime are known. Most survivors are heavily worn, and the single finest at PCGS is graded VF35. This representative has a bold date. The first five stars are faint, as are the first few letters in UNITED. E PLURIBUS UNUM is absent, but a hint of the TY in LIBERTY is present. The central obverse displays a few thin marks. PCGS# 38836 Base PCGS# 4512

## SEATED DIMES

- 3704 1840 Drapery, F-101, R.3, AU53 NGC.** Chestnut-gold and powder-blue embrace this lightly circulated and inoffensively abraded representative. Crisply struck and partially lustrous.  
Ex: Long Beach Signature (*Heritage*, 2/2009), lot 900, which realized \$1,092.50. PCGS# 537747 Base PCGS# 4578

**1849 Seated Dime, MS65**  
**A Lustrous, Charming Example**

- 3705** 1849 F-102a, R.3, MS65 NGC. This is a boldly struck, satiny example with traces of light golden toning over silvery-gray surfaces. No major abrasions are present. The 1849 Seated Liberty dime is available in circulated grades but quickly becomes rare in Mint State; Gem or better examples are exceedingly scarce. Census: 8 in 65, 3 finer (6/15). PCGS# 537861 Base PCGS# 4591

**1853 Arrows Dime, Toned MS66**

- 3706** 1853 Arrows MS66 NGC. F-103, R.3. Rich toning is present on both sides of this Premium Gem, the colors particularly vibrant on the obverse. The shades include deep gold, red-brown, emerald-green, teal, steel-blue, and plum. This attractive piece exhibits a crisp strike and is scarce this well-preserved. Census: 44 in 66 (1 in 66+, 1 in 66 ★), 17 finer (6/15).  
*Ex: Dallas ANA Signature (Heritage, 10/2012), lot 3913. NGC ID# 2398, PCGS# 4603*

**1853 Arrows Dime, Original MS66**  
**Ideal Type Coin**

- 3707** 1853 Arrows MS66 NGC. F-104, R.2. The With Arrows 1853 Seated dime is available, but highly popular as a representative of this short-lived type. This Premium Gem example displays deeply struck design elements and original, frosty luster. Splashes of amber, russet, and blue toning appear periodically over the luminous champagne surfaces. Trivial contact on the high points of Liberty's figure limits the grade. Census: 44 in 66 (1 in 66+, 1 in 66 ★), 17 finer (6/15). NGC ID# 2398, PCGS# 4603

**1854 Arrows Seated Dime, MS66**  
**Frosty Mint Luster**

- 3708** 1854 Arrows MS66 NGC. F-107, R.3. The large mintage of nearly 4.5 million pieces suggests the Mint pushed dies to their limit — just 12 die pairs are identified by Gerry Fortin for the 1854 issue. Not surprisingly, die wear is evident on this frosty, lustrous Premium Gem example, and die clashing is prominent on both sides of the coin. The Variety Three Arrows dime is a necessity for type, and collectors have no choice but to vie for the few examples that were put aside in high Mint State. The population at both services is remarkably low in MS66 and finer. Census: 12 in 66, 10 finer (6/15). NGC ID# 239A, PCGS# 4605

- 3709** 1857 MS66 NGC. Virtually pristine preservation with few visible marks and a bold strike separate this Premium Gem 1857 dime from most of its cohort, a large mintage exceeding 5.5 million pieces. Few survive finer than this lovely coin, with only one numerically finer each at NGC and PCGS. Census: 15 in 66 (2 in 66+), 1 finer (6/15). NGC ID# 238X, PCGS# 4614

**1857 Seated Dime, MS66**  
**Multicolor Toning**

- 3710** 1857 MS66 PCGS. F-108, R.2. Available in lower grades, the 1857 Seated dime becomes rare at the Premium Gem level and anything finer is almost unobtainable. This piece is boldly struck, with satiny luster that is devoid of distracting abrasions. Both sides show splashes of aquamarine, amber, violet, and champagne toning. Population: 4 in 66 (2 in 66+), 1 finer (6/15). NGC ID# 238X, PCGS# 4614

- 3711** 1859 F-106, R.4, MS64 PCGS. A bold die line through the top of the cap identifies the scarce Fortin variety. A satiny near-Gem with light almond-gold toning and pleasing surfaces. The strike is sharp at the borders, although the peripheries show minor softness. PCGS# 538137 Base PCGS# 4619

- 3712** 1859 F-106, R.4, MS65 NGC. CAC. A die line through the top of the cap attributes the Fortin variety. Ocean-blue, ruby-red, sun-gold, and stone-gray toning endow coruscating surfaces. Unobtrusive field marks are noted near star 5 and beneath DIME. PCGS# 538137 Base PCGS# 4619

**3713 1862 MS66 PCGS.** The 1862 Seated Liberty dime is an available date in grades through MS64, but Gem or finer representatives are seldom seen. This Premium Gem example displays satiny luster beneath lavender-gray, rose-gold, and aquamarine toning. The strike is soft on Liberty's foot, right (facing) shoulder, and the corresponding portion of the reverse wreath. Population: 16 in 66 (2 in 66+), 2 finer (5/15). NGC ID# 239H, PCGS# 4635

**3714 1867-S F-102, R.4, AU55 PCGS.** Few examples of this scarce San Francisco issue survive from the original mintage of 140,000 coins, and the vast majority are in VF or lower grades. This date is scarce in XF and AU, and Mint State pieces are genuinely rare. This Choice AU representative displays bold detail with remnants of luster in the peripheral fields. A glaze of light golden toning is the only mentionable color. Population: 3 in 55, 14 finer (5/15). PCGS# 538220 Base PCGS# 4646

#### 1873-CC Arrows Dime, XF Details Key Carson City Issue

**3715 1873-CC Arrows, F-101, R.4 — Smoothed — PCGS Genuine.** XF Details. The With Arrows 1873-CC is one of the major keys to the Seated dime series. The issue is scarce in all grades, with most examples exhibiting minor problems and/or grading just VF or lower. This issue is genuinely rare in XF or AU condition, and Mint State coins are nearly unobtainable. This piece shows XF detail with softened surfaces to hide abrasions. The obverse is nickel-gray and the reverse is light golden. The enthusiast of Carson City dimes will appreciate the value this coin represents. PCGS# 538326 Base PCGS# 4666

#### 1875-S Mintmark Above Bow Dime, MS66 Tied for Finest Certified

**3716 1875-S Mintmark Above Bow MS66 NGC.** Heavily fatigued and cracked dies (particularly the reverse die) make this San Francisco issue challenging to find with Liberty's head, foot, and shield well-defined. The current example is far sharper than most, with a bold shield and above-average head and foot detail. The frosty-smooth surfaces flash brilliant silver luster with scattered glimpses of golden-gray patina. It will be difficult to improve upon this gleaming Premium Gem representative of the In Wreath mintmark, both in terms of exceptional eye appeal and technical merit. Census: 6 in 66, 0 finer (6/15). NGC ID# 23AG, PCGS# 4677

**3717 1876-CC MS66 NGC. F-131, R.4.** Both dies are severely rusted on this scarcer 1876-CC variety. This Premium Gem example is nonetheless well-struck, with frosty luster that shows just a hint of light golden toning. No distinctive abrasions are present. Census: 23 in 66 (1 in 66+), 6 finer (5/15). NGC ID# 23AJ, PCGS# 4680

#### 1877-CC Dime, MS66 Delicately Toned

**3718 1877-CC MS66 PCGS. F-103, R.3.** An available Carson City issue with a generous mintage of 7.7 million pieces. This frosted, Premium Gem example displays russet and lilac toning over lustrous, sharply struck silver surfaces. The Fortin variety is indicated by die clashing on the Type Two reverse, with numerous faint die cracks through the obverse legend and at the base of the date. Few examples have achieved a higher grade at PCGS. Population: 47 in 66 (5 in 66+), 5 finer (6/15). NGC ID# 23AM, PCGS# 4683

**3719 1879 Repunched Date, F-104a, R.4, MS66 PCGS.** Repunched date. Frosty centers are devoid of serious abrasions and the peripheral fields display semiprooflike mirroring. Uniformly toned in champagne, olive, and lilac-gray on both sides, with well-struck devices and original eye appeal. Population: 59 in 66 (5 in 66+), 25 finer (6/15). PCGS# 538642 Base PCGS# 4687

**3720 1879 Repunched Date, F-105, MS66+ Prooflike NGC.** Lovely tobacco-brown, fire-red, and cobalt-blue toning adorns the borders. The fields are flashy and nearly free from contact. The date was initially entered level, then mostly effaced and repunched with an upward slope. The 9 shows the most remnants of the prior impression. The reverse lacks the peripheral die crack described in the Fortin reference. PCGS# 538643 Base PCGS# 4687

**3721 1880 F-102a, R.4, MS65 PCGS.** This Gem 1880 dime was struck from a retired proof die pair, with significant semiprooflike mirroring evident in the fields. The design elements are well-struck and there is modest cameo contrast on the reverse. Light golden in color, with deeper amber hues around the borders. Population: 26 in 65, 54 finer (5/15). PCGS# 538644 Base PCGS# 4688

#### 1883 Seated Dime, MS67 Attractive Patina

**3722 1883 MS67 NGC.** The availability of the 1883 Seated dime plummets at the Superb Gem grade level. This glowing example displays vivid gold, crimson, and forest-green toning around the peripheries, with lighter lilac-gray and champagne interiors. Liberty's head and the bowknot are a trifle soft, but the strike is otherwise well-executed. Census: 22 in 67, 1 finer (6/15). NGC ID# 23AW, PCGS# 4691

**3723 1884-S MS64 PCGS. F-102, R.3.** Liberty's drapery near the shield is lapped, characteristic of F-102. A lustrous near-Gem with brilliant centers and attractively toned golden-brown and jade-green margins. A mildly granular streak above ONE decides the grade. NGC ID# 23AY, PCGS# 4693

- 3724 1886 MS67 NGC. F-103a, R.2.** This high-mintage issue, produced to the extent of more than 6.3 million pieces, becomes a notable condition rarity at the Superb Gem grade level. This vividly colored example displays frosty luster amid splashes of gold, amber, aquamarine, and mint-rose toning. The strike is sharp, and close examination fails to reveal any noteworthy abrasions. Census: 12 in 67 (1 in 67+, 1 in 67 ★), 0 finer (5/15). NGC ID# 23B3, PCGS# 4696

**1891 Seated Dime, MS67  
Beautiful Multihued Patina**

- 3725 1891 MS67 NGC. F-106, R.3.** The 1891 is a favorite date among type collectors, and the present Superb Gem example is well-suited to this purpose. The design elements are well-defined, and close study with a glass fails to reveal any discernible abrasions, even beneath the rich multicolor toning that blanket both sides in shades of cerulean-blue, violet, and mint-gold. Census: 20 in 67 (3 in 67 ★), 1 finer (5/15). NGC ID# 23BD, PCGS# 4706

**PROOF SEATED DIMES**

**1859 Dime, PR66 Cameo  
Uncommonly Well-Contrasted**

- 3726 1859 PR66 Cameo NGC. F-101, R.4.** A number of proof 1859 dimes survive from a mintage of 800 pieces, but Cameo examples are rare in all grades. This Premium Gem representative is sharply struck, with frosty devices set against deeply mirrored fields. Amber-gold peripheral toning lightens toward the centers, delivering pleasing eye appeal. Census: 6 in 66 Cameo (1 in 66 ★ Cameo), 12 finer (6/15). PCGS# 84748

- 3727 1866 PR64+ Deep Cameo PCGS. F-102.** The date is lightly repunched, apparent above the base of the 1 and southwest of the second 6. Icy devices rise in full detail and contrast with glassy fields. The brilliant centers cede to plum-red and aquamarine borders. PCGS# 94759

- 3728 1866 F-102, R.3, PR66+ NGC. CAC.** The low date proof variant. Blue-green and cherry-red borders surround caramel-gold centers. Crisply struck and devoid of contact. Both sides display a partial wire rim, most prominent near 1 o'clock. PCGS# 539017 Base PCGS# 4759

- 3729 1867 PR64 Cameo PCGS. F-103.** The date is repunched, most prominently above the base of the 1. An essentially brilliant Choice proof with moderately frosted motifs. The strike is precise aside from minor blending on the upper left portion of the wreath. PCGS# 84760

- 3730 1867 PR64 Cameo PCGS. CAC. F-103, R.5.** Considered a key issue in Mint State grades, the 1867 is generally available only as a proof. This piece is a splendid example with fully mirrored fields and lustrous devices. Only a trace of toning appears on each side. Population: 19 in 64 (1 in 64+) Cameo, 16 finer (5/15). Ex: FUN Signature (Heritage, 7/2010), lot 3482. PCGS# 84760

- 3731 1871 F-102, R.4, PR66 PCGS. CAC.** The most available proof variety; minor die doubling is evident on the tops of AMERICA. This Premium Gem example displays unblemished fields and nicely struck devices. Medium autumn-brown, cream-gray, and ocean-blue toning blankets both sides. PCGS# 539028 Base PCGS# 4764

**1873 With Arrows Dime, PR65 Cameo  
Frosty Contrast**

- 3732 1873 Arrows PR65 Cameo NGC. F-102, R.4.** A couple tiny die lumps on Liberty's left (facing) thigh identify this only known proof die pairing. Coinage amounted to 500 specimens, few of which survive in Cameo grades. This Gem example displays frost-white devices and fully mirrored fields. The strike is a trifle soft on the upper-left portions of the wreath, as well as the rock base near the point of the shield. Census: 3 in 65 Cameo, 6 finer (6/15). PCGS# 84769

- 3733 1874 Arrows PR63 Cameo PCGS. F-101, R.3.** A delightful example of the short-lived With Arrows design produced in 1873 and 1874. This Cameo proof has fully mirrored fields with light gold toning on the obverse and deeper iridescent toning on the reverse. Population: 8 in 63 Cameo, 13 finer (5/15). Ex: Long Beach Signature (Heritage, 9/2010), lot 3761. PCGS# 84770

- 3734 1878 Type Two Reverse, F-101, R.3, PR65 PCGS.** Narrow bands of ocean-blue toning accompany the rims, while the remainder this flashy Gem offers only faint tan patina. A lens is required to view the minor field imperfections near Liberty's raised arm. PCGS# 539041 Base PCGS# 4775

- 3735 1879 PR65 Cameo NGC. F-102, R.3.** Cameo examples of the 1879 proof dime are in the distinct minority of survivors, and are particularly scarce in Gem or better condition. This example displays well-struck motifs with pleasing field-device contrast. A warm golden hue deepens toward the peripheries. Census: 14 in 65 Cameo, 20 finer (5/15). PCGS# 84776

- 3736 1881 PR66 Cameo NGC. F-101.** The well-preserved surfaces of this impressive Premium Gem are richly toned in shades of greenish-gold and violet, with deeply reflective fields underneath and sharply detailed frosty design elements that provide noticeable cameo contrast. Census: 11 in 66 Cameo (1 in 66+ Cameo), 13 finer (6/15). PCGS# 84778

- 3737 1885 PR67 Cameo NGC. F-101, R.3.** Extraordinary contrast meets the eye on this impressive Superb Gem Cameo proof, with gorgeous silver surfaces that show hints of peripheral champagne toning. Deeply mirrored fields provide a wonderful backdrop for the intensely frosted devices. Census: 21 in 67 Cameo (1 in 67+ Cameo, 1 in 67 ★ Cameo), 7 finer (5/15). PCGS# 84782

**3738 1886 PR67 NGC.** The date position does not match one of the Fortin-listed proof die pairs, perhaps indicating a proof die later used for business strikes, or a new variety. Toned ocean-blue and butter-gold except for a peach-red obverse center. Well struck save for blending on Liberty's hair. In a prior generation holder. NGC ID# 23DB, PCGS# 4783

**3739 1888 PR66 Cameo NGC. F-102a, R.3.** This Premium Gem proof Cameo was struck with a circulation strike die pair that was aggressively polished down for proof coinage. The advancement of the polishing is plain in the recesses of Liberty's gown, the rock base, and the lower-left portion of the wreath, which are weakened. The design elements are sharply detailed and this piece displays stark, untoned white-on-black contrast. Census: 9 in 66 Cameo, 9 finer (5/15). PCGS# 84785

**3740 1889 PR67 PCGS. F-125, R.3.** A gleaming Superb Gem proof, struck from Fortin's 125 die pair. Fortin-125 was not previously known to have struck proof dimes, although the attribution of this piece confirms that it was. The flag of the 1 in the date is recut north, and a tiny lump on the dentil below the left foot of the same numeral is consistent with the one seen in the enlarged plate of Fortin-125 on Fortin's website. The coin is boldly struck and deeply mirrored, exhibiting shades of rose, gold, and gunmetal-blue on the obverse with lighter mint-green and lemon-gold over the reverse. A few mint-made strike-throughs are seen on Liberty's left (facing) arm and cheek. Population: 7 in 67, 0 finer (5/15). NGC ID# 23DE, PCGS# 4786

**3741 1890 PR66 NGC. Fortin-101a, R.4.** Ex: Eliasberg. A boldly struck and beautifully preserved Premium Gem proof. Aquamarine and lavender-gold hues encompass the peripheries, while the centers show lighter champagne-gray color.  
Ex: William M. Friesner Collection (Edouard Frossard, 6/1894), lot 470, as part of a five-piece lot of proof dimes dated 1887 to 1891, inclusive; J.M. Clapp; Clapp Estate to Louis E. Eliasberg, Sr. (1942); Louis E. Eliasberg, Sr. Collection (Bowers and Merena, 5/1996), lot 1235. NGC ID# 23DE, PCGS# 4787

## BARBER DIMES

**3742 1896-O AU58 PCGS.** Deeply toned overall with russet and olive-gray hues that show tinges of amber-gold in the obverse fields. The strike is sharp and just trivial friction is evident over the devices. The 1896-O Barber dime is a semikey date in all grades, and is genuinely scarce in Mint State. Population: 3 in 58, 41 finer (6/15). NGC ID# 23DZ, PCGS# 4810

### 1897-O Barber Dime, MS64 Better New Orleans Issue

**3743 1897-O MS64 PCGS.** The 1897-O Barber dime is a better date, scarce in Choice Mint State and rare finer. This example displays satiny luster beneath shades of olive-gold and pale aquamarine toning that primarily reside in the margins. Liberty's cheek shows faint roller marks when viewed beneath a glass, although the strike is well-executed throughout. Population: 23 in 64, 22 finer (6/15). PCGS# 4813

### 1903-O Dime, MS65 Notable Condition Rarity

**3744 1903-O MS65 PCGS.** A faint hint of lilac toning visits the otherwise frosty, brilliant surfaces of this Gem New Orleans dime. A glass reveals no deficiency of strike or mentionable marks across the smooth, softly lustrous fields and devices. The issue is a notable series rarity in Gem or finer condition, with only about two dozen coins receiving such an honor from both PCGS and NGC combined. Population: 13 in 65, 5 finer (6/15). NGC ID# 23EN, PCGS# 4831

**3745 1905-O Micro O AU53 PCGS.** The 1905-O Micro O Guide Book variety is seldom seen in any grade, but is notably rare in Mint State. This About Uncirculated example displays steel-gray surfaces with some luster remaining in the recesses. Well-struck with brief circulation in evidence. Population: 4 in 53, 14 finer (5/15). PCGS# 94836

**3746 1907-D MS64 NGC.** The 1907-D dime is a much scarcer issue than its mintage of more than 4 million pieces would suggest. Allegedly, a hoard of this issue was lost in Black Canyon near Gunnison, Colorado. This is a brilliant coin with a thin layer of satiny mint luster. Fully struck throughout, and the only mark of any note is located in the lower right obverse field. Census: 18 in 64 (1 in 64+, 1 in 64 ★), 21 finer (5/15).  
Ex: Dallas Signature (Heritage, 11/2007), lot 432. NGC ID# 23F4, PCGS# 4843

**3747 1907-D MS64 PCGS. CAC.** Radiantly lustrous surfaces are visited by splotches of medium intensity sky-blue, lavender, and golden-brown toning on the obverse, and by a similar color scheme on the reverse that displays somewhat lighter hues. The design elements are sharply impressed, except for minor softness in the ribbon to the upper right of the bowknot. Minute marks on Liberty's cheek and neck define the grade. Population: 22 in 64 (1 in 64+), 21 finer (5/15).  
Ex: Central States Signature (Heritage, 4/2006), lot 1305; Denver Signature (Heritage, 8/2006), lot 946. NGC ID# 23F4, PCGS# 4843

### 1909-O Barber Dime, MS66 Delicately Preserved Surfaces

**3748 1909-O MS66 NGC.** This popular New Orleans issue is conditionally rare in Gem or finer grades, making the present Premium Gem example of notable importance to advanced collector. This piece displays sharp design elements and satiny golden-gray luster. Only a few faint grazes on Liberty's cheek preclude a Superb Gem grade. Census: 4 in 66, 2 finer (5/15). NGC ID# 23FD, PCGS# 4852

**1912-D Barber Dime, MS67  
Tied for Finest Certified**

- 3749 1912-D MS67 NGC.** Most Mint State examples of the 1912-D Barber dime are in MS64 and lower grades; Gems are scarce, and this issue is rare any finer. The present piece is the sole finest certified at NGC, and is rivaled at PCGS only by a pair of numerically equal examples (6/15). Brilliant centers deepen to amber-gold and ocean-blue toning around the borders, and the design elements are sharply impressed. NGC ID# 23FN, PCGS# 4861

**1914-S Barber Dime, MS66+  
Condition Census Candidate**

- 3750 1914-S MS66+ NGC.** It would not be a stretch to say this semiprooflike, fully struck San Francisco dime deserves a spot in or near the Condition Census for the issue. The sharply struck surfaces glisten with a faint trace of iridescence, while fleeting rose-gold accents complement the lustrous, reflective fields. Just two coins show a numerically finer grade at both services combined, and the NGC Plus designation raises the status of this coin above most other Premium Gems. Census: 11 in 66 (2 in 66+, 1 in 66 ★), 1 finer (6/15). NGC ID# 23FV, PCGS# 4867

- 3751 1915-S MS66 NGC.** The well-preserved mostly brilliant surfaces of this delightful Premium Gem display delicate wisps of pale gold and lavender toning in selected areas. Vibrant mint luster and sharply detailed design elements add to the terrific eye appeal. Census: 7 in 66, 5 finer (6/15). NGC ID# 23FX, PCGS# 4869

- 3752 1916-S MS66 PCGS.** A well-preserved, satiny example of this final Barber dime issue. The wreath bowknot is a trifle soft, but the remaining details are clear. The obverse shows mottled olive, gold, and russet toning, while the reverse is primarily yellow-gold with tinges of olive around the periphery. Population: 25 in 66 (6 in 66+), 0 finer (6/15). NGC ID# 23FZ, PCGS# 4871

**PROOF BARBER DIMES**

- 3753 1898 PR66 NGC.** The impeccably preserved surfaces of this spectacular Premium Gem display a mix of lavender, gray, greenish-gold, and cerulean-blue toning. The design elements are sharply detailed and the fields are deeply reflective, under the toning. Census: 34 in 66, 34 finer (6/15). NGC ID# 23GB, PCGS# 4882

- 3754 1898 PR65 Cameo PCGS.** Ex: Teich Family Collection. Light caramel-gold toning visits this nicely mirrored and well-preserved Gem. The devices are luminous and provide good contrast. Only 735 proofs were coined. Population: 14 in 65 Cameo, 37 finer (5/15). Ex: Jim Spaulding White Collection (Stack's, 2/1960), lot 795. PCGS# 84882

**1898 Dime, PR66 Deep Cameo  
Stark Contrast, Lightly Toned**

- 3755 1898 PR66 Deep Cameo PCGS.** Frosty, needle-sharp motifs deliver incredible contrast against the fully mirrored fields of this gold-tinted Deep Cameo proof. There are no discernible contact marks and close study with a lens finds only a few faint lines which determine the grade. A boldly eye-appealing proof type or date representative. Population: 8 in 66 (1 in 66+) Deep Cameo, 6 finer (5/15). PCGS# 94882

- 3756 1900 PR66 Cameo PCGS.** This is a fully struck, starkly contrasted example of this final 19th century proof dime issue. Both sides show a hint of light golden toning, but are otherwise free of color. A tiny speck appears near the base of the I in AMERICA, and a few others are seen with a loupe near the upper-right reverse rim. PCGS# 84884

- 3757 1901 PR65 PCGS.** The inaugural proof dime issue of the 20th century had a mintage of 813 pieces. Examples are marginally available in most grades, but become scarce finer than the present Gem example. This piece is boldly struck with deeply mirrored fields. The obverse exhibits intermingled orange-gold, amber, and powder-blue hues, while the reverse is primarily champagne with deeper umber toning around the periphery. Population: 32 in 65, 33 finer (5/15). NGC ID# 23GE, PCGS# 4885

- 3758 1901 PR65 PCGS.** A glittering, deep-mirrored proof, one of the high-grade survivors from a mintage of 813 pieces. Gunmetal-blue toning encircles both sides framing golden centers. Moderate contrast with the frosted devices adds to the eye appeal. Population: 32 in 65, 33 finer (6/15). NGC ID# 23GE, PCGS# 4885

- 3759 1901 PR66 NGC.** An ideal 20th century type coin, this boldly struck 1901 proof Barber dime displays soft lilac toning with interior accents of pine-green and gold. The mirrored fields easily reflect light, and this piece might have garnered a Cameo designation were it not for the delicate patination. Census: 47 in 66 (1 in 66 ★), 17 finer (5/15). NGC ID# 23GE, PCGS# 4885

- 3760 1901 PR67 NGC.** From a proof mintage of 813 coins, this sharp Superb Gem displays deeply mirrored fields, with light frost seen over the obverse portrait. Intermingled blue, violet, and olive-gold hues accent the nearly perfect surfaces, adding to the visual appeal of this high-end representative. Census: 15 in 67 (1 in 67 ★), 2 finer (5/15). NGC ID# 23GE, PCGS# 4885

- 3761 1902 PR66 NGC.** The toning is rich and appealing over the deep-mirrored surfaces of this sharply struck proof dime. Steel-blue and reddish-gold shades vie for attention with the blue tones occupying slightly more territory. The strike is razor-sharp, and there are no marks requiring individual mention. Census: 26 in 66, 16 finer (6/15). NGC ID# 23GF, PCGS# 4886

- 3762 1903 PR66 PCGS.** Shades of yellow, sea-green, and orange-gold radiate from the obverse of this glittering proof dime, while violet and blue toning blankets the reverse. Glassy, deep mirrors surround lightly frosted motifs on both sides. A fully struck Premium Gem. Population: 27 in 66, 10 finer (6/15). NGC ID# 23GG, PCGS# 4887

**1905 Dime, Richly Toned PR67**

- 3763 1905 PR67 PCGS. CAC.** This patinated Superb Gem proof displays deep violet, crimson, and cobalt-blue at the borders and margins with smoky golden-gray in the extreme centers. Both sides yield sharply struck design elements and impeccable preservation. This issue is relatively available in numerical grades through PR66, but is elusive any finer. Population: 16 in 67 (1 in 67+), 0 finer (6/15). NGC ID# 23GJ, PCGS# 4889

- 3764 1907 PR66 NGC.** Even though the business strike variant was produced in excess of 22 million coins, the proof 1907 dime saw one of the lowest proof mintage figures for the series (575 coins). This boldly struck, beautifully preserved Premium Gem displays complementary amber-gold and sky-blue hues melting into deeply mirrored fields on each side. Census: 27 in 66 (1 in 66+), 22 finer (5/15). NGC ID# 23GM, PCGS# 4891

**1908 Dime, PR67  
Razor-Sharp, Copper-Toned Beauty**

- 3765 1908 PR67 NGC.** Only 545 proof Barber dimes were struck in 1908. This spectacular Superb Gem displays razor-sharp definition on all design elements and deeply reflective fields that are blanketed in attractive shades of coppery-gold and cerulean-blue toning. Census: 18 in 67, 4 finer (6/15). NGC ID# 23GN, PCGS# 4892
- 3766 1911 PR66 Cameo NGC. CAC.** Razor-sharp definition shows on all the design elements of this delightful Premium Gem and the deeply mirrored fields contrast boldly with the frosty devices. The well-preserved surfaces show hints of pale gold toning. Census: 8 in 66 Cameo, 15 finer (6/15). PCGS# 84895

**1913 Dime, Stark PR66+ Cameo  
Picture-Perfect Contrast**

- 3767 1913 PR66+ Cameo PCGS. CAC.** A borderline Deep Cameo, with tinges of champagne-gold toning accentuating the field-motif contrast — a true white-on-black proof. The fully mirrored fields are seemingly pristine, and the only grade-limiting factor appears to be a few faint lines on Liberty's cheek which are only visible with the coin turned at a 90-degree angle and tilted beneath a light. Fully struck and impressively eye-appealing. Population: 13 in 66 (1 in 66+) Cameo, 4 finer (5/15). PCGS# 84897

**MERCURY DIMES**

- 3768 1916-D Fine 12 NGC.** A lightly abraded and problem-free example of this low-mintage series key. The bands on the fasces show significant wear on this pleasing Fine specimen, but the vertical sticks are still intact. NGC ID# 23GY, PCGS# 4906

**1916-D Mercury Dime, AU Details  
Sharp Strike**

- 3769 1916-D — Improperly Cleaned — NGC Details. AU.** A trace of high-point friction is evident on this key-date Mercury dime, although the sharpness of the strike is hardly hindered, showing nearly full separation of the central bands on the reverse. The surfaces are unnaturally bright due to past cleaning, but this moderately affordable example retains pleasing eye appeal. NGC ID# 23GY, PCGS# 4906
- 3770 1920 MS67 PCGS. CAC.** A mix of sea-green, amber, and ice-blue toning blankets the virtually pristine surfaces of this spectacular Superb Gem, with vibrant mint luster underneath. The design elements are well-detailed, but some softness shows on the middle bands. Population: 1 in 67, 0 finer (6/15). NGC ID# 23HB, PCGS# 4928
- 3771 1920-D MS64 Full Bands PCGS.** The 1920-D Mercury dime is a slightly better date with Full Bands definition. This Choice example is remarkably appealing for the grade, exhibiting thick, matte-like luster and minimally disturbed surfaces. The strike is razor-sharp throughout, and both sides display blended shades of lavender-gray, violet, and sun-gold toning. NGC ID# 23HC, PCGS# 4931

**3772 1923-S MS66 PCGS.** The 1923-S Mercury dime is rare at the Premium Gem grade level, with or without a Full Bands designation. This piece is carefully preserved with satiny luster and light golden toning. The horizontal bands on the reverse are nearly separated, although minor weakness is observed along the lower portion of ONE. Population: 8 in 66 (1 in 66+), 0 finer (5/15). NGC ID# 23HH, PCGS# 4940

**3773 1928 MS67 Full Bands PCGS. CAC.** This available issue is most widely sought in Superb Gem condition, where Full Bands representatives are rare. This piece is boldly struck, with a lack of any perceptible abrasions. Deep amber-orange and russet peripheral toning surrounds pale champagne centers. Population: 35 in 67 (2 in 67+) Full Bands, 1 finer (6/15). NGC ID# 23HX, PCGS# 4967

**3774 1931-D MS67 Full Bands PCGS.** Shades of golden-brown and amber toning visit the impeccably preserved surfaces of this delightful Superb Gem, with vibrant mint luster underneath. The design elements are sharply detailed, with Full Bands definition on the fascies. Population: 59 in 67 (2 in 67+) Full Bands, 0 finer (6/15). NGC ID# 23J8, PCGS# 4985

#### 1941 Dime, MS68 Full Bands Intense Obverse Toning

**3775 1941 MS68 Full Bands PCGS. CAC.** One of only 11 MS68 Full Bands examples at PCGS, the finest seen by that service (6/15). This Registry-grade 1941 Mercury dime yields splendid sun-gold, rose, and azure peripheral toning on the obverse, with pale champagne in the center and over the entire reverse. Boldly struck and beautifully preserved. NGC ID# 23JX, PCGS# 5029

**3776 1942/1 FS-101 AU55 PCGS.** Comprehensive sun-gold, powder-blue, and lilac toning endows this lightly circulated key date dime. No marks are remotely consequential, and luster illuminates the margins and motifs. PCGS# 145473 Base PCGS# 5036

**3777 1942-S MS67+ Full Bands PCGS. CAC.** Large S. A brilliant Superb Gem. Pristine aside from unobtrusive contact on the reverse rim above OF A. Although this World War II issue often comes nice, examples of the present quality are elusive. NGC ID# 23K7, PCGS# 5043

**3778 1944 MS67 Full Bands PCGS. CAC.** A spectacular Superb Gem, with sharp definition on all design elements and Full Bands on the fascies. The impeccably preserved lustrous surfaces show a few hints of golden-tan toning. PCGS has graded only three numerically finer examples (5/15). NGC ID# 23KB, PCGS# 5051

**3779 1944-D MS68 Full Bands PCGS.** This magnificent MS68 specimen exhibits razor-sharp definition on all design elements, including full split bands on the fascies. Subtle hints of greenish-gold and magenta toning visit the pristine lustrous surfaces. Population: 87 in 68 (1 in 68+) Full Bands, 0 finer (5/15). NGC ID# 23KC, PCGS# 5053

**3780 1944-S MS67+ Full Bands PCGS. CAC.** The Plus designation sets this piece apart from almost all other MS67 examples of the 1844-S Mercury dime. The strike is full throughout the motifs and peripheral legends. The obverse displays swirling forest-green, violet, and olive-gold toning, while the reverse shows just a few splashes of gold. Six Full Bands coins are finer at PCGS (6/15). NGC ID# 23KD, PCGS# 5055

#### 1945-S Dime, MS67 Full Bands Scarce Micro S Mintmark

**3781 1945-S Micro S, FS-512, MS67 Full Bands PCGS.** Most Mercury dime collectors eschew the various mintmark size varieties on San Francisco issues from the 1940s. But specialists of the series make an exception for the distinctive 1945-S Micro S. The tiny mintmark punch was not used on any other issue during the 1940s. The present well struck example displays richly variegated forest-green and golden-brown obverse toning. The reverse is brilliant aside from peripheral chestnut patina, and displays a few minor field grazes. Population: 32 in 67 (2 in 67+) Full Bands, 2 finer (3/15). PCGS# 145415 Base PCGS# 5063

### PROOF MERCURY DIMES

**3782 1936 PR66 PCGS.** The 1936 was the first proof issue in the Mercury dime series, and it is also the scarcest date in the seven-year proof series. This Premium Gem example is deeply reflective with just a hint of light golden toning overall. Fully struck and free of distractions. NGC ID# 27DG, PCGS# 5071

**3783 1936 PR66 PCGS.** Hints of ice-blue and pale champagne color intrude upon the mirrored surfaces of this Premium Gem first-year proof, while the design elements are fully struck and the surfaces are devoid of contact marks. Finer examples of this Mercury dime proof issue are seldom seen. NGC ID# 27DG, PCGS# 5071

**3784 1936 PR66+ NGC.** This high-end Premium Gem shows the all-brilliant finish used on proof coins of this era, with razor-sharp definition on all design elements and impeccably preserved reflective fields. NGC ID# 27DG, PCGS# 5071

**3785 1936 PR66 PCGS. CAC.** The CAC endorsement confirms the high technical quality of this Premium Gem proof, including carefully preserved surfaces and boldly rendered design elements. Dusky champagne toning is observed over each side, accentuated by hints of lilac and blue. NGC ID# 27DG, PCGS# 5071

**3786 1936 PR66 PCGS. CAC.** The government resumed proof set offerings after a two decade hiatus in 1936. This delightful Premium Gem is fully struck, with impeccably preserved surfaces that show the all-brilliant finish employed on proofs of this era. NGC ID# 27DG, PCGS# 5071

#### 1938 Mercury Dime, PR68 Conditionally Rare

**3787 1938 PR68 PCGS.** Even this available Mercury dime proof issue is rare as fine as the PR68 grade level. This piece is deeply mirrored in the fields, with fully struck, satiny devices and pale lemon-gold toning overall. A lack of contact marks or hairlines confirms the lofty grade. Population: 9 in 68 (1 in 68+), 0 finer (6/15). NGC ID# 27DJ, PCGS# 5073

**3788 1939 PR68 PCGS.** This is a fully struck, gold-tinted proof of the highest numerical grade obtainable. Both sides are devoid of flaws and the eye appeal is evident in the mirrored fields and thick, satiny devices. Population: 43 in 68 (1 in 68+), 0 finer (6/15). NGC ID# 27DK, PCGS# 5074

**3789 1939 PR68 NGC.** The brilliant, deeply reflective surfaces of this spectacular Mercury dime are virtually perfect and the design elements are razor-sharp throughout. Eye appeal is tremendous. Census: 79 in 68 (1 in 68+, 10 in 68 ★), 0 finer (6/15). NGC ID# 27DK, PCGS# 5074

## ROOSEVELT DIMES

**3790 1948-D MS68 Full Bands NGC.** An important Registry coin, this boldly struck, frosty 1948-D dime is among the finest seen by either NGC or PCGS. The obverse is accentuated by russet, olive, and golden toning around the margins, while the central portrait is brilliant; the reverse shows a hint of iridescent champagne color, with a few russet overtones near the peripheries. Census: 6 in 68 (2 in 68 ★) Full Bands, 0 finer (5/15). NGC ID# 23KS, PCGS# 85089

**3791 1953-D MS68 Full Bands NGC.** An important Registry acquisition, among the finest at NGC; PCGS has not certified any Full Bands examples finer than MS67+. This piece is boldly struck, with frosty gold-tinted luster. A couple minute die chips appear on Roosevelt's eyebrow and nostril. Census: 5 in 68 (3 in 68 ★) Full Bands, 0 finer (6/15). NGC ID# 23L9, PCGS# 85104

## PROOF ROOSEVELT DIMES

**3792 1955 PR69 W Ultra Cameo NGC.** The fields are fully reflective and the devices are thickly frosted. The strike is needle-sharp and the profound white-on-black contrast ensures superior visual appeal. Census: 8 in 69 Ultra Cameo, none finer (6/15). Ex: V. A. Everest Collection (Heritage, 7/2003), lot 6872, which realized \$2,587.50. PCGS# 95230

**3793 1958 PR69 Ultra Cameo NGC.** A virtually perfect example of this popular proof issue, with fully detailed design elements and stunning field-device contrast. The brilliant surfaces add to the incredible eye appeal. Census: 11 in 69 Ultra Cameo, 0 finer (6/15). NGC ID# 27ET, PCGS# 95233

## 1973-S Roosevelt Dime, PR70 Elusive Deep Cameo Specimen

**3794 1973-S PR70 Deep Cameo PCGS.** From a proof-only mintage of 2.7 million pieces, the 1973-S Roosevelt dime is a rare issue in the ultimate grade of PR70. This technically perfect example offers fully detailed design elements with a rich coat of mint frost that contrasts boldly with the deeply reflective fields. Population: 27 in 70 Deep Cameo, (6/15). NGC ID# 27F8, PCGS# 95251

## TWENTY CENT PIECES

**3795 1875 MS62 PCGS. BF-1, R.1.** Stone-gray motifs, golden-brown fields, and aquamarine borders confirm the originality of this Philadelphia Mint type coin. Well struck and semiprooflike. Minor field marks correspond to the designated third party grade. NGC ID# 23R5, PCGS# 5296

## 1875-CC Twenty Cent, MS63 BF-2, High Close CC

**3796 1875-CC MS63 PCGS. BF-2, R.1.** Although the BF-2 variety is the most available of five die pairs known for the issue, it is still in intense demand by collectors needing a Carson City representative of the denomination. This Select Uncirculated example is typically struck, with minor central weakness most evident on the eagle's left wing top and on the breast feathers. The CC mintmark is close to the arrow fletchings and high. Blue-gray patina mixes with rose-gold accents for nice eye appeal. NGC ID# 23R6, PCGS# 5297

**3797 1875-S MS63 PCGS. BF-6, R.4.** Deep autumn-brown, forest-green, and navy-blue toning encompasses this satiny and carefully preserved example. The strike is bold save for blending near Liberty's head. An early die state of BF-6, without obverse clash marks. NGC ID# 23R7, PCGS# 5298

## 1875-S Twenty Cent, MS65 Frosty and Original

**3798 1875-S MS65 NGC. BF-5.** Beautifully preserved with original mint frost and medium golden-gray and champagne toning; a few small russet overtones appear in the obverse margins. This coin is moderately well-struck for the issue, although some of the usual softness persists on the upper edge of the eagle's left (facing) wing. The 1875-S is the most plentiful twenty cent issue, ideal for type purposes. This variety shows an extensively cracked reverse. NGC ID# 23R7, PCGS# 5298

## PROOF TWENTY CENT PIECE

### 1876 Twenty Cent, PR64 Cameo Hint of Golden Toning

**3799 1876 PR64 Cameo PCGS.** A less often seen Cameo example of this popular proof twenty cent issue. The devices show crisp detail with gold-tinted, frosty luster. No significant contact marks are present, although the mirrored fields show scattered hairlines that limit the grade. Population: 31 in 64 Cameo, 21 finer (6/15). PCGS# 85304

## EARLY QUARTER

- 3800 1806 B-9, R.1, VF20 PCGS.** Tompkins Die State 3/2. Lilac and aquamarine undertones emerge when this cream-gray Draped Bust quarter is rotated beneath a light. Minimally abraded, and each letter in PLURIBUS UNUM is apparent. Certified in a green label holder. PCGS# 38935 Base PCGS# 5314

## BUST QUARTERS

**1822 Quarter, B-1, AU53**  
Modestly Reflective Fields

- 3801 1822 B-1, R.2, AU53 PCGS.** B-1 is the more plentiful of the two 1822 quarter die varieties, ideal for date representation. This About Uncirculated piece is evenly and boldly struck, showing just a touch of wear over the high points of the design. Steel-gray centers show a hint of pale lavender color, while the margins are more deeply toned in iridescent blue-gray, olive, and amber hues. PCGS# 38969 Base PCGS# 5332

- 3802 1831 Small Letters, B-2, R.2, MS62 NGC.** Die cracks across the reverse periphery aid in the attribution of this satiny and well-struck quarter. Dusky gunmetal-gray centers are bounded by sea-green peripheries. Minimally abraded and attractive. PCGS# 38981 Base PCGS# 5348

**1834 B-1 Quarter, MS62**  
Advanced Die State

- 3803 1834 O Over F in OF, B-1, FS-901, R.1, MS62 PCGS.** Heavily clashed and cracked, and struck with a pronounced clockwise rotation of the reverse of about 45 degrees. The reverse is extensively lapped, with most of the olive leaves well-separated from the branch. This is the famous O Over F in OF *Guide Book* variety, although the undertype is lapped away on this advanced die state. This piece is well-struck and lustrous, with blended rose-gold and sea-green toning overall. Abrasions are at a minimum. PCGS# 38992 Base PCGS# 5353

## SEATED QUARTERS

- 3804 1844-O MS63 PCGS. Briggs 1-A.** This New Orleans quarter is both conditionally rare and numismatically intriguing. The date is noticeably recut north, with evidence of the underdigits most visible at the lower sides of the crosslets. Extra digits — apparently, a 1 and an 8 — are visible in the dentils. The fields show areas of prooflikeness, with deep teal and red-gold toning, interspersed with shades of dark-charcoal gray. The coin is boldly struck except for the star centers on either side of Liberty's head. Rare in this Select Uncirculated condition. Population: 6 in 63, 5 finer (5/15). NGC ID# 23SU, PCGS# 5407

- 3805 1847 MS63 PCGS. Briggs 4-D.** A curved die defect at the base of Liberty's shield confirms the Briggs variety. The well struck and satiny surfaces are free from any consequential marks. The light almond-gold toning is consistent aside from a small obverse spot at 11 o'clock. NGC ID# 23SX, PCGS# 5410

**1850 FS-301 Quarter, MS64**  
Misplaced 1, Better Date

- 3806 1850 Misplaced Date, Briggs 1-A, FS-301, MS64 NGC.** A large silver melt in 1853 may have something to do with the scarcity of this Philadelphia issue despite a reasonable mintage of 190,800 pieces. Silver coinage in general from half dimes to dollars were melted for their silver content in the early 1850s. This softly frosted, boldly struck near-Gem survivor is untuned with a pleasing, silver-white sheen. As seen on most 1850 quarters, the base of a 1 is misplaced on the obverse rim at 6:30. Census: 7 in 64, 3 finer (5/15). PCGS# 395929 Base PCGS# 5415

**1854-O Quarter, VF20**  
FS-501, 'Huge O' Variety

- 3807 1854-O Huge O, Briggs 1-A, FS-501, VF20 PCGS.** This intriguing *Guide Book* variety is inherently difficult to find with pleasing eye appeal, as most examples are well-worn and suffer from varying degrees of die fatigue. The present coin is lightly circulated, but retains detail worthy of the VF grade level. Original pewter-gray patina overall yields to deeper olive toning in the recesses, giving this piece a distinct old-time appearance. An old, faint pinscratch in the right obverse field does not affect the grade assessment from PCGS. PCGS# 395933 Base PCGS# 5434

- 3808 1854-O Huge O, Briggs 1-A, FS-501, VF20 PCGS.** The antithesis of a variety such as the 1892-O Micro O half dollar; here the gigantic mintmark is too large, with a misshapen and obviously hand-worked O that bulges markedly on the left side. This slate-gray piece shows light-gray high points, expected wear, and relatively minor marks. Always in demand. PCGS# 395933 Base PCGS# 5434

**1854-O Huge O Quarter, XF40**  
**Famous Guide Book Rarity**

- 3809** 1854-O Huge O, Briggs 1-A, FS-501, XF40 PCGS. The oversized, donut-shaped mintmark was likely entered by hand on the working reverse die at New Orleans, due to an error of omission at Philadelphia, where the dies were made. The present lavender and sea-green representative has pleasing definition. Thorough inspection beneath a lens reveals occasional unobtrusive field marks. PCGS# 395933 Base PCGS# 5434

**1856 Quarter, MS66**  
**None Certified Finer**

- 3810** 1856 MS66 NGC. Rich russet-red and navy-blue toning embraces the margins of this lustrous and nearly immaculate No Motto quarter. Well struck and desirable. The die variety is Briggs-unlisted, but nonetheless interesting for its faint tail feathers and many spindly obverse cracks. Unimprovable at either leading service. Census: 9 in 66, 0 finer (5/15). NGC ID# 23TB, PCGS# 5438

- 3811** 1858-S XF40 NGC. Briggs 2-B. As with almost all early S-mint quarters, the 1858-S has an even lower availability than its mintage of 121,000 pieces would suggest. Just over three dozen pieces are available in this grade and finer. This is a totally original piece with light gray surfaces and a subtle reddish undertone. No singular marks are present and the devices show even wear on each side. Census: 2 in 40, 18 finer (5/15). NGC ID# 23TK, PCGS# 5447

**1860-O Quarter, MS64**  
**Attractively Patinated**

- 3812** 1860-O MS64 PCGS. Briggs 1-A. A precisely struck Choice example of the final No Motto New Orleans issue. Rich mahogany-brown and apple-green borders frame cream-gray fields and motifs. Minor obverse contact merits only passing mention. The Briggs variety with die rust on UNITED. Population: 9 in 64, 3 finer (6/15). NGC ID# 23TR, PCGS# 5452

- 3813** 1860-S — Scratch — PCGS Genuine. VF Details. Briggs 1-A. This key-date example is lightly circulated with the usual array of minor nicks and abrasions. When tilted at an angle, there are numerous vertical lines detected in the fields, but the only significant scratch is a thin horizontal pinscratch crossing Liberty's leg toward star 13. Well-detailed, with amber-orange and sea-green toning in the peripheral recesses. The 1860-S is a key branch mint issue with a mintage of only 56,000 pieces. NGC ID# 23TS, PCGS# 5453

**1862-S Quarter, AU53**  
**Mintage of 67,000 Pieces**

- 3814** 1862-S AU53 PCGS. Briggs 1-A. The pearl-gray fields and devices are framed by peripheral golden-brown. Smooth aside from a couple of unimportant marks on the right obverse field. A very scarce West Coast Civil War issue with a low mintage of 67,000 pieces. Ex: Long Beach Signature (Heritage, 6/2006), lot 1330; Long Beach Signature (Heritage, 9/2008), lot 1857, which realized \$2,300. NGC ID# 23TW, PCGS# 5457

- 3815** 1867 VF25 NGC. Briggs 1-A. All quarter dollar issues from the late 1860s are scarce to a certain extent, and in comparison to its branch mint-issued counterparts, the 1867 is somewhat underrated. This mid-grade example displays original gunmetal-gray patina, lightening to lavender-gray over the high points of the devices. Well-detailed and pleasantly problem-free. Census: 1 in 25, 23 finer (5/15). NGC ID# 23UD, PCGS# 5470

**1874-S Arrows Quarter, MS65**  
**Satiny Type Coin**

- 3816** 1874-S Arrows MS65 NGC. Briggs 3-A. In high grades, the 1874-S is one of the most available With Motto, With Arrows issues in the Seated quarter series, ideal for type representation. This Gem example displays satiny luster with blended amber, gold, and sky-blue toning over each side. The definition on the stars and Liberty's head is particularly notable. Census: 35 in 65, 29 finer (5/15). NGC ID# 23VY, PCGS# 5495

**1874-S Arrows Quarter, MS65  
Brilliant Luster, Full Strike**

**3817 1874-S Arrows MS65 PCGS. Briggs 1-A.** A moderate mintage of 392,000 pieces yields a comparatively substantial number of Gem and finer examples, making this Arrows quarter the target of type and series collectors alike. Most high-grade representatives come from a West Coast bank hoard of between 80 and 100 Mint State pieces located in 1949. The present coin is extremely sharp with brilliant, frosty surfaces. Cartwheel luster flashes across the untuned fields and elements for terrific eye appeal. Population: 49 in 65, 37 finer (6/15). NGC ID# 23VY, PCGS# 5495

**3818 1877 MS64 NGC.** This piece displays significant prooflike appearance, although incomplete details on several stars and the top of Liberty's head suggest only a single impression of the dies. This coin is essentially brilliant, with deeply mirrored fields and minimal hairlines. One of only six Prooflike pieces certified by NGC, including one PR60, two PR63, and three PR64 (6/15). NGC ID# 23V5, PCGS# 5504

**1877 Seated Quarter, MS67  
Lustrous, Delicately Toned Rarity**

**3819 1877 MS67 PCGS.** This Philadelphia date was the last really large mintage of the Liberty Seated series, with 10.9 million pieces struck for circulation, but is nonetheless elusive in the higher ranks of Mint State. This example offers delightfully smooth, deeply lustrous fields that gleam under light peach-gold toning of great delicacy. It would appear that most of these coins entered active circulation with comparatively few preserved. Population: 44 in 67 (2 in 67+), 3 finer (5/15).  
Ex: *Long Beach Signature* (Heritage, 5/2012), lot 3638. NGC ID# 23V5, PCGS# 5504

**1877 Seated Quarter, MS67  
Crisp and Fresh**

**3820 1877 MS67 NGC.** An absolutely spectacular coin with hallmark attributes of unmarked surfaces, vibrant, mint-fresh luster, and bold design definition. Hints of golden toning intrude from the peripheries, intensifying the radiance of the centers. Each side shows minor clashing. The 1877 Seated quarter is an ideal With Motto type representative, boasting a mintage of nearly 11 million coins. Census: 39 in 67 (3 in 67+, 5 in 67 ★), 9 finer (6/15). NGC ID# 23V5, PCGS# 5504

**3821 1877-CC MS64 PCGS.** A moderately available Carson City issue, ideal for the collector seeking a single representative from this mint. The present Choice example displays frosty luster beneath a blanket of uniform tan-gold toning that shows the occasional glimpse of lavender throughout. Well-struck with minimal abrasions. NGC ID# 23V6, PCGS# 5505

**3822 1880 MS66 PCGS. Briggs 1-A.** This Premium Gem 1880 quarter shows semiprooflike fields around thickly frosted, sharp design elements. Toning ranges in shades from sun-gold to amber to aquamarine and mint-green. No distracting abrasions are observed. Population: 34 in 66 (1 in 66+), 17 finer (5/15). NGC ID# 23VC, PCGS# 5512

**3823 1883 MS64 NGC. Briggs 2-A.** A lustrous Choice example with smooth surfaces and a wisp of sun-gold toning. Nicely struck and pleasing. A meager 14,400 pieces were coined, due to ongoing extensive silver dollar production. Census: 20 in 64, 28 finer (5/15). NGC ID# 23VE, PCGS# 5515

**3824 1883 MS65 PCGS. Briggs 2-A.** Golden-brown and lime hues endow this highly lustrous and sharply struck Gem. A well-preserved and desirable example of this popular late-series date. Only 14,400 pieces were struck. Population: 12 in 65, 22 finer (5/15).  
Ex: *FUN Signature* (Heritage, 1/2007), lot 2941. NGC ID# 23VE, PCGS# 5515

**PROOF SEATED QUARTERS**

**3825 1859 PR64 PCGS. Briggs 2-B.** By 1859, proof quarters were being marketed to a wider collector base, but the purchase price of a coin did not include a proofing charge until 1860. The proof 1859 issue had a mintage of 800 pieces, and is proportionately scarcer than many later proof issues in the Seated Liberty series. This Choice example displays bold design elements set against deeply mirrored fields. A medium olive-gray overlay of toning allows the emergence of champagne, amber, and aquamarine undertones, giving this original proof exceptional eye appeal. Population: 55 in 64, 13 finer (5/15). NGC ID# 23WL, PCGS# 5555

**3826 1864 PR63 Cameo PCGS. Briggs 3-C.** Light golden toning accentuates the field-motif contrast of this Select proof Cameo, warming the satiny devices and deepening the mirrored fields. A few light lines are not discernible to the naked eye. Population: 11 in 63 Cameo, 25 finer (5/15). PCGS# 85560

**3827 1872 PR65 Cameo PCGS. Briggs 3-C.** The die line on the left border of the eagle's shield identifies the proof variety. A hint of golden-brown toning denies full brilliance. Well struck and flashy with pleasing frost throughout the legends and devices. Population: 10 in 65 Cameo, 7 finer (6/15). PCGS# 85571

**3828 1874 Arrows PR64 ANACS. Briggs 5-D.** This Choice proof shows ocean-blue and violet peripheral accents around warm champagne centers. The design elements are sharp and satiny, with modest field-motif contrast on the reverse. No contact marks or distracting hairlines are observed. NGC ID# 23XS, PCGS# 5575

**3829 1875 PR64 Cameo PCGS. Briggs 5-F.** Bold, frosty design elements starkly contrast with the fully mirrored fields, while a hint of light champagne toning accentuates the cameo effect. A few faint hairlines limit the grade, but are not seen with the naked eye. Population: 20 in 64 Cameo, 10 finer (5/15). PCGS# 85576

**3830 1876 PR65 Cameo PCGS.** The Cameo designation is fully appropriate for this starkly contrasted Gem proof. The devices are sharply impressed and the fields exhibit deep mirroring; a light golden hue over each side accentuates the eye appeal. Cameo representatives of this issue are rarely seen in Gem or finer condition. Population: 10 in 65 Cameo, 4 finer (5/15). PCGS# 85577

#### 1880 Seated Quarter, PR67 Obsolete Type One Reverse

**3831 1880 PR67 NGC. Briggs 2-B.** Ocean-blue centers and honey-gold margins ensure the eye appeal of this fully struck Superb Gem. The flashy surfaces are virtually flawless. The specialist-familiar Type One Reverse with a die line across the left shield border. The same reverse die had been used to strike proofs intermittently since 1872. Census: 16 in 67 (3 in 67 ★), 5 finer (6/15). NGC ID# 23XC, PCGS# 5581

**3832 1881 PR65 PCGS. Briggs 1-A.** Identified as a Gem proof by PCGS, but struck from the regular issue dies, per the Briggs reference. The fields are mirrored and the design elements display modest cameo contrast. Well-struck overall, although a trifle soft on the stars around Liberty's head. The central regions are brilliant, surrounded by pale lavender in the margins and deeper aqua-blue in the peripheries. Population: 30 in 65, 30 finer (5/15). NGC ID# 23XD, PCGS# 5582

**3833 1883 PR64 PCGS. Briggs 1-A.** Beautifully patinated peach-gold, jade-green, and navy-blue. Precisely struck and pleasing despite delicate hairlines on the right obverse field. A popular low mintage date. NGC ID# 23XF, PCGS# 5584

#### 1884 Seated Quarter, PR66 Attractive Two-Sided Toning

**3834 1884 PR66 PCGS. Briggs 2-B.** The 1884 Seated quarter is a challenging issue, with only 875 proofs minted to supplement a paltry 8,000-coin circulation strike production total. This Premium Gem proof displays sharp design elements and deeply mirrored fields. Peripheral hues of mint-gold and ocean-blue surround interiors of deep lavender. Population: 22 in 66, 9 finer (5/15). NGC ID# 23XG, PCGS# 5585

**3835 1889 PR64 PCGS. Briggs 2-B.** This Choice proof is fully struck, with gleaming fields that are almost devoid of toning. The reverse is boldly contrasted, although the obverse is somewhat more subdued in that sense. A few light lines in the fields determine the grade. Population: 45 in 64, 39 finer (5/15). NGC ID# 23XM, PCGS# 5590

#### 1890 Quarter, PR66 Cameo Attractive, Boldly Contrasted

**3836 1890 PR66 Cameo NGC.** Overtly original toning covers both sides of this deep-mirrored, strongly contrasted cameo quarter. Just 590 proofs were struck plus a mintage of 80,000 circulation strikes, accounting for strong demand to fill the late-series date sequence. Cerulean-blue and rose-red toning provide a counterpoint to the mirrored fields and frosted central devices. Census: 12 in 66 Cameo (1 in 66+ Cameo), 19 finer (6/15). PCGS# 85591

### BARBER QUARTERS

#### 1892 Quarter, MS67 Peach and Aquamarine Patina

**3837 1892 MS67 NGC.** Type One Reverse. Iridescent autumn-brown centers cede to ocean-blue borders. Lustrous and fully struck with smooth fields and only unobtrusive grazes on the portrait. A national design contest took place in 1891 to determine the successor to the Seated type. No winner was declared, and Chief Engraver Barber's own design was implemented. Census: 24 in 67 (2 in 67+, 2 in 67 ★), 6 finer (5/15). NGC ID# 23XT, PCGS# 5601

#### 1892-S Quarter, MS65 Well-Struck, Mark-Free Reverse

**3838 1892-S MS65 NGC.** Type Two Reverse. Medium lavender and cream-gray toning graces the fields and devices. The borders display freckles of blue-green and tan-brown. A lustrous and well-struck Gem. The reverse appears pristine and the portrait shows only wispy marks. The 1892-S is much scarcer than its Philadelphia and New Orleans cousins. Census: 6 in 65, 3 finer (5/15). NGC ID# 23XV, PCGS# 5603

**3839 1908-D MS65 PCGS.** A substantial mintage of 5.7 million Barber quarters was accomplished at the Denver Mint in 1908, but few examples were saved and the issue is seldom encountered in high grade today. This well-detailed Gem displays well-preserved lustrous surfaces under shades of golden-brown, lavender-gray, and magenta toning. Population: 23 in 65 (1 in 65+), 15 finer (6/15). NGC ID# 23ZD, PCGS# 5650

**3840 1909 MS66 PCGS.** The impeccably preserved surfaces of this sharply detailed Premium Gem exhibit dappled shades of lavender-gray, greenish-gold, and amber toning, with vibrant mint luster underneath. Population: 20 in 66 (2 in 66+), 3 finer (5/15). NGC ID# 23ZG, PCGS# 5653

**3841 1913-S Good 4 PCGS. CAC.** An ideal example for the grade, with smooth wear and nearly full rims. Medium-gray old-silver patina covers both sides — lighter on the raised elements, and deeper gray in the recesses. L and part of Y are visible at LIBERTY and some letters remain on the scroll. Both date and mintmark are sharp for this key series date. NGC ID# 23ZW, PCGS# 5666

**3842 1913-S VG8 PCGS.** This is a pleasing collector-grade example of one of the three big keys in the Barber quarter series. The surfaces are primarily battleship-gray, although deeper gunmetal-gray hues dominate the protected regions. The L and Y in LIBERTY are clear, along with the upper halves of the I and T. NGC ID# 23ZW, PCGS# 5666

#### 1914-D Quarter, MS67 Green - Newman Pedigree

**3843 1914-D MS67 NGC.** Ex: "Col." E.H.R. Green / Eric P. Newman Collection. This is an uncommon coin in several ways. While the 1914-D is considered a common date among the later Barber issues, it barely exists in Superb Gem condition. This is a magnificently lustrous example, that displays even gray-golden toning over each side. The strike is strong overall and, of course, no abrasions can be seen. The sole finest at NGC (6/15).

Ex: "Colonel" E.H.R. Green; Eric P. Newman Numismatic Education Society. NGC ID# 23ZY, PCGS# 5668

**3844 1914-S MS63 PCGS.** With a mintage of only 264,000 coins, the 1914-S is one of the more significant semikey dates in the Barber quarter series. This Select example displays satiny luster with a touch of light golden toning over each side. The eagle's right (facing) talons and shoulder are a trifle soft, although the strike is otherwise well-defined. Light contact on Liberty's cheek limits the grade. Population: 14 in 63, 40 finer (5/15). NGC ID# 23ZZ, PCGS# 5669

**3845 1916 MS66 PCGS.** Rich amber-gold toning combines with sea-green and blue shades to produce the lovely patination on this lustrous, final-year Barber quarter. A sharp strike on all of the elements gives this coin high marks both on the technical side and for eye appeal. Few coins are graded at this Premium Gem level, and finer examples are nearly unavailable. Population: 30 in 66, 4 finer (6/15). NGC ID# 2425, PCGS# 5673

**3846 1916-D MS66+ PCGS. CAC.** Intense, frosty luster exhibits traces of light golden toning on each side of this high-end final-year type coin, while the underlying surfaces are free of all but a few faint grazes on Liberty's cheek. The eagle's right (facing) talons and the clutched arrow fletchings are weak, but the strike is otherwise well-executed. Just 15 examples are finer at PCGS (5/15). NGC ID# 2426, PCGS# 5674

## PROOF BARBER QUARTERS

**3847 1893 PR66 PCGS.** Attractive shades of cobalt-blue and lavender-gray toning blanket the pristine surfaces of this delightful Premium Gem. The design elements are sharply detailed and the fields are deeply mirrored. Population: 32 in 66 (1 in 66+), 21 finer (5/15). NGC ID# 2428, PCGS# 5679

**3848 1895 PR66 NGC.** From a proof mintage of 880 pieces, this sharply detailed Premium Gem displays deeply mirrored fields under shades of pale gold and powder-blue toning. Both sides have been well cared for. Census: 32 in 66 (2 in 66+), 28 finer (5/15). NGC ID# 242A, PCGS# 5681

#### 1900 Quarter, PR67 Cameo Sharp Strike and Contrast

**3849 1900 PR67 Cameo NGC.** Cameo examples of the proof 1900 quarter make up only a small percentage of the surviving population, and such pieces are rare at the Superb Gem grade level. This representative is fully struck, with deep, glassy mirrors. Hints of champagne toning intensify the contrast on both sides. Census: 16 in 67 Cameo (2 in 67 ★ Cameo), 6 finer (6/15). PCGS# 85686

**3850 1901 PR66 NGC.** A debut issue at the Third Philadelphia Mint on Spring Garden Street, this Premium Gem proof has exceptional eye appeal with deeply mirrored fields and sharply detailed devices beneath lovely iridescent toning. Census: 34 in 66 (2 in 66+), 34 finer (5/15). NGC ID# 242G, PCGS# 5687

**3851 1901 PR65 Cameo PCGS.** This Gem Cameo displays modest contrast beneath warm sunset-gold toning, showing hints of red and amber near the peripheries. The eagle's right (facing) talons and the clutched arrow fletchings show minor weakness, but the design elements are otherwise bold. Population: 5 in 65 Cameo, 29 finer (5/15). PCGS# 85687

#### 1901 Barber Quarter, PR65 One of Two Deep Cameo Proofs Known

**3852 1901 PR65 Deep Cameo PCGS.** Amazingly, just two 1901 proof quarters have achieved the Deep Cameo designation by either service — this Gem example, and a Superb PR67 Deep Cameo PCGS coin. NGC has certified no Ultra Cameo proofs of the issue in any grade. The present coin is intensely mirrored with frost-white devices and a thin veil of clear gold toning throughout the fields. Blue and amber-gold accents appear at the borders. With only the two coins in Deep Cameo format available, we expect spirited competition for this decidedly rare appearance. Population: 1 in 65 Deep Cameo, 1 finer (6/15). PCGS# 95687

- 3853 1902 PR66 NGC.** Iridescent splashes of pink, jade-green, sky-blue, and apricot color the lightly toned surfaces of this Premium Gem proof Barber quarter. A bold strike augments the desirability of this piece. Census: 40 in 66 (1 in 66+, 1 in 66+★), 21 finer (5/15). NGC ID# 242H, PCGS# 5688
- 3854 1902 PR66 NGC.** This attractive proof is deeply toned blue-violet and emerald on the obverse, while a touch of gold on the cap points to the lighter tones to be found on the reverse interior. Great eye appeal for this issue with a “lucky” mintage of 777 pieces. Census: 40 in 66 (1 in 66+, 1 in 66+★), 21 finer (5/15). NGC ID# 242H, PCGS# 5688
- 3855 1904 PR66 PCGS.** Only 670 proof Barber quarters were struck in 1904, and examples in Premium Gem condition are rare in today’s market. This delightful Premium Gem is sharply detailed throughout, with deeply mirrored fields that are blanketed in attractive shades of champagne-gold and blue toning. Housed in a green label holder. Population: 31 in 66 (1 in 66+), 11 finer (5/15). NGC ID# 242K, PCGS# 5690
- 3856 1905 PR66 NGC.** Considerable silver brilliance remains with delicate gold toning over much of the obverse and reverse. This lovely piece has noticeable contrast, although insufficient for a Cameo designation. Census: 37 in 66, 26 finer (5/15). NGC ID# 242L, PCGS# 5691
- 3857 1907 PR66 PCGS. CAC.** The exceptional preservation of this bold Premium Gem proof type coin is accentuated by noticeable field-device contrast on each side. About as close to a full Cameo as a coin can get without earning the appropriate designation from PCGS, with a light golden halo around the peripheries. Population: 13 in 66, 14 finer (5/15). NGC ID# 242N, PCGS# 5693
- 3858 1907 PR64 Cameo PCGS.** This boldly rendered proof displays considerable field-motif contrast, accentuated by a blush of light golden toning that heightens the cameo appeal. Faint, scattered hairlines in the fields limit the grade, but are undetectable to the unaided eye. Population: 16 in 64 (1 in 64+) Cameo, 38 finer (5/15). PCGS# 85693

#### 1915 Quarter, Pristine PR67

- 3859 1915 PR67 NGC.** This reflective Superb Gem proof displays pleasing blue, pink, and gray patina on each side amid immaculately preserved, fully struck-up surfaces and excellent eye appeal. From the mintage of 450 pieces, little more than about two dozen examples achieve this grade at NGC and PCGS combined. Census: 15 in 67 (2 in 67 ★), 5 finer (5/15). NGC ID# 242X, PCGS# 5701

### STANDING LIBERTY QUARTERS

- 3860 1917 Type One MS66 Full Head PCGS.** The strike on this Type One Full Head quarter is notably bold, even for this well-produced Philadelphia issue. In contrast to most examples of this date, the current coin shows the outer rim of the shield raised over Liberty’s bust, and the leading edge of the eagle’s left (facing) wing is fully detailed. Satiny surfaces show soft champagne and lilac-gray toning, with a lack of any major abrasions. NGC ID# 242Z, PCGS# 5707
- 3861 1917 Type One MS66 Full Head NGC.** Deep original toning sets this sharply struck Type One Standing Liberty quarter apart from most other examples of the issue. The interiors display warm gold and champagne hues, while the margins exhibit deep crimson and russet. Well-preserved, with satiny luster. NGC ID# 242Z, PCGS# 5707

- 3862 1917 Type One MS66 Full Head PCGS.** This satiny Type One representative is sharply struck on the figure of Liberty and the eagle, and the surfaces are devoid of any mentionable abrasions. Pale champagne hues accent each side, with a few deeper russet overtones evident periodically around the peripheries. NGC ID# 242Z, PCGS# 5707
- 3863 1917 Type One MS66 Full Head PCGS.** Boldly struck and luminous, this Premium Gem Full Head type coin exhibits sharp definition throughout, even on the leading edge of the eagle’s left (facing) wing, an area that is often weak even on otherwise “well-struck” examples. The surfaces are free of major abrasions, and each side shows a hint of iridescent champagne and ice-blue toning. NGC ID# 242Z, PCGS# 5707

#### 1917-D Type One Quarter, MS67 Excellent Luster, Lightly Toned

- 3864 1917-D Type One MS67 PCGS.** For the budget-conscious collector seeking quality but not wanting to shell out the big bucks, this non-Full Head Superb Gem may fill the bill. Liberty’s head shows nearly complete definition, but since the finer hair curls are not fully rendered, a Full Head designation has been withheld. The only mentionable weakness on this piece is seen on the outer rim of the shield as it grows faint over the high point of the bust. Mint-fresh luster is largely devoid of interruptions as it illuminates original shades of olive-gold, champagne, and amber-red toning, the hues most prominent on the obverse. Population: 4 in 67, 0 finer (5/15). NGC ID# 2432, PCGS# 5708

- 3865 1917-D Type One MS65 Full Head NGC.** A boldly struck, satiny example of this Type One Denver issue, this Gem Standing Liberty quarter displays sharp head detail and crisp eagle feathers; the outer rim of the shield is raised over Liberty’s bust. This piece is well-preserved and displays medium amber-gold toning. NGC ID# 2432, PCGS# 5709
- 3866 1917-D Type One MS66+ Full Head PCGS. CAC.** Intense luster radiates from both sides of this Type One quarter, each of which displays whispers of soft champagne-gold color with faint purplish highlights. Crisp detail transcends the full head to include all rivets, the vertical stripes of the inner shield, and most of the eagle’s breast feathers, but the leading edge of the eagle’s left (facing) wing is weakly defined. Both sides are remarkably well-preserved. Population: 142 in 66 (6 in 66+) Full Head, 22 finer (5/15). NGC ID# 2432, PCGS# 5709
- 3867 1917-S Type One MS65 PCGS. CAC.** From a general perspective one could argue that the head detail on this piece is “full enough,” but the criterion for a Full Head designation on a Type One Standing Liberty quarter demands complete definition of each curl. This piece is otherwise boldly rendered and pleasing. Mint-gold and olive toning blankets each side with varying degrees of intensity. Population: 46 in 65 (2 in 65+), 21 finer (6/15). NGC ID# 2433, PCGS# 5710

**1917-S Type One Quarter, MS66  
Lightly Toned Full Head Example**

- 3868 1917-S Type One MS66 Full Head PCGS.** Well-struck and satiny, with soft golden-gray toning that yields hints of turquoise throughout when tilted beneath a light. A small tick below Liberty's neck is the only grade-limiting abrasion. The San Francisco is the most elusive 1917 Type One issue in high-grade Full Head. Population: 84 in 66 (4 in 66+) Full Head, 12 finer (6/15). NGC ID# 2433, PCGS# 5711

**1918/7-S Quarter, Fine 12  
Clear Overdate**

- 3869 1918/7-S FS-101 Fine 12 PCGS.** Seldom is a mid-grade circulated example of this scarce overdate available. The present piece is evenly worn with grade-consistent detail remaining amid medium battleship-gray patina that shows hints of gold and olive throughout. The date is clear and the overdate feature is bold. A few light ticks appear on the eagle's body and near the R in LIBERTY, not out of line for the grade. PCGS# 395949 Base PCGS# 5726

- 3870 1920 MS66 PCGS. CAC.** Shades of pink, golden-brown, and amber toning enhance the well-preserved surfaces of this spectacular Premium Gem, with most of the color on the reverse. The design elements are well-struck and both sides radiate vibrant mint luster. Population: 71 in 66 (4 in 66+), 20 finer (6/15). NGC ID# 243E, PCGS# 5734

- 3871 1920 MS65 Full Head PCGS.** Full shield rivets and a sharp Full Head complement bold eagle feathers on this Gem 1920 Standing Liberty quarter. The 1 in the date shows the only mentionable weakness, a typical characteristic of this otherwise well-made issue. This piece displays satiny luster with hints of dusky golden-gray toning. PCGS lists 33 numerically finer Full Head examples (6/15). NGC ID# 243E, PCGS# 5735

- 3872 1921 MS62 NGC.** This is a well-struck example, with a sharp shield and nearly Full Head detail. The first 1 in the date is weakly defined, but there are no other mentionable weak points. This piece is pleasantly lustrous and displays just a hint of light golden toning, with fewer significant abrasions than are expected for the grade. NGC ID# 243H, PCGS# 5740

**1924 Quarter, Originally Toned MS67+  
Rare Quality, Rich Eye Appeal**

- 3873 1924 MS67+ NGC.** The 1924 Standing Liberty quarter is a fairly plentiful issue overall, but the certified population thins considerably in MS66 or finer grades, with or without a Full Head designation. This stellar non-Full Head coin is beautifully preserved, with satiny luster shining through original champagne-gold toning that shows deeper olive, russet, and amber hues around the obverse margins. The stars and eagle's feathers are well-defined, as are the obverse shield rivets. Liberty's head is a touch weak at the temple, as usual. Census: 20 in 67 (3 in 67+), 5 finer (6/15). NGC ID# 243L, PCGS# 5746

**1924-S Standing Liberty Quarter, MS66  
Intense Luster and Eye Appeal**

- 3874 1924-S MS66 PCGS.** As a San Francisco issue from the 1920s, the 1924-S is inherently difficult in Full Head grades, but unbeknownst to many novices, the date is also scarce in non-Full Head Mint State, especially in Gem or better condition. This Premium Gem example is a lovely coin. The first visual impression is made by the unusually fresh, radiant luster, but closer examination finds also exceptional striking sharpness on the stars, shield, date numerals, and the eagle's feathers; Liberty's head is 80 percent complete. The fields show faint, parallel die striations, the residual effects of an attempt to efface clash marks by grinding on the die face. These lines contribute to the unique appeal of the luster. Population: 32 in 66 (1 in 66+), 4 finer (5/15). NGC ID# 243N, PCGS# 5750

- 3875 1924-S MS64 Full Head NGC.** The 1924-S is one of the more difficult issues in the series to locate well-struck. This Choice example is uncommonly sharp on the date, stars, and eagle's feathers. Liberty's head is bold at the temple and only a couple shield rivets are incomplete. Toned in soft lemon-gold, amber, and lilac hues. Census: 56 in 64 (1 in 64+) Full Head, 42 finer (6/15). NGC ID# 243N, PCGS# 5751

- 3876 1927 MS66 Full Head PCGS.** The 1927 is generally considered to be one of the more plentiful post-1924 Standing Liberty quarters in Full Head, but such examples are conditionally scarce in MS66. This frosty piece exhibits fresh, original luster, accentuated by just a hint of ice-blue toning. A sharply struck and well-preserved representative. Population: 54 in 66 (4 in 66+) Full Head, 5 finer (5/15). NGC ID# 243U, PCGS# 5761

**3877 1928-S MS67 PCGS. CAC.** In general, Standing Liberty quarters have a hard time achieving the Superb Gem grade level, making any such example, regardless of date, special. This 1928-S representative is one of only nine non-Full Head MS67 coins at PCGS (6/15). Pale lavender-blue and champagne centers deepen to amber-gold and medium olive toning around the peripheries, while the underlying surfaces are devoid of mentionable abrasions. The usual striking softness is seen on the shield rivets and Liberty's head. NGC ID# 243Z, PCGS# 5770

**3878 1929-S MS66 Full Head PCGS.** This glowing Premium Gem exhibits a sharp Full Head, even while a couple shield rivets and the leading edge of the eagle's left (facing) wing show minor weakness. Luminous champagne-tinted luster highlights the motifs and reveals few abrasions. Only 14 Full Head coins are numerically finer at PCGS (6/15). NGC ID# 2444, PCGS# 5777

**3879 1930-S MS66 Full Head PCGS. CAC.** The rich, frosty luster for which the 1930-S quarter is known is especially luminous on this Premium Gem example, glowing beneath modest shades of champagne, ice-blue, and lavender toning. Liberty's head is sharp and above-average definition is also seen on the shield rivets and the eagle's feathers. The 1930-S appears in this grade only about a third as frequently as its Philadelphia counterpart. PCGS has seen 21 numerically finer Full Head examples. NGC ID# 2446, PCGS# 5781

## WASHINGTON QUARTERS

**3880 1932-D MS63 PCGS. CAC.** From a mintage of 436,800 pieces, the 1932-D is the rarest Washington quarter in high grade. This impressive Select example offers sharply detailed design elements and lightly marked surfaces under light shades of golden-tan and lavender-gray toning. NGC ID# 2448, PCGS# 5791

**3881 1932-D MS64 PCGS. CAC.** The 1932-D Washington quarter just edges out its San Francisco counterpart as the scarcest issue in the series in high grade Mint State. This Choice example is boldly struck and lustrous with a pale iridescent hue over each side. Fewer abrasions are present than are expected for the grade. NGC ID# 2448, PCGS# 5791

**3882 1932-S MS64 PCGS.** For the grade, this key-date Washington quarter reveals remarkably few noticeable abrasions, and close study with a loupe is needed to detect trivial grade-limiting contact on the high points of the devices. Well-struck and satiny, both sides show just a hint of light golden toning. NGC ID# 2449, PCGS# 5792

**3883 1934 Doubled Die Obverse, FS-101, MS64 PCGS.** Widespread die doubling on IN GOD WE TRUST, and ultra-thick letters in LIBERTY and the date, are characteristic of this well-known *Guide Book* variety. A lustrous Choice quarter with delicate tan toning and a bold strike. Population: 27 in 64 (1 in 64+), 31 finer (5/15). PCGS# 5900 Base PCGS# 5795

**3884 1934-D Heavy Motto MS66 NGC.** Ocean-blue, lavender, and stone-gray toning encompass this lustrous and exceptionally preserved quarter. The major devices are well struck. An early and low mintage branch mint issue.  
*Ex: Dallas Signature (Heritage, 4/2007), lot 711, which realized \$1,265. PCGS# 85796*

**3885 1935-S MS67 NGC.** This satiny Superb Gem is highly lustrous with wispy champagne toning on each side. The surfaces are seemingly perfect. An important Registry Set contender, among the finest certified. Census: 39 in 67 (1 in 67+, 2 in 67 ★), 0 finer (6/15). NGC ID# 244F, PCGS# 5799

**3886 1936-D MS66 PCGS.** This frosty Premium Gem is delicately preserved, with only a few light ticks present to limit the grade. The design elements are well-defined. Subtle lavender-gold hues exhibit deeper olive and russet overtones around the peripheries. Housed in an old green label holder. Only 17 coins are numerically finer at PCGS (5/15). NGC ID# 244H, PCGS# 5801

**3887 1936-D MS66 NGC. CAC.** Gorgeous frosty luster provides both sides of this Premium Gem example with tremendous eye appeal. Scattered light splashes of color include ice-blue, cool-lavender, pale gold, and orange-pink. Tiny flecks of deeper color are also present. Census: 69 in 66 (1 in 66+, 5 in 66 ★, 1 in 66+★), 11 finer (5/15).  
*Ex: Eric P. Newman Numismatic Education Society. NGC ID# 244H, PCGS# 5801*

**3888 1937-S MS67 PCGS.** The lower mintage 1937-S Quarter is one of the more sought-after issues in the series at the Uncirculated level, and those that were spared from circulation are generally high-quality. However, the technical superiority of this flagrantly original example carries it a step or two beyond what is normally encountered. Crescents of rich orange and rose iridescent toning partially outline each side and the frosty, silver-gray centers are nearly pristine. Population: 33 in 67 (2 in 67+), 0 finer (5/15).  
*Ex: Baltimore Signature (Heritage, 7/2003), lot 7219. NGC ID# 244M, PCGS# 5805*

**3889 1937-S MS67 NGC.** Intensely lustrous and toned light golden, this Superb Gem 1937-S Washington quarter is among the finest seen by either leading service. Only a few tiny ticks on the eagle's body prevent an MS68 grade. Ideal for Registry Set inclusion. Census: 28 in 67, 0 finer (6/15). NGC ID# 244M, PCGS# 5805

### 1938 Quarter, Iridescent MS67+ Impressive Registry Potential

**3890 1938 MS67+ PCGS. CAC.** Glistening iridescence graces each side of this high-end Superb Gem Registry coin, revealing intermingled pastel shades of lavender, mint, rose, and champagne. The strike is crisp and the satiny surfaces are almost devoid of contact. This piece, tied for finest certified at PCGS, is numerically equivalent to the coin in the current highest-rated Registry Set. Population: 59 in 67 (5 in 67+), 0 finer (5/15). NGC ID# 244N, PCGS# 5806

### 1943-D Quarter, MS67+ Suitable for Registry Inclusion

**3891 1943-D MS67+ PCGS. CAC.** An outstanding Registry-quality coin, this 1943-D quarter showcases radiant, satiny luster and sharp devices. The surfaces are free of any mentionable flaws. The central obverse and most of the reverse show pale ice-blue toning, with deeper amber-gold around the obverse periphery. Population: 60 in 67 (6 in 67+), 1 finer (6/15). NGC ID# 2456, PCGS# 5821

**1945 Quarter, Toned MS67+**  
**Considerable Registry Set Prospects**

**3892 1945 MS67+ PCGS. CAC.** The Plus designation sets this outstanding Superb Gem apart from most other MS67 examples, and pegs it as a prime consideration for a high-end Registry Set. The well-struck devices are enclosed in frosty luster that exhibits primarily soft lavender-gold and powder-blue hues, but also shows deep crimson and amber-red crescents along the lower obverse and upper reverse borders. A thorough scouting for abrasions turns up only a few tiny breaks in the luster, none out of line for the grade. Population: 30 in 67 (2 in 67+), 2 finer (5/15). NGC ID# 245B, PCGS# 5827

**3893 1950-D/S FS-601 MS63 NGC.** A lightly toned and sharply struck example of this popular S Over D overmintmark *Guide Book* variety. A small reeding mark is noted below the M in UNUM, with the surfaces otherwise choice. The prominent D mintmark is strike tripled, as usual on this variety. Census: 12 in 63, 21 finer (6/15). Ex: *Long Beach Bullet* (Heritage, 2/2003), lot 801; *Philadelphia Signature* (Heritage, 8/2012), lot 8281, which realized \$705. PCGS# 145638 Base PCGS# 5843

**3894 1950-S/D FS-601 MS65 PCGS.** This *Guide Book* variety is seldom available in Gem condition. Radiant luster and delicate iridescent toning are the highlights of this piece, although the sharp design elements further contribute to the eye appeal. A few microscopic ticks on Washington's portrait are all that preclude an even finer grade. Population: 47 in 65, 41 finer (5/15). PCGS# 145639 Base PCGS# 5845

**3895 1957 MS68 NGC.** Green-gold at the margins with blue-violet centers, the colors of the obverse are a trifle deeper than those seen over the reverse. Vibrant luster and carefully preserved surfaces under the toning make this amazing MS68 example an important Registry opportunity. Census: 3 in 68, 0 finer (5/15). NGC ID# 246D, PCGS# 5862

**3896 1963 MS67 PCGS.** This radiant Superb Gem is tied just 16 others (one in MS67+) for finest at PCGS (5/15). Both sides display warm champagne centers with rings of mint, gold, and amber-russet toning around the peripheries. A few minute ticks are restricted to inconspicuous places on the reverse. NGC ID# 246S, PCGS# 5874

**PROOF WASHINGTON QUARTERS**

**3897 1936 PR65+ PCGS. CAC.** An appealing first-year proof, this high-end Gem 1936 Washington quarter gleams in the fields and displays well-struck, satiny motifs. Each side of cast in a dusky champagne-gold hue. NGC ID# 27HN, PCGS# 5975

**3898 1936 PR66 PCGS. CAC.** This inaugural Washington quarter proof issue had a mintage of just 3,837 pieces, few of which survive finer than the present Premium Gem example. This piece shows glossy surfaces with dusky golden and ice-blue toning, but no other significant color. PCGS lists 10 numerically finer representatives (5/15). NGC ID# 27HN, PCGS# 5975

**3899 1937 PR67 PCGS. CAC.** The gleaming fields of this boldly struck proof quarter showcase satiny design elements, while an overlay of dusky champagne-gold toning adds a degree of warmth to each side. Registry Set-quality, with only three pieces numerically finer at PCGS (5/15). NGC ID# 27HP, PCGS# 5976

**3900 1937 PR67+ NGC. CAC.** This is one of only four Plus-graded PR67 examples at NGC, with only 15 coins finer (6/15). Both sides are boldly struck, with mirrored fields and a dusky champagne-gold overlay of toning. Deeper rose and forest-green hues are also visible around the peripheries. A Registry Set contender. NGC ID# 27HP, PCGS# 5976

**3901 1953 PR68 Ultra Cameo NGC.** The cameo contrast is remarkable for a quarter from the first half of the 1950s. The surfaces are brilliant throughout, and the fields are unfathomably deep. Set against the mirrors are the thickly frosted devices. Census: 12 in 68 Ultra Cameo, 1 finer (6/15). Ex: *Long Beach Signature* (Heritage, 9/2011), lot 3476. NGC ID# 248Y, PCGS# 95985

**3902 1960 PR69 Deep Cameo PCGS.** Frosty on the devices with seemingly endless depth in the fields. Several light toning spots are noticed to the left of Washington's portrait and prevent complete brilliance, but overall eye appeal is incredible. Population: 36 in 69 Deep Cameo, 0 finer (6/15). NGC ID# 2492, PCGS# 95992

**1974-S Washington Quarter, PR70**  
**Rare Deep Cameo Example**

**3903 1974-S PR70 Deep Cameo PCGS.** The 1974-S Washington quarter was a proof-only issue of 2.8 million pieces, struck just before the reverse design was changed for two years to commemorate the nation's bicentennial. This magnificent example features technically perfect surfaces and fully struck frosty design elements that contrast dramatically with the deeply mirrored fields. Population: 18 in 70 Deep Cameo, (6/15). NGC ID# 27JE, PCGS# 96006

**PROOF STATEHOOD QUARTER**

**3904 1999-S Delaware Silver PR70 Deep Cameo PCGS.** Fully struck and brilliant, with stark white-on-black Deep Cameo contrast. Delaware was the debut issue in the popular 50 States quarter program, recognizing Delaware as the first colony to ratify the U.S. Constitution, officially becoming a State of the Union. Certified in the special Flag holder. NGC ID# 27M8, PCGS# 96043

## EARLY HALF DOLLARS

### 1794 Half Dollar, Original Good Details Rare O-105a Variety

- 3905** 1794 O-105a, R.6 — Edge Damage — PCGS Genuine. Good Details. All 1794 half dollar varieties are scarce to rare, and several are extremely rare. O-105a is one of the less often seen die pairings, and is rarer than its early die state counterpart, O-105. The present example is well-circulated, but Liberty's portrait is boldly outlined and much of the rims are well-defined. A true circulation cameo, this piece displays medium battleship-gray color on the central devices with deep gunmetal-blue in the fields. A small groove in the obverse rim at 10:30 precludes a numeric grade, possibly from a jeweler's file. Otherwise, the coin is problem-free, just well-worn; considerable weakness on the reverse below STATES is due in part to die sinking, a diagnostic of this late die state variety. PCGS# 39207 Base PCGS# 6051

### 1795 O-109 Half Dollar, VF20 Appealing Golden-Gray Surfaces

- 3906** 1795 2 Leaves, O-109, R.4, VF20 PCGS. The obverse portrait is particularly well-detailed for the assigned grade, which displays faint traces of golden luster among the recesses of the Flowing Hair motifs. The eagle is less sharply impressed, with a few shallow adjustment marks at the left border and across the eagle's right wing, but the same even, golden-gray toning prevails for nice appeal. The rims are sharp with full dentils on both sides. PCGS# 39227 Base PCGS# 6052
- 3907** 1795 2 Leaves, A Over E in STATES, O-113a, R.4, VG8 PCGS. The A in STATES is entered over an errant E on this scarce Flowing Hair variety. This example displays consistent battleship-gray patina. The border dentils are complete and the central devices are boldly outlined, although finer details are lacking, per the grade. PCGS# 39254 Base PCGS# 6052
- 3908** 1795 2 Leaves, O-115, R.5, VG8 PCGS. All stars and letters are apparent, and the date is bold. A few of the right-side stars and letters are faint. The powder-blue and cream-gray surfaces are unblemished except for a dull, thin diagonal field mark beneath Liberty's chin. PCGS# 39231 Base PCGS# 6052

### 1795 Flowing Hair Half Dollar, VF20 O-116, UNITED Incused Under LIBERTY

- 3909** 1795 2 Leaves, O-116, R.4, VF20 PCGS. A somewhat scarce (R.4) variety known for die clashing that reveals the reversed letters of UNITED adjacent to star 8 and within the recesses of LIBERTY. Old album toning conveys multicolor concentric shades of gold, gunmetal-blue, and olive-gray toning over both sides of the coin. A shallow abrasion in the field near stars 12, 13, and 14 is the most noticeable mark on this moderately worn example. Enough detail remains in the hair strands and among the eagle's wing feathers to confirm the assigned grade. PCGS# 39232 Base PCGS# 6052

### 1802 Half Dollar, VF30 Details O-101, Key Heraldic Eagle Date

- 3910** 1802 O-101, R.3 — Cleaned — ANACS. VF30 Details. A silver-gray representative with moderately bright surfaces. Free from reportable abrasions, and Liberty's curls have pleasing definition for the VF30 level. The only 1802 die marriage, and key to a date collection of Heraldic Eagle halves.  
*Ex: Long Beach Signature (Heritage, 5/2008), lot 8472, which realized \$2,990. PCGS# 39269 Base PCGS# 6065*
- 3911** 1803 Large 3, Large Reverse Stars, O-103, R.3, XF45 NGC. Delicate aquamarine, lilac-red, and straw-gold toning visits the margins of this nicely defined early half dollar. Pockets of luster are plentiful, although we note thin marks on Liberty's neck and the field above her chest. PCGS# 39273 Base PCGS# 6066
- 3912** 1805 O-106, High R.3, XF40 NGC. Four Berries, broken right foot on F in OF. Deep peripheral patina on the obverse leaves the center untuned, while the reverse displays dappled olive, tan, and salmon coloration. Lightly abraded with even highpoint wear across each side, but pleasing for the grade.  
*Ex: Central States Signature (Heritage, 5/2007), lot 653. PCGS# 39279 Base PCGS# 6069*
- 3913** 1805 O-112, R.2, XF40 NGC Details. Sharpness of an XF coin, but lightly cleaned in the past. As a result, the surfaces are somewhat glossy and silver-gray, with medium-gray toning at the border. Light, shallow marks and lines are distributed across both sides. Sharp detail on Liberty's hair and the eagle's plumage remain. Die clashing above the date and below the neck plus one or two few light rim nicks are the most noticeable marks.
- 3914** 1806/5 O-103, R.2, VF35 PCGS. CAC. Dove-gray and walnut-brown toning alternate across this nicely detailed and problem-free early half. The strike is consistent except for the usual softness near 1:30 on the reverse, opposite the bust tip. PCGS# 39299 Base PCGS# 6077

**3915 1806 Knob 6, Large Stars, O-105, R.2, XF40 PCGS.** The die state is between O-105 and O-105a. A die crack connects the first five stars. This gunmetal-gray representative is evenly defined aside from softness on the clouds and reverse stars opposite the bust tip. The moderately granular surfaces lack noticeable marks. Incorrectly designated as Small Stars by PCGS. PCGS# 39304 Base PCGS# 6074

**3916 1806 Pointed 6, No Stem, O-109, R.1, XF40 PCGS.** In a later die state, this head die cracks from star 12 toward the neck, but this early die state variant is more frequently encountered. This piece is evenly struck and well-detail for the grade. Deep orange-gold centers yield to deeper aqua-blue peripheries, while grayish overtones are scattered over the high points of the design. PCGS# 39310 Base PCGS# 6073

**3917 1806 Pointed 6, Stem, O-114, R.5, VF25 PCGS.** The rarer major die state of this very scarce die pairing. Most examples of the Overton marriage are O-114a with a break through the E in AMERICA, but the present piece shows no such crack. An evenly circulated charcoal-gray and cream example with moderate marks below the chin and on the shield. PCGS# 39315 Base PCGS# 6071

**3918 1806 Pointed 6, Stem, O-115, R.1, VF35 PCGS. CAC.** Deep forest-green, lavender, and cobalt-blue toning embraces well defined and unblemished surfaces. A problem-free collector coin of the popular Draped Bust series. PCGS# 39317 Base PCGS# 6071

**3919 1807 Draped Bust, O-103, R.3, XF45 NGC. CAC.** Medium steel-gray surfaces show hints of gold around the peripheries on this Choice XF Draped Bust type coin. The strike is even and well-executed, and the central devices exhibit sufficient detail for the grade. PCGS# 39340 Base PCGS# 6079

**3920 1807 Draped Bust, O-105, R.1, XF40 NGC.** Deep steel-gray, autumn-brown, and forest-green toning encompasses nicely detailed and lightly abraded surfaces. Luster illuminates the borders. A charming Draped Bust type coin. PCGS# 39343 Base PCGS# 6079

#### 1807 Draped Bust Half, AU55 O-109a, Dramatic Die State

**3921 1807 Draped Bust, O-109a, R.3, AU55 NGC.** Predominately pearl-gray, although freckles of forest-green reside in peripheral recesses. Impressively devoid of abrasions. An intermediate to late die state with a reverse crack through STA but not through ATEs. A heavy diagonal crack across the portrait, from the hair ribbon to the drapery, is undescribed in the Overton fifth edition. The lower left obverse field is buckled, which contributes to weakness of strike on the neck curls and, opposite, in the vicinity of the eagle's beak. The remainder of the design is bold. PCGS# 39350 Base PCGS# 6079

**3922 1807 Draped Bust, O-110a, R.2, XF45 PCGS.** Cream-gray, steel-blue, and straw-gold toning embraces this minimally abraded Choice XF Draped Bust half dollar. The strike shows softness near the eagle's beak and opposite on the upper neck curls, but luster illuminates the legends and stars.  
*Ex: Dallas Signature (Heritage, 10/2006), lot 1131, which realized \$1,897.50. PCGS# 39352 Base PCGS# 6079*

#### 1807 O-111a Half Dollar, XF45 Early Die State 'Bearded Goddess'

**3923 1807 Bearded Goddess, O-111a, R.5, XF45 PCGS.** An early die state of the famous "Bearded Goddess" variety. The die crack extends without interruption from Liberty's chin to her chest, but is much more delicate than seen on the spectacular Overton-111b die state. The well-known blundered denomination reverse with the 5 in 50 C entered over a 2. A stone-gray and wheat-gold example that shows glimmers of luster from the wings and letters. The field near the profile displays a few faint marks. PCGS# 39355 Base PCGS# 6086

### BUST HALF DOLLARS

**3924 1807 Capped Bust, Large Stars, 50 Over 20, O-112, R.1, VF30 PCGS.** A midgrade example of the popular *Guide Book* blundered denomination variety. The stone-gray and almond-gold surfaces display light hairlines but are without any mentionable abrasions. A later die state with the letters in UNITED drawn toward the rim. PCGS# 39356 Base PCGS# 6086

**3925 1807 Capped Bust, Large Stars, 50 Over 20, O-112, R.1, XF45 NGC.** Light peach-gold toning visits the lustrous borders, while the remainder of this half dollar is pearl-gray. No marks are noticeable and the eye appeal is pleasing. O-112 is the usual 1807 Capped Bust variety, attributed by the perfect 1 in the date and the 5 over 2 engraver's blunder on the reverse. PCGS# 39356 Base PCGS# 6086

#### 1808 O-108 Half Dollar, AU58 Early Die State, Condition Census Quality

**3926 1808 O-108, R.3, AU58 PCGS.** Soft luster permeates the minimally marked, ash-gray surfaces of this delightfully original Bust half. Sharply struck for the issue and unaffected by post-Mint distractions, a few glimpses of die clashing appear adjacent to the portrait near Liberty's lips, eyes, and forehead, visible under magnification. The 1 in the date is missing the lower left serif. One of the scarcer die varieties for the date, with most Condition Census coins representing the later O-108a die state. Just two Mint State examples of the earlier O-108 variety are reported in the Spring, 2015 Stephen Herrman census. PCGS# 39372 Base PCGS# 6090

**3927 1809 XXX Edge, O-102, R.1, AU53 NGC.** Dappled jade-green and chestnut-gold toning embraces this unmarked and briefly circulated half dollar. Luster illuminates design elements. O-102 and O-110 share the same reverse die, noted for a row of V-shaped clashes above the eagle's head. PCGS# 39380 Base PCGS# 6093

**1817/3 O-101a Half, AU53**  
**Remarkably Bold Overdate**

**3928** 1817/3 O-101a, R.2, AU53 PCGS. Silver luster remains across both sides of this late die state example, with multiple areas of die clashing visible throughout the obverse and the reverse. An ascending curved die crack runs through the top of the denomination, confirming the O-101a die state. As always, the overdate is abundantly clear for the variety, with an underdigit 3 boldly evident beneath the 7 to create one of the most spectacular overdates of the series. Slight golden-rose accents enhance the pleasing, sharply struck silver-gray fields and devices. PCGS# 39512 Base PCGS# 6111

**3929** 1818 O-111, R.1, AU58 NGC. A small spike protruding from the top of Liberty's cap confirms the die variety. This near-Mint example is sharply struck, with only a trace of friction evident over select high points on the obverse portrait. The fields remain radiantly lustrous, while each side is accented by delicate golden-gray toning. PCGS# 39528 Base PCGS# 6113

**3930** 1821 O-107, R.3, AU58 PCGS. A minimally toned near-Mint example that boasts ample luster and is free from mentionable abrasions. The strike shows slight inexactness on the upper stars and the A in STATES. PCGS# 39586 Base PCGS# 6128

**3931** 1822 O-110a, R.2, AU58 PCGS. This coin appears Mint State to the unaided eye, although further study with a loupe reveals trivial friction over the highest hair curls and the upper edge of the eagle's wings. Boldly struck, with satiny luster shining through olive-gold, amber, and medium brown toning on each side. PCGS# 39598 Base PCGS# 6129

**1823 O-101 Half Dollar, AU58**  
**Scarce Broken 3 Guide Book Variety**

**3932** 1823 Broken 3, O-101, R.3, AU58 NGC. O-101 receives its own *Guide Book* listing as the Broken 3 variety. The defective 3 on the die was eventually repaired, creating the O-101a Patched 3 variety. O-101 is significantly scarcer than O-101a. This lustrous and lightly toned near-Mint example shows slight high point wear but is free from any relevant marks. Among the nicest examples of O-101, especially if measured by eye appeal. PCGS# 39620 Base PCGS# 6132

**3933** 1825 O-117, R.4, AU58 NGC. The repunched 5 in the date is characteristic of this very scarce 1825 Overton marriage. The margins display a hint of tan toning, and the open fields are moderately bright. The strike is crisp except on the stars. PCGS# 39664 Base PCGS# 6142

**3934** 1826 O-112a, R.2, MS63 PCGS. Rich dove-gray, orange-gold, navy-blue, and olive-green toning graces this satiny and nicely struck half dollar. Marks are minor and mostly relegated to the fields near the beak and shoulder curl. PCGS# 408532 Base PCGS# 6143

**3935** 1826 O-117a, R.2, AU58 PCGS. The spindly die crack along the right reverse border identifies this collectible Overton variety. A partly lustrous near-Mint representative with only a hint of tan toning. The strike is crisp except on the stars. Marks are minor and the eye appeal is attractive. PCGS# 39690 Base PCGS# 6143

**3936** 1827/6 O-101, R.2, MS60 NGC. Honey-gold and pearl-gray endow this well detailed and coruscating representative. A slender streak of russet toning passes through the M in UNUM. Refreshingly unabraded except for a slight obverse edge knock at 8 o'clock. PCGS# 39751 Base PCGS# 6147

**3937** 1827 Square Base 2, O-117a, R.4, MS62 PCGS. The upright of the 5 in the denomination is recut on this scarce variety. This example is brightly lustrous, with tinges of russet-gold toning around the peripheries. The design elements are well-struck and there only minimal abrasions. PCGS# 39714 Base PCGS# 6144

**3938** 1827 Square Base 2, O-128, Low R.4, AU58 PCGS. An early die state that shows repunching below the 8 in the date, and a cluster of die lines beneath the bust tip. Star 4 has a spur from the upper inner point. The E in STATES is repunched north. Butter-gold and steel-gray enrich this lightly abraded and original example. PCGS# 39727 Base PCGS# 6144

**1829 O-115 Half Dollar, MS64**  
**Small Letters, High 'T' in STATES**

**3939** 1829 Small Letters, O-115, R.1, MS64 NGC. The second T in STATES is higher than surrounding A and E in STATES, and the lowest arrowhead is recut at the base near the shaft. The 5 in the denomination shows an upturned tip of the flag. Struck with some diagonal planchet striations, with the stars and legend drawn to the edge and some weakness at the denticles. Nice luster shines through steel-gray and blue toning throughout both sides of this near-Gem half, complemented by pearlescent silver fields. NGC Census all varieties: 47 in 64, 35 finer (6/15). PCGS# 39800 Base PCGS# 6154

**3940** 1830 Small 0, O-113, R.2, MS63 PCGS. Rich lavender and mahogany-red shades encompass this boldly struck and minimally abraded Select half dollar. A late die state example with a small break near the upper knob of the 3 in the date. Liberty's profile is lightly strike doubled. PCGS# 39825 Base PCGS# 6156

**1830 Small O Half, O-117, MS64**  
Lustrous, Original Surfaces

**3941** 1830 Small O, O-117, R.2, MS64 PCGS. Luminous surfaces reflect light in a radiant cartwheel effect, illuminating the iridescent champagne and olive-green hues that encompass each side. This piece is in an early die state, well-struck with recutting on the 5 in 50C. plain. Trivial contact on Liberty's cheek is almost not worthy of mention, but defines the grade. PCGS# 39828 Base PCGS# 6156

**3942** 1830 Large O, O-121, R.3, MS63 NGC. Satiny luster shines through steel and gold toning on both sides of this Select Mint State specimen. The reverse field is slightly reflective and the design elements are bold.  
*Ex: Long Beach Signature (Heritage, 6/2011), lot 3636.* PCGS# 39832 Base PCGS# 6157

**3943** 1830 Large O, O-123, R.1, MS63 PCGS. This satiny Mint State coin shows mottled olive-gold and russet toning, while the underlying surfaces are free of any major abrasions. A few of the upper stars are weakly defined, but the strike is otherwise sharp. PCGS# 39834 Base PCGS# 6157

**1832 Half Dollar, O-118, MS64**  
Radiant Mint Luster

**3944** 1832 Small Letters, O-118, R.1, MS64 PCGS. The so-called "laced lips" variety, for the tiny die lines that run through the lower lip of Liberty. The reverse shows doubling at the upper-left shield corner. This frosty Select example is untuned and offers excellent eye appeal. Some old die clashes appear in the obverse left field from the eagle's wing on the reverse. A great-looking example. PCGS# 39877 Base PCGS# 6160

**3945** 1833 O-105, R.2, AU58 PCGS. Wheat-gold and cream-gray embrace satiny and nearly mark-free surfaces. The strike shows blending on the stars and fletchings. A distinctive die variety due to the widely repunched second S in STATES. PCGS# 39892 Base PCGS# 6163

**1834 O-101 Bust Half Dollar, MS64**  
Large Date, Large Letters

**3946** 1834 Large Date, Large Letters, O-101, R.1, MS64 PCGS. Only three varieties of the 1834 issue show the Large Date, Large Letters combination. The O-101 die pair is characterized by a solidly joined forecurl, which distinguishes it from the other two varieties (O-102 and O-103). A recut stand on the 5 of the denomination confirms the attribution. This example is brilliantly lustrous and virtually untuned silver-white, save for a hint of pale russet patina at the borders. Sharply struck and frosty, although the dentils are diagnostically narrow and weak in spots. The Condition Census for the variety includes at least two MS64 examples. PCGS# 39905 Base PCGS# 6164

**3947** 1834 Large Date, Small Letters, O-105, R.1, AU58 PCGS. The ES in STATES is lightly repunched, and so is the 4 in the date. Light tan-gold toning visits this partially lustrous Capped Bust half. Well struck aside from the first two stars. A lens reveals occasional moderate abrasions. PCGS# 39909 Base PCGS# 6165

**3948** 1834 Small Date, Small Letters, O-111, R.1, MS63 PCGS. Brilliant with booming luster and superior surfaces for the designated grade. Liberty's shoulder and forehead curls show some incompleteness of strike. Stars 6 and 7 are repunched, characteristic of Overton-111. PCGS# 39915 Base PCGS# 6166

**3949** 1835 O-101, R.1, AU58 PCGS. The 5 in 50 C is clearly repunched, and the 5 in the date has a thick, curved flag. Iridescent powder-blue and caramel-gold toning adorns this partly lustrous and nearly unabraded representative. The strike shows occasional incompleteness. PCGS# 39927 Base PCGS# 6168

**REEDED EDGE HALF DOLLARS**

**3950** 1838 GR-4, R.1, MS62 PCGS. This is a boldly struck Reeded Edge half, with satiny luster residing beneath a blanket of lavender-gray and warm golden toning. Minor grazes on the cheek slightly dull the luster in that region, but the coin is otherwise free of distractions. PCGS# 531084 Base PCGS# 6177

**3951** 1838 GR-13, R.1, MS62 PCGS. A lengthy reverse peripheral die crack helps attribute the marriage. This is a satiny cream-gray representative with smooth surfaces. The central strike is sharp, although right-side stars and legends show incompleteness. PCGS# 531094 Base PCGS# 6177

**SEATED HALF DOLLARS**

**3952** 1840 Reverse of 1839, WB-101, MS62 NGC. CAC. Ex: "Col." E.H.R. Green/Eric P. Newman Collection. Attractive blue and gold peripheral toning complements lustrous fields. A few minor scuffs in the fields are consistent with the MS62 grade, but they are not distracting by any means. Strongly struck except for minor blending on the eagle's left (facing) leg, but this is typically seen on the issue. Most 1840 half dollars are of the WB-101 variety, yet NGC has certified only 12 coins at this level. CAC endorsed. Census: 12 in 62, 40 finer (5/15). PCGS# 572002 Base PCGS# 6234

**1841-O WB-102 Seated Half, AU50  
'Baseball' Die Crack Reverse**

**3953** 1841-O Medium O, WB-102, Die Pair 2, R.5, AU50 NGC. The die pair used to strike this scarce and popular variety was pressed into service more than once — an original production, and at least one remarriage of the same obverse and reverse in a later die state. The current example represents the first striking, with bold die cracks curving opposite each other to resemble the stitching on a baseball. One crack reaches from the edge between ST of STATES, through the left wing and olive leaves, to the bottom edge at the left of HALF. An opposing crack travels downward from the M of AMERICA through the right wing. Additional cracks complete the “stitching” from the edge past the O of DOL, to the branch tip, and upward along the eagle’s right leg. Yet another crack runs horizontally through the eagle’s head, connecting the two wings. This sharply struck example ranks among the finest known of the variety, with silver-gray surfaces and bits of golden luster. Light abrasions are appropriate for the AU50 grade. PCGS# 572010 Base PCGS# 6237

**3954** 1842-O Small Date, Small Letters, WB-101, Die Pair 1, R.5, VF25 PCGS. This *Guide Book* variety is scarce in all grades, and is decidedly rare finer than the VF level. This example displays pleasing detail for the grade, with largely steel-gray patina overall; overlays of olive-gold toning hesitantly intrude from the peripheral regions. Population: 7 in 25, 39 finer (5/15). PCGS# 572015 Base PCGS# 6238

**3955** 1844-O Repunched Date FS-301, WB-104, Die Pair 15, R.3, MS62 NGC. The second 4 of the date is noticeably repunched south, and the reverse features bold die cracks at the top of UNITED STATES and at the bottom of HALF. A cud appears at the denticles beneath the A of HALF. The Large O mintmark is far right near the branch end and leans slightly left. A pearlescent-gray example, sharply struck, with generous silver mint luster beneath the patina. Census: 15 in 62, 17 finer (6/15). PCGS# 572032 Base PCGS# 6246

**3956** 1850-O WB-101, Die Pair 6, R.5, MS63 NGC. A late die state example, cracked around portions of the reverse periphery. This rare doubled die obverse variety was discovered by Dick Osburn, and its diagnostics were first published in the July 1997, Issue #69 of the *Gobrecht Journal*. The doubling is minor, but is clearly visible on the upper-right shield lines. The present example is boldly struck and displays semiprooflike mirroring in the obverse fields. Light golden toning accents each side. The only mentionable abrasions are a pair of hits on Liberty’s knees, not immediately obvious. Census: 10 in 63, 24 finer (5/15). PCGS# 572076 Base PCGS# 6265

**3957** 1852 WB-101 AU58 NGC. CAC. Ex: “Col.” E.H.R. Green/Eric P. Newman Collection. In their 1993 reference, Randy Wiley and Bill Bugert comment about how expensive the date is when it is found in high grades — a situation that has not changed in the past 20 years. The present near-Mint example is a viable alternative to a full Mint State coin. Considerable mint luster is evident beneath the significant presence of original gray and blue patina that covers each side. A sharply — but not quite fully — struck representative of the low-mintage issue, with just the slightest trace of high-point weakness seen on the eagle’s plumage. PCGS# 572083 Base PCGS# 6268

**3958** 1853 Arrows and Rays, WB-101, MS62 NGC. Star 8 is a bit flat and the eagle’s left (facing) talon shows minor incompleteness, but overall this is a sharply struck coin. Golden luster peaks through the even, lilac-gray toning. Like most Seated halves from the 1840s and 1850s, few Mint State coins survive in relation to the mintage, a fact that is clearly evident from the population reports. Census (all varieties): 7 in 62, 29 finer (6/15). PCGS# 572085 Base PCGS# 6275

**3959** 1853 Arrows and Rays, WB-101, MS62 NGC. A one-year type with both the Arrows and Rays, and always in demand accordingly. This frost-white example is mostly untoned and lustrous. Well-struck except for a few of the star centers, both obverse and reverse display die clashing and numerous interesting die cracks. PCGS# 572085 Base PCGS# 6275

**3960** 1853-O Arrows and Rays, WB-101, Die Pair 18, R.3, AU53 PCGS. A pair of diagonal die lines in Liberty’s drapery beneath the right elbow and a diagnostic die crack travels from the edge at 4 o’clock through the top arrowhead and into the rays identifies the die pair. Light die doubling on the reverse is apparent on the upper-right wing feathers and on some of the vertical shield lines. The coin is essentially untuned with bright-silver surfaces and slightly reflective surfaces. Small lumps from die rust appear on both sides, especially near the date and denomination. Sharp detail remains on the motifs. Population (all varieties): 19 in 53, 65 finer (6/15). PCGS# 572086 Base PCGS# 6276

**3961** 1855-O Arrows, WB-101, Die Pair 8, R.4, MS63 PCGS. This Select New Orleans Mint half displays splashes of cobalt-blue, pale violet, orange-gold, and yellow-gold on the obverse, with light tan-gray and blue-green peripheral toning on the reverse. Lustrous surfaces exhibit well struck design features, and the fields are minimally marked. Extensive die cracks encircle both sides through the stars and legends, suggesting a late state of the dies. Ex: *Long Beach Signature* (9/2008), lot 2194. PCGS# 572090 Base PCGS# 6283

**1856-S Seated Half, AU55  
WB-101, Scarce No Drapery Die State**

**3962** 1856-S WB-101, Die Pair 3, R.5, AU55 PCGS. Large S mintmark. The late die state of Die Pair 3 is the only No Drapery obverse for the 1856 San Francisco issue, making attribution simple. This example is nearly untuned and brilliant, with considerable silver luster remaining across both sides. The strike is sharp except for minor blending on the arrow fletchings. Light abrasions and thin lines occupy the fields, but there are no heavy marks. A renowned low-mintage issue, with few pieces certified any finer. Population: 10 in 55, 9 finer (6/15). PCGS# 572098 Base PCGS# 6289

**3963** 1859 Type One Reverse, WB-101, MS64+ NGC. A thick patina of royal-blue, violet, and orange-gold toning blankets both sides of this high-end near-Gem half, with sharply struck motifs and splendid eye appeal. A moderate mintage of 747,200 pieces was not saved to any great extent, and the Philadelphia issue is challenging so well-preserved. The surfaces are nearly mark-free, and mint luster shines through the original toning. Census: 21 in 64 (2 in 64+, 1 in 64 ★), 9 finer (6/15). PCGS# 572128 Base PCGS# 6296

**3964** 1862-S Large S, WB-101, Die Pair 5, R.2, MS62 PCGS. Large S. Type One Reverse. A lustrous apricot-gold and olive-green representative. Liberty’s waist displays faint vertical roller marks (as made) but post-strike abrasions are inconsequential. The strike is crisp except on the uppermost stars. A desirable example of this conditionally rare San Francisco issue. Population: 13 in 62, 23 finer (6/15). PCGS# 572153 Base PCGS# 6308

**3965** 1863-S Small S, WB-101, MS62 PCGS. With the exception of the 1861 mintage, more S-Mint halves were struck in 1863 than in any other Civil War year, but the half dollars owe their scarcity to lengthy circulation on the West Coast rather than anything to do with the war. This example is basically untuned with faint powder-gray patina and considerable silver luster. Slight weakness of strike at Liberty's head and the eagle's left leg do not limit the grade or the appeal. Population: 13 in 62, 36 finer (5/15). PCGS# 572156 Base PCGS# 6310

**3966** 1866-S No Motto, Small Thin S, WB-101, Die Pair 1, R.4, XF40 PCGS. CAC. Late die state, reverse clashed and cracked. The San Francisco Mint coined 60,000 No Motto half dollars in 1866, all from a single die pair. This moderately worn example has grayish-gold toning with deeper peripheral color. Both sides are attractive with smooth surfaces. Population: 18 in 40, 32 finer (5/15).  
Ex: *Central States Signature* (Heritage, 4/2011), lot 3684; *Pittsburgh Signature* (Heritage, 10/2011), lot 3748. PCGS# 572170 Base PCGS# 6315

**1871 Half Dollar, MS64  
Scarce in Mint State**

**3967** 1871 WB-101 MS64 PCGS. CAC. The 1871 half dollar, with a mintage exceeding 1.2 million pieces, is a common date overall, but is scarce in Mint State. Near-Gems such as the present coin are a great find, and finer examples are seen infrequently. Gold and iridescent toning adorns the obverse while the reverse displays light champagne color with pale blue accents. Frosty silver luster and bold design motifs are evident on both sides. A few trivial grade-consistent marks are noted. Population: 18 in 64, 8 finer (5/15).  
Ex: *Long Beach Signature* (Heritage, 5/2012), lot 3832. PCGS# 572193 Base PCGS# 6330

**3968** 1872-CC WB-101, Die Pair 9, R.4, VF30 ANACS. A mid-grade example of this challenging Carson City half, with slate-gray and walnut-brown surfaces that show a few scattered marks but strong rims and generally smooth surfaces. LIBERTY is complete on all the letters except E, which shows some expected wear. Always an important issue for Seated half specialists, housed in an early generation ANACS holder. PCGS# 572203 Base PCGS# 6334

**1873 Arrows Seated Half, AU58  
Scarce WB-109, FS-101 'Quad Stripes' Variety  
Doubled Die Obverse**

**3969** 1873 Small Arrows, Doubled Die Obverse, WB-109, FS-101, High R.4, AU58 PCGS. A textbook example of what the Wiley-Bugert reference calls "the most dramatic doubled head die of the Liberty Seated half dollar series." Doubling is visible on Liberty's gown and foot, and clearly evident on the obverse shield, scroll, and LIBERTY. The obverse shield stripes are in sets of four, rather than the customary three stripes per set. A sharp and lustrous coin, with impressive multicolor, two-sided toning and a sharp strike. A few minor abrasions do not detract from the appeal. Desirable, too, as one of the Small Arrows varieties, always in demand. The sole finest graded of this scarce variety at PCGS (6/15).

Ex: *Jim Matthews/Harry Laibstain at Central States* (4/2008).

From *The Dr. Harry Salyards Collection, Part Two*. PCGS# 400136 Base PCGS# 6343

**3970** 1873-CC Arrows, Small CC, WB-102, Die Pair 3, R.4, XF40 PCGS. The With Arrows 1873-CC half is scarce in all grades, but becomes significantly elusive in XF or finer condition. This example shows soft pewter-gray color on the device highpoints and deeper tan-gray and lavender coloration elsewhere. Outstanding for the grade with no marks of significance and undeniable originality.

Ex: *Denver Signature* (Heritage, 8/2006), lot 3349. PCGS# 572215 Base PCGS# 6344

**1874-CC Arrows Half, Patinated VF25  
Carson City Semikey**

**3971** 1874-CC Arrows, WB-101, Die Pair 2, R.5, VF25 PCGS. With a mintage of only 59,000 coins, the 1874-CC half dollar is one of the prime semikey dates in the Seated Liberty series, seldom seen in any grade and rarely without problems. This mid-grade representative is pleasantly original, with deep olive-gold and lavender-gray patina that lightens over the central high points. A little chatter in the fields accompanies the grade, but the overall eye appeal is excellent for the issue. Population: 7 in 25, 66 finer (5/15). PCGS# 572221 Base PCGS# 6347

**3972 1875-S WB-101, Die Pair 16, R.3, MS64 PCGS. CAC.** A lustrous near-Gem Seated half showing brilliant silver-gray surfaces with a hint of gold toning plus a few deep-russet accents on the reverse above the lower berry and at the top border. Struck from a late state of the dies, with die cracks encircling the stars, legends, date, and denomination. Reasonably well-impressed except where planchet roller marks remain. Nice eye appeal with CAC endorsement. PCGS# 572229 Base PCGS# 6351

**3973 1876-CC WB-102, Die Pair 15, R.3, AU58 PCGS.** Medium CC mintmark. Nearly 2 million pieces were struck in Carson City for the 1876 issue (the largest half dollar mintage of the CC-Mint series), but even this quantity paled in comparison to the San Francisco output of more than 4.5 million halves and the 8.4 million half dollars produced at the Philadelphia Mint. The current example represents the sole use of the obverse — an early strike, with ample evidence of prooflike surfaces. The fields are busy with microscopic lines and a single reeding mark between the knee and star 12. Sharply struck, with nice remaining luster and translucent violet shades at the margins. PCGS# 572239 Base PCGS# 6353

**3974 1877-S WB-104, Die Pair 29, R.3, MS64 PCGS.** Type Two reverse (Closed Bud). Very Small S mintmark. A fully struck, brilliant near-Gem half, although weakness at the eagle's tail feathers is characteristic of the die pair. A faint band of gold toning angles up left-to-right across the eagle's wings and shield. More than 5.3 million pieces were struck, representing the largest Seated half mintage from the San Francisco Mint. Even so, high-quality examples such as this coin are elusive, with just 56 coins in a higher numeric grade at PCGS (5/15). PCGS# 572255 Base PCGS# 6357

**1877-S WB-104, Seated Half, MS65  
Closed Bud Beneath Stem**

**3975 1877-S Closed Bud, Very Small S, WB-104, Die Pair 24, R.3, MS65 PCGS.** The Type II Reverse. Scattered bumps and lines in the obverse shield and a crumbling die at the top edge of the eagle's right (facing) wing are obvious diagnostics for the die pair. More than 5.3 million half dollars were produced at the San Francisco Mint in 1877, and while the current Bugert monograph lists 38 die pairs, many more may exist to accomplish such a large mintage. Sky-blue and peach-gold toning blankets both sides of this fully struck Gem. For so many coins struck, high-grade examples are surprisingly scarce. Population: 34 in 65 (1 in 65+), 22 finer (6/15). PCGS# 572255 Base PCGS# 6357

**3976 1878-CC WB-101, Die Pair 1, R.4, VG10 PCGS. CAC.** A key to the Seated half series in any grade, perhaps only 250 or so examples of this rare Carson City issue survive. Many of the coins are impaired, and attractive representatives are in high demand regardless of grade. The present CAC-endorsed coin is attractive and minimally abraded with only honest wear. Light silver-gray surfaces retain a lively appeal, and the wide rims show no problems whatsoever. Population: 21 in 10, 63 finer (6/15). PCGS# 572257 Base PCGS# 6359

**1881 Half Dollar, MS65+  
Beautifully Toned Both Sides**

**3977 1881 Closed Bud, WB-102, MS65+ NGC.** Sharply struck and original, this high-end Gem 1881 half dollar exhibits vivid two-sided toning that shows deep ocean-blue around the peripheries with violet and orange-gold in the centers. A few small abrasions are well-hidden by the rich patina. This piece shows significant semiprooflike mirroring in the fields which beautifully illuminates the toning. Census: 12 in 65 (3 in 65+, 1 in 65 ★), 13 finer (6/15). PCGS# 572264 Base PCGS# 6363

**PROOF SEATED HALF DOLLARS**

**3978 1860 PR63 PCGS.** This bright, razor-sharp proof shows just a hint of light golden toning over each side, with modest field-motif contrast highlighting the central devices. Faint, scattered hairlines limit the grade, but this remains a pleasing collector-grade proof. From a mintage of just 1,000 pieces. NGC ID# 27TK, PCGS# 6414

**1864 Half, PR64 Cameo  
Exceptional Reflectivity**

**3979 1864 PR64 Cameo PCGS.** Glassy-smooth mirrors display blue and ivory-gold toning with sharp contrast between the frosted devices and the reflective fields. A few delicate field lines are visible with magnification, but the in-hand appearance of this gleaming proof is suggestive of an even higher grade. The strike is razor-sharp. Population: 18 in 64 Cameo, 3 finer (5/15). PCGS# 86418

**1866 Motto Seated Half, PR66  
Only One Finer Example at Either Service**

**3980 1866 Motto PR66 NGC.** Vivid iridescent hues of gunmetal-blue, purple, and sunset-gold gravitate to the margins on each side of this first-year With Motto issue, leaving the centers a soft champagne-gold. Sharply struck and nicely preserved. Certainly one of the finest survivors from a mintage of 725 proofs. Census: 11 in 66 (1 in 66 ★), 1 finer (6/15). Ex: Central States Signature (Heritage, 5/2000), lot 7403; FUN Signature (Heritage, 1/2009), lot 2896; Baltimore Signature (Heritage, 3/2009), lot 2101. NGC ID# 27TZ, PCGS# 6424

- 3981 1872 PR65 NGC.** The proof 1872 half is seldom seen in Gem or better grades. This example is attractively toned in shades of amber-gold, turquoise, and lilac-gray, with modest field-device contrast evident on the obverse. The strike is bold and there are no visual impairments. Census: 12 in 65 (1 in 65+), 12 finer (5/15). NGC ID# 27U7, PCGS# 6430

**1874 Arrows Half Dollar, PR64  
Boldly Mirrored, Pinpoint-Sharp**

- 3982 1874 Arrows PR64 PCGS.** A splash of aquamarine, amber, and light golden toning covers much of the central obverse, while the reverse is awash in dusky tan-gray patina. The strike is bold and the few grade-defining hairlines in the mirrored fields are not apparent to the unaided eye. Representatives grading finer than this piece are seldom seen. Population: 58 in 64, 25 finer (6/15). NGC ID# 27UV, PCGS# 6435

- 3983 1875 PR64 PCGS.** This pale-gold proof displays a sharp strike, with the central devices and the star centers fully developed and only trivial weakness of strike in the eagle's left foot and in the upper hair of Liberty. The brilliant mirrors show reflective flash and provide mild contrast with the minimally toned surfaces. A few trivial hairlines are present, as expected for the grade, and a curving hair-thin scrape extends from the eagle's left wing to the F of HALF. A good candidate for a Choice 19th Century Proof Type Set. Ex: *Atlanta Signature* (Heritage, 8/2001), lot 6219; *FUN Bullet Sale* (Heritage, 1/2002), lot 760; *FUN Signature* (Heritage, 1/2006), lot 2767. NGC ID# 27U9, PCGS# 6436

- 3984 1879 WB-101, PR64 NGC.** The Bland-Allison Act of 1878 shifted emphasis to silver dollars at the Mint, resulting in a low business strike mintage of just 4,800 half dollars and 1,100 proofs in 1879. This example is the Type One variety with a split lower berry, used solely to strike proofs. The coin is sharply struck and appealing, with deep-mirrored surfaces that show just a few delicate lines under magnification. A light-gold patina merges with shades of steel-blue at the borders. NGC ID# 27UE, PCGS# 6440

- 3985 1880 PR64 PCGS. WB-101.** The open bud below the branch confirms the proof-only dies used to strike this issue, with a proof mintage of 1,355 pieces and a limited circulation-strike production of 8,400 pieces. Prooflike business strikes are sometimes confused with proofs, but the current coin is certainly a proof both visually and by die pair. Splendid concentric toning of sea-green, azure-blue, violet, and rich-gold frame the lightly frosted central motifs. The strike is reasonably sharp, while a few minor lines determine the near-Gem grade. Eye appeal is terrific. NGC ID# 27UF, PCGS# 6441

**1880 Half Dollar, Toned PR66**

- 3986 1880 PR66 PCGS.** A deeply mirrored Premium Gem proof with sea-green and umber interiors and brighter rose-gold peripheries. No contact marks are present. The obverse is well-struck, although the reverse shows localized weakness on the eagle's head and left (facing) talons and upper wing edge, as well as on the central shield. Population: 19 in 66 (2 in 66+), 3 finer (6/15). NGC ID# 27UF, PCGS# 6441

**1882 Half Dollar, PR65 Cameo  
Delicate Rose-Gold Toning**

- 3987 1882 PR65 Cameo PCGS.** Very lightly toned, the devices show a considerable amount of mint frost. Set against the deeply reflective fields, this Gem proof 1882 half dollar exhibits modest cameo contrast. This issue had a mintage of 1,100 pieces, but seldom are Cameo representatives encountered at this grade level. Population: 18 in 65 (2 in 65+) Cameo, 11 finer (6/15). PCGS# 86443

**1884 WB-101 Seated Half  
Late-Series Gem Proof**

- 3988 1884 WB-101, PR65 NGC.** Both business strikes and proofs have their proponents among collectors of the late-series (1879-1891), making this run of low-mintage halves an interesting subset. Surviving proofs outnumber business strikes in the higher grades. This example is one of 875 proofs struck, with blue and reddish-gold tones framing silver centers. Deeply mirrored fields surround the boldly struck devices, with slight cloudiness noted on the obverse. A tiny toning spot marks the top of Liberty's gown. Census: 32 in 65, 20 finer (6/15). NGC ID# 27UK, PCGS# 6445

**1885 Half Dollar, PR66  
Old Holder**

- 3989 1885 PR66 NGC.** Rich apple-green margins surround dusky rose-red fields and devices. Well-preserved and sharply struck with undisturbed original toning and attractive eye appeal. Encased in a prior generation holder. One of just 930 proofs issued for this low-mintage date. Census: 20 in 66 (1 in 66 ★), 9 finer (5/15). NGC ID# 27UL, PCGS# 6446

**BARBER HALF DOLLARS**

**1892-S Barber Half Dollar, MS64  
First-Year Branch Mint Issue**

- 3990 1892-S MS64 PCGS.** From a first-year mintage of just over 1 million pieces, the 1892-S Barber half dollar is a rare issue in MS64 condition. This attractive Choice specimen exhibits sharply detailed design elements and lustrous, lightly marked surfaces, under shades of blue, gray, lavender, and greenish-gold toning. Population: 33 in 64 (1 in 64+), 17 finer (5/15). NGC ID# 24LJ, PCGS# 6464

**1893-S Half Dollar, MS62  
Better San Francisco Issue**

- 3991 1893-S MS62 PCGS.** The 1893-S Barber half dollar is a slightly better date, boasting a mintage of only 740,000 coins. This Uncirculated example displays satiny luster beneath a mottled blanket of olive-gold and light gray toning. Well-struck, with grade-consistent abrasions and trivial weakness on the eagle's right (facing) talons. Population: 7 in 62, 45 finer (5/15). NGC ID# 24LM, PCGS# 6467

**1900-S Half Dollar, MS64  
Seldom Seen This Fine**

- 3992 1900-S MS64 PCGS.** The 1900-S Barber half dollar is scarcer in Mint State than would be expected given its mintage of more than 2.5 million pieces. Choice examples are seldom seen and anything finer is rare. This piece is minimally abraded with satiny luster and an iridescent champagne and ice-blue hue. The obverse stars and the eagle's talons are sharp, although a few of the high leaves on the obverse and the eagle's right (facing) shoulder are lacking complete definition. Population: 24 in 64, 11 finer (5/15). NGC ID# 24MB, PCGS# 6488

- 3993 1903-S AU58 PCGS. CAC.** Gold-tinted silver color complements frosty surfaces that show just a hint of high-point rub and scattered minor marks consistent with the grade. Well-struck, save for the right side of the eagle on the reverse. Population: 11 in 58, 64 finer (6/15). NGC ID# 24ML, PCGS# 6497

**1904-S Barber Half Dollar, XF45  
Low-Mintage Better Date**

- 3994 1904-S XF45 PCGS.** From a low mintage of 553,038 pieces, the 1904-S Barber half dollar is especially elusive in high grade. This impressive Choice XF example shows light wear on the well-detailed design elements, but the surfaces are lightly abraded under shades of lavender-gray and amber toning. Population: 14 in 45, 72 finer (6/15). NGC ID# 24MP, PCGS# 6500

- 3995 1907 MS64 NGC. CAC.** Sharply detailed in most areas, this attractive Choice Specimen shows a touch of softness on the shield point. The well-preserved, lightly toned surfaces exhibit vibrant satiny mint luster. Census: 76 in 64 (2 in 64+), 23 finer (6/15). NGC ID# 24MY, PCGS# 6508

**1907-D Half Dollar, MS66**  
Rare This Well-Preserved

**3996 1907-D MS66 NGC.** This is an appealing Premium Gem with golden-brown and iridescent toning over frosty luster on both sides. The strike shows some weakness at the centers, especially on the reverse. This early Denver Mint product has few peers at this grade level. Census: 5 in 66, 3 finer (5/15).  
Ex: *Dallas Signature* (Heritage, 4/2007), lot 805. NGC ID# 24MZ, PCGS# 6509

**3997 1907-O MS64 PCGS. CAC.** This Choice 1907-O representative is uncommonly well-struck, and displays original, softly frosted luster. An overlay of dusky lavender-gray toning is pleasant on the eyes, and effectively masks a few trivial grazes which limit the grade. Population: 43 in 64 (2 in 64+), 22 finer (5/15). NGC ID# 24N2, PCGS# 6510

**3998 1908-O MS64 PCGS.** The 1908-O Barber half dollar is a scarce issue in MS64 condition. This attractive Choice example offers well-detailed design elements and lightly marked surfaces, with satiny mint luster and hints of greenish-gold and lavender toning at the peripheries. Population: 75 in 64, 70 finer (6/15). NGC ID# 24N6, PCGS# 6514

**1909-S Barber Half, Sharply Original MS65**

**3999 1909-S MS65 PCGS.** Silver luster looms boldly beneath an original powder-gray patina across both sides of this Gem San Francisco half. The strike is sharp except on the eagle's right talon and on the arrow fletchings, although the shield corner and wing details are complete. This issue is often overlooked in high Uncirculated grades, yet fewer than two dozen examples are certified any finer by both services combined. PCGS Population: 10 in 65, 15 finer (6/15). NGC ID# 24NA, PCGS# 6518 Base PCGS# 6518

**4000 1911-D MS64 PCGS.** This well-preserved, lightly toned Choice specimen displays a mix of vibrant satiny mint luster and prooflike reflectivity on both sides. The design elements are well-detailed and eye appeal is quite strong. Population: 39 in 64 (2 in 64+), 34 finer (6/15). NGC ID# 24NE, PCGS# 6522

**4001 1912-D MS64 PCGS.** Satiny luster yields champagne and amber-gold hues over each side of this Choice 1912-D half dollar, while Liberty's cheek shows only a few light grazes. The eagle's right (facing) talons and shoulder exhibit the usual softness, but the design elements are otherwise well brought up. This Denver issue is seldom seen finer. Housed in a first generation holder. NGC ID# 24NH, PCGS# 6525

**PROOF BARBER HALF DOLLARS**

**4002 1894 PR64 NGC.** Deeply toned over both sides, with slate-blue color dominating the obverse. The reverse shows multiple hues that include bright teal-green, lavender, and plum. A fully struck, well-preserved example of this third-year Barber proof issue. NGC ID# 24NW, PCGS# 6541

**1899 Barber Half, PR66**  
Undesignated Contrast

**4003 1899 PR66 NGC.** Significant undesignated field-motif contrast appears on both sides of this Premium Gem proof, accentuated by tinges of pale violet toning around portions of the periphery. The strike is fully rendered and the frosty devices are devoid of flaws. Close study with a glass reveals a few trivial lines in the right obverse field. Census: 23 in 66, 12 finer (6/15). NGC ID# 24P3, PCGS# 6546

**1904 Barber Half Dollar, PR66**  
Vivid Multicolor Toning

**4004 1904 PR66 PCGS.** This intricately struck specimen is lavishly toned powder-blue, rose-red, and lime-green. Thorough rotation and evaluation only reveals nearly imperceptible slide marks on the cheek. A prize for the toning enthusiast and one of the best-preserved survivors from a mintage of just 670 proofs. Population: 16 in 66 (1 in 66+), 9 finer (6/15).  
Ex: *Dallas Signature* (Heritage, 10/2006), lot 1246; *Long Beach Signature* (Heritage, 2/2007), lot 3576. NGC ID# 24P8, PCGS# 6551

**1906 Barber Half, All-Brilliant PR66**

**4005 1906 PR66 NGC.** Bright, watery mirrors are completely untuned and even boast a hint of contrast on an issue that normally displays the all-brilliant finish utilized over much of this decade. Examination with a loupe reveals a couple of minor slidemarks on Liberty's cheek. Census: 35 in 66 (1 in 66+, 1 in 66 ★), 24 finer (5/15).  
Ex: *Long Beach Signature* (Heritage, 6/2005), lot 6412. NGC ID# 24PA, PCGS# 6553

**1909 Barber Half, PR66  
Contrasted Obverse**

- 4006 1909 PR66 PCGS. CAC.** This Premium Gem 1909 proof half dollar displays a significant cameo appearance on the obverse, although the reverse contrast is hindered by a blanket of lavender-rose toning. The obverse is more lightly colored in pale champagne hues with hints of ice-blue throughout. The eagle's right (facing) shoulder is a trifle soft, but the motifs are otherwise well-defined and the surfaces are carefully preserved. Population: 21 in 66, 18 finer (5/15). NGC ID# 24PD, PCGS# 6556

**1911 Barber Half, PR66  
Modest Field-Motif Contrast**

- 4007 1911 PR66 PCGS.** The sharply struck devices of this Premium Gem proof Barber half display considerable mint frost, although a Cameo designation is precluded by splashes of sun-gold, lilac-gray, and deeper amber toning on each side. Substantial reflectivity is present in the fields and the preservation is outstanding. Population: 13 in 66 (1 in 66+), 14 finer (5/15). NGC ID# 24PF, PCGS# 6558

**WALKING LIBERTY HALF DOLLARS**

**1916-S Half Dollar, MS64  
Sharp, Rich luster**

- 4008 1916-S MS64 PCGS.** This first-year Walking Liberty half dollar issue had a mintage of only 508,000 coins; survivors grading finer than the present Choice example are scarce. This piece is boldly struck with minimal abrasions for the grade. A blush of light golden toning accents the matte-like luster. NGC ID# 24PN, PCGS# 6568

**1916-S Half Dollar, MS64  
Crisply Struck, Lightly Toned**

- 4009 1916-S MS64 PCGS.** A whisper of soft-gray toning visits the right obverse field, but otherwise first-year San Francisco example is untoned and sharply lustrous. The strike is crisp for the issue, with some thumb and finger detail visible on the branch hand and Liberty's facial details complete. The eagle's plumage shows only slight blending on the trailing leg. A single scrape at Liberty's neckline is visible with a glass, the only mentionable mark of any significance. NGC ID# 24PN, PCGS# 6568

- 4010 1917-D Obverse MS64 PCGS.** This piece is visually impressive for the grade, showing excellent detail throughout Liberty's figure and the eagle's plumage. Both sides exhibit medium gold toning and satiny underlying luster. No major abrasions are present. Finer pieces are scarce. NGC ID# 24PR, PCGS# 6570

**1917-D Half Dollar, Lustrous MS64  
Reverse Mintmark**

- 4011 1917-D Reverse MS64 PCGS.** In 1917, the mintmark on the Walking Liberty half was moved from the obverse above IN GOD WE TRUST to the reverse below the branch near the border. The two varieties are widely collected as separate issues, and the Reverse Mintmark variant is the scarcest in Mint State. This Choice example displays satiny, gold-tinted luster with pleasantly few signs of surface contact. Liberty's head and branch hand show some of the usual striking softness. NGC ID# 24PS, PCGS# 6571

**1917-S Obverse Walker, MS63  
Lightly Toned, Lustrous**

- 4012 1917-S Obverse MS63 NGC.** Considerably scarcer in Mint State than the Reverse Mintmark variety, this lustrous and sharply struck example offers excellent eye appeal for the Select Uncirculated grade. A faint crescent of olive-gold toning occupies the right obverse field, while the remainder of the coin is brilliant and nearly untuned. Strong silver luster throughout accompanies bold detail on the central motifs. Only a few small ticks appear on the high points to determine the grade. NGC ID# 24PT, PCGS# 6572

**4013 1917-S Reverse MS63 PCGS.** Matte-like luster displays soft golden hues on each side of this Select example, and the surfaces are devoid of any major abrasions. Considerable striking deficiency on the central high points likely contributes to the grade. NGC ID# 24PU, PCGS# 6573

**4014 1918 MS64 PCGS.** This Choice 1918 Walker is boldly struck, with satiny nickel-gray luster that exhibits pine-green and amber-gold hues around the margins. A few light ticks on Liberty's leg and on the central eagle limit the numeric grade. NGC ID# 24PV, PCGS# 6574

**4015 1918 MS64 PCGS.** A lustrous, almost white near-Gem Walker, essentially untuned save for a few glimpses of golden-gray at the borders. Sharply struck for the issue. Some thumb detail is visible on the branch hand and the central strike on Liberty and the eagle's trailing leg are far above average. The fields and devices are satin-smooth and nearly mark-free. NGC ID# 24PV, PCGS# 6574

#### 1919 Half Dollar, MS62 Appealing for the Grade

**4016 1919 MS62 NGC.** The 1919 Walking Liberty half is a slightly better date in Mint State, coming from a moderately small mintage of 962,000 coins. This example is Uncirculated, but shows some of the usual striking weakness on Liberty's leg, head, and branch hand. The coin displays soft, satiny luster with just a touch of light golden toning, and is pleasantly free of any major abrasions. NGC ID# 24PY, PCGS# 6577

**4017 1919-D AU50 PCGS.** An attractive AU example of this popular early series issue, with just a touch of actual wear on the well-detailed design elements, and lightly toned surfaces that retain most of their original mint luster and show few signs of contact. NGC ID# 24PZ, PCGS# 6578

#### 1920-S Half Dollar Appealing Near-Gem Example

**4018 1920-S MS64 PCGS.** While readily available in lower grades, the 1920-S is one of the key issues to the early Walker series when Uncirculated. The strike on the present coin is typically soft through the centers, but perhaps a bit better than usually seen. The surfaces are satiny as often encountered, with each side covered in a light, even layer of golden-gray toning. Importantly, there are no significant abrasions on either side of this near-Gem coin.

*Ex: Long Beach Signature (Heritage, 9/2002), lot 7040; Long Beach Signature (Heritage, 2/2003), lot 6947. NGC ID# 24R5, PCGS# 6582*

**4019 1927-S MS62 PCGS.** This satiny Mint State example displays dusky golden-gray toning, with an array of microscopic russet pepper-specks seen when studied with a loupe. Minimally abraded, but showing considerable striking weakness in the centers, as usual. NGC ID# 24RA, PCGS# 6587

**4020 1928-S AU58 PCGS.** This bright, satiny 1928-S half dollar is almost devoid of wear, as much of the weakness on the eagle's central feathers and Liberty's thigh and branch hand is due to strike. For the grade, this is a pleasing example of this better San Francisco issue. NGC ID# 24RB, PCGS# 6588

**4021 1929-D MS64 PCGS.** This frosty 1929-D half dollar displays radiant surfaces with warm champagne toning; a few deeper lilac tinges are also seen around portions of the peripheries. This piece is lightly struck on Liberty's head and branch hand, not uncommon for the issue. NGC ID# 24RC, PCGS# 6589

#### 1929-S Half Dollar, MS65 Seldom Seen Finer

**4022 1929-S MS65 PCGS. CAC.** Gem condition is about as fine as this San Francisco issue is typically seen, as Premium Gems are scarce and are proportionately more costly to acquire. This collector-grade example is well-struck with satiny luster that shows hints of light golden toning. Trivial contact marks on Liberty's thigh and on the high points of the eagle's feathers determine the grade. There are 48 numerically finer coins at PCGS (5/15). NGC ID# 24RD, PCGS# 6590

**4023 1933-S MS63 PCGS.** Bold central definition grants impressive sharpness to Liberty's branch hand and the forward edge of the eagle's right (facing) leg. The surfaces are soft and satiny with amber-gold toning that lightens toward the centers. A few trivial abrasions limit the grade. NGC ID# 24RE, PCGS# 6591

**4024 1933-S MS64 PCGS.** The soft, satiny luster of this golden-gray 1933-S half seems to absorb the few light ticks and grazes that limit the grade, delivering a high degree of eye appeal. Liberty's branch hand is mildly weak. NGC ID# 24RE, PCGS# 6591

**4025 1934-D MS65 PCGS. CAC.** Vibrant, frosty luster accentuates the soft lilac-gray, champagne, and umber toning that grace each side of this Gem 1934-D Walker. Liberty's branch hand is sharply defined, although the head and the upper portion of the date numerals show trivial weakness, not uncommon on this issue. A few insignificant ticks are well-hidden by the patina. NGC ID# 24RG, PCGS# 6593

**4026 1934-S MS65 PCGS.** Satiny and lightly toned in champagne-gray hues, with deeper sun-gold and olive tinges in the recesses on each side. Excellent sharpness is seen along Liberty's figure and branch hand. The 1934-S half dollar is elusive any finer. NGC ID# 24RH, PCGS# 6594

**1935 Walking Liberty Half, MS67  
Mint-Fresh Radiance**

**4027 1935 MS67 PCGS. CAC.** A blazing frost-white glow highlights the impeccably well-preserved surfaces on this Superb Gem Registry coin, while a vibrant cartwheel effect further heightens the visual appeal. Liberty's branch hand shows a touch of the usual striking weakness. This Philadelphia issue is available in lower grades, but advanced collectors will find it challenging to locate another piece of this technical quality. Population: 50 in 67 (5 in 67+), 1 finer (5/15). NGC ID# 24RJ, PCGS# 6595

**4028 1935-D MS65 PCGS. CAC.** The Gem grade level is the finest the 1935-D Walker is usually available, as Premium Gems are scarce. This piece exhibits rich, frosty luster with swirling lavender, sky-blue, and champagne hues over each side. Liberty's branch hand is soft, but the head and leg show pleasing definition. NGC ID# 24RK, PCGS# 6596

**1935-S Walking Liberty Half, MS66  
Few Known Finer**

**4029 1935-S MS66 PCGS. CAC.** Frosty surfaces yield a hint of light golden color on each side of this Premium Gem 1935-S half, while the only grade-limiting flaws are a few insignificant ticks on the high points of Liberty's figure. Some of the usual softness is evident on Liberty's branch hand and the central eagle's feathers. Only three coins are numerically finer at PCGS (5/15). NGC ID# 24RL, PCGS# 6597

**4030 1936-D MS66+ PCGS. CAC.** This Plus-graded Premium Gem with CAC endorsement offers outstanding eye appeal. Light-gold toning with slight russet accents embellish the waves of satiny luster that flow across smooth, minimally marked surfaces. The strike is reasonably bold throughout, with some weakness at Liberty's head and branch hand as often seen. Population: 10 in 66+, 35 finer (5/15). NGC ID# 24RN, PCGS# 6599 Base PCGS# 6599

**4031 1936-S MS66 PCGS.** Beautifully preserved surfaces are aglow with fresh, frosty luster that shows just a hint of light golden color. A few faint grazes along Liberty's leg are not obtrusive. This piece shows partial thumb separation on the branch hand, and is pleasantly well-defined elsewhere, as well. Only 11 coins are numerically finer at PCGS (6/15). NGC ID# 24RP, PCGS# 6600

**4032 1937 MS67 PCGS. CAC.** This spectacular Superb Gem exhibits sharply detailed design elements and impeccably preserved lustrous surfaces, with a few hints of golden-tan toning. PCGS has graded only five numerically finer examples (5/15). NGC ID# 24RR, PCGS# 6601

**4033 1938-D MS65 PCGS. CAC.** Blazing mint luster dominates the silver-white surfaces of this frosty Gem half, the lowest mintage issue of the late series. A few minuscule marks in the right obverse field need mention, but the sharp strike and overall eye appeal are suggestive of an even higher grade. NGC ID# 24RV, PCGS# 6605

**4034 1939-S MS67 NGC.** This magnificent Superb Gem offers impeccably preserved surfaces with vibrant mint luster and a few highlights of pink and pale gold toning. The design elements are well-detailed, with just a touch of the typical softness on Liberty's wreath hand. NGC has graded one numerically finer example (6/15). NGC ID# 24RY, PCGS# 6608

**4035 1939-S MS67 NGC. CAC.** MS67 examples of this San Francisco issue are essentially the finest obtainable by collectors, as anything finer is prohibitively rare. This CAC-approved representative displays frost-white, mint-fresh luster and is seemingly devoid of any noticeable abrasions. Partial thumb separation on Liberty's branch hand further contributes to the visual attributes. Only a single MS68 coin is finer at NGC (5/15). NGC ID# 24RY, PCGS# 6608

**4036 1939-S MS67 PCGS. CAC.** The 1939-S is an available date overall, but this MS67 example is among the finest seen by PCGS (5/15). Both sides show vibrant, frosty luster with just a hint of pastel gold and lavender-blue color seen when tilted beneath a light. Partial thumb separation is evident on Liberty's branch hand. NGC ID# 24RY, PCGS# 6608

**4037 1941-S MS66 PCGS.** The well-preserved brilliant surfaces of this delightful Premium Gem radiate vibrant mint luster on both sides. The design elements are well-detailed, with a touch of the usual softness on Liberty's wreath hand and the eagle's leg. PCGS has graded nine numerically finer examples (6/15). NGC ID# 24S5, PCGS# 6613 Base PCGS# 6613

**4038 1942-D MS67+ NGC. CAC.** This high-end Superb Gem displays vibrant mint luster and sharply detailed design elements on both sides. The impeccably preserved surfaces show a trace of lavender toning and eye appeal is terrific. NGC has graded only six finer examples (6/15). NGC ID# 24S7, PCGS# 6615

**4039 1943 MS67+ NGC. CAC.** Brilliant and superbly frosted, this Plus-graded Registry coin is devoid of any detracting abrasions. Sharp definition on the central eagle's feathers, as well as along the figure of Liberty, heightens the eye appeal. NGC lists only 17 coins finer (6/15). NGC ID# 24S9, PCGS# 6618

**1944-S Half Dollar, MS66+  
Mint-Fresh Luster**

**4040 1944-S MS66+ PCGS. CAC.** Large S mintmark. This blazing 1944-S half is awash in frosty, brilliant luster with the appearance of having just been struck yesterday. A few faint ticks on Liberty's leg are all that preclude a full Superb Gem grade. Liberty's branch hand, as well as the leading edge of the eagle's rear leg, are a trifle soft, as usual. PCGS shows only eight finer representatives (5/15). NGC ID# 24SE, PCGS# 6623 Base PCGS# 6623

**4041 1945 MS67 PCGS. CAC.** A sharply detailed Superb Gem, with definite separation between Liberty's thumb and finger on the wreath hand. This coin displays impeccably preserved surfaces with vibrant mint luster and delicate hints of champagne-gold toning. PCGS has graded no coins in numerically finer grades (6/15). NGC ID# 24SF, PCGS# 6624 Base PCGS# 6624

### 1946-S Half, Delicately Toned MS67

- 4042 1946-S MS67 NGC.** Available in lower grades, the 1946-S Walking Liberty half becomes conditionally rare in MS67, these being the finest-known examples. This piece is graced in satiny champagne luster with hints of pale aqua-green toning throughout. Abrasions are almost nonexistent. Liberty's branch hand is weak, as usual, but there are no other striking deficiencies. Census: 74 in 67 (1 in 67+, 4 in 67 ★), 0 finer (6/15). NGC ID# 24SL, PCGS# 6629

### 1946-S Walker, Frosty MS67 Excellent Luster and Preservation

- 4043 1946-S MS67 NGC.** A beautifully preserved, frosty example with light golden toning and excellent eye appeal. Well-struck design elements include partial thumb separation on Liberty's branch hand. The 1946-S is a plentiful late-series issue overall, causing the scarcity of Superb Gem examples to be overlooked by novices. Census: 74 in 67 (1 in 67+, 4 in 67 ★), 0 finer (6/15). NGC ID# 24SL, PCGS# 6629

## PROOF WALKING LIBERTY HALF DOLLARS

### 1936 Half Dollar, PR65 Key to the Proof Series

- 4044 1936 PR65 PCGS.** A fully struck Gem with consistent light straw-gold toning and exemplary surface preservation. The 1936 proof Walker is key to a complete set of the widely collected proof series. The low mintage was due in part to competition from the plethora of silver commemorative types issued that year. Encapsulated in a green label holder. NGC ID# 27V4, PCGS# 6636

### 1936 Half Dollar, Lightly Toned PR66

- 4045 1936 PR66 PCGS. CAC.** The 1936 is the scarcest issue in the proof Walking Liberty half dollar series, widely sought in high grade. This Premium Gem representative displays light golden toning over sharp, satiny devices and mirrored fields. No contact marks are present, and a few light hairlines are well-hidden beneath the soft patina. PCGS shows 36 numerically finer examples (5/15). NGC ID# 27V4, PCGS# 6636

### 1936 Half Dollar, PR66+ Lightly Toned

- 4046 1936 PR66+ NGC. CAC.** The Plus designation sets this beautifully preserved first-year proof above most other Premium Gems, while the CAC green label confirms the lofty grade. The design elements are boldly rendered, and the glass-like fields are free of noticeable hairlines. Iridescent champagne toning accents each side, yielding to russet and olive around the obverse periphery and pale rose over the upper and lower portions of the reverse. NGC ID# 27V4, PCGS# 6636

- 4047 1937 PR67 PCGS.** This Superb Gem proof Walking Liberty half dollar displays bold design elements and deeply mirrored, untuned fields. The satiny motifs deliver a subtle cameo appearance, but the contrast is not stark enough to warrant the appropriate designation. This piece is second to only 10 PR68 examples at PCGS (5/15). NGC ID# 27V5, PCGS# 6637

- 4048 1938 PR67+ NGC.** This gleaming proof is fully struck with ample reflectivity in the fields. Lemon-gold and lavender-tan toning effectively masks any faint hairlines that might occur in the mirrors. Seldom seen finer. NGC ID# 27V6, PCGS# 6638

- 4049 1941 PR67+ NGC. CAC.** Deep olive-gold and apricot peripheral toning surrounds lighter champagne and mint-gold hues in the centers of this reflective and boldly struck Superb Gem proof. The Plus designation confirms the outstanding preservation. NGC ID# 24SP, PCGS# 6641

### 1941 Half Dollar, Lightly Toned PR68

**4050 1941 PR68 NGC. CAC.** Available in most grades, the proof 1941 Walking Liberty half dollar becomes conditionally rare in PR68, and is almost unknown finer. This gleaming representative displays fully struck, satiny design elements amid a blanket of warm golden toning that reveals flashes of rainbow color in the margins when tilted beneath a light. Census: 83 in 68 (18 in 68 ★, 1 in 68+★), 1 finer (5/15). NGC ID# 24SP, PCGS# 6641

**4051 1942 PR68 NGC.** Attractive shades of pale gold and cerulean-blue toning visit the impeccably preserved surfaces of this magnificent PR68 specimen. Fully struck design elements and deeply mirrored fields add to the incredible eye appeal. NGC has graded five numerically finer examples (6/15). NGC ID# 27V9, PCGS# 6642

**4052 1942 PR68 NGC.** A stunning Superb Gem, this 1942 Walker is fully brilliant and untuned with a hint of contrast between the satin devices and deeply mirrored fields. The 1942 was the final proof Walker and boasts with the highest mintage of the seven proof issues, an ideal candidate for type collectors.  
*Ex: New York Signature (Heritage, 12/2011), lot 3910.* NGC ID# 27V9, PCGS# 6642

### FRANKLIN HALF DOLLARS

**4053 1950 MS66+ Full Bell Lines PCGS. CAC.** Frosty mint luster resides beneath a light golden veil on each side of this Registry-grade 1950 Franklin, while the lower obverse periphery also exhibits a crescent of deep amber and russet toning. Sharply struck, with only 10 coins finer at PCGS (5/15). NGC ID# 24SW, PCGS# 86656 Base PCGS# 86656

**4054 1951 MS66+ Full Bell Lines PCGS. CAC.** This is an intensely lustrous, Registry-grade example of this conditionally elusive Franklin half dollar. The interiors display ice-blue and pale champagne hues, while the peripheries exhibit tinges of deeper amber-gold color. Boldly struck and beautifully preserved; much of the faint "chatter" on Franklin's cheek and the Liberty Bell is mint-made, caused by pieces of metal debris in the recesses of the die. PCGS shows only three finer examples (5/15). NGC ID# 24SY, PCGS# 86658 Base PCGS# 86658

**4055 1953 MS66 Full Bell Lines PCGS. CAC.** This is a pleasantly sharp and notably well-preserved Registry-grade example, among the finest Full Bell Lines coins seen by either PCGS or NGC. Both sides display frosty gold-tinted luster with deeper russet overtones in the margins. A Registry Set essential. Population: 47 in 66 (3 in 66+) Full Bell Lines, 0 finer (6/15). NGC ID# 24T6, PCGS# 86664 Base PCGS# 86664

**4056 1954-S MS67 PCGS.** A vibrant Registry-grade example, this Superb Gem 1954-S Franklin half is tied with five others as the finest non-Full Bell Lines example at PCGS (5/15). The preservation is outstanding, accentuated by olive-gold and umber toning that grace the frosty surfaces. The bell lines show nearly full delineation. NGC ID# 24TB, PCGS# 6669 Base PCGS# 6669

**4057 1960 MS66 Full Bell Lines PCGS.** The 1960 Franklin half dollar is scarce in Premium Gem condition, and Full Bell Lines examples are particularly so. This piece is sharply struck and lustrous with an overlay of mottled olive, gold, and amber toning on the obverse and lighter lavender-gold hues on the reverse. Population: 55 in 66 (2 in 66+) Full Bell Lines, 0 finer (6/15). NGC ID# 24TL, PCGS# 86678 Base PCGS# 86678

### PROOF FRANKLIN HALF DOLLARS

**4058 1950 PR65 Cameo NGC.** An affordable Cameo example of this inaugural proof Franklin half dollar issue. The strike is fully rendered and the fields exhibit a seemingly infinite depth of mirroring in stark contrast to the frosty devices. A few stray hairlines define the grade. NGC ID# 27VA, PCGS# 86691

**4059 1951 PR67 PCGS. CAC.** The brilliant surfaces of this spectacular Superb Gem are impeccably preserved and the design elements are fully struck, with deeply mirrored fields and outstanding eye appeal. PCGS has graded only two numerically finer examples (6/15). NGC ID# 27VB, PCGS# 6692

### 1951 Franklin Half, Seldom-Seen PR67 Cameo

**4060 1951 PR67 Cameo PCGS.** Few examples of this early proof Franklin half issue can combine the pristine preservation and sufficient field-device contrast necessary to attain the PR67 Cameo designation this coin has. The surfaces are untuned with high field reflectivity and a nice layer of mint frost on the devices. PCGS reports only 21 submissions in this grade with none finer (5/15). NGC ID# 27VB, PCGS# 86692

**4061 1956 Type Two PR69 Ultra Cameo NGC.** The Type Two is common among proof Franklin halves, though PR69 Ultra Cameo survivors are anything but. The frost over the devices stands out, though a tiny break is noted in Franklin's trailing hair. Census: 85 in 69 Ultra Cameo, 0 finer (6/15). NGC ID# 24TW, PCGS# 96697

**4062 1958 PR67 ★ Ultra Cameo NGC.** This magnificent Superb Gem displays fully struck design elements with a rich coat of mint frost that creates intense cameo contrast with the deeply mirrored fields. The brilliant surfaces are impeccably preserved and eye appeal is terrific. Census: 16 in 67 Ultra Cameo (2 in 67 ★ Ultra Cameo), 14 finer (6/15). NGC ID# 27VH, PCGS# 96699

**4063 1960 PR68 Ultra Cameo NGC.** This magnificent specimen exhibits virtually flawless brilliant surfaces and fully struck, frosty design elements that contrast profoundly with the deeply mirrored fields. Eye appeal is simply incredible. Census: 71 in 68 Ultra Cameo (1 in 68 ★ Ultra Cameo), 6 finer (6/15). NGC ID# 24TY, PCGS# 96701

### PROOF KENNEDY HALF DOLLARS

**4064 1964 Accented Hair, FS-401, PR68 Cameo NGC.** Type One Reverse. The briefly coined Accented Hair subtype is found only on a small portion of proof 1964 half dollars. This well struck specimen appears as made aside from a few minute freckles on tan toning on the lower reverse. PCGS# 145626 Base PCGS# 86801

**1976-S Kennedy Half, PR70 Deep Cameo  
Two-Year Bicentennial Clad Issue**

- 4065** 1976-S Clad PR70 Deep Cameo PCGS. From a mintage of just over 7 million pieces, the copper-nickel clad proof 1976-S Kennedy half dollars were actually struck over the course of two years with the bicentennial reverse, as there were no 1975 dated examples struck. This magnificent specimen offers technically perfect surfaces, with deeply mirrored fields that contrast profoundly with the fully struck frosty devices. Population: 67 in 70 Deep Cameo, (6/15). NGC ID# 27WP, PCGS# 96811

- 4066** 1976-S Silver PR70 Deep Cameo PCGS. This silver Bicentennial issue is seldom seen in the perfect PR70 Deep Cameo grade. This Registry-quality coin exhibits perfect, brilliant surfaces with frost-white devices and glass-black mirroring in the fields. NGC ID# 27WR, PCGS# 96812

**EARLY DOLLARS**

**1795 Flowing Hair Dollar, B-9, BB-13, Fine 12  
Head of '94, Rare Clashed Die State**

- 4067** 1795 Flowing Hair, Two Leaves, B-9, BB-13, R.4, Fine 12 PCGS. Die State II, heavily clashed. BB-13 is a scarce Head of '94 variety, almost always seen only in lower grades; no Mint State examples are currently known. Moreover, the present example is in a rare late die state, with bold clash marks from the wreath and eagle impressed into the obverse fields all around the portrait. The coin is evenly circulated and displays uniform gunmetal-gray patina. Some detail remains in the eagle's feathers and in Liberty's hair curls. Close study with a loupe finds a faint scattering of tiny specks on each side, not obvious to the unaided eye. PCGS# 39980 Base PCGS# 6853

- 4068** 1795 Flowing Hair, Two Leaves, B-1, BB-21, R.2 — Plugged, Altered Surfaces — ANACS. VG10 Details. A still-pleasing Two Leaves type coin for the budget-conscious collector, with complete border dentils and boldly outlined central devices that retain some interior detail. Expertly plugged at 12 o'clock on the obverse, with the evidence barely discernible under a loupe. The surfaces are lightly smoothed, with even gunmetal-blue patina. PCGS# 39986 Base PCGS# 6853

- 4069** 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1 — Holed, Plugged — PCGS Genuine. Fine Details. No plug is readily apparent, but within the date, the loop of the 9 and the flag of the 5 are re-engraved. The obverse field is smoothed near the bust tip and profile. The chestnut-gold and pearl-gray surfaces are lightly abraded overall. PCGS# 39977 Base PCGS# 6852

- 4070** 1795 Draped Bust, Centered, B-15, BB-52, R.2, VF20 PCGS. Die State IV. This is an evenly struck, sharply detailed example, with pleasing olive and battleship-gray hues over each side. The Damage noted by PCGS is seen as just a couple small scratches near the reverse rim at 7 o'clock, hardly an obtrusive imperfection. PCGS# 39995 Base PCGS# 6858

**1795 Draped Bust, Centered Dollar, VF35  
Available B-15, BB-52 Variety**

- 4071** 1795 Draped Bust, Centered, B-15, BB-52, R.2, VF35 ANACS. Bowers Die State IV, showing a small die break on the leaf below (O)F and a triangular die break in Liberty's hair with a knifelike extension on the top. The Draped Bust, Centered variety is second in availability only to the ubiquitous B-5, BB-27 Flowing Hair dollar — fortunate for collectors who wish to obtain one of each of these important early types. The rose-gold surfaces of this piece still show some muted luster amid the expected signs of contact and moderate wear. A few spots of darker toning cluster closer to the rims. PCGS# 39995 Base PCGS# 6858

**1795 B-15, BB-52 Draped Bust Dollar  
Centered Bust, XF Details**

- 4072** 1795 Draped Bust, Centered, B-15, BB-52, R.2 — Cleaning — PCGS Genuine. XF Details. Bowers Die State IV. This first-year Draped Bust dollar displays minimally abraded and moderately granular olive-gold and steel-gray surfaces. Traces of luster emerge from protected regions. The die state is slightly earlier than usual, since the triangular break in the hair is only tenuously connected with the adjacent slender vertical break. PCGS# 39995 Base PCGS# 6858

**1796 Draped Bust Dollar, Fine 12  
B-5, BB-65, Large Date, Small Letters**

- 4073** 1796 Large Date, Small Letters, B-5, BB-65, R.2, Fine 12 NGC. A large die lump, or cud, attaches I and C in AMERICA, identifying this coin as a representative of the BB-65 variety, the only Large Date, Small Letters variety of the year. The size of the lump indicates this specimen is from the very scarce Die State IV. The devices show even wear and the deep battleship-gray surfaces are smooth and lightly abraded. A tiny obverse rim bruise is detected at 11 o'clock.  
Ex: Central States Signature (Heritage, 4/2011), lot 3818. PCGS# 40002 Base PCGS# 6861

**1796 Dollar, B-1, BB-66, VG10  
Consistent Light Gray Color**

- 4074** 1796 Small Date, Small Letters, B-1, BB-66, R.4, VG10 PCGS. A collector-grade example of this scarce variety, this BB-66 representative is well-circulated, but retains a bold outline around the central devices and displays pleasing battleship-gray patina. The obverse borders are strong, although the reverse rim grows a little weak above OF. No adjustment marks are present and the eye appeal is pleasing for the grade. PCGS# 39999 Base PCGS# 6859

**1797 B-3, BB-71 Dollar, XF Sharpness**

- 4075** 1797 10x6 Stars, Large Letters, B-3, BB-71, R.2 — Smoothed. PCGS Genuine. XF Details. Bowers Die State III, showing the usually seen lapping on Liberty's highest hair curl and the edges of the palm leaf below the last A in AMERICA on the reverse. The interiors of each side of this piece have been smoothed in an attempt to diminish the severity of scattered scrapes and abrasions on both sides. A coin that should be seen in hand (as should all coins, for that matter), but one which still retains essential appeal for the many early dollar enthusiasts. A good amount of detail and collectibility remain.

**1797 Dollar, 9x7 Stars, Fine 15  
B-1, BB-73**

- 4076** 1797 9x7 Stars, Large Letters, B-1, BB-73, R.3 Fine 15 NGC. Die State IV. The Draped Bust dollars of 1797 are more available than the tiny mintage of 7,776 pieces would suggest, but only three die varieties are known for the date, which seems to confirm a limited production. The present coin retains more detail on the central devices than expected, and the surfaces are smooth except for a few reverse streaks in the planchet, near the bottom. The 9x7 obverse star arrangement, with the large letters in the reverse legend, identifies the BB-73 variety.  
Ex: ANA Signature (Heritage, 3/2011), lot 4467. PCGS# 40003 Base PCGS# 6863

- 4077** 1798 Large Eagle, Knob 9, 5 Vertical Lines, B-4, BB-92, R.4, Fine 12 PCGS. Blended caramel-gold and cream-gray toning graces this evenly circulated Heraldic Eagle dollar. No abrasions merit mention, although portions of the reverse rim grow weak. Star 4 on the obverse is recut on this scarce variety.  
Ex: FUN Signature (Heritage, 1/2011), lot 3944. PCGS# 40010 Base PCGS# 6874

- 4078** 1798 Large Eagle, Pointed 9, Wide Date, B-23, BB-105, R.3, VF30 NGC. Deep sea-green, rose-red, and gunmetal-blue toning embraces this pleasing midgrade Heraldic Eagle dollar. Marks are minor aside from a small obverse rim nick at 5 o'clock and a pair of thin lines near the final obverse stars. PCGS# 40022 Base PCGS# 6877

- 4079** 1798 Large Eagle, Pointed 9, 10 Arrows, B-13, BB-108, R.2, VG10 NGC. Bowers Die State II. and Butter-gold and gunmetal-blue shades visit this minimally abraded and microgranular type representative. Wear is even aside from soft definition on a pair of stars above the eagle's beak. PCGS# 40025 Base PCGS# 6876

**1798 Large Eagle, Pointed 9 Dollar, AU Details  
B-27, BB-113 Example**

- 4080** 1798 Large Eagle, Pointed 9, Close Date, B-27, BB-113, R.2 — NGC Details. AU. Bowers Die State III. Subjected to a light cleaning long ago, the coin has recovered to some extent with a trace of faint, golden-tan toning across the obverse and at the reverse margin. A few adjustment marks obscure two or three of the field stars above the eagle's head. Elsewhere, AU details remain with a hint of silver luster. PCGS# 40030 Base PCGS# 6873

- 4081** 1798 Large Eagle, Pointed 9, Close Date, B-31, BB-115, R.4 — Improperly Cleaned — NGC Details. VF. Die State IV, extensively cracked. This BB-115 example shows bright, slate-gray surfaces with tinges of russet, pine-green, and amber toning along the lower-right obverse and upper-right reverse borders. An old, vertical scratch appears in the right obverse field near Liberty's profile. This piece is well-detailed and shows strong borders, although the usual weakness is seen over the upper-right reverse stars and clouds. PCGS# 40032 Base PCGS# 6873

**1798 Large Eagle Dollar, XF40  
B-25, BB-123, Close Date**

- 4082** 1798 Large Eagle, Pointed 9, Close Date, B-25, BB-123, R.4, XF40 ANACS. Die State II, a rare early die state before the obverse cracks around the periphery but after the reverse cracks from the branch stem to the rim. This piece displays mottled gunmetal and battleship-gray patina with overtones of olive and gold. Well-struck without obvious adjustment marks, and showing light wear over the high points of the devices. PCGS# 40040 Base PCGS# 6873

- 4083** 1798 Large Eagle, Pointed 9, Four Berries, B-8, BB-125, R.2, VF20 ANACS. Bowers Die State II. Splashes of golden-brown and forest-green dominate the borders, but the remainder of the coin is mostly pearl-white. Smooth for the grade despite a couple of tiny rim bumps. Moderate parallel adjustment marks (as coined) cross the back of Liberty's neck.

*Ex: Tampa FUN Signature (Heritage, 1/2011), lot 3935, which realized \$1,610. PCGS# 40042 Base PCGS# 6873*

- 4084** 1798 Large Eagle, Pointed 9, Four Berries, B-8, BB-125, R.2 — Cleaning — PCGS Genuine. XF Details. Bowers Die State II to III. Some, but not all, of the cracks and clashes described in Die State III are apparent. A richly detailed and somewhat glossy charcoal-gray example. Marks are unusually absent, and only a faint thin line east of the arrowheads merits mention. PCGS# 40042 Base PCGS# 6873

- 4085** 1799 7x6 Stars, B-19, BB-155, R.4, Good 6 PCGS. CAC. Bowers Die State IV. Most examples of the scarce Bolender-19 variety belong to this late die state, which exhibits pronounced buckling on the left obverse field. Gunmetal and olive-green fields contrast with cream-gray high points. All legends are clear except for E PLURIBUS UNUM. The centers display moderate marks. PCGS# 40047 Base PCGS# 6878

- 4086** 1799 7x6 Stars, B-12, BB-160, R.3, VF20 PCGS. Bowers Die State III. Medium caramel-gold and stone-gray toning encompasses this problem-free Very Fine Draped Bust dollar. All letters in E PLURIBUS UNUM are at least partly present. PCGS# 40051 Base PCGS# 6878

**1799 Draped Bust Dollar, XF40  
B-17, BB-164**

- 4087** 1799 7x6 Stars, B-17, BB-164, R.2, XF40 NGC. Die State III, cracked peripherally on the reverse. This briefly circulated Large Eagle type coin displays mottled patina of gunmetal-gray, olive, and dusky-gold, with strong detail on the central devices and complete dentils around the borders. No adjustment marks are observed, and an old dig in the field below Liberty's chin is the only surface flaw of note. Housed in a prior generation holder. PCGS# 40055 Base PCGS# 6878

- 4088** 1799 7x6 Stars, B-8, BB-165, R.3, VF35 ANACS. Bowers Die State III. Gunmetal-gray and chestnut-gold embrace this refreshingly unabraded Choice VF early dollar. Several stars above the eagle are softly brought up, but the remainder of the strike is consistent. PCGS# 40056 Base PCGS# 6878

- 4089** 1799 7x6 Stars, B-9, BB-166, R.1, Fine 12 PCGS. Die State V. A blatantly original circulation cameo, this mid-grade 1799 dollar displays deep olive-gray and iridescent hues in the fields, with lighter tan-gray color over the relief elements. Evenly worn and problem-free. This is an outstanding coin for the grade, ideal for the collector who appreciates old-time patina. PCGS# 40057 Base PCGS# 6878

**1799 Draped Bust Dollar, XF40  
7x6 Stars, B-9, BB-166**

- 4090** 1799 7x6 Stars, B-9, BB-166, R.1, XF40 NGC. Traces of prooflikeness remain despite a scattering of small abrasions across the surfaces of this essentially untoned early dollar. The rims and dentils are bold, although the reverse is slightly off-center to the northeast, where the dentils are narrow and the dentilation to the southwest is extremely wide. Some mint luster remains. A tiny vertical die crack below the base of the 1 in the date and the beginnings of a diagnostic "apostrophe" crack following the second S in STATES help identify the variety. PCGS# 40057 Base PCGS# 6878

- 4091** 1799 7x6 Stars, B-14, BB-167, R.3, Fine 15 NGC. Die State III. This lightly abraded Draped Bust dollar possesses deep olive-brown and gunmetal-gray toning, save for lighter gray color on the highpoints of the portrait. Glimpses of charcoal debris outline design elements. One tiny obverse rim nick is seen at 12 o'clock. *Ex: Long Beach Signature (Heritage, 9/2005), lot 3673; FUN Signature (Heritage, 1/2011), lot 3951. PCGS# 40058 Base PCGS# 6878*

- 4092** 1801 B-3, BB-213, R.3, VF20 ANACS. Bowers Die State III. Stone-gray, straw-gold, and charcoal toning encompass this Very Fine Draped Bust type coin. Marks are confined to a single hair-thin line below the hair ribbon. The surfaces show occasional granularity, particularly on the reverse near 6 o'clock. PCGS# 40085 Base PCGS# 6893

- 4093 1802 Narrow Date, B-6, BB-241, R.1 — Altered Surfaces — PCGS Genuine. VF Details.** Die State III, obverse lapped. This is a moderately well-detailed piece, with irregular lilac-gray and olive-tan patina. A mint-made grease mark is struck into the surface from star 7 to the ribbon. This piece shows mild smoothing of the fields, likely an attempt to soften abrasions. PCGS# 40088 Base PCGS# 6895

**1802 Dollar, B-6, BB-241, XF40  
Pleasing Original Patina**

- 4094 1802 Narrow Date, B-6, BB-241, R.1, XF40 ANACS.** Die State I, perfect obverse. An excellent Draped Bust type coin, this 1802 dollar is impressively sharp for the grade, with original olive-brown toning over portions of the battleship-gray surfaces. The strike is even and well-executed and there are no obvious adjustment marks. The reverse rim shows a few light bumps, located at 11, 1, and 6 o'clock. A notably pleasing example for the grade. PCGS# 40088 Base PCGS# 6895

- 4095 1803 Large 3, B-6, BB-255, R.2, Fine 12 ANACS.** Die State III. A delightfully original circulation cameo, this mid-grade BB-255 representative combines affordability with a degree of eye appeal that is seldom seen in lower grades. Tan-gray on the relief elements, the surfaces deepen to lavender-gray in the fields where the obverse also shows a rich overlay of gunmetal-blue patina. PCGS# 40101 Base PCGS# 6901

- 4096 1803 Large 3, B-6, BB-255, R.2, VF20 ANACS.** Die State III. The 3 in the date is lightly recut on this variety. The present example is well-detailed, with subtly iridescent lilac-gray and warm golden toning. No adjustment marks are observed and an old tick below Liberty's ear is the only mentionable surface flaw. The fields are minutely reflective when tilted against a light source. PCGS# 40101 Base PCGS# 6901

**SEATED DOLLARS**

- 4097 1840 AU55 NGC.** Briefly circulation, this bright, steel-gray type coin shows sharp detail on the design elements with noticeable semiprooflike mirroring in the protected regions of the fields. Traces of light golden toning accentuate the peripheries. NGC ID# 24YA, PCGS# 6926
- 4098 1844 AU50 NGC.** Liberty's shield is die doubled, diagnostic for the circulation strike 1844 Seated dollars. All 20,000 examples were minted from a single die pair. This pleasing AU example retains glimmers of luster about the stars and letters. Light wheat-gold and ice-blue toning embraces moderately marked surfaces. NGC ID# 24YE, PCGS# 6930
- 4099 1847 AU58 NGC.** Sharp detail confirms the near-Mint grade of this No Motto type coin, while deep gunmetal-gray, russet, and olive-brown toning encompasses each side, masking any minor abrasions. Hints of semiprooflike mirroring are seen when tilted beneath a light. NGC ID# 24YJ, PCGS# 6934
- 4100 1847 AU58 PCGS.** A sharp and appealing near-Mint example, with light, silver-gray surfaces and a strong strike. Faint golden mint luster remains beneath the original patina. This Philadelphia issue is a popular date for type with one of the higher Seated dollar mintages of the 1840s (140,750 pieces). A few tiny rim nicks are the only marks needing mention. NGC ID# 24YJ, PCGS# 6934

**1850-O Seated Dollar, AU50  
Scarest O-Mint Issue in the Series**

- 4101 1850-O AU50 PCGS.** The 1850-O is one of only four issues in the Seated Liberty dollar series from New Orleans, and it is the scarcest of these; circulated examples are infrequently encountered, and Mint State coins are genuinely rare and out of reach for most collectors. This About Uncirculated piece retains semiprooflike mirroring in portions of the fields, despite minor high-point wear on the devices. Tinges of blue and amber peripheral toning accent the warm sun-gold interiors. Population: 27 in 50, 42 finer (5/15). NGC ID# 24YN, PCGS# 6938

- 4102 1859-O MS60 PCGS.** An undeniably Mint State example, this 1859-O Seated Liberty dollar displays fresh, frosty devices set against mirrored fields that show just a touch of light golden toning. Well-struck, with scattered abrasions pursuant to the grade. Housed in a first generation holder. NGC ID# 24YY, PCGS# 6947

- 4103 1860 AU53 PCGS.** While its New Orleans counterpart is readily available, the 1860 Seated dollar is notably scarce in the AU and Mint State grade range. This briefly circulated piece shows steel-gray patina with just a hint of gold. A deeper toning streak stretches across the reverse horizontally from 8 to 4 o'clock. Well-detailed, with some semiprooflike mirroring surviving in the protected regions of the fields. NGC ID# 24Z2, PCGS# 6949

- 4104 1863 AU53 PCGS.** A popular Civil War date, collectible in circulated grades but scarce in Mint State. This About Uncirculated piece is well-detailed, with gold-tinted steel-gray patina. Hints of semiprooflike mirroring remain in the protected regions of the fields. Population: 10 in 53, 74 finer (6/15). NGC ID# 24Z6, PCGS# 6953

- 4105 1871-CC — Graffiti — PCGS Genuine. VG Details.** The 1871-CC has the lowest mintage of any Carson City dollar. A meager 1,376 pieces were struck. Although a number of first-year 1870-CC dollars were set aside as symbols of local pride, the 1871-CC was little-saved and is rare regardless of condition. The present cream-gray and straw-gold example is moderately glossy and has the name "John" faintly entered vertically on the left and right obverse field. The date and mintmark are bold. NGC ID# 24ZH, PCGS# 6967

- 4106 1872-S — Improperly Cleaned — NGC Details. AU.** This briefly circulated example is generally attractive, but has the lower right obverse field has a moderately granular area of dove-gray toning. Graffiti, consisting of three small initials, is noted on the left portion of the scroll. The 1872-S is the only collectible San Francisco Motto issue, but the low mintage of 9,000 pieces ensures its scarcity. NGC ID# 24ZL, PCGS# 6970

## PROOF SEATED DOLLARS

### 1860 Silver Dollar, PR63 Collectible Proof Seated Dollar

- 4107 1860 PR63 PCGS.** This is a moderately affordable proof Seated dollar that showcases fully rendered design elements and impressively deep mirrors in the fields. Light, scattered hairlines limit the grade, but are not obvious to the unaided eye and their impact is further lessened by a touch of light golden toning that appears over each side. A hint of field-motif contrast is not quite bold enough to warrant a Cameo designation. Population: 39 in 63, 54 finer (5/15). NGC ID# 252E, PCGS# 7003

### 1864 Seated Dollar, PR63 Challenging in Proof Format

- 4108 1864 PR63 PCGS.** Modest field-motif contrast is observed on this Select proof, while the design elements are boldly rendered and each side displays just a blush lavender-gold toning that deepens to amber and blue around the peripheries. The 1864 Seated dollar is seldom seen in proof format, as this issue had a mintage of only 470 pieces. A few stray lines are all that limit the grade on this piece. NGC ID# 252J, PCGS# 7007

### 1870 Seated Dollar, Sharply Struck PR63

- 4109 1870 PR63 PCGS.** The 1870 proof Seated dollar is more difficult to locate than its 1,000-piece mintage might suggest. Reddish-gold surfaces exhibit sharply impressed design features on this Select example, and bright mirrors flash strongly beneath the toning. This is quite a nice looking piece for the grade designation. NGC ID# 252S, PCGS# 7018

## TRADE DOLLARS

### 1873-CC Trade Dollar, Unc Details Semiprooflike Obverse

- 4110 1873-CC — Reverse Scratched — NGC Details. Unc.** This inaugural Trade dollar issue at the Carson City Mint had a production of only 124,500 coins, few of which survive in high grade. This unworn example shows dusky champagne toning over both sides with semiprooflike mirroring in the obverse fields. The design elements are well-struck and there are no obvious abrasions, save for a hair-thin scratch in the right reverse field. NGC ID# 252X, PCGS# 7032

### 1873-S Trade Dollar, MS63 Shimmering Luster

- 4111 1873-S MS63 PCGS.** Medium S. The 1873-S Trade dollar is an elusive date in Mint State. This issue was extensively used in the Oriental trade, as many examples are known with the tell-tale chop marks. This Uncirculated piece displays softly frosted luster with just a hint of light golden toning overall. The stars and Liberty's head are well-defined, although striking weakness is seen on the eagle's right (facing) leg and to a lesser extent on Liberty's central gown folds. Population: 27 in 63, 29 finer (5/15). NGC ID# 252Y, PCGS# 7033

- 4112 1874-CC AU58 PCGS.** Micro CC. A nicely struck and nearly brilliant Carson City representative. Flashy luster dominates protected areas. The obverse field displays a smattering of wispy marks, characteristic of a brief stint in Old West commerce. NGC ID# 2532, PCGS# 7035

- 4113 1874-S MS63 NGC.** Large S. Cartwheel luster sweeps this lightly abraded and attractive San Francisco Trade dollar. Blushes of blue-green and tan-brown toning overlie cream-gray surfaces. One small spot atop the I in FINE. Census: 30 in 63, 20 finer (6/15). NGC ID# 2533, PCGS# 7036

- 4114 1875-S Type One Reverse MS63 PCGS.** Ex: Col. Green, Eric P. Newman. Large S. Lavender, cobalt-blue, and orange-red patina encompasses this Select Trade dollar type coin. The strike is crisp and the surfaces are refreshingly free from marks. PCGS# 510101 Base PCGS# 7039

**1875-S Trade Dollar, Near-Gem  
Rich Original Patina**

**4115** 1875-S Type One Reverse MS64 NGC. Large S. Peach-gold and dove-gray shades alternate across this coruscating and minimally marked near-Gem. The strike is good, although Liberty's curls and the eagle's right (facing) leg lack a full impression. Numerous spindly die cracks across the margins provide additional interest. PCGS# 510101 Base PCGS# 7039

**4116** 1876-S Type One Obverse, Type One Reverse, MS61 NGC. Large S. A hint of golden patina visits the margins, but this satiny Trade dollar type coin is mostly brilliant. The strike is good, the reverse is carefully preserved, and the obverse field displays distributed small abrasions. PCGS# 40114 Base PCGS# 7043

**PROOF TRADE DOLLARS**

**4117** 1873 — Stained — NGC Details. Proof. The fields and devices appear undisturbed beneath the deep blanket of steel-gray and tan-brown toning. The strike is crisp overall, but incomplete on the eagle's right (facing) claw. A scant 865 proofs were produced. NGC ID# 27YJ, PCGS# 7053

**1873 Trade Dollar, PR62 Cameo  
First Year of the Series**

**4118** 1873 PR62 Cameo PCGS. The Trade dollar was introduced in 1873, and a nominal proof mintage of 865 pieces was accomplished. This attractive specimen is sharply detailed on the obverse, but a touch of the typical softness shows on the eagle's leg on the reverse. The design elements are richly frosted and show bold cameo contrast with the mirrored fields. A few minor hairlines explain the grade. Population: 11 in 62 Cameo, 36 finer (5/15). PCGS# 87053

**4119** 1875 PR62 PCGS. Type One Reverse. This brilliant proof Trade dollar exhibits obvious cameo contrast, but is undesignated as such due to its green label holder. The fields exhibit wispy hairlines, and thin marks are noted near the ER in AMERICA.  
*Ex: Denver Signature (Heritage, 8/2006), lot 3782; Long Beach Signature (Heritage, 2/2013), lot 3631, which realized \$2,702.50.* NGC ID# 27YL, PCGS# 7055

**1878 Trade Dollar, PR64 Cameo  
Elusive So Contrasted**

**4120** 1878 PR64 Cameo PCGS. Only 900 Trade dollars were struck at the Philadelphia Mint in 1878, all in proof format. This attractive Choice specimen is sharply detailed throughout, with richly frosted devices that contrast intensely with the deeply mirrored fields. A few hints of golden-tan toning enhance the outstanding eye appeal. Population: 26 in 64 Cameo, 13 finer (5/15). PCGS# 87058

**4121** 1879 PR62 NGC. A coin with tremendous eye appeal, this bright 1879 proof Trade dollar remains mostly untuned, save for traces of dusky gold. Subtle field-motif contrast is evident on the reverse and the devices display a sharp strike overall. Surface marks appear, primarily on the reverse under the eagle's wings. NGC ID# 27YR, PCGS# 7059

**4122** 1880 PR62 PCGS. A gleaming brilliant proof, this 1880 Trade dollar is untuned and modestly contrasted on each side. Liberty's head and the adjacent stars are incomplete, although the strike is otherwise well-executed. Scattered hairlines limit the grade. NGC ID# 27YS, PCGS# 7060

**1880 Trade Dollar, PR63 Ultra Cameo  
Bold Field-Motif Contrast**

**4123** 1880 PR63 Ultra Cameo NGC. An ambitious mintage of 1,987 proofs was an attempt by the Mint to capitalize on speculation in proof-only Trade dollars that was popular in 1880 — a record proof production for the denomination. Most of the mintage still exists today. Despite the availability, Ultra Cameo proofs are rare. This example displays strong contrast between the frosted motifs and deep-mirrored fields. A thin veil of ivory-gold patina provides nice eye appeal. A scattering of field lines — particularly beneath Liberty's outstretched branch hand — determines the Select Proof grade. Census: 2 in 63 Ultra Cameo, 6 finer (6/15). PCGS# 97060

**1881 Trade Dollar, PR63 Cameo  
Toned and Contrasted Surfaces**

- 4124 1881 PR63 Cameo PCGS.** While the “regular” proof-only Trade dollar series would last a couple of more years, this palindromic proof-only issue would amount to only 960 proofs. The surfaces are considerably contrasted on each side, with silver-gray ceding to aqua at the obverse rims, while the reverse features more golden hues in the center. A well-struck and pleasing coin for the grade.  
Ex: Long Beach Signature (Heritage, 9/2011), lot 4148. PCGS# 87061

**1882 Trade Dollar, Toned PR64  
One-Sided Cameo**

- 4125 1882 PR64 PCGS.** The proof 1882 Trade dollar, struck to the extent of 1,097 coins, supplemented 1,100 proof Morgan dollars of this same year. The similarity of the mintage figures suggests that contemporary collectors likely sought an example of each type for their collections, a practice that continued through 1883, when the Trade dollar was officially discontinued. This Choice example is deeply mirrored and boldly struck. The reverse glistens with a light golden hue and boasts stark cameo contrast, although the obverse is more deeply toned in deep blue and sea-green hues with proportionately impeded contrast. A few stray hairlines are hidden by the rich patina. NGC ID# 27YU, PCGS# 7062

**1882 Trade Dollar, PR64  
Pleasing for the Grade**

- 4126 1882 PR64 PCGS.** A collectible example of this proof-only Trade dollar issue, ideal for the date collector on a budget. This piece shows boldly rendered, frosty devices with mark-free, deeply mirrored fields. A dusky lavender-gray and champagne-gold glaze blankets the obverse, while the reverse shows deeper amber-gold and violet hues. A long, thread-like strike-through stretches from Liberty's right (facing) shoulder to the drapery near the same hand. Any faint hairlines in the fields are well-masked by the patina. NGC ID# 27YU, PCGS# 7062

**1882 Trade Dollar, PR63 Deep Cameo  
Brilliant With Thickly Frosted Devices**

- 4127 1882 PR63 Deep Cameo PCGS.** While 1882 Trade dollars are frequently encountered, few are seen with the profound contrast between fields and devices noted on this coin. The brilliant surfaces certainly help, but the mirroring is remarkable, as is the heavy mint frost seen on the devices. The strike is bold overall, but light hairlines appear under a loupe. Population: 15 in 63 (2 in 63+) Deep Cameo, 37 finer (5/15). PCGS# 97062

- 4128 1883 PR60 NGC.** The 1883 is the final regular issue proof Trade dollar. This lower-grade example is sharply detailed with bright, untuned mirrors. Scattered hairlines define the grade, but no detracting contact marks are present. NGC ID# 27YV, PCGS# 7063

**MODERN ISSUES**

- 4129 2008-W Jackson's Liberty Half-Ounce Gold Ten Dollar NGC.** Listed as number 58 in Garrett and Schechter's *100 Greatest U.S. Modern Coins*, the obverse of the 2008-W Jackson First Spouse ten dollar coin features the portrait of Liberty from the Capped Bust half dollar series because Andrew Jackson was not married during the term of his presidency. This technically perfect example, from an Uncirculated mintage of 4,754 pieces, is fully struck and lustrous, with outstanding visual appeal. NGC ID# 28ZY, PCGS# 395700

**MODERN BULLION COINS**

- 4130 1995-W Gold Eagle Set PR70 Ultra Cameo NGC.** The set includes the tenth-ounce \$5, quarter-ounce \$10, half-ounce \$25, and one-ounce \$50. Each coin is individually certified as the highest obtainable grade. The four pieces are fully struck and immaculate with outstanding contrast between the glassy fields and the radiant motifs. (Total: 4 coins)
- 4131 1999-W Quarter-Ounce Gold Eagle, Unfinished Proof Dies, FS-401, MS69 NGC.** Struck with West Point dies that lacked the final proof finish typically imparted on them. This nearly perfect example is sharp and radiant with original golden luster. A popular *Guide Book* variety. NGC ID# 26MG, PCGS# 99942
- 4132 1999-W Quarter-Ounce Gold Eagle, Unfinished Proof Dies, FS-401, MS69 PCGS.** The inadvertent usage of West Point proof dies for a run of regular 1999 quarter-ounce Gold Eagle coinage resulted in this popular *Guide Book* variety. This example is sharply struck and radiant, with nearly perfect surfaces. NGC ID# 26MG, PCGS# 99942
- 4133 1999-W Quarter-Ounce Gold Eagle, Unfinished Proof Dies, FS-401, MS69 PCGS.** Radiant golden luster and fully struck design elements are the hallmarks of this piece, while the surfaces show almost perfect condition. This variety is the product of an unfinished West Point proof die pair being used for regular coinage. All normal issues from the West Point facility were strictly in proof format. NGC ID# 26MG, PCGS# 99942
- 4134 1999-W Quarter-Ounce Gold Eagle, Unfinished Proof Dies, FS-401, MS69 NGC.** Fully rendered and almost perfectly preserved, with exceptional eye appeal and luster. Struck with a West Point proof die pair before the final stage of the proofing process was applied to the faces. NGC ID# 26MG, PCGS# 99942

**4135 1999-W Quarter-Ounce Gold Eagle, Unfinished Proof Dies, FS-401, MS69 NGC.** Exceptional quality modern issue gold coins, such as this highly lustrous yellow specimen, combine the challenge of a specialized collection with a long-term investment in gold bullion, the best of both worlds. NGC and PCGS have combined to grade just 38 finer MS70 specimens (5/15). NGC ID# 26MG, PCGS# 99942

**4136 1999-W Quarter-Ounce Gold Eagle, Unfinished Proof Dies, FS-401, MS69 NGC.** This is a fully struck, radiant example of this highly popular *Guide Book* variety. A single, microscopic tick below Liberty's left (facing) breast appears to be the only imperfection, mentioned only for accuracy. NGC ID# 26MG, PCGS# 99942

**4137 2000 Silver Eagle MS70 ANACS.** A scarcely seen perfect example of the 2000 Silver Eagle, fully struck and technically pristine in every regard. Brilliant, frost-white luster illuminates each side. For perspective, NGC has certified only a couple hundred examples of this date as MS70, and PCGS has seen just two such coins (6/15). NGC ID# 26JZ, PCGS# 9949

**4138 Four-Piece 2004-W Platinum Eagle Proof Set.** The set includes the one-ounce \$100, half-ounce \$50, quarter-ounce \$25, and tenth-ounce \$10 denominations. All four coins are fully struck and immaculate with exemplary white-on-black contrast. A single-year reverse design type. The lot is accompanied by the blue cardboard box, blue presentation holder, and certificate of authenticity, as issued.

**4139 2008-W Quarter-Ounce Gold Eagle, Early Releases, MS70 NGC.** This impressively eye-appealing example is tack-sharp and perfectly preserved, with frosty, mint-fresh luster. From the first issuance of this 8,883-coin mintage at the West Point Mint. PCGS# 393065 Base PCGS# 393064

**4140 2008-W Quarter-Ounce Gold Buffalo, First Strike, MS70 PCGS.** One of the most popular bullion issues from the United States Mint, the quarter-ounce gold Buffalo faithfully reproduces James Earle Fraser's majestic Type One nickel design. This 2008-W representative is fully rendered and technically perfect. PCGS# 399929

**4141 2008-W Quarter-Ounce Gold Buffalo, Early Releases, MS70 NGC.** From a mintage of just 9,949 pieces, this fully struck, perfectly preserved ten dollar gold Buffalo delivers unsurpassed eye appeal and technical quality. One of only a limited number of Early Releases representatives. PCGS# 399929

**4142 2008-W Quarter-Ounce Gold Buffalo, PR70 Ultra Cameo NGC.** A beautiful, perfectly preserved Ultra Cameo proof, this quarter-ounce Gold Buffalo is fully rendered and magnificently depicts Fraser's iconic design. From a mintage of 13,125 pieces. PCGS# 399934

**4143 2008-W Quarter-Ounce Gold Buffalo, PR70 Deep Cameo PCGS.** A glittering proof, this boldly rendered and eye-catching gold Buffalo displays stark field-motif contrast with unsurpassable technical quality. Struck at the West Point Mint, from a mintage of 18,884 proofs. PCGS# 399934

**4144 2008-W Quarter-Ounce Gold Buffalo PR70 Ultra Cameo NGC.** A technically perfect example of this iconic bullion coin, from a mintage of 13,125 pieces. This coin displays fully detailed, richly frosted design elements that stand out dramatically against the reflective orange-peel fields. PCGS# 399934

**4145 2008-W Quarter-Ounce Gold Buffalo, First Strike, PR70 Ultra Cameo NGC.** From the earliest striking period of this popular quarter-ounce Gold Buffalo proof. This piece is fully struck and starkly contrasted, with flawlessly preserved surfaces. Only 13,125 proofs were struck in total. PCGS# 399935

**4146 2008-W Quarter-Ounce Gold Buffalo, Early Releases, PR70 Ultra Cameo NGC.** From the earliest releases of the 13,125-coin proof mintage of the 2008-W ten dollar Gold Buffalo. This piece is razor-sharp and perfectly preserved, with unimprovable cameo contrast. PCGS# 399935

**4147 2008-W Half-Ounce Gold Buffalo, MS70 NGC.** A fully rendered, as-struck beauty with shimmering yellow-gold luster and a commanding visual impression. A West Point Mint product with a mintage of only 16,908 pieces. PCGS# 399930

**4148 2008-W Half-Ounce Gold Buffalo, Early Releases, MS70 NGC.** A sharp, frosty example, perfectly preserved and unsurpassed in terms of eye appeal. From the earliest releases of the low 16,908-coin mintage at the West Point Mint. PCGS# 399931

**4149 2008-W Half-Ounce Gold Buffalo, PR70 Deep Cameo PCGS.** The proof 2008-W half-ounce Gold Buffalo is scarcer than the burnished issue of this same date and mint, struck to the limited extent of 12,169 pieces. This perfectly preserved example is fully struck and beautifully contrasted. PCGS# 399936

---

#### 2008-W Half-Ounce Gold Buffalo, PR70 Ultra Cameo

**4150 2008-W Half-Ounce Gold Buffalo, Early Releases, PR70 Ultra Cameo NGC.** The 2008-W half-ounce fractional equivalent to the one-ounce gold Buffalo and its quarter-ounce and tenth-ounce siblings have proven quite popular on the secondary market, as they continue to this day to be one-offs in the series. The sandy tan-gold color and design of this coin combine for compelling eye appeal. In an NGC Early Releases holder. PCGS# 399937

**4151 Four-Piece 2008-W Gold Buffalo Set MS70 NGC.** The set consists of a tenth-ounce \$5, quarter-ounce \$10, half-ounce \$25, and one-ounce \$50. The four coins are separately housed in identically and ideally graded holders. The fully struck quartet is pristine and exhibits vibrant satin sheen. (Total: 4 coins) PCGS# 400037

**4152 2008-W One-Ounce Gold Buffalo, PR69 Deep Cameo PCGS.** The one-ounce 2008-W Gold Buffalo was produced in both proof and burnished formats. This example of the former is virtually perfect in terms of both technical and aesthetic merit. An eye-catching alternative to more traditional bullion acquisitions. PCGS# 393329

---

#### 2008-W One-Ounce Gold Buffalo Pristine PR70 Ultra Cameo

**4153 2008-W One-Ounce Gold Buffalo PR70 Ultra Cameo NGC.** Optimal contrast is provided between the rugged, deep brownish-gold devices with thick mint frost, against the textured reflectivity of the lighter golden-yellow field on each side of this pristine one-ounce proof Buffalo. The 2008-W Buffalo gold pieces produced a sensation when they were launched together with their fractional equivalents in smaller sizes in this year. PCGS# 393329

---

**2008-W One-Ounce Gold Buffalo  
Superb PR70 Deep Cameo**

- 4154 2008-W One-Ounce Gold Buffalo PR70 Deep Cameo PCGS.** The proof 2008-W Gold Buffalo fifty dollar piece boasts the lowest proof mintage of the series up to that point, coming in at just 18,863 pieces. A little more than 9,000 burnished examples were also struck at the West Point Mint in 2008, but these are collected as a separate issue. This Superb proof is starkly contrasted and fully struck, with seemingly perfect surfaces. PCGS# 393329

- 4155 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 PCGS.** A beautiful representation of Saint-Gaudens' majestic double eagle design, struck on a small-diameter, thick planchet reminiscent of the similarly sized twenty dollar pattern of 1907. This piece is perfectly preserved with semiprooflike surfaces. NGC ID# 26S4, PCGS# 407404

**2009 Ultra High Relief One-Ounce Gold Twenty  
Mercanti Signature Insert, MS70 Prooflike**

- 4156 2009 One-Ounce Gold Ultra High Relief Twenty Dollar, Mercanti Signature Insert, MS70 Prooflike PCGS.** This glittering prooflike example is perfectly preserved, and exhibits a beautiful high relief representation of Augustus Saint-Gaudens' legendary portrayal of Liberty and the bald eagle. Housed in a PCGS holder with an insert signed by John M. Mercanti, the 12th Chief Engraver of the United States Mint. PCGS# 506602

**COINS OF HAWAII**

- 4157 1883 Hawaii Quarter MS66 PCGS. CAC.** Glowing luster emanates from both sides of this Premium Gem, which is covered with a medley of aqua-green, lavender, and silver-gray patination. A few minor luster grazes in the left obverse field preclude an even higher grade. A beautiful and popular Hawaii quarter. Population: 98 in 66 (2 in 66+), 17 finer (5/15).  
*Ex: Dallas Signature (Heritage, 11/2006), lot 1800; Long Beach Signature (Heritage, 2/2007), lot 6296. PCGS# 10987*

- 4158 20-Piece Lot of Love's Biscuit & Bread Co. Tokens, Honolulu. Medcalf 2TB-15.** This uncertified lot includes twenty examples of the octagonal, aluminum, 26 mm six cent variety. The tokens are AU to Uncirculated with light to medium silver-gray and straw-gold toning. A small cardboard box, printed with the Love's Biscuit & Bread Co. logotype, accompanies the lot. Founded in 1851, Love's Bakery remains in business today as the "largest wholesale baker of freshly baked bread, buns, and pies in Hawaii." M. 2TB-15 is listed in the 1990 edition of Medcalf at \$150 in XF.

**WORLD**

**Saudi Arabia 4 Pounds, MS62  
Struck at Philadelphia Mint**

- 4159 (1945-1946) Saudi Arabia, Abd al-Aziz bin Sa'ud, Gold 4 Pounds MS62 NGC. KM-34.** A Philadelphia Mint issue struck to pay the Saudi Arabia government for oil rights. The gold weight is equivalent to four British sovereigns. The seal of the Philadelphia Mint dominates the obverse, and the reverse displays the weight and fineness. A nicely struck and satiny representative that displays the expected number of minor to moderate field marks. AGW 0.9419 oz

**CERTIFIED MODERN PROOF SET**

- 4160 Five-Piece 1941 Proof Set NGC.** The five coins are individually encapsulated in holders with consecutive certification IDs. The set includes: **cent PR64 Red NGC**, flashy sun-gold surfaces, small flecks on the right obverse field; **nickel PR66 NGC**, light gunmetal and apricot toning; **dime PR65 NGC**, sharply struck, light streaks of gray toning; **quarter PR66 NGC**, ideal save for traces of translucent residue on the obverse at 3 and 9 o'clock; and a **No "AW" half dollar PR65 NGC**, fully struck, dappled green and gold toning, the designer's monogram was lapped away during die preparation. (Total: 5 coins)

**MINT SETS**

- 4161 Unopened 1952 Double Mint Set.** The outer manila envelope is sealed, and postmarked April 3, 1953, at Washington, D.C. Its cancelled 18 cent stamp is intact. The never-opened set includes 30 coins, a double PDS set of the cent, nickel, dime, quarter, and half dollar denominations. (Total: 30 coins)
- 4162 Unopened 1952 Double Mint Set.** The outer manila mailing envelope was postmarked on April 3, 1953, in Washington, D.C. The 18 cent stamp is cancelled and intact. Never opened, the double PDS mint set contains 30 coins. (Total: 30 coins)
- 4163 Unopened 1953 Double Mint Set.** This 1953 PDS double mint set has never been opened and remains housed in the original cardboard holders. This set contains 30 coins. The outer sealed manila envelope was postmarked March 5, 1954, at Washington, D.C., and retains its cancelled 18 cent stamp. (Total: 30 coins)

## ERRORS

1888 Liberty Nickel, XF40  
Obverse Struck Through Object

- 4164** 1888 Liberty Nickel — Obverse Struck Through Object — XF40 PCGS. A thin object with a dual central perforation, approximately 16 mm in diameter, rested between the obverse die and the obverse of the present coin during its strike. The object, probably a clothing button, overlapped the upper right quadrant of the obverse, and extended to the center. The reverse has a normal appearance. Toned cream-gray with charcoal patina in design recesses.

1917-D Dime, MS65 Full Bands  
Broadstruck Better Date

- 4165** 1917-D Mercury Dime — Broadstruck — MS65 Full Bands NGC. A nearly oval-shaped example with a broad, indistinct rim between 12 and 6 o'clock, widest at 3:30. Only a trace of reeding is apparent, near the obverse rim at 8 o'clock. The motifs are fully struck. The right-side legends show minor distortion, caused by unimpeded peripheral metal flow. Lustrous and beautifully preserved with light green-gold and cream-gray toning. The '17-D is a much better date in the present quality.

1899-S Barber Half, MS62  
Partial Collar Strike

- 4166** 1899-S Barber Half Dollar — Partial Collar Strike — MS62 PCGS. The collar die was only partly employed when the present Barber half was coined. On the reverse border, reeding is barely present near 9 o'clock, and is essentially complete near 2 o'clock. The obverse rim is much wider at 8 o'clock than at 2 o'clock. Lightly toned and satiny with unblemished surfaces. The fletchings and shield tips are well struck.

1921-S Morgan Dollar, MS65  
Partial Collar, Fully Struck Wreath

- 4167** 1921-S Morgan Dollar — Partial Collar — MS65 NGC. Designated on the NGC insert as a broadstrike, but partial reeding is apparent on the edge, most apparent when viewed from the reverse near 3 and 9 o'clock. The collar die was partially deployed above the anvil (reverse) die. The rim is broad near 11 o'clock and very thin near 5:30. Due to the mint error, the strike is intricate on the wreath, highly unusual for a 1921-S dollar. Lustrous and well preserved with light powder-blue and chestnut toning.

1974 Ike Dollar, MS64  
Struck Through Duct Tape

- 4168** 1974 Eisenhower Dollar — Obverse Struck Through Duct Tape — MS64 PCGS. A thick strip of duct tape, approximately 10 mm x 5 mm, was struck into the obverse between 7 and 8 o'clock. On most struck-through mint errors, the foreign object dislodged and no longer accompanies the coin. But on the present piece, the duct tape remains affixed, increasing its value and interest. Lustrous and well struck with light almond-gold and silver-gray toning. Minor marks on Ike's jaw and upper neck determine the grade.

## ALASKA TOKENS

- 4169** (1935) Complete Eight-Piece Alaska Bingle Set MS61 to MS63 NGC. Gould-Bressett 4 through 11. During the Great Depression, struggling Midwestern farmers were relocated by the Federal government to Matanuska Valley, Alaska. They received Alaska Rural Rehabilitation Corporation tokens, which could be redeemed in government-run stores. This moderately abraded set contains all eight "bingle" denominations, and includes: cent MS63 NGC; five cent MS62 NGC; ten cent MS61 NGC; 25 cent MS62 NGC; 50 cent MS62 NGC; one dollar MS63 NGC; five dollar MS63 NGC; and ten dollar MS62 NGC. (Total: 8 coins)

## GSA DOLLARS

- 4170** 1880/79-CC Reverse of 1878, VAM-4, GSA, MS64 NGC. A Top 100 Variety. VAM-4 is the most prominent overdate of the Morgan dollar series, and its obsolete reverse provides further interest. Light to medium tan-gold toning accompanies this lustrous and well struck example. The fields are smooth and the cheek shows wispy marks. The GSA box and certificate are present. PCGS# 518922 Base PCGS# 407108

**4171 1880-CC GSA MS65 NGC. VAM-3.** Light chestnut-gold toning graces this lustrous Carson City Gem. Exceptionally nice for the designated grade, with Liberty's cheek particularly smooth. The strike is good although slightly incomplete at the centers. VAM-3 is distinguished by die crumbling atop the O in DOLLAR. No box or certificate included. PCGS# 518851 Base PCGS# 407100

**4172 1882-CC GSA MS66 NGC.** This vibrant 1882-CC Morgan is certified in its original GSA hard plastic holder, with frosty luster and boldly rendered design elements. Traces of light golden toning appear occasionally over the surfaces. Lightly double-clashed on each side. PCGS# 518866 Base PCGS# 407134

**4173 1884-CC GSA MS66 NGC.** The 1884-CC Morgan was one of the most well-represented Carson City issues in the GSA sales of the early 1970s, and is ideal for the collector seeking a single coin from this mint in an original GSA holder. This Premium Gem delivers in terms of both vibrancy and sharpness, illuminated by frost-white, delicately preserved luster. Brilliant and eye-appealing. PCGS# 518872 Base PCGS# 407152

**4174 1884-CC GSA MS66 NGC.** A brilliant, frosty Premium Gem example of this available Carson City Morgan dollar, accentuated by bold design elements and a touch of semiprooflike mirroring in the reverse fields. A couple faint grazes on Liberty's cheek are all that limit the grade. Housed in its original GSA hard plastic holder. PCGS# 518872 Base PCGS# 407152

**4175 1884-CC GSA MS66 NGC. VAM-6.** The 18 is lightly doubled, as is the left C in the mintmark. Highly lustrous and essentially brilliant with a bold strike and outstanding eye appeal. The cardboard box and certificate of GSA issue accompany the lot, although the box has separated into two halves. PCGS# 518872 Base PCGS# 407152

**4176 1885-CC GSA MS65 NGC. VAM-2A.** Faint gold patina graces this lustrous, nicely struck, and carefully preserved Carson City dollar. The cheek exhibits a subtle streak of gray toning. Among the lowest mintage Morgan issues. VAMworld.com describes VAM-2A as a "Clashed die with faint partial incuse n of In from reverse showing next to Liberty head neck." The GSA box and certificate accompany the lot. PCGS# 518875 Base PCGS# 407160

**4177 1885-CC GSA MS65+ PCGS. VAM-2A.** The die crack of VAM-2B is present but in its nascent stage. The low mintage '85-CC is much scarcer than its '84-CC predecessor. This nicely struck and lustrous Gem is beautifully preserved and displays light wheat-gold toning. The certificate and black cardboard box of GSA issue accompany the lot. PCGS# 518875 Base PCGS# 407160

#### 1890-CC Silver Dollar, MS61 Original GSA Holder

**4178 1890-CC GSA MS61 NGC.** A brilliant, frosty example of this popular Carson City issue, housed in its original hard plastic GSA holder. Scattered abrasions, primarily on the obverse, define the grade, while sharply struck design elements boost the eye appeal. Aside from the 1889-CC, 1892-CC, and 1893-CC which were represented by just a single coin each, the 1890-CC had the smallest presence of any Carson City Morgan in the GSA sales, with a total of only 3,949 pieces distributed. PCGS# 518878 Base PCGS# 407198

#### 1891-CC Morgan, MS62 GSA Hoard Coin

**4179 1891-CC GSA MS62 NGC.** The 1891-CC Morgan is among the Carson City issues which were not well-represented in the GSA sales; only 5,687 pieces were distributed, or about .3 percent of the original 1.6 million-coin mintage. As a result, there is substantial demand for 1891-CC dollars still housed in their original GSA plastic, as is the present example. This piece is well-struck, with frosty, brilliant luster. Scattered abrasions are restricted to the obverse. PCGS# 518881 Base PCGS# 407206

#### 1891-CC GSA Dollar, MS62 VAM-3, 'Spitting Eagle'

**4180 1891-CC GSA MS62 NGC. VAM-3.** A Top 100 Variety. The popular "Spitting Eagle" variety. VAM-3 is fairly prevalent among Uncirculated '91-CC dollars, but the issue is very scarce in a GSA holder. A lustrous and nearly brilliant silver dollar that has a sharp strike and pleasing eye appeal for the third party grade. The box and certificates of GSA issue accompany the lot. PCGS# 518881 Base PCGS# 407206

#### 1891-CC GSA Dollar, MS62

**4181 1891-CC GSA MS62 NGC.** Light wheat-gold toning adorns the central obverse, but the reverse is virtually brilliant. Lustrous and nicely struck. The cheek is typically abraded. Scarce in a GSA holder, relative to the plentiful 1880-CC through 1885-CC issues. Accompanied by its GSA-issued box and certificate. PCGS# 518881 Base PCGS# 407206

**4182 1903-O GSA MS63 NGC.** Wisps of tan toning deny full brilliance, but this well struck New Orleans dollar displays potent luster. Smooth aside from a solitary tick on the cheek. The 1903-O is rarely encountered in a black GSA holder. The NGC Census shows only 39 such pieces in all grades. An additional 56 examples are certified by NGC in the soft pack GSA format. PCGS# 417286

### End of Session Two

## SESSION THREE

### MORGAN DOLLARS

- 4183 1878 8TF Alligator Eye, VAM-14.1A, MS65 PCGS.** Light olive-gold toning adorns this thoroughly lustrous and boldly struck Gem. The fields are well preserved and the portrait displays only wispy marks. The usual clashed die state. Population: 8 in 65, 0 finer (5/15). PCGS# 133796 Base PCGS# 7072
- 4184 1878 8TF Broken R&B, VAM-21, MS65 PCGS.** Significant doubling is seen in the reverse peripheral legends, and the R and B in PLURIBUS have broken bases on the obverse. This Gem example is well-struck with semiprooflike mirroring in the fields, primarily on the reverse. Deep golden peripheral toning appears on each side, while the centers are brilliant. Population for VAM-21: 11 in 65, 1 finer (6/15). PCGS# 133822 Base PCGS# 7072
- 4185 1878 7/8TF 7/4 Strong, VAM-37, MS65 NGC.** VAM-37 is moderately available in the absolute sense, but Gem examples are scarcely seen. As a date, the 1878 7/8 tailfeathers Morgan is genuinely rare finer than the present MS65 example. This piece shows brilliant, frosty centers with amber and aquamarine around the peripheries. There are no significant abrasions, although we note striking weakness on the eagle's breast and the hair above Liberty's ear. All Strong 7/8 tailfeathers varieties included, NGC has seen only five numerically finer pieces (6/15). PCGS# 134034 Base PCGS# 7078
- 4186 1878 7/8TF Triple Blossoms, VAM-44, VF25 PCGS.** A Top 100 Variety. VAM-44 is a 7/8 tailfeather die pairing that shows bold tripling on the obverse, particularly on the leaves and cotton bolls. VAMworld.com suggests only about 70 examples are known in all grades and many enthusiasts consider this variety the "King of VAMs." This piece is evenly worn with steel-gray surfaces that show hints of lavender throughout. PCGS# 133829 Base PCGS# 7070
- 4187 1878 Reverse of 1878, Tripled Eye, VAM-166, AU50 PCGS.** A Hit List 40 Variety. A correctly attributed example of this scarce VAM; E PLURIBUS UNUM shows the appropriate abnormalities and the 1 in the date is notched at the top right corner; the reverse shows the diagnostic die line extending toward the top arrow from the eagle's talon. This piece is brilliant with grade-consistent wear and scattered abrasions, but retains semiprooflike mirroring in the protected regions of the fields. PCGS# 134045 Base PCGS# 7074

1878-CC Morgan Dollar, MS66  
Conditionally Rare Any Finer

- 4188 1878-CC MS66 NGC.** After the Trade Dollar passed into history, the Carson City Mint turned much of its attention to the new Morgan Dollar. The premier issue from this fabled frontier Mint, the 1878-CC was produced to the extent of 2.2 million coins. This is a respectable total for a CC-mint issue of this type, but the '78-CC is not as common as one might assume. Nonetheless, enough coins survive in the lower Mint State grades to satisfy most collectors. It is above the Gem threshold that the 1878-CC shows its true condition rarity. This is a simply beautiful coin whose lightly toned surfaces shimmer with frosty luster. The strike is full in all areas, and the surfaces are as smooth as one should expect for the MS66 level. We anticipate spirited competition when this coin crosses the auction block. NGC has graded nine numerically finer examples (6/15). NGC ID# 253M, PCGS# 7080

- 4189 1878-CC Lines in Wing, VAM-11, MS65 ANACS.** A Top 100 Variety. Numerous bold die lines within the eagle's wings identify this popular and distinctive first-year Carson City Morgan dollar VAM. Well struck and flashy with a glimpse of peripheral golden patina. PCGS# 133843 Base PCGS# 7080
- 4190 1878-S MS66+ NGC.** Premium Gems are the finest examples of the 1878-S Morgan that are typically available, as MS67 examples are conditionally scarce. This Plus-designated MS66 coin is fully struck and beautifully preserved — Liberty's cheek is particularly clean. Traces of light golden toning accentuate the semiprooflike mirroring in the fields. NGC lists 34 finer examples (6/15). NGC ID# 253R, PCGS# 7082
- 4191 1879-S Reverse of 1878, VAM-43, MS64 NGC.** A Top 100 Variety. The scarce obsolete reverse subtype with a parallel feather atop the fletchings. Diagonal die lines below the 1 in the date and on the right (facing) wing identify the specific VAM pairing. Brilliant and lustrous with a well preserved obverse and moderate bagmarks on the reverse field. PCGS# 133864 Base PCGS# 7094
- 4192 1879-S MS66 Deep Mirror Prooflike NGC.** Reverse of 1879. Liberty's portrait stands out from the mirrored fields as if extra-dimensional, while the sharp strike defines intricate detail in the hair and adornments. The eagle is full-feathered and the talons fully defined. Brilliant and untoned, this Premium Gem appears Mint-fresh virtually unscathed. Census: 30 in 66 Deep Mirror Prooflike, 2 finer (6/15). NGC ID# 253X, PCGS# 97093
- 4193 1880 MS66 PCGS.** With none certified finer (5/15), Premium Gem 1880 Morgan dollars are in high demand among series collectors. This piece is well-preserved and frosty, with sea-green, blue, and lavender-gray toning encompassing much of each side; the reverse also exhibits hints of pale gold in the peripheral recesses. Trivial striking softness is seen on the eagle's breast and the hair immediately above Liberty's ear. NGC ID# 253Y, PCGS# 7096
- 4194 1880/79-CC Reverse of 1878, VAM-4, MS64 PCGS.** A Top 100 Variety. A less often seen Reverse of 1878 variety, VAM-4 shows a dramatic overdate, with an underlying 79 clearly evident within the loops of the 80 in the date. This piece is boldly struck, with brilliant frosty mint luster as is a hallmark of Carson City dollars from this year. A few light grazes on Liberty's cheek and in the adjacent field limit the grade. PCGS# 133876 Base PCGS# 7108
- 4195 1880-CC MS65 PCGS.** An intensely frosted and well-preserved Carson City Morgan, showing a few wisps of tan-gold toning over otherwise ice-white luster. The strike is slightly soft on the eagle's breast and the hair above Liberty's ear, although the eye appeal is hardly impeded. NGC ID# 2542, PCGS# 7100
- 4196 1880-CC MS65 PCGS.** A frosty, untuned Gem example pedigreed to the GSA sales of the early 1970s. A few minor grazes do not detract and the fields show modest semiprooflike reflectivity. Well-struck and visually pleasing. NGC ID# 2542, PCGS# 7100
- 4197 1880-CC MS65 PCGS. CAC. VAM-3.** Dash under 8. The vivid multicolor toning that blankets much of the obverse of this Gem 1880-CC Morgan effectively masks a few faint grazes on Liberty's cheek — the only grade-limiting factor on this coin. The remainder of the obverse and the entire reverse show just a touch of light golden color. This piece is well-struck, with frosty mint luster. NGC ID# 2542, PCGS# 7100
- 4198 1880-CC MS66 PCGS.** Thick, frosty luster circulates boldly beneath virtually unmarked surfaces of this Premium Gem dollar. A few light luster grazes and a small contact at E of ONE are the only signs of coin-to-coin contact. The strike is sharp but not full, with slight blending of hair strands above the ear. A dash below the second 8 will be of interest to VAM enthusiasts. PCGS has certified 31 numerically finer pieces (5/15). NGC ID# 2542, PCGS# 7100

**4199 1880-CC MS66 PCGS. VAM-3.** This well struck and lightly patinated Carson City dollar offers dazzling luster and uncommonly smooth surfaces. Many similar pieces emerged from the GSA auctions of the 1970s, although the pedigree of the present coin is unknown. NGC ID# 2542, PCGS# 7100

**4200 1880-CC MS66 PCGS. VAM-3.** Light straw-gold toning visits this highly lustrous and impressively unabraded Carson City Morgan. The hair above the ear lacks absolute detail, but the strike is generally bold. NGC ID# 2542, PCGS# 7100

**1880-CC Dollar, MS66+  
Elusive Any Finer**

**4201 1880-CC MS66+ PCGS. VAM-9.** Frosty surfaces yield just a hint of light golden toning around the outer peripheries, while the interiors are essentially brilliant. The design elements are boldly rendered and there are no detracting abrasions. The 1880-CC Morgan is available in Premium Gem condition, but finer pieces become scarce. NGC ID# 2542, PCGS# 7100

**1880-CC Silver Dollar, MS66+  
CAC-Endorsed Quality**

**4202 1880-CC MS66+ PCGS. CAC. VAM-8.** Dash under 8, dots in mintmark. The thickly frosted surfaces of this high-end Premium Gem are devoid of any distracting abrasions, and the originality is confirmed by a light golden glow that accentuates each side. Trivial striking softness is noted on the eagle's breast and the hair above Liberty's ear. PCGS lists 31 finer representatives (5/15). NGC ID# 2542, PCGS# 7100

**1880-CC Morgan Dollar, MS66 Prooflike  
Bold Cameo Contrast**

**4203 1880-CC MS66 Prooflike NGC. VAM-3.** Dash under 8. The 1880-CC is seldom seen in this high of a grade with prooflike fields. The present example displays stark white-on-black cameo contrast with just a few traces of light golden color throughout. The strike is bold and there are no significant abrasions. Census: 21 in 66 Prooflike, 1 finer (5/15). NGC ID# 2542, PCGS# 7101

**4204 1880-O MS64 PCGS.** Small or Micro O. Pumpkin-gold toning adorns the margins of this otherwise light silver gray New Orleans representative. Well struck and lustrous with moderate grazes on the cheek. NGC ID# 2543, PCGS# 7114

**4205 1880-O MS64 PCGS.** Unusually intense luster cartwheels around each side of this Choice 1880-O Morgan, illuminating semiprooflike fields and boldly struck, frosty devices. A few wisps of tan-gold color appear here and there. Only 37 coins are numerically finer at PCGS (6/15). NGC ID# 2543, PCGS# 7114

**1880-S Silver Dollar, Captivating MS68**

**4206 1880-S MS68 NGC.** An exceptional, glowing type coin, this 1880-S Morgan dollar exhibits brilliant, radiant luster and seemingly perfect surfaces. Significant semiprooflike mirroring accentuates the eye appeal and the design elements are boldly rendered. Only 10 examples are certified numerically finer, including five at each leading service (5/15). NGC ID# 2544, PCGS# 7118

**4207 1880/9-S VAM-11 MS65+ Deep Mirror Prooflike PCGS.** A Hot 50 Variety. Medium S. The peripheries display freckles of cherry-red and blue-green, but the flashy fields and frosty devices remain untuned. A well struck representative with smooth fields and minor facial grazes. PCGS# 41508 Base PCGS# 97123

**4208 1881-CC MS66 PCGS.** A lack of mentionable abrasions confirms the lofty grade of this frosty 1881-CC Morgan. The central motifs are boldly brought up. Faint traces of light golden toning accentuate the eye appeal. NGC ID# 2547, PCGS# 7126

**4209 1881-CC MS64 Deep Mirror Prooflike NGC.** Pale champagne iridescence complements both surfaces. As can be inferred from NGC's "DPL" label designation, the frosty devices contrast beautifully with the mirror fields. Very pleasing from the aesthetic perspective. The 1881-CC is a conditionally scarce and desirable date eagerly sought because of its Carson City mintmark. Ex: Jules Reiver Collection (Heritage, 1/2006), lot 21612. NGC ID# 2547, PCGS# 97127

**1881-S Morgan, Radiant MS68  
Among the Finest at NGC**

**4210 1881-S MS68 NGC.** Along with the 1880-S, the 1881-S Morgan is a favorite among type collectors due to its availability in high grades. This MS68 example is among the finest obtainable. Both sides display vibrant mint bloom with traces of peripheral golden toning and beautifully preserved surfaces. Semiprooflike fields accentuate the fully struck, frosty motifs. None are numerically finer at NGC, and just two are so-graded at PCGS (5/15). NGC ID# 2549, PCGS# 7130

**4211 1882-O/S O/S Broken, VAM-5, MS64+ PCGS.** A Top 100 Variety. Traces of sun-gold toning graces this thoroughly lustrous and intricately struck New Orleans overmintmarked dollar. The surfaces are uncommonly free from scuffs, even for the MS64+ grade. The eagle displays substantial die rust, characteristic of VAM-5. PCGS# 133893 Base PCGS# 87138

**4212 1882-O MS64 Deep Mirror Prooflike NGC.** A noticeable degree of cameo contrast on this piece is accentuated by a combination of a light golden hue over the frosty devices and hints of ice-blue in the deeply mirrored fields. The strike is sharp and no major abrasions are observed. The 1882-O is a challenging issue in the Deep Mirror Prooflike category, and only six such coins are finer than the present piece at NGC (5/15). NGC ID# 254C, PCGS# 97137

### 1882-S Silver Dollar, MS68 Stellar Preservation

**4213 1882-S MS68 NGC.** Although the 1880-S, and '81-S are more widely collected, the 1882-S is a significant type coin contender in its own right. This magnificent MS68 example is awash in vibrant, frosty luster, showing seemingly perfect surfaces and just a blush of light golden toning. The 1882-S is known for its typically outstanding eye appeal, and this sharply struck example does not disappoint. None are numerically finer at either service (5/15). NGC ID# 254F, PCGS# 7140

**4214 1883-CC MS66 ★ NGC.** A well-struck premium Gem, the obverse is lavishly toned in sea-green, ruby-red, apricot, and sky-blue colors, while the impeccably preserved reverse is brilliant and frosty. Ex: *Central States Signature (Heritage, 5/2005)*, lot 9544. NGC ID# 254H, PCGS# 7144

### 1883-CC Morgan, Semiprooflike MS67 Toned Obverse

**4215 1883-CC MS67 NGC. VAM-5A.** Clashed N, die line below DO in DOLLAR. An uncommonly clean Carson City dollar, this piece also possesses visual appeal of which few other CC dollars from any date can boast. The obverse has speckled ice-blue and golden-russet toning, the two colors bisecting that side on a diagonal. The reverse is brilliant. The fields are semi-reflective, which adds even more to the coin's overall brightness and attractiveness. Census: 131 in 67 (3 in 67+, 6 in 67 ★, 1 in 67+★), 0 finer (5/15). Ex: *Long Beach Signature (Heritage, 6/2006)*, lot 2323; *FUN Signature (Heritage, 1/2007)*, lot 7014. NGC ID# 254H, PCGS# 7144

**4216 1883-CC MS65 Deep Mirror Prooflike NGC. VAM-5.** Dash under 8, die line below mintmark on the reverse. This radiant, brilliant Carson City Morgan displays gleaming fields that contrast boldly with the frost-white, sharply rendered design elements. There are a couple faint grazes on Liberty's cheek and neck, but the overall surface quality is impressive. NGC ID# 254H, PCGS# 97145

### 1883-CC Silver Dollar, MS66 Sharp Deep Mirror Prooflike Example

**4217 1883-CC MS66 Deep Mirror Prooflike NGC.** The strike is especially sharp on this deeply mirrored Premium Gem, with frosted devices for nice contrast and a few speckles of russet toning at the margins. Relatively few of the unavoidable bagmarks are scattered over the gleaming silver surfaces, the legacy of transport and storage. Treasury releases and a massive GSA sale resulted in most of the distribution of this Carson City issue. Numerous die cracks on both the obverse and reverse make this coin appealing for the specialist, and the deeply reflective fields make the coin scarce in this grade. PCGS and NGC combined show just seven examples with a numerically finer grade in Deep Mirror Prooflike (6/15). NGC ID# 254H, PCGS# 97145

**4218 1883-O MS65 Deep Mirror Prooflike NGC.** A beautiful white-on-black dollar with deep, watery mirrors and frosty devices. The striking details are good, and there are a few scattered contact marks on each side of the coin. A lovely cameo Gem. Census: 57 in 65 (1 in 65+) Deep Mirror Prooflike, 3 finer (5/15). Ex: *Long Beach Signature (Heritage, 9/2005)*, lot 5741. NGC ID# 254J, PCGS# 97147

**4219 1883-S MS61 NGC.** Light amber-gold toning accents the satiny luster of this Mint State 1883-S Morgan, while the design elements are well-struck and the surfaces reveal few significant abrasions. Most examples of this issue were either released into circulation in the late 19th century or were later melted, and Mint State availability is minimal. NGC ID# 254K, PCGS# 7148

**4220 1883-S MS63 NGC.** Light abrasions on the cheek limit the grade, but they are faint to the unaided eye. This piece is well-struck and toned in light golden hues, with radiant luster shining through the patina. Select examples of this better San Francisco issue are among the finer examples seen and obtainable by most collectors. NGC ID# 254K, PCGS# 7148

**4221 1884 MS66 Prooflike PCGS. CAC.** Thoroughly prooflike on both sides, this untuned and brilliant-white dollar is sharply struck as well. Marks and grazes are widely scattered and minor. David Bowers reports "some prooflike pieces exist and are in the distinct minority." The population figures confirm the rarity of this Premium Gem. Population: 7 in 66 (1 in 66+) Prooflike, 1 finer (6/15). NGC ID# 254L, PCGS# 7151

**4222 1884-CC MS66+ PCGS. VAM-6.** This Carson City VAM is interesting chiefly for its several straight slender field die lines near the eagle's tail and shoulders. A thoroughly lustrous Premium Gem that boasts a bold strike and exceptionally mark-free surfaces. A wisp of tan toning visits both sides. NGC ID# 254M, PCGS# 7152

**4223 1884-CC MS66+ PCGS. CAC. VAM-4A.** The popular "Pinned Wing Gouge" VAM, which also shows repunching on the flag of the 1 in the date. Rich golden-brown and blue-green toning endows the borders of this splendid high grade Carson City type coin. Well struck and lustrous with nearly pristine fields. NGC ID# 254M, PCGS# 7152

**4224 1884-CC MS66+ PCGS. CAC.** A beautiful, frosty example of this popular Carson City issue, suitable for the collector seeking a single piece from this mint. This coin is well-struck and brilliant, free of any distracting abrasions. Finer examples are seldom available. NGC ID# 254M, PCGS# 7152

### 1884-CC Dollar, MS67

**4225 1884-CC MS67 NGC. VAM-6.** Booming cartwheel luster sweeps this well struck, beautifully preserved, and minimally toned Superb Gem. VAM-6 shows a repunched first C in the mintmark, and the 18 in the date also exhibits minor doubling. The portrait displays minute die rust, as made from an improperly stored obverse die. NGC ID# 254M, PCGS# 7152

**4226 1884-O MS67 PCGS.** An available date, the 1884-O Morgan becomes conditionally scarcer in Superb Gem condition. This example displays above-average sharpness on the central design elements, and shows softly frosted luster. Both sides are largely orange-gold and lavender, with tinges of mint-gold and pine-green seen occasionally around the peripheries. PCGS lists only one coin numerically finer (5/15). NGC ID# 254N, PCGS# 7154

**4227 1884-S AU58 NGC.** The fields emit significant luster on this Borderline Uncirculated 1884-S Morgan, while the design elements show only a brush of wear over the high points. A light blush of golden toning accents each side. NGC ID# 254P, PCGS# 7156

**4228 1884-S AU58 NGC.** Attractive shades of champagne-gold and lavender toning visit the lightly abraded surfaces of this impressive near-Mint Morgan dollar. The design elements are well-detailed and the surfaces retain almost all of their original mint luster. NGC ID# 254P, PCGS# 7156

**4229 1884-S AU58 PCGS.** The elusiveness of the 1884-S in Mint State heightens demand for high-end AU representatives. This well-struck example displays just a hint of light golden toning, with substantial luster in the fields. Scattered abrasions accompany the grade, as expected. NGC ID# 254P, PCGS# 7156

**4230 1885 MS67 NGC.** The 1885 Morgan is a moderately plentiful issue, but is conditionally scarce at the MS67 grade level and is extremely rare finer. This Superb Gem example displays radiant luster with just a touch of yellow-gold toning around the outer peripheries. Well-struck and eye-appealing. NGC has seen only five numerically finer submissions (5/15). NGC ID# 254R, PCGS# 7158

**4231 1885-CC MS66 PCGS.** Dusky olive, amber, and lilac-gray hues blend over the obverse of this Premium Gem 1885-CC Morgan, while the reverse displays cheerier gold and coppery-orange toning. The design elements are boldly rendered. A few light abrasions on the cheek and neck are evident beneath the patina, but do not hinder the eye appeal. NGC ID# 254S, PCGS# 7160

**4232 1885-CC MS66+ PCGS.** A high-end Premium Gem with satin-smooth surfaces and hardly any disturbance of the smooth fields and devices. A brilliant, silver-white coin of spectacular quality and eye appeal. Razor-sharp and vibrantly lustrous. PCGS has certified just 69 finer examples (6/15). NGC ID# 254S, PCGS# 7160

**4233 1885-CC MS63+ Deep Mirror Prooflike PCGS. CAC.** The degree of mirroring on this Plus-designated Cameo is staggering, delivering an almost blinding reflection against the sharp, frost-white devices. A few light grazes on the cheek limit the grade, but none are individually obtrusive. NGC ID# 254S, PCGS# 97161

**4234 1885-CC MS65 Deep Mirror Prooflike PCGS. CAC.** A few hints of greenish-gold and cobalt-blue toning enhance the well-preserved surfaces of this impressive Gem. The design elements are well-detailed and the fields show deep prooflike reflectivity throughout. PCGS has graded 48 numerically finer examples (6/15). NGC ID# 254S, PCGS# 97161

**4235 1885-O MS67 PCGS.** A Mint-fresh, silver-white Superb Gem with frosty cartwheel luster and only a few faint contacts widely scattered over the otherwise smooth, clean fields. Fully struck including sharp detail at the centers. Brilliant and attractive. PCGS shows just a single coin graded in a higher numeric grade (5/15). NGC ID# 254T, PCGS# 7162

**4236 1885-O MS67 PCGS.** The 1885-O Morgan is a plentiful date through MS67, but is prohibitively rare any finer. This radiant, frost-white example displays brilliant, well-preserved surfaces and unusually bold design elements. PCGS has certified one MS68 coin finer (5/15). NGC ID# 254T, PCGS# 7162

**4237 1886 MS67 ★ NGC. CAC.** Exquisite bands of ocean-blue, lemon-gold, emerald-green, and ruby-red alternate across the right reverse periphery. Otherwise, this lustrous Superb Gem is medium golden-brown save for an arc of apple-green and amber along the right obverse margin. A touch of striking softness is seen on the eagle's breast feathers.  
Ex: *FUN Signature (Heritage, 1/2010)*, lot 2915. NGC ID# 254V, PCGS# 7166

**4238 1886-O MS61 PCGS.** This is one of the more conditionally challenging issues of the period, seldom available in Mint State. This example is pleasantly lustrous and untuned. Some of the usual striking softness is evident on the eagle's breast and the hair above Liberty's ear, with grade-consistent abrasions lightly dispersed overall. NGC ID# 254W, PCGS# 7168

**4239 1886-O MS61 PCGS.** An attractive Mint State Morgan dollar, with lustrous brilliant surfaces that show only scattered minor contact marks. The design elements are well-detailed on this impressive example, much better than usually seen on this issue. NGC ID# 254W, PCGS# 7168

**4240 1886-O MS62 PCGS.** Light luster grazes on Liberty's cheek limit the grade, but no major abrasions are present. This frosty 1886-O representative is typically soft on the eagle's breast and the hair above Liberty's ear, but the eye appeal is pleasing for the grade. Each side shows just a hint of light golden toning. NGC ID# 254W, PCGS# 7168

**4241 1886-O MS62 ANACS.** Light chatter on Liberty's cheek and the eagle's breast is the primary factor behind the limited grade on this 1886-O Morgan, as no major abrasions are present. The surfaces are satiny with medium golden-gray toning. Some of the usual striking softness is seen on the high points of the central motifs. NGC ID# 254W, PCGS# 7168

### 1886-O Morgan, MS63 Notable Luster

**4242 1886-O MS63 PCGS.** Frosty luster is the chief visual attribute of this Select 1886-O example, brilliant on the reverse and showing areas of light golden toning on the obverse. Light, scattered grazes in the luster determine the grade, but none are individually noteworthy. The hair above Liberty's ear shows some of the usual softness. Despite a mintage of more than 10.7 million coins, no large quantities of this New Orleans issue survived in Mint State. NGC ID# 254W, PCGS# 7168

**1886-O Silver Dollar, MS63  
Better New Orleans Issue**

- 4243 1886-O MS63 PCGS.** This softly lustrous 1886-O Morgan shows above-average sharpness for the issue, with minimal abrasions primarily limited to Liberty's cheek where they are masked by the golden-gray patina that blankets each side. This issue is available in circulated grades, but the Mint State population declines significantly at each succeeding grade level. NGC ID# 254W, PCGS# 7168

**1886-O Silver Dollar, MS63  
Challenging O-Mint Issue**

- 4244 1886-O MS63 PCGS.** The 1886-O Morgan dollar is much scarcer in Mint State than its mintage of more than 10.7 million coins would suggest; many examples were released into circulation in the late 19th century, and still others were destroyed under order of the Pittman Act of 1918. This Select example displays above-average sharpness on the central motifs, with satiny luster in the fields that is free of any major abrasions. Each side's eye appeal is heightened by a touch of light golden toning. NGC ID# 254W, PCGS# 7168

**1886-S Dollar, MS65  
Semiprooflike, Sharp Strike**

- 4245 1886-S MS65 PCGS.** S/S Repunched Mintmark. Most of the fields are fully prooflike, with some slight haziness around the central elements. The strike is pinpoint sharp on Liberty's portrait, and the eagle shows crisp feather detail. A whisper of golden-gray toning sits at the borders and creeps into the fields. Just 750,000 coins were struck, and PCGS shows a mere 50 coins certified numerically finer (6/15). NGC ID# 254X, PCGS# 7170

- 4246 1887/6-O VAM-3 MS62 PCGS.** A Top 100 Variety, showing the remnant of an underlying 6 to the right of the 7 in the date. This example is radiantly lustrous with light golden toning overall. Weakly struck in the centers, as usual, with grade-consistent abrasions. PCGS# 133912 Base PCGS# 7178

- 4247 1887/6-O VAM-3 MS62 PCGS.** A Top 100 Variety. The remnant of the base of a 6 is visible on both sides of the bottom of the 7. Discovered later than its overdated Philadelphia counterpart, and certainly scarcer. Lustrous and minimally toned with a typical strike and a smooth reverse. PCGS# 133912 Base PCGS# 7178

- 4248 1887/6-O VAM-3 MS63 PCGS.** A Top 100 Variety. The tell-tale curve at the bottom of the 7 confirms this scarce New Orleans overdate. Medium chestnut-gold and stone-gray toning enriches this lustrous and moderately marked example. The centers are lightly brought up, usual for VAM-3. PCGS# 133912 Base PCGS# 7178

- 4249 1887/6-O VAM-3 MS63 PCGS. CAC.** A Top 100 Variety. A hint of honey toning visits the cheek, but this lustrous overdated New Orleans dollar is close to brilliant. The centers show the incompleteness characteristic of the *Guide Book* variety. PCGS# 133912 Base PCGS# 7178

- 4250 1888-O Hot Lips, Doubled Die Obverse, VAM-4, AU55 PCGS.** A Top 100 Variety. The famous "Hot Lips" variety, photographed on page 229 of the 2016 *Guide Book*. Liberty's chin, lips, and nose are strongly die doubled. A great rarity in Mint State, although collectible at the Choice AU level. The present silver-gray and almond-gold example has ample luster and no obtrusive marks. Ex: FUN Signature (Heritage, 1/2011), lot 5993, which realized \$2,530. PCGS# 133919 Base PCGS# 7308

- 4251 1888-S MS65 PCGS.** The 1888-S Morgan dollar is rarely seen finer than the currently offered Gem example. This piece is radiantly lustrous with a touch of semiprooflike mirroring in the fields and a tinge of light golden color throughout. The hair above Liberty's ear is a trifle soft. PCGS has seen 30 numerically finer submissions (6/15). NGC ID# 2557, PCGS# 7186

**1888-S Silver Dollar, Brilliant White  
Dazzling High-End Gem**

- 4252 1888-S MS65+ PCGS.** The Plus designation from PCGS must relate to mint luster, which the coin displays in abundance. The surfaces are vibrant and alive with cartwheel silver flash. The strike is satisfying and sharp, while Liberty's cheek is clean. The high points absorbed some tiny coin-to-coin contact that is visible with a glass, but even so the fields are smooth and appealing. This low-mintage San Francisco dollar offers dazzling appeal. Population: 10 in 65+, 30 finer (6/15). NGC ID# 2557, PCGS# 7186

- 4253 1889 MS66 PCGS. CAC.** This well-struck and vibrantly lustrous 1889 Morgan dollar displays bold multicolor toning on the obverse in shades of pine-green, violet, sun-gold, and turquoise-blue, while the reverse is more uniformly colored in warm champagne hues with deeper amber and ocean-blue accents seen around the periphery. PCGS lists four numerically finer representatives (5/15). NGC ID# 2558, PCGS# 7188

- 4254 1889-CC VF30 ANACS.** This mid-grade 1889-CC Morgan displays medium steel-gray patina with hints of light golden throughout. Close examination reveals remnants of semiprooflike mirroring in the protected peripheral regions, a plus on this key Carson City issue. NGC ID# 2559, PCGS# 7190

- 4255 1889-CC VF30 PCGS.** This is a collector-grade 1889-CC Morgan, with two-sided gunmetal-gray patina over problem-free surfaces. Lightly worn design elements retain pleasing detail, and the overall appeal is little-rivaled for the grade. NGC ID# 2559, PCGS# 7190

- 4256 1889-CC — Tooled — PCGS Genuine. XF Details.** This is a well-detailed, affordable example of this essential Carson City key, with light golden toning over each side. The surfaces are unnaturally bright, and closer inspection reveals extensive tool marks in the fields from an attempt to efface abrasions. NGC ID# 2559, PCGS# 7190

**1889-CC Morgan, XF45  
Hints of Luster**

- 4257 1889-CC XF45 NGC.** Minor high-point wear limits the grade on this Carson City key, but the fields retain remnants of luster in the protected peripheral regions. The surfaces are largely steel-gray with light golden toning, although deeper amber-gold overtones are observed over the high points of the devices. A single mark on Liberty's jaw is the only abrasion of note. NGC ID# 2559, PCGS# 7190

**1889-CC Silver Dollar, XF45  
Problem-Free Collector Coin**

- 4258 1889-CC XF45 PCGS.** Consistent pewter-gray toning blankets each side of this lightly circulated 1889-CC Morgan, although the fields reveal hints of golden underlying luster when tilted against a light source. The surfaces are pleasantly smooth and devoid of distractions, making this an ideal collector-grade example of this key Carson City issue. NGC ID# 2559, PCGS# 7190

- 4259 1889-CC — Altered Surfaces — PCGS Genuine. AU Details.** A briefly circulated stone-gray key date Carson City dollar. Luster illuminates the borders, curls, and plumage. The obverse is exceptionally unabraded but appears microgranular. NGC ID# 2559, PCGS# 7190

**1889-CC Silver Dollar, AU Sharpness  
Scarce in All Conditions**

- 4260 1889-CC — Stained — NGC. AU Details.** High-point wear and a less-than-full strike on Liberty's hair and the eagle's breast feathers, legs, and talons are still within the limits of About Uncirculated sharpness. The light silver-gray patina was artificially applied. The effect is somewhat pleasing if not for a bit of dullness that is accentuated by traces of luster that peak through protected areas.

- 4261 1889-S MS65 PCGS.** This is a high-quality piece, even for the Gem grade level. A couple faint grazes above Liberty's eye and on the lowermost point of the neck truncation appear to be all that limit the grade; the cheek is pleasantly clean, but shows a few faint roller marks on the lower jaw. Nonetheless, the high points of the eagle's breast and the hair above Liberty's ear are well-defined. The 1889-S Morgan is seldom seen finer. NGC ID# 255B, PCGS# 7194

- 4262 1889-S MS64 Deep Mirror Prooflike ANACS.** This is a boldly struck near-Gem that has wispy rose-gold and champagne color with nicely reflective fields. The frosty devices provide modest cameo contrast and are largely free of abrasions; the fields are fairly clean as well, although some light chatter appears near the E P in E PLURIBUS UNUM. This issue is rarely encountered with Deep Mirror Prooflike surfaces, and the present coin is quite eye-appealing.  
*Ex: Santa Clara Bullet (Heritage, 11/2002), lot 1537.* NGC ID# 255B, PCGS# 97195

- 4263 1890 MS65 PCGS.** A Gem-graded example of this conditionally better-date Philadelphia issue. This piece is well-struck and frosty, with minimal disturbances in the luster. A blush of light golden toning along the left obverse periphery is the only mentionable color. PCGS has seen just four MS66 coins finer (6/15). NGC ID# 255C, PCGS# 7196

- 4264 1890-CC MS64 PCGS.** A few faint traces of light golden toning grace the frost-white surfaces of this Carson City Morgan. A small reed mark behind Liberty's eye is the only mentionable abrasion. The reverse is well-struck, although minute softness is seen on the hair above Liberty's ear and there are a few trivial roller marks on the lower jaw. NGC ID# 255D, PCGS# 7198

- 4265 1890-CC MS63 Deep Mirror Prooflike PCGS.** The 1890-CC Morgan had a rather substantial mintage of more than 2.3 million pieces, but is not quite as available as are Carson City issues from the mid-1880s. This example delivers excellent eye appeal with boldly struck motifs and deeply mirrored fields. The surfaces are largely brilliant, save for a couple ribbons of pale golden color over the obverse portrait. Light, scattered abrasions contribute to the grade, though none are individually noteworthy. NGC ID# 255D, PCGS# 97199

- 4266 1890-CC Tail Bar, VAM-4, MS61 PCGS.** A Top 100 Variety. The broad vertical die gouge beneath the fletchings is apparent to the unaided eye. Lustrous and lightly toned with smooth fields and the expected number of light facial marks. Housed in a rare circa-1995 Regency holder. Included with the lot is a small green PCGS pouch, originally distributed with the oversized presentation holder. PCGS# 133934 Base PCGS# 87198

**4267 1890-CC Tail Bar, VAM-4, MS62 PCGS.** A Top 100 Variety. The "Tail Bar" variety can be attributed at arm's length, identified by the thick die line below the fletchings. Light straw-gold toning visits this lustrous better date Carson City dollar. Marks are mostly relegated to the vicinity of Liberty's nose and mouth. PCGS# 133934 Base PCGS# 87198

**4268 1890-O MS65 PCGS. VAM-31.** The 9 in the date is lightly repunched north. Delicate tan toning adorns this lustrous, nicely struck, and splendidly preserved Gem. The '90-O is readily acquired in typical Mint State, but like many New Orleans issues, is challenging to locate as a Gem. NGC ID# 255E, PCGS# 7200

**4269 1890-O MS64 Deep Mirror Prooflike PCGS. CAC.** The 1890-O Morgan dollar is seldom seen in Deep Mirror Prooflike grades, and rarely are such pieces encountered above the MS64 level. This Choice Cameo is unusually well-struck for the issue, and only a few light abrasions on the cheek limit the grade. PCGS shows 21 numerically finer representatives in this category (5/15). NGC ID# 255E, PCGS# 97201

---

**1890-S Silver Dollar, MS66  
Vivid Reddish-Gold Toning**

**4270 1890-S MS66 PCGS.** Dramatic reddish-gold toning covers the obverse with electric blue accents at the rims. The reverse shows a less-intense infusion of the same coloration, and both sides are boldly struck. Vivid mint luster shines over the unmarked surfaces of this Premium Gem coin. PCGS and NGC combined have seen just eight numerically finer examples (6/15). NGC ID# 255F, PCGS# 7202

**4271 1891-CC MS64 PCGS. CAC.** The 1891-CC is a slightly more challenging issue in the Carson City short set, particularly in the finer Mint State grades. This Choice example displays frosty, brilliant luster with fewer abrasions than are expected for the grade. Trivial striking weakness is noted on the eagle's breast and the hair above Liberty's ear. NGC ID# 255H, PCGS# 7206

**4272 1891-CC Spitting Eagle, VAM-3, MS64 PCGS.** A Top 100 Variety. Delicate tan-gold toning visits this highly lustrous and well struck Choice dollar. The fields are well preserved, as is the center of the cheek. Minor grazes behind the mouth are all that limit the grade. PCGS# 133937 Base PCGS# 7206

**4273 1891-CC Spitting Eagle, VAM-3, MS64 ANACS.** A Top 100 Variety. The variety is undesignated within the old ANA cache holder. Rich and attractive orange-gold toning accompanies the borders. Only lightly abraded, and certain to please any Carson City collector. PCGS# 133937 Base PCGS# 7206

**4274 1891-CC Spitting Eagle, VAM-3, Top 100, MS64 NGC. CAC.** A Top 100 Variety. An intensely lustrous, frosty example with light golden toning and surprisingly clean surfaces for the grade. The strike is a touch soft on the hair above Liberty's ear, but the eye appeal is unhindered. PCGS# 133937 Base PCGS# 7206

**4275 1891-O MS64+ PCGS. CAC.** The 1891-O Morgan dollar is a plentiful issue in grades up to the MS64 level, but it becomes scarce in finer grades. This high-end Choice example is well-struck and lustrous and the lightly toned surfaces show few signs of contact. NGC ID# 255J, PCGS# 7208

**4276 1892 MS64+ NGC.** This heavily frosted 1892 Morgan is devoid of major abrasions, and shows instead only a few faint grazes on the obverse that limit the grade. Traces of light golden color preclude full brilliance, while the eagle's breast and the hair above Liberty's ear are a trifle soft, as usual. NGC ID# 255L, PCGS# 7212

**4277 1892 MS64 PCGS. CAC.** A slightly better Philadelphia issue, the 1892 Morgan had a mintage of barely more than 1 million coins. This Choice example is frosty and uniformly toned on both sides with shades of amber-gray, gold, and sea-green. The strike is a trifle soft on the eagle's breast and the hair above Liberty's ear. NGC ID# 255L, PCGS# 7212

**4278 1892 MS64 PCGS. CAC.** A frosty array of luster sets this Choice 1892 Morgan aglow in brilliant cartwheels, while the design elements are boldly rendered. A few light grazes on the obverse limit the grade, but none are significant. CAC-endorsed eye appeal. NGC ID# 255L, PCGS# 7212

**4279 1892-CC MS62 PCGS. VAM-4B.** Only a hint of tan-gold toning accompanies this lustrous and suitably struck better date Carson City dollar. The reverse and right obverse are well preserved. An interesting VAM that has a repunched mintmark, a triple-clashed N from IN near Liberty's neck, and a tilted field die break atop the second S in STATES. NGC ID# 255M, PCGS# 7214

**4280 1892-CC MS63 PCGS. VAM-8A.** Faint splashes of chestnut-gold toning adorn this lustrous better date Carson City dollar. The left obverse shows minor marks, but the remainder of the coin is well preserved. A die break fills the bottom half of the 2 in the date, and a clashed N from IN is present near Liberty's neck. NGC ID# 255M, PCGS# 7214

**4281 1892-CC MS63 PCGS. VAM-8A, Clashed N.** This interesting variety shows the 2 in the date filled by a die chip. The present example is intensely frosty, with tinges of amber-gold and russet toning seen around both peripheries and the upper reverse margin. Well-struck, with light, grade-consistent abrasions. NGC ID# 255M, PCGS# 7214

**4282 1892-S AU50 NGC.** This example displays light wear on the high points, though the field luster is close to intact. Hints of gold and peach appear throughout each side. The 1892-S is one of the most challenging dates in the series in Mint State, putting heightened demand on pleasing AU representatives (6/15). NGC ID# 255P, PCGS# 7218

**4283 1892-S AU53 NGC.** This is a notably eye-appealing AU Morgan dollar, not just for the elusive 1892-S but for any date. Significant semiprooflike mirroring in the fields is minimally disturbed by abrasions, and offers subtle cameo contrast on the obverse. This piece is well-struck and shows just brief circulation with a light golden hue over each side. NGC ID# 255P, PCGS# 7218

**4284 1893 MS63 PCGS.** This brilliant, satiny 1893 Morgan is well-struck and unusually well-preserved for the grade. The fields on each side are almost perfect, and only a few light marks on Liberty's cheek limit PCGS' assessment. Worthy of a premium bid. NGC ID# 255R, PCGS# 7220

---

**1893-CC Dollar, Near-Mint  
Well Struck and Brilliant**

**4285 1893-CC AU58 PCGS. VAM-2A.** A brilliant and partly lustrous Borderline Uncirculated example of this desirable Carson City issue. Many '93-CC dollars are softly brought up at the centers, but the present coin is well struck. No marks are worthy of description. A faint clashed N in front of Liberty's neck confirms the scarce VAM variety. NGC ID# 255S, PCGS# 7222

**4286 1893-O AU58 PCGS. VAM-3A.** A partial N from IN is clashed in front of Liberty's neck. Most collectors will have greater interest in the low mintage of 300,000 pieces. The present lustrous example is virtually brilliant and nicely struck with a smooth reverse and moderate obverse marks. NGC ID# 255T, PCGS# 7224

**4287 1893-S Good 6 NGC.** This is an affordable circulation-cameo representative of this series key Morgan dollar. The fields display deep tan-gray patina, while the relief elements show lighter champagne-gray hues. The devices are evenly worn and retain some detail. NGC ID# 255U, PCGS# 7226

#### 1893-S Silver Dollar, VG10 Collector-Grade Example

**4288 1893-S VG10 NGC.** This is a lightly patinated, steel-gray example of this series key, in an ideal grade for the budget-conscious series enthusiast. The Morgan dollar set is large, but most issues can be acquired for little more than silver value in lower circulated grades. The 1893-S is one of only a handful of issue's that qualify as "stoppers" in all grade numeric levels. NGC ID# 255U, PCGS# 7226

**4289 1893-S — Repaired — PCGS Genuine. Fine Details.** The diagnostic die line within the central top of the T in LIBERTY is evident on this key date dollar. The eagle displays many light parallel abrasions and a couple of dull, thin scratches. The wreath and reverse legends also exhibit several slender marks. The steel-gray surfaces are occasionally microgranular. NGC ID# 255U, PCGS# 7226

**4290 1894 XF45 NGC. CAC.** This is a collectible, lightly circulated example of this better Philadelphia issue. Subtle iridescence is discernable amid the soft golden-gray patina that colors each side. An appealing, problem-free coin for the grade. NGC ID# 255V, PCGS# 7228

**4291 1894 — Improperly Cleaned — NGC Details. AU Details.** The Morgan dollar enthusiast of limited funds will find much to appreciate about this piece. The surfaces are lightly cleaned, but are free of any major abrasions and retain hints of luster in the protected areas. The design elements are well-struck and exhibit just trivial friction. NGC ID# 255V, PCGS# 7228

**4292 1894 AU53 PCGS.** Light friction is primarily restricted to the eagle's breast and the hair above Liberty's ear, while the protected areas of the fields display satiny silver luster. A pleasing, problem-free AU representative of this better Philadelphia issue. NGC ID# 255V, PCGS# 7228

**4293 1894 AU55 NGC.** Traces of gold toning are illuminated by satiny luster in the protected regions of the fields on this Choice AU 1894 dollar. A shallow scrape on Liberty's lower jaw is the only mentionable abrasion. NGC ID# 255V, PCGS# 7228

#### 1894 Morgan Dollar, MS61 Low-Mintage Philadelphia Issue

**4294 1894 MS61 NGC.** The 1894 Morgan dollar claims the second-lowest mintage of the series, at a meager 110,000 pieces. The issue is not too difficult to locate in lower Mint State grades, but high-grade examples are quite elusive. This attractive MS61 specimen is sharply detailed in most areas, with just a touch of softness on a few stars and the hair above the ear. The lustrous surfaces show scattered minor contact marks on both sides. NGC ID# 255V, PCGS# 7228

**4295 1894-O MS61 NGC.** The 1894-O is a better New Orleans date, a trifle scarcer in Mint State than its Philadelphia counterpart. This lower-grade Uncirculated example is pleasantly vibrant with satiny luster and just a blush of golden toning intruding from the left periphery on both sides. Light chatter defines the grade. NGC ID# 255W, PCGS# 7230

**4296 1894-O MS62 NGC.** The 1894-O Morgan dollar claims a smallish mintage of 1.7 million pieces and few examples were saved by contemporary collectors. This attractive MS62 example displays well-detailed design elements and lustrous surfaces with a scattering of minor contact marks under shades of gray, lavender, and greenish-gold toning. NGC ID# 255W, PCGS# 7230

**4297 1894-S MS63 PCGS.** Significant semiprooflike mirroring in the fields heightens this 1894-S Morgan dollar's eye appeal, while the well-struck devices and a blush of lemon-gold color further contribute to the visual attributes. Light, scattered abrasions limit the grade. NGC ID# 255X, PCGS# 7232

**4298 1894-S MS64 PCGS.** The 1894-S is one of the semikey dates in the series in Mint State and is seldom seen finer than this Choice example. This piece is well-struck, with softly frosted, brilliant luster. A few light, stray surface grazes limit the grade, but hardly impede the eye appeal. NGC ID# 255X, PCGS# 7232

**4299 1895-O AU55 PCGS.** Original surfaces display sun-gold and amber toning on each side of this Choice AU 1895-O dollar, with the deeper hues most prominent near the peripheries. The surfaces are fairly smooth and retain some luster, while wear is largely restricted to the eagle's breast and the hair immediately above Liberty's ear. NGC ID# 255Y, PCGS# 7236

**4300 1895-O AU55 PCGS.** A Choice AU example of this better date Morgan dollar from a mintage of 450,000 pieces. This specimen shows just a trace of wear on the high points of the design elements, and the lightly abraded surfaces retain traces of original mint luster, under shades of golden-brown toning. NGC ID# 255Y, PCGS# 7236

### 1895-O Silver Dollar, Lustrous AU58

- 4301 1895-O AU58 NGC.** The 1895-O Morgan dollar is one of several semikey dates from this period that are available in circulated grades, but become conditionally scarce in Mint State. This near-Mint example exhibits satiny luster in the fields, with just a touch of friction over the relief elements. The details are weakly struck on the eagle's breast and the hair above Liberty's ear, as usual. Both sides show a light overlay of champagne-gold toning. NGC ID# 255Y, PCGS# 7236

### 1895-O Morgan, AU55 Prooflike Elusive With Mirrored Fields

- 4302 1895-O AU55 Prooflike NGC.** The gleaming, Prooflike fields of this Choice AU 1895-O Morgan set it apart from most other examples of this elusive New Orleans issue. Moreover, the design elements are uncommonly well-defined, and high-point wear is minimal. The obverse is largely sun-gold with a few small splashes of aqua-blue, while the reverse is almost entirely consumed by the latter color. Census: 24 in 55 Prooflike, 38 finer (5/15). NGC ID# 255Y, PCGS# 7237
- 4303 1895-S XF45 NGC.** A lightly circulated, collectible example, this 1895-S Morgan dollar still exhibits hints of luster in the protected regions of the fields near the rims. The surfaces are fairly smooth, although a few marks are present on Liberty's cheek. Both sides show steel-gray patina with a thin overlay of light golden toning. NGC ID# 255Z, PCGS# 7238
- 4304 1895-S AU55 NGC.** With a mintage of just 400,000 coins, the 1895-S ranks as a significant semikey-date, particularly in Mint State. This Choice About Uncirculated piece shows brief circulation with the accompanying blanket of trivial abrasions and touch of light golden toning. Nonetheless, some luster remains in the fields. NGC ID# 255Z, PCGS# 7238

### 1895-S Morgan Dollar, MS60 Entry-Level Mint State Example

- 4305 1895-S MS60 NGC.** Partially semiprooflike fields heighten this Mint State example's visual merit, despite scattered abrasions that limit the grade. The design elements are well brought up and both sides show a warm overlay of light golden toning. The 1895-S Morgan is a challenging issue in Mint State, fueled by a mintage of only 400,000 coins. NGC ID# 255Z, PCGS# 7238
- 4306 1895-S — Altered Surfaces — PCGS Genuine. Unc. Details.** Pastel ice-blue and almond-gold toning visits the satiny and microgranular obverse. The reverse is brilliant and semiprooflike with myriad vertical die polish lines throughout the field, as issued. The cheek displays subtle abrasions. The 1895-S is key to a date set of Morgan dollars. NGC ID# 255Z, PCGS# 7238
- 4307 1896 MS67 PCGS.** A blush of sun-gold and amber toning emerges inward from the lower-left obverse and upper-left reverse peripheries, while the remainder of each side is brilliant. Well-preserved and satiny, with just trivial weakness on the hair immediately above Liberty's ear. PCGS shows only two numerically finer representatives (5/15). NGC ID# 2562, PCGS# 7240
- 4308 1896 MS67 PCGS.** A lack of surface distractions and a wealth of radiant, satiny luster confirm the lofty grade of this Philadelphia type coin. A hint of light golden toning graces the extreme outer peripheries, but leaves the well-struck interiors brilliant. Only two MS68 coins are finer at PCGS (5/15). NGC ID# 2562, PCGS# 7240
- 4309 1896-O MS60 NGC.** The fresh, vibrant luster of this 1896-O Morgan ensures meaningful eye appeal, despite light abrasions on Liberty's cheek which limit the grade. The surfaces are largely brilliant, although hints of gold appear over the central obverse. As expected for the issue, the eagle's breast and the hair above Liberty's ear are not fully defined. NGC ID# 2563, PCGS# 7242
- 4310 1896-O MS61 NGC.** The pleasing surfaces of this attractive Mint State example show a scattering of minor contact marks on each side and retain much original mint luster, under a thin blanket of greenish-gold and lavender toning. The design elements are well-detailed throughout. NGC ID# 2563, PCGS# 7242
- 4311 1896-O MS61 PCGS.** The 1896-O Morgan dollar is a challenging issue in high grade. This impressive Mint State example displays just a touch of the usual softness on the hair above the ear and the lustrous, lightly marked surfaces are blanketed in shades of lavender-gray and greenish-gold toning. NGC ID# 2563, PCGS# 7242
- 4312 1896-O MS61 NGC.** Light golden toning visits the margins of this lustrous New Orleans dollar. Marks are minor except for a vertical line on the cheek. The 1896-O is plentiful in VF but very scarce in Mint State. NGC ID# 2563, PCGS# 7242
- 4313 1896-O MS62 NGC.** This 1896-O Morgan possesses notably vibrant, frosty luster with just faint traces of light golden toning overall. The obverse is lightly abraded, but there are no major distractions. The strike is a little soft in the extreme centers, as usual. NGC ID# 2563, PCGS# 7242
- 4314 1896-O MS62 NGC.** The 1896-O is a fairly challenging date, seldom seen in pleasing Mint State condition. For the grade, this MS62 coin is uncommonly attractive. Both sides are radiantly lustrous, toned in warm amber hues that deepen across the reverse. A little soft on the eagle's breast and the hair above Liberty's ear, but with minimal abrasions. NGC ID# 2563, PCGS# 7242

- 4315 1897-O MS61 NGC.** The 1897-O is a slightly better date in Mint State, but this piece offers the budget-conscious collector a pleasing, yet, affordable entry into this grade range. Both sides display satiny luster with just a hint of light golden color, and grade-limiting abrasions are light and evenly dispersed over each side. The eagle's breast and the hair above Liberty's ear show the usual striking softness. NGC ID# 2566, PCGS# 7248
- 4316 1897-O MS61 NGC.** The 1897-O Morgan is hardly known for appealing luster, although this lower-end Mint State example is sufficiently vibrant in the fields. The frosty surfaces show uniform light golden toning and reveal only shallow grazes to limit the grade. A typical New Orleans product of this period, this piece is weakly struck on the central high points. NGC ID# 2566, PCGS# 7248
- 4317 1897-O MS61 PCGS.** This piece is uncommonly lustrous for the issue, with brilliant, satiny surfaces. Scattered abrasions are mostly trivial in nature and pose little distraction, while some of the usual striking softness is observed on the eagle's breast and the hair above Liberty's ear. NGC ID# 2566, PCGS# 7248
- 4318 1897-O MS62 PCGS.** This piece shows far fewer major abrasions than are expected for the grade, with only light grazes on the cheek limiting the assessment of PCGS. Trivial striking softness is evident on the eagle's breast and the hair above Liberty's ear, as usual for this New Orleans issue. The surfaces are satiny and lustrous. Just a suggestion of light golden toning accents each side. NGC ID# 2566, PCGS# 7248

**1897-O Morgan Dollar  
Elusive Select Mint State Example**

- 4319 1897-O MS63 PCGS.** Population reports show few high Mint State examples of this poorly produced New Orleans date, which tend to be on the dreary side in terms of strike and luster. This Select Uncirculated example displays bright mint luster and an above-average strike. Traces of gold and russet patina surround the stars and legends. Just 49 pieces are certified numerically finer by PCGS (6/15). NGC ID# 2566, PCGS# 7248

**1898-O Morgan, MS66 Deep Mirror Prooflike  
Enamoring Radiance and Contrast**

- 4320 1898-O MS66 Deep Mirror Prooflike NGC.** As is expected for a Deep Mirror Prooflike Morgan in Premium Gem condition, this 1898-O is absolutely beautiful, and technically impressive. Gleaming fields provide modest cameo contrast against the uncommonly sharp, frosty relief elements. Brilliant centers cede to lovely violet and plum peripheral hues which attractively frame the unabraded interiors. Census: 13 in 66 (1 in 66 ★) Deep Mirror Prooflike, 1 finer (5/15). NGC ID# 2569, PCGS# 97255

- 4321 1899 MS66 NGC.** The well-preserved surfaces of this spectacular Premium Gem are blanketed in attractive shades of greenish-gold and lavender-gray toning, with well-detailed design elements and vibrant mint luster underneath. Census: 73 in 66 (1 in 66+), 3 finer (6/15). NGC ID# 256B, PCGS# 7258
- 4322 1899-S MS65 PCGS.** An outstanding example of this conditionally challenging San Francisco issue, this Gem 1899-S Morgan dollar displays semiprooflike fields with well-struck, satiny devices and a pleasant lack of any significant abrasions. Traces of light golden toning accentuate the surfaces. NGC ID# 256D, PCGS# 7262
- 4323 1900-O/CC VAM-8 MS65 PCGS.** A Top 100 Variety. Magnificent golden-brown and sea-green toning endows the margins of this lustrous overmintmarked Gem. Well struck and uncommonly smooth, particularly on the center of Liberty's cheek. Population: 5 in 65, 1 finer (5/15). PCGS# 133960 Base PCGS# 7268
- 4324 1900-O/CC VAM-8 MS65 PCGS.** A Top 100 Variety. A highly lustrous, well struck, and nearly brilliant Gem. The reverse is virtually pristine, and the obverse displays only delicate marks. The six O/CC die marriages (VAM-7 through VAM-12) are each collectible and form an interesting set. PCGS# 133960 Base PCGS# 7268
- 4325 1900-O/CC VAM-11 MS65 PCGS. CAC.** A Top 100 Variety. This is a late die state piece, peripherally cracked around most of both sides. The luster is vibrant and frosty, and the surfaces are delightfully clean, even for the Gem grade level. The eagle's breast is a trifle soft, but the hair above Liberty's ear is well-defined. This Guide Book variety has become so popular that it is now widely collected as its own issue in the date and mintmark set. PCGS# 133963 Base PCGS# 7268
- 4326 1900-O Doubled Die Obverse, VAM-15, MS64 Deep Mirror Prooflike NGC.** A Top 100 Variety, with the stars to the right of the date boldly die doubled. The 1900-O Morgan is a plentiful date overall, but it is scarce in Deep Mirror Prooflike, regardless of grade. This Choice example displays sharp motifs and modest cameo contrast. Rose-gold toning around the peripheries leaves the interiors brilliant. An eye-appealing coin with no major abrasions. PCGS# 44417 Base PCGS# 97267
- 4327 1900-S MS65 NGC.** This is an attractively clean, Gem 1900-S Morgan dollar, and were it not for a few trivial scuffs on Liberty's lower cheek, a Premium Gem grade might have been achieved. As it stands, this eye-appealing coin shows semiprooflike fields and light golden toning, with a few deeper amber accents seen near the peripheries. The hair above Liberty's ear is not quite fully defined. NGC records 27 numerically finer representatives (5/15). NGC ID# 256H, PCGS# 7270
- 4328 1900-S MS65 PCGS.** The 1900-S Morgan is scarce in Premium Gem and extremely rare any finer, making Gem examples a more affordable alternative. Golden-brown and moss-green toning appears on both sides of this Gem. Attractive satin luster provides this piece with nice eye appeal. NGC ID# 256H, PCGS# 7270
- 4329 1901 AU58 PCGS.** The lightly abraded surfaces of this brightly lustrous near-Mint Morgan dollar show just a few hints of pink toning and the well-detailed design elements exhibit the slightest trace of friction on the high points. NGC ID# 256J, PCGS# 7272
- 4330 1901 AU58 PCGS. CAC.** At first glance, this near-Mint 1901 Morgan appears Uncirculated, although close study reveals minor friction on the highest points of the motifs. Essentially brilliant, with substantial luster illuminating the fields. NGC ID# 256J, PCGS# 7272

**1901 Silver Dollar, MS60  
Scarce Mint State Example**

- 4331 1901 MS60 NGC.** Cartwheel luster flows across both sides of this Mint State Philadelphia date, one of the heavily promoted silver dollar “rarities” from years gone by, yet the issue is indeed scarce in any Mint State. This example is relatively sharp at the centers, with a bit of blending above the ear and at the high points of the eagle. The fields and devices show remarkably few marks or abrasions for the assigned grade. NGC ID# 256J, PCGS# 7272

**1901 Silver Dollar, MS61  
Vibrant Cartwheel Luster**

- 4332 1901 MS61 NGC.** The 1901 is one of the most difficult 20th century Morgan dollar issues to locate in Mint State. This example is lightly abraded, as are most upper-end representatives, but there are no individually obtrusive distractions. The strike is sharp on the central high points and radiant luster illuminates a thin blanket of light golden toning on each side. NGC ID# 256J, PCGS# 7272

- 4333 1901-S MS64 PCGS. CAC.** This turn-of-the-century San Francisco Morgan is unusually well-preserved for the grade, although a few faint grazes in the left obverse field preclude full Gem status. Brilliant, satiny luster illuminates each side, while the design elements exhibit above-average definition. NGC ID# 256L, PCGS# 7276

- 4334 1902 MS66 PCGS. CAC.** This Premium Gem 1902 Morgan is impressively preserved, with sharp, satiny devices and modest semiprooflike mirroring in the fields. A few tinges of golden toning highlight the peripheries. This issue is challenging in high grades, with only 29 examples certified numerically finer than the present piece at PCGS (5/15). NGC ID# 256M, PCGS# 7278

- 4335 1902 MS65 Prooflike ANACS.** The 1902 Morgan dollar is plentiful in the absolute sense, but seldom is an example found with prooflike mirroring in the fields. This Gem representative displays sharp, satiny motifs set against notably prooflike mirrors, with tinges of amber-gold and blue toning around the outer peripheries. NGC ID# 256M, PCGS# 7279

- 4336 1903-S AU50 NGC.** The 1903-S is a recognized semikey among 20th century Morgan dollar issues. This AU example is uniformly golden-gray in color, with original surfaces that retain hints of luster in the fields. A problem-free, collector-grade piece. NGC ID# 256T, PCGS# 7288

- 4337 1903-S AU55 NGC.** This bright Choice AU representative shows semiprooflike mirroring in the fields, with just a touch of wear over the high points of the well-struck devices. A lack of any major abrasions increases the eye appeal. NGC ID# 256T, PCGS# 7288

**PROOF MORGAN DOLLARS**

- 4338 1879 — Questionable Color — PCGS Genuine. Proof, Unc. Details.** Dusky autumn-gold and olive-green toning embraces the obverse border and reverse field. A sharply struck specimen with smooth fields save for a few wispy marks beneath the right (facing) wing. Minor hairlines are noted on the lower left obverse field. NGC ID# 272Z, PCGS# 7314

- 4339 1883 — Questionable Color — PCGS Genuine. Proof, Unc. Details.** The pastel ocean-blue and straw-gold toning is deemed suspicious by PCGS. Mildly granular on the obverse field near the UR and US in PLURIBUS, and on the reverse field above the leaves of the olive branch. NGC ID# 2727, PCGS# 7318

- 4340 1883 PR62 PCGS.** A pleasing lower-grade proof Morgan, this 1883 representative exhibits modest, undesignated field-device contrast, with deep mirrors and a full strike. Each side shows warm golden toning. NGC ID# 2727, PCGS# 7318

**1885 Morgan Dollar, PR63  
One-Sided Cameo**

- 4341 1885 PR63 NGC.** This is a collectible proof Morgan dollar, about in the middle of the certified population for the 1885 issue. The strike is bold and the fields are deeply mirrored; a degree of cameo contrast on the obverse is accentuated by subtle steel-blue hues in the fields, although the reverse is not as starkly contrasted. NGC ID# 27ZE, PCGS# 7320

- 4342 1886 PR62 PCGS. VAM-15.** The 18 in the date is repunched. A razor-sharp specimen with subtle and consistent caramel-gold toning, aside from a small area of dusk steel-gray near the ST in STATES. One of only 886 proofs produced. NGC ID# 27ZE, PCGS# 7321

- 4343 1887 — Questionable Color — PCGS Genuine. Proof, Unc. Details.** A fully struck specimen that exhibits obvious cameo contrast between the frosty motifs and the glassy fields. The iridescent peach-gold, rose-red, and cobalt-blue shades are attractive, although regarded with skepticism by PCGS. NGC ID# 27ZG, PCGS# 7322

**1896 Morgan, PR63 Cameo  
Golden-Toned Contrast**

- 4344 1896 PR63 Cameo NGC.** For the grade, this Cameo proof possesses substantial visual merit, showcasing stark field-device contrast and bold relief elements. An overlay of light golden toning draws the eye away from a few faint hairlines, which are only obvious when studied beneath a glass. Census: 8 in 63 Cameo, 55 finer (5/15). PCGS# 87331

**4345 1899 PR61 PCGS.** Sun-gold toning with tinges of rainbow circumnavigates the peripheries on each side of this proof 1899 Morgan dollar. The strike is sharp and the fields are fully mirrored. Scattered hairlines determine the grade. NGC ID# 27ZX, PCGS# 7334

**4346 1901 PR62 Cameo PCGS. VAM-4.** Intricately struck and prominently mirrored with noticeable cameo contrast and minor hairlines on the left obverse field. Although many would regard the present specimen as brilliant, hints of golden toning visit both sides. The reverse is die doubled, strongest on ONE DOLLAR, a diagnostic for distinguishing proofs from the very scarce Uncirculated 1901 dollars. PCGS# 87336

## PEACE DOLLARS

**4347 1921 MS64 PCGS. CAC.** A couple small ticks on Liberty's cheek are all that preclude a full Gem grade on this fresh, frosty High Relief Peace dollar. Hints of gold toning accentuate the originality of the surfaces. The hair over Liberty's ear and the central eagle's feathers are predictably soft, but not so much so as to be distracting. NGC ID# 2U4E, PCGS# 7356

**4348 1921 MS65 PCGS.** Traces of light golden color grace the frosty, vibrant surfaces of this Gem High Relief Peace dollar. The centers are weakly struck, as usual, but the glow of the luster balances the eye appeal. A few faint grazes on Liberty's neck and cheek limit the grade. NGC ID# 2U4E, PCGS# 7356

**4349 1921 MS65 PCGS.** This Gem first-year Peace dollar shows above-average central definition, with frosty luster that exhibits just a trace of light golden toning. A few light ticks on the eagle's body and a scattering of minor grazes on Liberty's neck are all that preclude an even finer grade. NGC ID# 2U4E, PCGS# 7356

**4350 1921 MS65 PCGS.** Above-average central sharpness is the hallmark of this Gem High Relief Peace dollar, although well-preserved, satiny luster and a light golden hue over each side further contribute to the visual attributes. Finer representatives are only infrequently encountered. NGC ID# 2U4E, PCGS# 7356

**4351 1921 MS65 NGC. VAM-1G.** The obverse die is shared with VAM-1F, the die marriage that struck matte proofs. The present Gem has a better strike than most 1921 Peace dollars, although it was coined for commerce. The lustrous cream-gray and straw-gold surfaces are only minimally marked. NGC ID# 2U4E, PCGS# 7356

**4352 1921 MS65 NGC.** Fresh, ice-white luster is visited by hints of peripheral gold on this satiny Gem High Relief Peace dollar. The strike is a trifle soft on the hair over Liberty's ear and the central eagle's feathers, but the definition is above-average for the issue. Notably pleasing and original. Minor strike doubling is seen on the obverse. NGC ID# 2U4E, PCGS# 7356

**1921 Peace Dollar, MS65  
Ideal First-Year Type Coin**

**4353 1921 MS65 PCGS. CAC.** Undeniably original, frosty luster gives this Gem high relief Peace dollar impeccable eye appeal. Hints of light golden toning grace each side, but the surfaces are devoid of any significant abrasions. Not quite fully struck, but much sharper on Liberty's hair strands than is typically seen. Finer representatives are scarce, and this is a highly appealing 1921 Peace dollar. NGC ID# 2U4E, PCGS# 7356

**1921 Peace Dollar, MS65+  
Original, Frosty Luster**

**4354 1921 MS65+ PCGS. CAC.** An unquestionably original High Relief Peace dollar with powerful, frosty luster and tremendous eye appeal. Hints of light golden-gray toning cover each side with scattered russet-red accents at the borders. The surfaces show no significant abrasions on this high-end Gem example. Not quite fully struck, but the coin is much sharper on the eagle than is typically seen while Liberty's hair shows incompleteness over the ear. Finer representatives are decidedly scarce. CAC endorsed. NGC ID# 2U4E, PCGS# 7356

**4355 1922-S MS65 PCGS.** This impressive Gem is sharply detailed in most areas, with just a touch of softness on the eagle's leg. The well-preserved surfaces are mostly brilliant, with subtle hints of golden-tan toning and vibrant mint luster on both sides. NGC ID# 257E, PCGS# 7359

**4356 1924-S MS64+ PCGS.** The scarcity of the 1924-S Peace dollar in Gem condition puts increased demand on high-end Choice examples. This Plus-graded piece is thickly frosted in champagne-tinted silver luster, with only a few faint grazes observed upon close examination. Well-struck and pleasantly appealing. NGC ID# 257K, PCGS# 7364

**4357 1925-S MS64+ PCGS. CAC.** The 1925-S Peace dollar is a noteworthy rarity in Gem condition. This MS64+ example boasts light grayish-gold patina amid good luster and scattered inconsequential marks. NGC ID# 257M, PCGS# 7366

**4358 1926 MS66 NGC.** This available Philadelphia issue is only infrequently seen as fine as MS66, and anything higher-grade is almost nonexistent. This sharp, satiny example displays excellent preservation beneath just a suggestion of light golden toning. Census: 52 in 66, 1 finer (5/15). NGC ID# 257N, PCGS# 7367

**1926-S Peace Dollar, MS66  
Vibrant Luster**

**4359 1926-S MS66 PCGS.** Frosty luster illuminates the well-defined relief elements on each side of this Premium Gem 1926-S Peace dollar, while lightly mottled shades of champagne, amber, and olive toning mask any faint surface grazes that limit the grade. This San Francisco issue is available in Gem condition, but Premium Gems are seldom seen and only two finer pieces are recorded at PCGS (5/15). NGC ID# 257R, PCGS# 7369

**4360 1927-S MS64 PCGS. CAC.** A better date, boasting a mintage of only 866,000 coins. This 1927-S representative is well-struck and displays radiant, brilliant luster. No major abrasions are present, although a few faint grazes on the cheek and in the adjacent field preclude a finer grade. NGC ID# 257U, PCGS# 7372

- 4361 1928 MS64 PCGS.** Rich autumn-brown and green-gold shades envelop this satiny near-Gem. Sharply struck, and noticeable marks are absent. The 1928 is the lowest-mintage issue of the series (only a little more than 360,000 coins struck).  
*Ex: Dallas Signature (Heritage, 12/2004), lot 7808; FUN Signature (Heritage, 1/2007), lot 7542. NGC ID# 257V, PCGS# 7373*
- 4362 1928 MS64 PCGS.** The series key, heralding a low mintage of little more than 360,000 coins. This 1928 Peace dollar is well-struck, with satiny luster and traces of light golden toning. The surfaces are unusually clean for the grade. NGC ID# 257V, PCGS# 7373
- 4363 1928 MS64 NGC.** This satiny, gold-tinted key-date Peace dollar would have likely received a Gem grade were it not for the a single small reed mark on Liberty's cheek; there are no other mentionable surface flaws. The strike is sharp and the eye appeal is excellent for the MS64 level. NGC ID# 257V, PCGS# 7373
- 4364 1928 MS64 NGC.** The 1928 Peace dollar claims a low mintage of 360,649 pieces and the issue is scarce in grades above the MS64 level. This impressive Choice example offers well-detailed design elements and lightly marked lustrous surfaces, under shades of golden-brown and lavender-gray toning. NGC ID# 257V, PCGS# 7373
- 4365 1928 MS64 PCGS.** Lustrous and well-preserved, this Choice 1928 Peace dollar is suitable for inclusion in a mid-grade Uncirculated date set. The design elements show pleasing sharpness, and a few trivial ticks are softened by medium gold toning that blankets each side. NGC ID# 257V, PCGS# 7373
- 4366 1928 MS64+ NGC.** A blush of pale champagne toning accents the frosty, well-preserved surfaces of this Plus-graded near-Gem, while the devices exhibit sharp definition. Finer examples of this series key are only infrequently offered. NGC ID# 257V, PCGS# 7373
- 4367 1928-S MS64+ PCGS.** The 1928-S is one of the rarest dates in the Peace dollar series in Gem condition, making this Plus-graded MS64 example especially appealing. The obverse is arguably full Gem quality, although a few shallow scrapes on the reverse eagle's feathers — not immediately obvious — preclude such an assessment from PCGS. This piece is vibrantly frosted with light champagne toning over each side. NGC ID# 257W, PCGS# 7374

#### 1934 Peace Dollar, Golden MS66

- 4368 1934 MS66 PCGS.** Fewer than 1 million examples of this issue were struck by the Philadelphia Mint, giving it one of the lowest mintages of the series. This is a lovely Premium Gem with vibrant luster and golden toning over both sides. Well-struck with impressively preserved surfaces that are nearly flawless, save for a couple of minor marks on the reverse. NGC ID# 257X, PCGS# 7375

#### 1934-S Peace Dollar, MS62

##### A Key Date in the Series

- 4369 1934-S MS62 PCGS.** From a mintage of just over 1 million pieces, the 1934-S peace dollar is the most elusive issue of the series in absolute terms. This attractive MS62 specimen exhibits well-detailed design elements and vibrant mint luster throughout. The lightly toned surfaces show only minor signs of contact, aside from a couple of scratches that are well-hidden on the eagle's leg. NGC ID# 257Z, PCGS# 7377
- 4370 1935 MS66 NGC.** This late-series Philadelphia issue is infrequently seen in MS66, and finer pieces are extremely rare. This coin is sharply rendered, with smooth, satiny surfaces. Consistent tan-gold toning is visited by hints of lilac and rose along the upper right periphery. Census: 72 in 66, 5 finer (6/15). NGC ID# 2582, PCGS# 7378
- 4371 1935-S MS65+ PCGS.** The 1935-S Peace dollar is difficult to locate in Premium Gem condition. This Plus-graded piece shows a few too many minute ticks to warrant a full MS66 grade, but the coin is clearly finer than most other Gems. The satiny surfaces exhibit blended olive-gold and lilac-gray hues, with mild striking weakness on the central high points. NGC ID# 2583, PCGS# 7379
- 4372 1935-S MS65 PCGS. CAC.** A couple trivial grazes on Liberty's cheek restrict PCGS' numeric assessment of this piece, although the vibrant, thickly frosted luster more than balances the visual impact. Sharply struck and toned in warm champagne hues, this piece is about as eye-appealing as the 1935-S Peace dollar is ever seen in Gem condition. NGC ID# 2583, PCGS# 7379

#### 1935-S Peace Dollar, MS66

##### Excellent Surface Quality

- 4373 1935-S MS66 NGC.** A slightly better date from the final year of the series, the 1935-S Peace dollar is elusive in MS66, and finer representatives are extremely rare. This piece displays satiny surfaces with just a hint of light golden toning. Trivial striking weakness is present on the high points of the eagle's feathers and the hair strands over Liberty's ear, but the outstanding surface preservation heightens the eye appeal. Census: 63 in 66 (1 in 66+, 2 in 66 ★), 3 finer (5/15). NGC ID# 2583, PCGS# 7379

## EISENHOWER DOLLAR

- 4374 1972 Type Two, FS-901, MS65 PCGS.** The 1972 Type Two reverse is key to a *Guide Book* collection of Eisenhower dollars. It is best identified by the incused Caribbean islands on the small depiction of Earth. The present evenly struck and coruscating Gem displays rich lemon-gold and powder-blue toning. PCGS# 510592 Base PCGS# 97409

## PROOF EISENHOWER DOLLARS

### 1972-S Ike Dollar, PR70 Deep Cameo Popular Silver-Clad Proof

- 4375** 1972-S Silver PR70 Deep Cameo PCGS. Although the production of silver-clad proof 1972-S Eisenhower dollars topped 1.8 million pieces, relatively few examples have survived in the ultimate grade of PR70 Deep Cameo. This magnificent specimen exhibits sharply detailed frosty design elements that stand out in bold cameo contrast against the deeply reflective fields. The brilliant surfaces are impeccably preserved and eye appeal is tremendous. Population: 61 in 70 Deep Cameo, (6/15). NGC ID# 258T, PCGS# 97429

### 1972-S Ike Dollar, PR70 Deep Cameo Not Included in the Proof Sets

- 4376** 1972-S Silver PR70 Deep Cameo PCGS. From a mintage of 1.8 million pieces, the 1972-S silver clad proof Eisenhower dollars were sold individually in brown boxes and not included in the proof sets. This magnificent example offers fully struck design elements and deeply mirrored fields that contrast dramatically with the frosty devices to produce a stunning cameo effect. The brilliant surfaces are impeccably preserved. Population: 61 in 70 Deep Cameo, (6/15). NGC ID# 258T, PCGS# 97429

### 1973-S Eisenhower Dollar, PR70 Deep Cameo First Copper-Nickel Proof Dollar

- 4377** 1973-S Clad PR70 Deep Cameo PCGS. The San Francisco Mint struck copper-nickel clad Eisenhower dollars in proof format for the first time in 1973 (the 1971-S and 1972-S proofs were silver clad). This technically perfect example exhibits fully struck richly frosted design elements that contrast profoundly with the deeply mirrored fields. Population: 13 in 70 Deep Cameo, (6/15). NGC ID# 282A, PCGS# 97430

### 1977-S Ike Dollar, PR70 Deep Cameo Elusive Issue in the Ultimate Grade

- 4378** 1977-S PR70 Deep Cameo PCGS. Large heavy coins, like the Eisenhower dollar, acquire contact marks more easily than their smaller counterparts. Accordingly, even proof Eisenhower dollar, which are handled more carefully than business strikes, are seldom encountered with the technically perfect surfaces exhibited by this spectacular PR70 example. The design elements are fully detailed and richly frosted, providing intense cameo contrast with the deeply mirrored fields. Population: 56 in 70 Deep Cameo, (6/15). NGC ID# 282C, PCGS# 97437

### 1978-S Ike Dollar, PR70 Deep Cameo Technically Perfect, Final-Date Example

- 4379** 1978-S PR70 Deep Cameo PCGS. From a mintage of 3.1 million pieces, the 1978-S proof Eisenhower dollar represents the final year of the series. This magnificent PR70 example exhibits technically perfect surfaces, with deeply mirrored fields, richly frosted design elements, and profound cameo contrast. A few hints of champagne-gold toning add to the incredible eye appeal. Population: 50 in 70 Deep Cameo, (6/15). NGC ID# 282D, PCGS# 97438

## GOLD DOLLARS

- 4380** 1849-O Open Wreath MS61 NGC. Variety 3. The inaugural gold dollar issue in New Orleans had a mintage of 215,000 coins, but Mint State survivors are only infrequently seen and are almost always heavily abraded. This piece is pleasing for the grade, with light chatter being the only grade-limiting factor. Bright yellow-gold luster illuminates well-struck motifs on the obverse, while the reverse is noticeably lapped, a characteristic of this variety. NGC ID# 25BE, PCGS# 7508

- 4381** 1850-O MS61 PCGS. A peach-gold representative with glimpses of forest-green near the stars. Well struck and satiny. Clusters of small abrasions are noted near the mintmark and the 3 o'clock star. Easily the lowest mintage New Orleans gold dollar issue, with about one-fourth the production of the more famous Type Two 1855-O. Population: 10 in 61, 16 finer (6/15).  
Ex: Winter Collection (Stack's, 2/1974), lot 452; Goshen Collection (Stack's, 2/1978), lot 968. NGC ID# 25BJ, PCGS# 7512

**1851-C Dollar, Well-Struck AU58  
Considerable Natural Appeal**

**4382 1851-C AU58 PCGS. CAC. Variety 1.** Always a favorite of branch mint gold collectors, this Charlotte issue is the most-available of the series — although the availability is relative. Legions of type and mintmark specialists note every appearance, and natural, well-detailed examples receive the greatest attention. This sharp, near-Mint piece fills the bill, with greenish-gold patina that retains considerable luster. The surfaces are smooth and attractive. Population: 39 in 58, 69 finer (6/15). NGC ID# 25BL, PCGS# 7514

**4383 1852-C XF40 NGC. Variety 2.** A straw-gold representative of this challenging Charlotte issue. A lens reveals a few thin obverse marks and a mint-made strike-through near the A in DOLLAR. A meager 9,434 pieces were distributed. NGC ID# 25BR, PCGS# 7518

**4384 1852-O MS62 NGC. Variety 1.** The eye appeal on this Mint State 1852-O gold dollar is excellent for the grade and issue. Satiny yellow-gold surfaces reveal few abrasions, and the typical striking weakness in the centers is minor. Lightly clashed on the reverse and cracked radially from the obverse rim at 1 o'clock. Census: 51 in 62, 31 finer (5/15). NGC ID# 25BT, PCGS# 7520

**4385 1852-O MS62 NGC. Variety 1.** This example is unclashed, but there is a heavy radial die crack extending from the obverse rim at 1 o'clock toward the T in LIBERTY. Satiny yellow-gold luster is pleasant on the eyes, and there are no major abrasions. Minor striking weakness on the highest hair curls is characteristic of this New Orleans issue. Census: 51 in 62, 31 finer (5/15). NGC ID# 25BT, PCGS# 7520

**1853 Gold Dollar, MS65  
Green Label Holder**

**4386 1853 MS65 PCGS.** This intricately struck Gem type coin displays peach-gold centers and broad sea-green margins. Careful rotation beneath a lens reveals only inconsequential field grazes. The highest mintage issue of the series, since gold dollars were needed in commerce to replace hoarded silver. Certified in a green label holder. NGC ID# 25BU, PCGS# 7521

**1853 Gold Dollar, MS65  
Popular Type Coin**

**4387 1853 MS65 NGC.** A lustrous canary-gold example. The strike is sharp except on the upper fold of Liberty's hairbun. Infrequent and moderate field marks determine the grade. The 1853 is often selected by collectors to represent the Type One design. Certified in a prior generation holder. NGC ID# 25BU, PCGS# 7521

**4388 1853-O MS62+ NGC. CAC. Variety 1.** The 1853-O gold dollar is the final readily available gold dollar issue from this mint with a mintage of 290,000 coins. No gold dollars were struck in New Orleans in 1854, and only a limited 55,000-coin mintage was accomplished in 1855 — the final issuance of the denomination from the Louisiana facility. This 1853-O representative displays medium green-gold luster with satiny surfaces and minimal abrasions. The obverse dentils are weak, but the stars and central motifs on both sides are sharp. NGC ID# 25BX, PCGS# 7524

**4389 1854 Type Two MS62 NGC.** An attractive MS62 example of the short-lived Type Two design, with well-detailed design elements and lightly marked orange-gold surfaces that retain much of their original mint luster. NGC ID# 25C3, PCGS# 7531

**4390 1855 MS62 NGC.** The 1855 is one of the more available Type Two gold dollar issues, ideal for type purposes. This piece is uncommonly well-defined on the Liberty portrait, and the first L in DOLLAR is only slightly weak. Frosty green-gold luster is devoid of any major abrasions. NGC ID# 25C4, PCGS# 7532

**4391 1855-O AU50 PCGS. Variety 1.** A highly popular issue, the only O-mint gold dollar of the Type Two design. This is a highly appealing AU representative, showing original olive-gold patina with hints of luster in the protected areas and a few coppery overtones on each side. The strike is bold and the devices show little wear. NGC ID# 25C7, PCGS# 7535

**1856 Gold Dollar, Slanted 5, MS66  
Immediate Eye Appeal**

**4392 1856 Slanted 5 MS66 PCGS.** Glistening butter-gold surfaces provide this Premium Gem with immediate eye appeal. This piece exhibits generally good strike detail, although there is typical weakness on OLL and 85 at the reverse center. Shallow planchet flaws appear on the obverse near the central portions of AMERICA. Population: 10 in 66 (2 in 66+), 4 finer (6/15). NGC ID# 25C9, PCGS# 7540

**1857-C Gold Dollar, AU55**  
**Challenging Charlotte Issue**

**4393 1857-C AU55 PCGS. Variety 1.** The 1857-C is one of the most poorly produced issues in the Charlotte gold dollar series, and a noticeable degree of striking weakness and planchet problems are to be expected. This Choice AU coin is actually quite pleasing for the issue, with satiny green-gold surfaces. The higher hair curls on Liberty's portrait, as well as the lower reverse wreath and much of DOLLAR and the date are weakly defined; the border dentils lack sharp definition. Overall, the surface quality is above-average for the date. Population: 15 in 55, 13 finer (6/15). NGC ID# 25CE, PCGS# 7545

**4394 1869 MS63 NGC.** A 5,900-piece business strike mintage ensures the scarcity of the 1869 gold dollar in all grades. The lustrous peach-gold surfaces of the MS63 example presented here exhibit a sharp strike. Minor handling marks on each side preclude a higher grade. Census: 12 in 63, 19 finer (5/15).  
*Ex: Long Beach Signature (Heritage, 2/2007), lot 4258.* NGC ID# 25D5, PCGS# 7568

**1879 Gold Dollar, MS67**  
**Among the Finest Known**

**4395 1879 MS67 NGC.** Although a number of Mint State examples were saved at the time of issue, the 1879 gold dollar is seldom seen in MS67, and none are certified finer. This semiprooflike example yields warm orange-gold luster and well-preserved surfaces. The bowknot is a little weak, but the coin is otherwise sharply struck. LIBERTY is weakened by die lapping. Census: 17 in 67 (2 in 67 ★), 0 finer (6/15). NGC ID# 25DH, PCGS# 7580

**4396 1885 MS64 Prooflike NGC.** One of only 30 Prooflike examples certified by NGC. This Choice representative is sharply struck, with bright yellow-gold luster and reflective fields. A few minor abrasions are of little concern. Census: 8 in 64 Prooflike, 12 finer (6/15). PCGS# 77586

**4397 1887 MS65 PCGS.** Beautifully toned olive-green, lemon-gold, and fire-red. Lustrous and intricately struck with only infrequent wispy obverse field grazes. The reverse is essentially as made, and shows a delicate lintmark near the 7 in the date. A popular low mintage date. Certified in a green label holder. NGC ID# 25DS, PCGS# 7588

**1888 Gold Dollar, MS67**  
**Rich Mint Luster**

**4398 1888 MS67 PCGS.** For type collectors, few Type Three gold dollar issues are as suitable as the 1888; this date survives in fairly large numbers, and Superb Gems such as the present coin are occasionally available for collectors who desire outstanding quality. This piece displays satiny orange-gold luster and sharply rendered motifs. Population: 46 in 67 (1 in 67+), 5 finer (6/15). NGC ID# 25DT, PCGS# 7589

**4399 1889 MS66+ NGC.** A high-end Premium Gem example from the final year of the denomination, with vibrant mint luster and sharply detailed design elements throughout. The well-preserved orange-gold surfaces show a few highlights of rose. NGC ID# 25DU, PCGS# 7590

**4400 1889 MS66+ NGC.** This delightful gold dollar represents the final year of the denomination. The design elements are sharply detailed and the well-preserved orange-gold surfaces radiate vibrant mint luster on both sides. Eye appeal is outstanding. NGC ID# 25DU, PCGS# 7590

**1889 Gold Dollar, Flashy MS67**  
**Superb Mint Luster**

**4401 1889 MS67 PCGS.** As the final-year gold dollar, many examples of the 1889 issue were saved including many in high Uncirculated grades. As a result, the date is a frequent target of type collectors despite the limited mintage of 29,000 pieces. This Superb Gem example is exemplary in every way, with bursting mint luster throughout the sharply struck elements. Die clashing and a long, curving reverse die crack suggest a later state of the dies. PCGS has certified just six numerically finer examples (6/15). NGC ID# 25DU, PCGS# 7590

**1889 Gold Dollar, MS67**  
**Sharply Struck and Immaculately Preserved**

- 4402** 1889 MS67 NGC. The design elements of this delightful Superb Gem are sharply detailed with strong "Longacre" doubling on the reverse devices. The impeccably preserved orange-gold surfaces display satiny mint luster, with a few hints of rose. Eye appeal is terrific. From a mintage of 28,950 pieces. NGC has graded 16 numerically finer examples (6/15). NGC ID# 25DU, PCGS# 7590

### CLASSIC QUARTER EAGLES

- 4403** 1834 AU55 PCGS. Breen-6140, Variety 4, R.3. This Large Head Choice AU example has a good strike and substantial luster. The olive-gold surfaces are refreshingly unabraded. The fairly scarce Variety 4 shows wide repunching on stars 2 and 3, and a diagonal is absent within the M in AMERICA. NGC ID# 25FS, PCGS# 7692
- 4404** 1834 AU58 NGC. Breen-6138, Variety 1, R.1. A sun-gold Borderline Uncirculated example of the first Classic quarter eagle variety. The Small Head subtype exists only on the present die pair; replaced by the Large Head for the remainder of 1834 coinage. The borders and devices show luster and the only reportable mark is a brief line beneath the TE in STATES. NGC ID# 25FS, PCGS# 7692
- 4405** 1835 Breen-6141, Variety 6, R.2, AU53 NGC. Original orange and coppery-gold hues encompass each side of this About Uncirculated Classic Head type coin, and the surfaces are free of distractions. Weakness on Liberty's central hair curls and the upper-left portion of the shield is due more to strike than wear. NGC ID# 25FT, PCGS# 7693

**1836 Quarter Eagle, MS60**  
**Script 8, 'Head of 1835'**

- 4406** 1836 Script 8 MS60 NGC. Variety 11, R.2. The yellow-gold fields are slightly prooflike and remarkably unabraded for the grade, although a few light lines are visible under magnification. Only minor incompleteness of strike at the centers is visible, primarily at the eagle's shield and Liberty's hair curls at the ear. While the Script 8 variant is not as scarce as its Block 8 counterpart, all Classic quarter eagles are highly collectible and eagerly sought. This is a sharp example for the assigned grade. NGC ID# 25FU, PCGS# 7694
- 4407** 1836 Block 8, Head of 1837, Breen-6144, Variety 15, R.2, AU55 NGC. Lustrous for the grade with minor striking softness on the IB in LIBERTY and on the eagle's leg. The fields are slightly bright, but lack any significant abrasions.  
*Ex: Long Beach Signature (Heritage, 5/2007), lot 2152. PCGS# 97694*

- 4408** 1839-C — Improperly Cleaned — NGC Details. AU. Breen-6150, Variety 22, R.4. The 39 in the date is widely repunched and a vertical crack passes through the beak. This richly detailed apricot-gold example is mildly bright, but marks are minor aside from a field depression beneath the left (facing) wing and a scuff on the reverse rim near 5 o'clock. NGC ID# 25G4, PCGS# 7699

**1839-O AU53 Two and a Half**  
**Wide Fraction, Original Toning**

- 4409** 1839-O AU53 NGC. Breen-6152, Variety 27, R.3. Sea-green and caramel-gold blend throughout this original and well defined quarter eagle. Marks are trivial aside from an inconspicuous thin line beneath the beak. Light wear on the curls confirms brief circulation. The Wide Fraction variety of the sole New Orleans Classic two and a half issue. NGC ID# 25G7, PCGS# 7701

### LIBERTY QUARTER EAGLES

- 4410** 1843-D Small D VF35 PCGS. Variety 4-F. A lovely caramel-gold Dahlonega example. Evenly defined and only lightly abraded. Luster fills the legends and outlines the stars. Five die marriages are known despite a mintage of only 36,209 pieces. Housed in an old green label holder. NGC ID# 25GP, PCGS# 7730
- 4411** 1846 AU58 NGC. A limited mintage of 21,500 coins ensures the overall scarcity of this Philadelphia issue, as well as its rarity in Mint State. This near-Mint example displays well-struck devices with soft luster remaining in the fields. Yellow-gold surfaces show deeper amber-gold overtones in portions of the recesses. Census: 46 in 58, 24 finer (5/15). NGC ID# 25GZ, PCGS# 7740
- 4412** 1846-D XF40 PCGS. Variety 8-M. A very rare die variety that places the upright of the mintmark over the right end of the fraction bar. Luster outlines peripheral elements. The apricot-gold and powder-blue surfaces are pleasing. A search of our online archives suggests that the present lot may be the first Heritage auction appearance of a Dahlonega gold coin in a doily label holder. The rare PCGS holder generation was purportedly in use for only a single month, December 1989. NGC ID# 25H3, PCGS# 7742
- 4413** 1847-C AU50 PCGS. Variety 1. The 1847-C is the most available Charlotte quarter eagle issue, with possibly more than 450 pieces extant. It is also one of the best-struck overall, a characteristic which is showcased by the present example, which is only slightly worn on the high points of the design. The surfaces are free of distractions and present original olive-gold patina with coppery-amber overtones in the recesses. NGC ID# 25H6, PCGS# 7745
- 4414** 1851-C XF40 PCGS. Variety 1. The 1851-C quarter eagle is a challenging issue in all grades, with possibly fewer than 200 pieces known. Coins grading finer than XF are scarce, and Mint State representatives are significant rarities. This lightly circulated example displays pleasant olive-gold patina with rich coppery-amber overtones in the recesses. The detail is a little soft in the centers, a product of both weak striking and minor wear. Population: 16 in 40, 63 finer (5/15). NGC ID# 25HM, PCGS# 7760
- 4415** 1852-O AU58 NGC. Variety 2. A partly lustrous almond-gold New Orleans type coin. Smooth aside from a few hair-thin lines on the bust tip. The strike is fairly sharp, although the eagle's legs show softness. The donut-shaped mintmark is oversized and was likely engraved by hand on the working die, reminiscent of the 1854-O Huge O quarter. NGC ID# 25HU, PCGS# 7766

**4416 1856 MS63 PCGS.** This pre-Civil War Philadelphia issue is challenging in pleasing Mint State condition, and is rarely seen finer than the present Select example. Both sides display satiny yellow-gold luster with a lack of any distracting abrasions. The eagle's left (facing) leg shows the only mentionable striking softness. Population: 28 in 63, 32 finer (5/15). NGC ID# 25J7, PCGS# 7777

**4417 1857-S AU58 NGC.** The 1857-S quarter eagle is elusive in AU grades, and Mint State examples are rarely seen. This near-Mint piece is sharply detailed, with medium yellow-gold patina and hints of luster the peripheral recesses. Census: 63 in 58, 21 finer (6/15). NGC ID# 25JF, PCGS# 7785

**4418 1859-D — Improperly Cleaned — NGC Details. AU. Variety 22-N.** The 1859-D quarter eagle boasts a scant mintage of only 2,244 pieces, and is proportionately scarce in all grades. This well-detailed example is shows pale olive-gold patina, with deeper copper-red alloy toning in portions of the recesses. NGC ID# 25JM, PCGS# 7789

**4419 1860-S AU58 NGC.** The 1860-S quarter eagle is somewhat more elusive than many novices realize, partly due to a limited mintage of 35,600 coins. This near-Mint example displays modest friction over well-struck devices. Hints of luster compete with orange-gold overtones for dominance in the fields. Census: 24 in 58, 10 finer (6/15). NGC ID# 25JU, PCGS# 7793

#### 1862 Quarter Eagle, AU58 Lustrous, Original Patina

**4420 1862 AU58 NGC.** Gold coinage did not circulate to any extent during the Civil War, due to government policy and widespread hoarding. Mintages were reduced accordingly, and high-grade examples of gold coins from this era are seldom encountered today. This lightly circulated 1862 quarter eagle is well-detailed, with slightly subdued mint luster, and a dark grease strike-through on the reverse at 9 o'clock. NGC ID# 25JZ, PCGS# 7796

**4421 1866-S AU58 NGC.** The 1866-S quarter eagle is elusive in all grades, and rare in Mint State. This near-Mint example displays deep orange-gold patina with lavender overtones around the interior relief elements. Well-struck with just a touch of friction over the high points of the design. Census: 25 in 58, 9 finer (5/15). NGC ID# 25K8, PCGS# 7804

**4422 1878-S MS63 NGC.** The 1878-S Liberty quarter eagle is a scarce issue in MS63 condition, and finer examples are rare. This attractive Select specimen is sharply detailed, with lustrous antique-gold surfaces that show a few scattered minor contact marks. Census: 46 in 63, 19 finer (6/15). NGC ID# 25KZ, PCGS# 7829

**4423 1899 MS65 PCGS. CAC.** The 1897, 1898, and 1899 quarter eagles are all similar in mintage and availability, yet Gem or finer coins stubbornly elusive. This fully struck MS65 example displays flowing mint luster and tempting straw-gold coloration. CAC endorsed, with outstanding eye appeal. Population: 71 in 65 (1 in 65+), 28 finer (5/15). NGC ID# 25LP, PCGS# 7851

**4424 1903 MS65 PCGS.** Original peach-gold toning and dynamic cartwheel sheen invigorate this precisely struck and unmarked Gem. Trivial contact near the jaw denies near perfection. Those who lack this date within their holdings should consider the present piece. Housed in a green label holder.  
Ex: FUN Signature (Heritage, 1/2007), lot 5481. NGC ID# 25LU, PCGS# 7855

#### 1904 Quarter Eagle, MS67 Only One Finer at PCGS

**4425 1904 MS67 PCGS.** A fully struck and seemingly pristine type coin, this 1904 quarter eagle glows with frosty yellow-gold luster and is entirely devoid of objectionable flaws. This date is available in grades through MS66, but Superb Gems are scarce and only a handful grade finer than the present piece. Population: 50 in 67, 1 finer (6/15). NGC ID# 25LV, PCGS# 7856

#### 1904 Liberty Quarter Eagle, MS67 Only One Finer Coin at PCGS

**4426 1904 MS67 PCGS Secure.** From a mintage of 160,790 pieces, the 1904 Liberty quarter eagle is an available date in the context of the series. The population drops off dramatically at the MS67 level, however, and finer examples are virtually unobtainable. This delightful Superb Gem is sharply detailed and brightly lustrous, with impeccably preserved peach-gold surfaces. Population: 50 in 67, 1 finer (6/15). NGC ID# 25LV, PCGS# 7856

**4427 1906 MS65 PCGS. CAC.** The 1906 quarter eagle frequently comes with outstanding eye appeal, making it ideal for the type collector. The present example radiates full mint bloom and original golden color, beautifully showcasing incredibly clean surfaces and a perfect, needle-sharp strike. NGC ID# 25LX, PCGS# 7858

**4428 1907 MS66 NGC.** This final-year Liberty Head quarter eagle is ideal for type representation, showcasing sharp motifs and smooth, unabraded surfaces. Warm honey-gold patina blankets each side. NGC ID# 25LY, PCGS# 7859

### INDIAN QUARTER EAGLES

**4429 1908 MS64 PCGS.** The design elements are solidly struck, although the eagle's shoulder shows the always-present weakness — an engraving fault and not a product of deficient die pressure. Peach-gold color enlivens highly lustrous surfaces that are nicely preserved.  
Ex: FUN Signature (Heritage, 1/2007), lot 5509. NGC ID# 288Y, PCGS# 7939

**1908 Indian Head Quarter Eagle  
First-Year Premium Gem**

**4430 1908 MS66 PCGS.** First-year production issues faced the new Indian Head design when the Philadelphia Mint struck 564,800 quarter eagles. Improper die preparation resulted in some softness on the eagle's shoulder and wing. This Premium Gem demonstrates the weakness on the wing, but is sharply struck otherwise and the sunken design elements are sharp and attractive. Peach-gold surfaces display frosted luster and orange accents over the multilevel devices. Seldom seen any finer, with just five examples in a higher numeric grade by PCGS and NGC combined (6/15). NGC ID# 288Y, PCGS# 7939

**4431 1909 MS64 NGC.** A few light grazes appear on the Indian's profile, but the fields — particularly on the reverse — are smooth. The strike is sharp and each side displays satiny wheat-gold luster. Finer pieces are occasionally seen, although this example is more suitable for the budget-conscious collector. NGC ID# 288Z, PCGS# 7940

**4432 1910 MS64 NGC.** The 1910 is a fairly plentiful issue overall, suitable for type purposes. This Choice example is well-struck with satiny green-gold luster. Abrasions are minimal, and none are individually obvious. This issue's availability declines somewhat in finer grades. NGC ID# 2892, PCGS# 7941

**4433 1910 MS64 NGC.** A lovely prairie-gold example, notably upper-end for the grade, although a few minute ticks around IN GOD on the reverse preclude a Gem assessment. The strike is sharp and the luster is attractive and satiny. Infrequently seen finer. NGC ID# 2892, PCGS# 7941

**1910 Two and a Half, MS65+  
Few Finer**

**4434 1910 MS65+ NGC.** This high-end Gem displays satiny yellow-gold luster and well-detailed devices. A few trivial grazes appear in the left obverse field, but the reverse is seemingly devoid of contact. Marginally available in MS65, the 1910 Indian quarter eagle becomes conditionally rare any finer, with only 15 such coins certified by NGC (6/15). NGC ID# 2892, PCGS# 7941

**4435 1911 MS64 NGC.** A few tiny ticks in the left obverse field prevent a Gem grade on this 1911 quarter eagle, but the softly frosted luster and lovely wheat-gold color is nonetheless eye-appealing. It would be difficult to locate a visually finer example within the Choice grade level. NGC ID# 2893, PCGS# 7942

**4436 1911-D — Improperly Cleaned — NGC Details. AU.** An affordable, yet, well-detailed Strong D example, this lightly cleaned 1911-D quarter eagle shows mildly bright surfaces in a medium honey-gold hue. No obtrusive abrasions are present. NGC ID# 2894, PCGS# 7943

**4437 1911-D — Polished — NGC Details. AU.** Unnaturally bright surfaces are the product of light polishing on each side of this sharply detailed 1911-D quarter eagle, but another side effect is the softening of any small abrasions in the fields. The mintmark is bold and the upper-right obverse rim shows the diagnostic wire edge. NGC ID# 2894, PCGS# 7943

**1911-D Quarter Eagle, Appealing AU55**

**4438 1911-D AU55 PCGS.** Strong D. The sole absolute series key in all grades to the Indian Head quarter eagle series, the 1911-D has no other competition when conditional rarity is not considered. This Choice AU PCGS example boasts top-notch eye appeal on surfaces that show the expected trace of high-point wear but no mentionable contact. Attractive orange-gold color and the strong mintmark are other pluses. NGC ID# 2894, PCGS# 7943

**1911-D Indian Quarter Eagle, AU55  
Low-Mintage Series Key**

**4439 1911-D AU55 PCGS.** From a series-low mintage of 55,680 pieces, the 1911-D Indian quarter eagle is the acknowledged key to the series in all grades. This attractive Choice AU specimen shows just a trace of wear on the cheekbone and headdress, but the vivid orange-gold surfaces are lightly abraded and retain much of their original mint luster. NGC ID# 2894, PCGS# 7943

**1911-D Quarter Eagle, Unc Details  
Appealing Key Date**

**4440 1911-D — Improperly Cleaned — NGC Details. Unc.** Despite the NGC caveat, this Uncirculated Details 1911-D is a great-looking example of this key date that many collectors would consider themselves fortunate to own. A few light field hairlines and a couple of smallish marks on the Indian's cheek are the only mentionable distractions, but the surfaces retain good luster and much of their essential appeal.

**4441 1913 MS64 PCGS.** Rich orange and lilac overtones accentuate the beautiful luster of this Choice 1913 Indian quarter eagle. Striking sharpness is pleasing throughout. The obverse is seemingly a grade point finer, but the reverse shows a few minor grazes in the fields. NGC ID# 2897, PCGS# 7945

**4442 1913 MS64 NGC.** Indian gold enthusiasts will appreciate the frosty, delicate luster of this Choice 1913 quarter eagle, as well as the uncommonly smooth surfaces which show only a few small ticks near the Indian's profile. Lovely honey and olive-gold hues encompass each side. NGC ID# 2897, PCGS# 7945

**4443 1913 MS64 PCGS.** The obverse of this piece appears almost a grade point finer, although a few minor grazes in the reverse fields confirm the MS64 level. This 1913 Indian quarter eagle is well-struck and displays softly frosted wheat-gold luster. NGC ID# 2897, PCGS# 7945

**4444 1913 MS64 NGC.** A well-struck example, showing satiny golden luster with a few light, scattered ticks in the fields that limit the grade. The 1913 quarter eagle is plentiful in MS64, but finer examples are challenging to locate and are proportionately more costly to acquire. NGC ID# 2897, PCGS# 7945

**4445 1913 MS64+ PCGS.** For the budget-conscious collector seeking quality, this high-end near-Gem is hard to beat. The reverse is seemingly pristine, even under a lens; the obverse shows only a couple small ticks around the Indian's chin that preclude a full Gem grade. The strike is sharp and the surfaces display frosty wheat-gold luster. NGC ID# 2897, PCGS# 7945

**4446 1914 MS61 NGC.** The reddish-gold surfaces of this pleasing Mint State example show the expected number of minor contact marks for the grade and a few amber alloy spots on the obverse. The design elements are well-detailed throughout. NGC ID# 2898, PCGS# 7946

**4447 1914 MS62 NGC.** This is an affordable Mint State example of this better Philadelphia issue, with sharp design elements and pleasing yellow-gold luster. No major abrasions are observed, although a loupe reveals high-point grazes that limit the grade. NGC ID# 2898, PCGS# 7946

**4448 1914 MS63 NGC.** A well-struck and eye-appealing example with fewer abrasions than are expected for the grade. Satiny luster reveals only a few minor lines and grazes, none discernible to the unaided eye. The 1914 is a better date in high grade, which heightens demand for appealing MS63 and MS64 pieces. NGC ID# 2898, PCGS# 7946

**4449 1914 MS63 PCGS.** Deep amber and olive overtones accent the satiny apricot-gold luster of this minimally abraded Select Mint State example. Some slight incompleteness is noted on the lower headdress feathers, though the strike is otherwise sharp. The 1914 quarter eagle had the second-lowest mintage of the series (240,000 coins), and is one of the scarcer dates overall in Mint State. NGC ID# 2898, PCGS# 7946

**4450 1914 MS63 NGC.** Gold-orange luster is subtle yet strong on this luminous Select example. A few light surface grazes limit the grade, but none are individually noticeable. Though still available for a price in MS63 condition, the 1914 quarter eagle is a semikey of its series and commands appropriate recognition. NGC ID# 2898, PCGS# 7946

**4451 1914 MS63 NGC.** A Select example of this popular lower-mintage Pratt quarter eagle issue, amply lustrous and yellow-to-orange with a handful of long, shallow abrasions in the fields. The 1914 is recognized as a better date, particularly in high grade. NGC ID# 2898, PCGS# 7946

**4452 1914 MS63 NGC. CAC.** This Select example is free of obvious abrasions, and only trivial grazes in the fields prevent a finer grade. The coin is well-struck and displays satiny wheat-gold luster. The CAC-endorsement affirms the eye appeal. NGC ID# 2898, PCGS# 7946

---

### 1914 Quarter Eagle, MS64 Challenging Series Date

**4453 1914 MS64 NGC.** While the mintage is about four times that of the key 1911-D, the 1914 Philadelphia issue is scarce in its own right. Because the Indian Head quarter eagle series has no uncollectible rarities, this date is the second-most challenging (financially) of the series to acquire. It is eminently affordable in near-Gem condition, however, and this well-produced example would be a wise selection. Lustrous amber-gold surfaces are fully struck with only minor marks of any kind. NGC ID# 2898, PCGS# 7946

---

### 1914 Quarter Eagle, MS64 Original, Softly Lustrous Example

**4454 1914 MS64 ANACS.** While moderately available in near-Gem condition, this Philadelphia issue ranks second in scarcity for the series when in MS64 and finer grades. The original, orange-gold patina of this example conveys a stately look, with soft mint luster that augments the well-struck devices. A few stray marks in the left obverse field require magnification and do not lessen the appeal. NGC ID# 2898, PCGS# 7946

**4455 1914-D MS64 NGC.** The 1914-D is one of the most elusive Indian quarter eagle issues in Gem condition, making attractive Choice examples, such as the piece here offered, widely sought by casual date collectors. The surfaces are rich in honey-gold brilliance, with only a few light luster grazes in the reverse fields limiting the grade. The strike is crisp throughout. NGC has certified only 44 numerically finer representatives (6/15). NGC ID# 2899, PCGS# 7947

**4456 1914-D MS64 PCGS.** The 1914-D quarter eagle, with a mintage of less than half a million pieces, becomes more difficult to obtain in near-Gem and better grades. This MS64 specimen displays rich apricot-gold patina, which is joined by reddish-gold on the reverse. The design elements exhibit above-average striking impressions, including sharp definition on the eagle's shoulder and leg feathers, areas that are typically weak on this issue. A few inoffensive marks scattered about prevent a higher grade. NGC ID# 2899, PCGS# 7947

**4457 1914-D MS64 NGC.** This piece displays glossy, semireflective surfaces, a little unusual for this better Denver issue. Die fatigue is evident around the peripheries, although the legends and mintmark remain clear. Some weakness is seen in portions of the Indian's headdress feathers. NGC records only 44 numerically finer representatives (6/15). NGC ID# 2899, PCGS# 7947

**4458 1915 MS64 NGC.** Vibrant mint luster and sharply detailed design elements are the calling cards of this popular type coin, with well-preserved yellow and greenish-gold surfaces and outstanding eye appeal. NGC ID# 289A, PCGS# 7948

- 4459 1915 MS64 PCGS.** A bold strike and satiny luster complement rich apricot-gold hues on this Choice 1915 quarter eagle. Grade-limiting abrasions are limited to a few insignificant ticks, mostly in the reverse fields, none of which are obvious under a lens. NGC ID# 289A, PCGS# 7948

**1915 Two and a Half, MS65  
Rare Any Finer**

- 4460 1915 MS65 NGC.** A softly frosted Gem type coin, this 1915 Indian quarter eagle shows luminous wheat-gold surfaces and pleasantly sharp devices. Examples are infrequently seen in this grade, and just eight coins are numerically finer at NGC (6/15). The Indian quarter eagle series is a popular and challenging set to assemble in Gem grade. NGC ID# 289A, PCGS# 7948

**1929 Indian Quarter Eagle, MS65  
Final Year of Issue**

- 4461 1929 MS65 NGC.** The 1929 Indian quarter eagle is the last issue of the series, and this Gem approaches the best available quality. NGC and PCGS have each certified four finer examples (6/15). Both sides are fully lustrous with frosty yellow-gold surfaces and delicate rose overtones. NGC ID# 289F, PCGS# 7953

**1929 Indian Quarter Eagle, MS65  
Very Rare Any Finer**

- 4462 1929 MS65 PCGS.** Quarter eagles were produced for the last time in 1929, an important consideration for type purposes. This impressive Gem exhibits sharply detailed design elements and well-preserved orange-gold surfaces with vibrant mint luster on both sides. The 1929 is a scarce issue at the MS65 level, and finer coins are very rare. PCGS has graded four numerically finer examples (6/15). NGC ID# 289F, PCGS# 7953

**THREE DOLLAR GOLD PIECES**

- 4463 1854 AU55 NGC.** An excellent collector-grade type coin, this first-year three dollar gold piece shows warm honey-gold patina overall, with some luster shining in the protected regions of the fields. Smooth and attractive with minimal wear over the motifs. NGC ID# 25M3, PCGS# 7969

- 4464 1854 MS61 NGC.** The 1854 three dollar gold piece is always popular as the first year of the denomination. This attractive Mint State specimen exhibits well-detailed design elements and lustrous orange-gold surfaces that show the minimum number of minor contact marks for the grade. NGC ID# 25M3, PCGS# 7969

**1854 Gold Three Dollar, MS62  
Smooth, Appealing Surfaces**

- 4465 1854 MS62 NGC.** The 1854 is a popular type coin in the three dollar gold series, being moderately available in Mint State and ranking as the first issue of the series. This piece is well-struck, with satiny peach-gold luster. No major abrasions are present, although a glass reveals light contact on the devices that limits the grade. NGC ID# 25M3, PCGS# 7969

**1854-O Three Dollar, Choice XF**

- 4466 1854-O XF45 NGC. Variety 2.** Moderately circulated and problem-free. Luster surrounds the letters and devices. The unblemished apricot-gold surfaces show occasional small strike-throughs, as made. The usual '54-O variety with die lapping apparent on the wreath ribbon. Both New Orleans and Dahlonega struck three dollar pieces in 1854, the first year of the series. But only the Philadelphia and San Francisco Mints would coin the denomination in subsequent years. NGC ID# 25M5, PCGS# 7971

- 4467 1854-O — Improperly Cleaned — NGC Details. AU. Variety 2.** Liberty's curls show light wear, but luster accompanies letters and devices. Faintly hairlined beneath iridescent lemon-gold patina. The obverse border displays minor mint-made strike-throughs. We note a nick below the 3, and a small area of smoothing on the field beneath the date. A scarce and popular Southern gold issue. NGC ID# 25M5, PCGS# 7971

- 4468 1856-S XF40 NGC.** Medium S. One of only a handful of San Francisco issues in the three dollar gold series, the 1856-S had a limited mintage of 34,500 coins. This lightly circulated example displays undeniably original orange and coppery-gold hues, with problem-free surfaces and pleasing detail on the relief elements. NGC ID# 25M9, PCGS# 7975

**1878 Gold Three Dollar, MS63  
Softly Lustrous Type Coin**

- 4469** 1878 MS63 NGC. A pleasing type coin, this Select 1878 three dollar gold piece displays shimmering rose-gold luster with soft overtones of olive on the relief elements and in the exposed regions of the fields. The bowknot is a touch soft, as usual, although the remainder of the design elements show pleasing definition. NGC ID# 25MZ, PCGS# 8000

**1883 Three Dollar, MS60  
A Popular, Low-Mintage Issue**

- 4470** 1883 MS60 NGC. The 1883 three dollar gold piece is a popular date because of its low mintage of 900 pieces. The semiprooflike fields of this MS60 example display mild contrast with the motifs when the coin is tilted slightly under a light source. Brassy-gold surfaces reveal light handling marks that determine the grade.  
Ex: *Long Beach Signature* (Heritage, 2/2012), lot 4739. NGC ID# 25N6, PCGS# 8005

**1887 Three Dollar, MS64  
Swirling Luster**

- 4471** 1887 MS64 PCGS. Just 6,000 business strikes make up this late-date three dollar gold issue, and that is one of the *higher* outputs for the post-1878 period. The denomination's characteristic swirling luster is yellow-orange and apricot-gold on this piece, with a handful of coppery elements most visibly at the bottom-left corner of the first A in AMERICA. Population: 77 in 64 (2 in 64+), 34 finer (6/15). NGC ID# 25NA, PCGS# 8009

**EARLY HALF EAGLES**

**1810 Large Date, Large 5 Half Eagle, XF40  
Available BD-4 Variety**

- 4472** 1810 Large Date, Large 5, BD-4, R.2, XF40 ANACS. Bass-Dannreuther Die State c/b. Despite extensive (and mostly small) contact marks throughout both sides, the light die crack to the right of the 8 can be discerned, running first to the lowest hair curl and thence on to the clasp of Liberty's gown. A couple of larger marks appear below Liberty's ear, on her cheek, and in the left obverse field. The patina runs the gamut from yellow-gold through orange and some deeper areas of brownish-gold nearer the rims. This should be an affordable entry point for this popular and relatively available half eagle variety. PCGS# 507598 Base PCGS# 8108

**1811 Half Eagle, BD-1, Sharp AU Details**

- 4473** 1811 Tall 5, BD-1, High R.3 — Smoothed — PCGS Genuine. AU Details. Bass-Dannreuther Die State b/d, lightly clashed. With as many as 250 examples believed known, BD-1 is fairly plentiful in the context of early half eagles, but it remains scarcer than BD-2, which survives to the extant of as many as 300 pieces. This sharply detailed and evenly struck representative displays warm honey-gold patina. Expert smoothing of the fields has erased most minor abrasions from view. PCGS# 507600 Base PCGS# 8110

## LIBERTY HALF EAGLES

### 1839-D Half Eagle, AU Details One-Year Type, Scarce Variety

- 4474 1839-D — Improperly Cleaned — NCS. AU Details. Variety 1-A.** The position of the obverse mintmark to the left above the 3 in the date confirms the Variety 1-A attribution, which is considerably scarcer than the more often-seen mintmark that is centered over 39. Regardless of variety, the Dahlonega half eagle is scarce in all grades. Fewer than 250 examples are thought to survive in all grades. This medium-gold representative retains considerable appeal despite a light cleaning. The strike is sharp, and the numerous shallow abrasions are largely inconspicuous.

### 1843-D Five Dollar, AU53 Elusive Small D Variety

- 4475 1843-D Small D AU53 PCGS. Variety 9-F.** An underrated Dahlonega variety, the 1843-D Small D is significantly rarer than its Medium D counterpart. The present lemon-gold example shows only minimal marks for the type and grade. The curls and fletchings are incompletely brought up, but peripheral elements are bold. Population: 3 in 53, 9 finer (6/15). PCGS# 98215
- 4476 1844-D XF40 PCGS. Variety 11-G.** A lemon-gold representative with noticeable luster and an absence of mentionable marks. The centers show the moderate incompleteness of strike customary for the Dahlonega type issue. Encased in an old green label holder. NGC ID# 25T9, PCGS# 8221

### 1846-D Half Eagle, AU50 Ample Radiant Luster

- 4477 1846-D AU50 PCGS. Variety 15-H.** An apricot-gold Dahlonega half eagle with considerable bright luster about the legends, stars, and vertical shield stripes. The strike is good, and moderate marks are confined to the upper reverse field. The 1846-D has four different die varieties; every possible combination of a low or high date paired with a normal or widely repunched mintmark. All four varieties are collectible. NGC ID# 25TH, PCGS# 8228

- 4478 1846-O XF45 NGC. Variety 1.** Luster illuminates the legends and plumage of this green-gold No Motto half eagle. Small marks are distributed but never distracting. The strike is good despite the usual blending on the curls. A scarce New Orleans issue. NGC ID# 25TK, PCGS# 8230

- 4479 1848-C — Cleaning — PCGS Genuine. AU Details. Variety 1.** Possibly more than 250 examples of the 1848-C half eagle survive, but most grade only in the VF to XF range. This piece is lightly cleaned but nonetheless displays strong AU detail with medium wheat-gold patina. Scattered abrasions are not unusual for the issue, and are seen even on otherwise problem-free coins. NGC ID# 25TT, PCGS# 8237

- 4480 1855-D Medium D VF30 NGC. Variety 38-CC (formerly 32-W).** The 1855-D half eagle is an elusive date in all grades with likely only 125 to 150 pieces known; it is the scarcest Dahlonega five of this decade. This mid-grade circulated example offers the budget-conscious collector an obtainable, yet, appealing example. Both sides are evenly worn with medium bronze-gold patina. Tiny bits of verdigris in the crevices attest to the originality of the surfaces. PCGS# 98263

### 1857-C Five, Well-Struck AU55 Few Marks for the Grade

- 4481 1857-C AU55 PCGS. Variety 1.** The surface quality is especially smooth for this Choice About Circulated Charlotte five. Minor abrasions exist, but they are shallow and well-hidden, while a sharp strike commands attention. The 1857 Charlotte issue is among the more available C-Mint half eagles, but they increase dramatically in scarcity approaching Mint State grades. The glossy appeal of this AU55 coin will satisfy the most discriminating bidder. Population: 17 in 55, 31 finer (6/15). NGC ID# 25V3, PCGS# 8272

### 1868 Liberty Five, AU55 Elusive, Low-Mintage Issue

- 4482 1868 AU55 NGC.** The bright yellow-gold surfaces of this attractive Choice AU example are minimally abraded and show highlights of green at certain angles. Just a trace of wear shows on the strongly impressed design elements and the fields exhibit prooflike reflectivity in sheltered areas. From a tiny business-strike mintage of 5,700 pieces. Census: 8 in 55, 15 finer (6/15). NGC ID# 25W5, PCGS# 8315

**1873 Half Eagle, MS63  
Frosty Closed 3 Example**

**4483 1873 Closed 3 MS63 PCGS.** The Closed 3 and Open 3 half eagle varieties are similar in overall availability and are scarce in Mint State. The Closed 3 logotype is unmistakable on this piece. Frosty rose-gold luster illuminates the fields while the devices show pleasing definition, save for the eagle's neck and the arrow fletchings which are a touch soft. Light, scattered abrasions limit the grade. Population: 10 in 63, 8 finer (6/15). NGC ID# 25WJ, PCGS# 8329

**4484 1879-S MS63 PCGS.** The bright yellow-gold surfaces are sharply struck and offer generous luster. A few scattered, small ticks are in concert with the grade but far from overt. Population: 28 in 63, 12 finer (6/15). NGC ID# 25X9, PCGS# 8350

**4485 1881 MS64+ NGC. CAC.** A high-end near-Gem, this 1881 half eagle shows only a few trivial ticks here and there on each side, none individually significant. The devices are sharp and the frosty surfaces display warm rose-gold luster. Scarce any finer. NGC ID# 25XD, PCGS# 8354

**4486 1885 MS64+ PCGS. CAC.** The 1885 Liberty half eagle is very rare in grades above the MS64 level. This sharply detailed near-Gem displays well-preserved lustrous surfaces and sharply detailed design elements throughout. Population: 87 in 64 (7 in 64+), 2 finer (6/15). NGC ID# 25XS, PCGS# 8367

**4487 1885-S MS65 PCGS.** A sharply struck example with frosty green-gold luster. There are a few grade-consistent ticks in the left obverse field, but these are not distracting. Population: 57 in 65 (1 in 65+), 5 finer (5/15). NGC ID# 25XT, PCGS# 8368

**4488 1887-S MS64 NGC.** Conditionally rare in high grades, well shy of a dozen Gem examples exist of this high-mintage San Francisco date, making sharp near-Gem coins a target for perceptive gold specialists. The current example will be the subject of strong interest based on its eye appeal alone, although the technical merits will not go unnoticed either. Sunset-gold colors float over lustrous, reflective fields. Green accents occupy the borders. A sole reeding mark in the left obverse field is worthy of mention, as is some light field chatter surrounding the eagle. Census: 67 in 64 (1 in 64+), 5 finer (5/15). NGC ID# 25XW, PCGS# 8371

**4489 1887-S MS64+ NGC.** The 1887-S Liberty half eagle is a condition rarity in grades above the MS64 level. This high-end Choice example is sharply detailed and lustrous, with yellow-gold surfaces that show some insignificant chatter in the reverse fields. Census: 67 in 64 (1 in 64+), 5 finer (6/15). NGC ID# 25XW, PCGS# 8371

**4490 1892-CC MS61 NGC. Variety 1-A.** Cartwheel luster dominates the borders, while the open fields are semiprooflike. The sun-gold surfaces are well struck and without any consequential marks. Ex: *Houston Signature* (Heritage, 11/2012), lot 5011. NGC ID# 25Y7, PCGS# 8380

**4491 1893-CC AU53 PCGS. Variety 2-A.** An orange-gold and apple-green representative. Well detailed and inoffensively abraded. The 1893-CC is scarcer than the 1891-CC and 1890-CC, but slightly more available in better grades than the 1892-CC. NGC ID# 25YB, PCGS# 8384

**4492 1893-O MS62 NGC. Variety 1.** New Orleans only struck Motto half eagles between 1892 and 1894, since the facility concentrated on Morgan dollar and Barber issues following its 1879 return to production. This charming and coruscating honey-gold example has a good strike and lacks mentionable marks. NGC ID# 25YC, PCGS# 8385

**4493 1893-S MS64 NGC.** A few faint surface grazes on the relief elements are all that limit the grade on this near-Gem 1893-S half eagle. The strike is sharp and each side displays frosty wheat-gold luster. Conditionally scarce this fine and rare as a Gem. This piece shows recutting within the upper loop of the first 8 in the date, not one of the varieties listed in the *Cherrypickers'* reference. NGC ID# 25YD, PCGS# 8386

**1894-S Half Eagle, Lustrous MS62  
Conditionally Elusive So Fine**

**4494 1894-S MS62 NGC.** Generous mint luster plays over each side of this late-series S-mint half eagle, from a surprisingly small mintage figure of only 55,900 pieces. Magnification reveals a few minor ticks, none overt, on surfaces that show a fairly sharp strike and excellent eye appeal throughout. Most survivors are well-circulated; this MS62 NGC example is one of eight in this grade, and only four are finer (5/15). NGC ID# 25YG, PCGS# 8389

**4495 1895 MS65 NGC.** Frosty honey-gold surfaces are largely free of abrasions, and the design elements are boldly brought up. This Philadelphia issue is available in the absolute sense, but Gem examples are scarce and anything finer is a rarity. Census: 78 in 65 (3 in 65+), 11 finer (5/15). NGC ID# 25YH, PCGS# 8390

**1896-S Five Dollar, MS62  
Better San Francisco Issue**

**4496 1896-S MS62 PCGS.** A better date in Mint State, the 1896-S half eagle is notably rare finer than the present MS62 example. The design elements are sharply rendered and the surfaces display bright yellow-gold luster. Scattered abrasions determine the grade, but none are individually obtrusive. Population: 16 in 62, 12 finer (6/15). NGC ID# 25YL, PCGS# 8393

**4497 1897 MS64 PCGS.** The 1897 Liberty five is a fairly plentiful issue for the period, but pieces grading finer than this Choice example are scarce. This piece displays bold motifs amid frosty yellow-gold luster. A few light grazes on the cheek and in the field limit the grade, but pose little distraction. PCGS lists only 30 numerically finer coins (6/15). NGC ID# 25YM, PCGS# 8394

**4498 1899 MS64+ NGC. CAC.** This Plus-graded 1899 five dollar is boldly struck and displays vibrant yellow-gold luster. A few light abrasions on the obverse portrait limit the grade, but the CAC green label affirms the Choice-quality surfaces. NGC ID# 25YS, PCGS# 8398

**4499 1901/0-S FS-301 MS63 NGC.** An important *Guide Book* variety, showing the final 1 in the date entered over a previous 0. This example shows sharp devices and satiny yellow-gold luster. The coin appears at least a grade point finer to the unaided eye, although minor handling marks on the cheek, visible with a loupe, limit the grade. PCGS# 145720 Base PCGS# 8403

**4500 1904 MS65 PCGS.** A nice sharp strike, close to full, with beaming luster and lovely orange-gold color make this well-preserved Gem one of the nicest survivors of its cohort. The issue is seldom seen in finer grades. Population: 68 in 65 (1 in 65+), 22 finer (5/15). NGC ID# 2524, PCGS# 8409

### 1905 Half Eagle, MS65 Clean, Frosty Surfaces

**4501 1905 MS65 PCGS.** A frosty Gem example of this conditionally elusive Philadelphia issue, and firmly within the assigned grade. Both sides are devoid of all but the most trivial grazes on the high points of the motifs, and luminous straw-gold surfaces deliver undeniable eye appeal. Population: 43 in 65 (1 in 65+), 17 finer (5/15). NGC ID# 2526, PCGS# 8411

## INDIAN HALF EAGLES

**4502 1908-D MS63+ NGC. CAC.** Uncommonly strong, frosty luster garners the Plus designation on this first-year Denver half eagle, although a few small ticks preclude a full MS64 grade. The strike is sharp and the eye appeal is excellent. NGC ID# 28DF, PCGS# 8511

**4503 1908-D MS64 NGC.** A few scattered high-point ticks comprise the grade, complementing rich apricot-orange color and flowing luster throughout both sides. The Gem level of this issue is seldom seen; NGC shows only five pieces in MS65 and none finer (6/15). NGC ID# 28DF, PCGS# 8511

**4504 1908-D MS64 NGC.** The lustrous orange and rose-gold surfaces of this attractive first-year specimen show only scattered minor contact marks and the design elements are sharply detailed throughout. NGC has graded only five numerically finer examples (6/15). NGC ID# 28DF, PCGS# 8511

**4505 1909 MS64 NGC.** Softly frosted surfaces display glowing honey-gold luster on this Choice 1909 Indian half eagle. The design elements are sharply rendered and only a few trivial grazes are observed in the fields. Finer examples are seldom offered. NGC ID# 28DH, PCGS# 8513

**4506 1909 MS64 PCGS.** This satiny example looks high-end for the grade, despite the lack of a Plus designation. The headdress feathers and the eagle's breast, wing, and leg feathers are boldly rendered. The light khaki-gold surfaces display few marks for a near-Gem designation. NGC ID# 28DH, PCGS# 8513

**4507 1909 MS64 NGC.** The 1909 Indian half eagle can be located in MS64 condition with a little patience and searching, but the issue is very scarce in higher grades. The design elements are sharply struck, including the feathers of the headdress and the eagle's shoulder feathers. Reddish-gold surfaces are devoid of significant contact marks, and a few darker areas are visible over each side. NGC ID# 28DH, PCGS# 8513

**4508 1909 MS64 PCGS.** Needle-sharp definition is apparent on all design elements of this attractive Choice example, with vivid orange-gold surfaces that show only minor signs of contact and vibrant mint luster on both sides. NGC ID# 28DH, PCGS# 8513

### 1910-D Five Dollar, MS63 Better Date in High Grade

**4509 1910-D MS63 NGC.** The 1910-D Indian half eagle is accessible in MS63, but finer representatives are seldom available. This piece is sharply struck, with original wheat-gold luster that shows occasional olive overtones in the fields. A scattering of light abrasions is present on each side. NGC has certified only 33 numerically finer representatives (6/15). NGC ID# 28DL, PCGS# 8518

**4510 1910-S MS61 NGC.** This richly original 1910-S half eagle is well-struck and displays satiny rose-gold luster in the recesses with deeper olive overtones in the fields. Scattered abrasions accompany the grade. This issue is challenging in Mint State, seldom seen finer than the present piece. NGC ID# 28DM, PCGS# 8519

**4511 1910-S MS61 PCGS. CAC.** CAC-approved with no major abrasions observed; scattered light grazes account for the grade. This semikey-date coin is well-struck, displaying medium apricot-gold patina. Finer examples are infrequently encountered. NGC ID# 28DM, PCGS# 8519

**4512 1911 MS64 NGC.** Vibrant mint luster radiates from the well-preserved orange-gold surfaces of this attractive Choice example and the design elements are sharply detailed throughout. Eye appeal is outstanding. NGC ID# 28DR, PCGS# 8520

**4513 1911-D AU53 PCGS.** Although not as highly heralded as its quarter eagle counterpart, the 1911-D Indian half eagle is actually the scarcer coin in high grade. This AU representative is well-detailed, with smooth olive-gold surfaces. The mintmark is clear. NGC ID# 28DR, PCGS# 8521

**4514 1911-S MS61 PCGS.** Although not as scarce as its Denver counterpart, the 1911-S Indian five is more elusive in Mint State than many collectors realize. This example displays well-struck motifs amid deep orange and lavender-gold patina. A few ticks in the field behind the eagle's head are the only abrasions of note. NGC ID# 25ZM, PCGS# 8522

**4515 1911-S MS62 NGC.** This attractive MS62 specimen is sharply detailed in most areas, with just a touch of softness on the eagle's shoulder. The pleasing orange-gold surfaces show a few scattered, grade-consistent contact marks. NGC ID# 25ZM, PCGS# 8522

**4516 1911-S MS62 PCGS.** The pleasing orange-gold surfaces of this attractive MS62 example show a scattering of minor contact marks, with vibrant mint luster on both sides. The design elements are well-detailed and overall visual appeal is strong for the grade. NGC ID# 25ZM, PCGS# 8522

**4517 1911-S MS62 NGC.** Mint State examples of this San Francisco issue are somewhat elusive. Although a few alloy spots are seen above the bonnet and on the Indian's cheekbone, abrasions are minor and widely separated on the high points. This example is well-struck and pleasingly lustrous for the grade. NGC ID# 25ZM, PCGS# 8522

**1911-S Indian Head Five, MS63  
Elusive in Mint State**

**4518 1911-S MS63 PCGS.** Despite a mintage of more than 1.4 million coins, the 1911-S half eagle is a challenging issue in Mint State; most such coins grade MS62 or lower, and anything finer than the present MS63 coin is rare. This piece displays satiny orange-gold luster without any major abrasions. Trivial striking weakness is evident on the lower headdress feathers. PCGS has seen 32 numerically finer submissions (6/15). NGC ID# 25ZM, PCGS# 8522

**4519 1912 MS64 PCGS.** With a rather substantial mintage of 790,000 pieces and a reputation for being well-made, the 1912 half eagle is a popular choice for type representation, though it becomes scarce at the Gem grade level and finer pieces are virtually unobtainable. This near-Gem exhibits bold design definition and satiny peach-gold luster overall. The surfaces are generally well-preserved, with only a few small marks in the reverse fields precluding a finer grade. NGC ID# 28DS, PCGS# 8523

**4520 1912-S MS61 NGC.** The 1912-S Indian half eagle is one of the most challenging issues of the series in high grade. This attractive Mint State specimen offers sharply detailed design elements (aside from the typically soft mintmark) and lightly marked, lustrous orange-gold surfaces. NGC has graded 82 numerically finer examples (6/15). NGC ID# 25ZN, PCGS# 8524

**4521 1913 MS64 PCGS.** Strong luster and a sharp strike add to the eye appeal of this attractive near-Gem example. The 1913 half eagle is a great representative of the series for type-set purposes due to its overall excellent surface qualities. PCGS has awarded higher numeric grades to only 53 pieces (6/15). NGC ID# 28DT, PCGS# 8525

**4522 1914 MS63 PCGS.** The pleasing yellow and orange-gold surfaces of this attractive Select specimen show a few scattered contact marks, with vibrant mint luster on both sides. The design elements are sharply detailed and eye appeal is quite strong. NGC ID# 28DU, PCGS# 8527

**4523 1914 MS63 PCGS. CAC.** Original, satiny surfaces show intermingled shades of honey, olive, and lilac-gold luster on this Select 1914 Indian half eagle. The design elements are well brought up and the only grade-limiting abrasions are a few light grazes in the left reverse field. CAC-endorsed in an old green label holder. NGC ID# 28DU, PCGS# 8527

**1914-D Half Eagle, MS63  
Appealing for the Grade**

**4524 1914-D MS63 NGC.** This Select example shows smooth, satiny surfaces, devoid of any major abrasions, although scattered light grazes are discernible with a glass. Peach and honey-gold hues warm the luster. The strike is a little soft on the lower headdress feathers, but eagle's feathers are well-defined. NGC ID# 28DV, PCGS# 8528

**4525 1915-S AU58 PCGS.** This is an undeniably original, near-Mint example of a San Francisco issue that is notably elusive any finer. Both sides display deep orange-gold patina with occasional overtones of olive where high-point friction is observed. Lightly abraded, as expected for the grade. NGC ID# 25ZR, PCGS# 8531

**4526 1916-S MS61 NGC.** The 1916-S appeals to collectors as the final Indian half eagle issue from the San Francisco Mint, as well as the second-to-last date in the series. This lower-end Mint State representative is pleasing for the grade, with well-struck devices and consistent rose-gold surfaces. Scattered abrasions limit the grade. NGC ID# 28DY, PCGS# 8532

**1916-S Five Dollar, MS62  
Final S-Mint Issue**

**4527 1916-S MS62 PCGS.** The 1916-S Indian half eagle is essential for a complete date or date and mintmark set, as it is the only issue of the year. This example displays satiny bronze-gold luster with light, scattered abrasions. The recesses on either side of the eagle's neck are not fully impressed, but the devices are otherwise sharp. NGC ID# 28DY, PCGS# 8532

## EARLY EAGLE

### 1803 Eagle, AU Details BD-5, Star on Cloud

- 4528 1803 Large Reverse Stars, Star on Cloud, BD-5, High R.4 — Repaired — PCGS Genuine. AU Details.** Bass-Dannreuther Die State g/b, reverse cracked. BD-5 is a scarce variety with likely only 90 to 110 examples believed known. This die pairing is known as the Extra Reverse Star variety, showing a 14th star on top of the cloud beneath the F in OF. It is faint on the current coin, but present. This extra star is from a noticeably smaller punch than the primary stars, and it is unclear as to how the impression might have happened. This piece is evenly struck with strong detail, although a few trivial adjustment marks appear above the eagle's head on the reverse. Lightly tooled, with bright yellow-gold patina.

## LIBERTY EAGLES

- 4529 1842 Large Date AU50 PCGS.** A well defined and original peach-gold No Motto eagle. No abrasions are consequential, and AU examples are surprisingly scarce. Struck during the term of the "Accidental President," John Tyler. Although he left office 170 years ago, Tyler has two living grandchildren, as of March 2015. Population: 16 in 50, 25 finer (6/15). NGC ID# 262K, PCGS# 8584
- 4530 1844-O AU53 PCGS. CAC. Variety 1.** Five die marriages of the 1844-O are confirmed from a relatively low New Orleans mintage of 118,700 pieces. A sharply defined apricot-gold example. Marks are minor for the issue despite wispy field abrasions near the neck curls. Population: 28 in 53, 21 finer (5/15). NGC ID# 262T, PCGS# 8591
- 4531 1850 Large Date AU50 NGC.** The 1850 Liberty eagle with a Large Date is the more available of the two varieties of this year. This lightly worn and lightly abraded AU example offers lustrous greenish-gold surfaces that show a few highlights of rose. NGC ID# 2637, PCGS# 8603
- 4532 1850 Small Date XF45 PCGS.** The Small Date 1850 Liberty eagle is scarce and underappreciated in today's market. This attractive Choice XF specimen shows some light wear on the well-detailed design elements and the lightly abraded orange-gold surfaces retain traces of original mint luster. Population: 28 in 45, 39 finer (6/15). NGC ID# 2638, PCGS# 8604
- 4533 1852 AU55 PCGS.** The 1852 eagle is a challenging issue in the finer AU grades and Mint State pieces are rare. This Choice AU example displays warm honey-gold patina with sharp detail on the devices and remnants of luster in the protected areas of the fields. Population: 21 in 55, 27 finer (6/15). NGC ID# 263C, PCGS# 8608

### 1854-S Ten Dollar, AU55 Seldom Seen Finer

- 4534 1854-S AU55 NGC.** Despite having one of the higher mintage figures of the period (more than 123,000 coins), the 1854-S eagle is elusive in AU grades and Mint State examples are noted rarities. This Choice AU representative displays medium olive-gold patina, with minimal wear over the design elements and hints of luster remaining in the protected areas of the fields. Scattered abrasions accompany brief circulation. NGC ID# 263K, PCGS# 8615

- 4535 1855-O Fine 15 PCGS. Variety 2.** With a mintage of only 18,000 pieces, the 1855-O eagle is elusive in all grades; Mint State coins are extremely rare. This piece is an unusually well-circulated example, with extensive but even wear on each side. The surfaces are smooth bronze-gold and problem-free. Suitable for a budget-friendly date set of New Orleans gold eagles. Population: 2 in 15, 67 finer (6/15). NGC ID# 263M, PCGS# 8617

- 4536 1859 XF45 PCGS.** Lightly abraded and lightly worn, this pleasing Choice XF specimen displays vivid orange-gold surfaces with prooflike reflectivity in sheltered areas. From a mintage of 16,093 pieces. Population: 22 in 45, 38 finer (6/15). NGC ID# 263Z, PCGS# 8628

- 4537 1872-S XF45 PCGS.** Available in lower grades, the scarcity of the issue in conditions approaching Mint State is dramatically evident in the prices realized (when such a coin can be found). This Choice XF example is a terrific alternative to a higher grade, with considerable golden luster remaining beneath the orange-gold patina. Numerous abrasions are noticeably mellowed by the time spent in circulation. Population: 26 in 45, 31 finer (5/15). NGC ID# 2653, PCGS# 8665

- 4538 1878 MS62 NGC. CAC.** European hoards apparently increased the available population of survivors from the 73,780-piece mintage over the past several decades, and while the issue is not as rare in Mint State as once thought, it remains scarce. This example is a light olive-gold coin with marbled mint luster and a sharp strike. CAC endorsed. Census: 25 in 62, 15 finer (5/15). NGC ID# 265J, PCGS# 8680

### 1879 Liberty Eagle, MS63 Seldom Seen Finer

- 4539 1879 MS63 PCGS.** The 1879 is one of the more plentiful ten dollar gold issues of the period, but it is only marginally available in Mint State and pieces grading finer than MS63 are rare. This Select example shows original honey and orange-gold luster with frosty surfaces and minimal abrasions. A sharp strike completes the eye appeal. Population: 28 in 63, 12 finer (6/15). NGC ID# 265M, PCGS# 8683

**4540 1880-S MS63 NGC.** Tall S. Two different mintmark sizes and placements were used on the '80-S eagle. The Tall S is more available than its Tiny S counterpart. This is a sea-green and orange-gold example with good luster, a crisp strike, and the expected number of small marks. Census: 42 in 63, 4 finer (5/15). NGC ID# 265V, PCGS# 8690

**1882-CC Eagle, Choice XF  
Green Label Holder**

**4541 1882-CC XF45 PCGS. Variety 2-A.** Another difficult entry in the Carson City ten dollar series. From the mintage of 6,764 pieces, approximately 300 coins have survived, generally in VF to AU grades. The present yellow-gold example has minimal wear and many pockets of bright luster, but the upper reverse displays a few thin marks. The obverse and lower reverse are minimally abraded for the grade. Certified in a green label holder. NGC ID# 2663, PCGS# 8696

**4542 1883 MS63 PCGS.** Eagle production at the Philadelphia Mint declined to just more than 208,000 coins in 1883 (down from more than 2.3 million pieces in 1882), and survivors are proportionately elusive in high grade. This Select example is well-struck and displays frosty wheat-gold luster, with prairie-gold hues around the peripheries. Light, scattered abrasions limit the grade. Population: 88 in 63 (1 in 63+), 3 finer (5/15). NGC ID# 2666, PCGS# 8699

**4543 1885 MS63 PCGS.** An attractive, well-detailed Select example, with lustrous surfaces that show only minor signs of contact. The 1885 Liberty eagle is scarce in Mint State grades, and is rarely seen finer than the present coin. Population: 46 in 63, 13 finer (5/15). Ex: *Beverly Hills Signature (Heritage, 11/2011), lot 4376.* NGC ID# 266D, PCGS# 8706

**4544 1886-S MS63 PCGS.** The base of the 6 in the date is clearly repunched. A sharply struck and coruscating yellow-gold representative. Field marks are commensurate with the designated grade. NGC ID# 266G, PCGS# 8709

**4545 1887-S MS63 NGC.** The 1887-S is a better San Francisco issue in high grade, even following the discovery of a handful of Mint State coins in the Saddle Ridge Hoard. This Select example has few superiors. The sharp motifs are amid against frosty prairie-gold luster, while a few minute ticks scattered about limit the grade. Census: 66 in 63, 12 finer (5/15). NGC ID# 266J, PCGS# 8711

**4546 1888-S MS63 PCGS. Flynn MPD-001.** The top of an 8 is misplaced in the dentils beneath the left border of the third 8 in the date. The variety is unlisted in *Cherrypickers'*, although a similar variety is designated for the 1883-S eagle. The 1888-S is rarely encountered graded any higher than the present lustrous peach-gold and olive-green representative. NGC ID# 266M, PCGS# 8714

**4547 1888-S MS63 NGC.** The 1888-S Liberty eagle is scarce in MS63 condition and finer examples are very rare. This sharply detailed Select example displays vibrant mint luster and only minor signs of contact. Census: 84 in 63 (2 in 63+), 4 finer (5/15). NGC ID# 266M, PCGS# 8714

**4548 1888-S MS63 NGC.** Similar in scarcity to the previous ten dollar issue from this mint, the 1888-S Liberty eagle is challenging in MS63 and is rarely seen finer. This example displays a bold strike, accentuated by frosty green-gold luster that deepens to rose hues in the centers. Trivial, scattered abrasions are not overly detracting. Census: 84 in 63 (2 in 63+), 4 finer (5/15). NGC ID# 266M, PCGS# 8714

**4549 1891-CC AU55 NGC. Variety 1-A.** A beautifully original Choice AU example, showing rich olive-gold centers and deeper coppery-brown margins. The strike is bold and the devices show evidence of only brief circulation. There are a few light abrasions on the obverse, but the surfaces are generally smoother than is typical for this Carson City issue. NGC ID# 266U, PCGS# 8720

**4550 1891-CC MS61 NGC. Variety 1-A.** Sharp motifs are highlighted by frosty original luster in shades of rose and olive-gold. The surfaces are moderately abraded, as expected for the grade, but no individually obtrusive imperfections are observed. NGC ID# 266U, PCGS# 8720

**1891-CC/CC Ten Dollar, MS62  
Repunched Mintmark**

**4551 1891-CC/CC FS-501 MS62 PCGS.** The second C in the mintmark is widely recut on this *Cherrypickers'* variety. The present example is highly lustrous with sharp design elements. Grade-consistent abrasions are uniformly distributed over each side. Frosty honey-gold surfaces reveal a few deeper alloy spots around the peripheries and on the central reverse. PCGS# 145728 Base PCGS# 8720

**4552 1893 MS61 Prooflike NGC.** The 1893 eagle is an available issue in the absolute sense, but Prooflike examples are seldom seen. This piece is moderately abraded, as the grade indicates, but the bright yellow-gold surfaces display wonderful reflectivity in the recesses and sharp detail on the central devices. PCGS# 78725

**4553 1894 MS64 PCGS.** The 1894 Liberty eagle was produced in large numbers, but survivors are scarce at the MS64 grade level, and finer coins are very rare. This sharply detailed Choice example displays lightly marked orange-gold surfaces with hints of rose and vibrant mint luster on both sides. PCGS has graded one numerically finer example (6/15). NGC ID# 2675, PCGS# 8729

**4554 1894-O MS61 PCGS. Variety 5.** Luster illuminates the motifs and margins of this well struck orange-gold New Orleans representative. Distributed field marks determine the grade. The mintage is less than 5% of its 1894 Philadelphia cousin. Population: 70 in 61, 66 finer (5/15). NGC ID# 2676, PCGS# 8730

**4555 1899 MS64 NGC.** Well-preserved and sharply struck, this Choice 1899 Liberty eagle reveals only trivial luster grazes in the fields, with no distracting abrasions. The surfaces are a warm honey-gold hue with frosty rose accents seen in the central recesses. Housed in a prior generation holder. NGC ID# 267J, PCGS# 8742

**4556 1899-O MS62 PCGS.** A semiprooflike and crisply struck apricot-gold New Orleans ten. The scattered marks are inoffensive for the designated grade. Despite a low business mintage of 37,047 pieces, at least four die varieties are known for the 1899-O. These differ chiefly in minute placement of the date and mintmark. NGC ID# 267K, PCGS# 8743

**4557 1899-S MS63 NGC.** Despite a mintage exceeding 800,000 pieces the 1899-S eagle is challenging in MS63 and rare numerically finer. Pleasing luster issues from the yellow-gold surfaces of this sharply struck Select example. Minute, grade-determining marks are more apparent on the obverse. Census: 69 in 63 (1 in 63+), 17 finer (5/15). NGC ID# 267L, PCGS# 8744

**4558 1900 MS64 PCGS.** A boldly struck, frosty type coin with blended rose and yellow-gold luster rolling over each side. A few light, scattered ticks and grazes limit the grade, but pose little distraction. Only 24 examples are numerically finer at PCGS (6/15). NGC ID# 267M, PCGS# 8745

**4559 1901-O MS61 PCGS. Variety 1.** This early 20th century New Orleans issue is sharply struck on the devices, with semiprooflike mirroring in the yellow-gold fields. Lightly abraded, as the grade suggests, but notably appealing for the MS61 level. NGC ID# 267R, PCGS# 8748

**4560 1901-S MS64+ PCGS.** This radiant, sun-gold eagle is a high-end near-Gem, brilliantly lustrous and fully struck. The frosty surfaces display a Mint-fresh appearance that is often seen from this San Francisco issue, which was generally well-produced from a mintage of more than 2.8 million pieces. The Plus designation signals an attractive opportunity for type and gold specialists. NGC ID# 267S, PCGS# 8749

### 1901-S Liberty Eagle, MS65 Delightful Originality

**4561 1901-S MS65 PCGS.** This is a visually charming Gem, ideal for inclusion in a 20th century type set. The design elements are fully rendered and the frosty, glowing surfaces yield transitional shades of honey, rose, and lilac-gold. The reverse is seemingly undisturbed, although a small mark in the obverse field near Liberty's mouth precludes a finer grade. Undeniably eye-appealing, housed in an old green label holder. NGC ID# 267S, PCGS# 8749

### 1901-S Liberty Ten, MS65 Excellent Branch Mint Type Coin

**4562 1901-S MS65 PCGS.** From a substantial mintage of 2.8 million pieces, the 1901-S Liberty eagle is not difficult to locate in grades up to the MS65 level, but the issue is scarce in finer grades. This attractive Gem is sharply detailed and lustrous, with well-preserved peach-gold surfaces and vibrant mint luster throughout. NGC ID# 267S, PCGS# 8749

**4563 1903-O MS62 NGC. Variety 2.** An original and coruscating caramel-gold example. The moderate obverse field marks are commensurate with the grade. A popular and relatively low mintage New Orleans issue. NGC ID# 267W, PCGS# 8753

**4564 1904 MS64 NGC.** The 1904 Liberty eagle is an elusive issue in Choice condition, and finer examples are notably rare. This well-detailed representative features lustrous greenish-gold surfaces, with only minor signs of contact. Census: 36 in 64, 7 finer (5/15). NGC ID# 267Y, PCGS# 8755

**4565 1904-O MS62 NGC. Variety 1.** This late New Orleans issue is only marginally available in Mint State, and pieces grading finer than the present coin are genuinely scarce. This example is sharply struck and aglow in frosty straw-gold luster. Light, scattered abrasions contribute to the grade. NGC ID# 267Z, PCGS# 8756

**4566 1905-S MS61 PCGS.** Notably lustrous with warm orange and peach-gold hues overlapping moderately abraded surfaces. The devices are boldly rendered throughout. This San Francisco issue is elusive in Mint State, regardless of grade. Population: 38 in 61, 53 finer (6/15). NGC ID# 2683, PCGS# 8758

**4567 1905-S MS62 NGC. CAC.** Both the 1905-S half eagles and eagles are numismatic curiosities, since neither denomination is as available in Mint State to the extent their large mintages would suggest. Garrett and Guth call the 1905-S eagle the most challenging 20th century issue in the ten dollar series in high grades (although several other issues have considerably lower mintages). This MS62 example shows a full strike and the lustrous eye appeal of a higher grade, limited only by a few too many pinprick marks that dot the surfaces. The CAC endorsement confirms its quality. Census: 24 in 62, 4 finer (5/15). NGC ID# 2683, PCGS# 8758

### 1906 Liberty Head Ten, MS64 Scarce This Nice

**4568 1906 MS64 PCGS.** This Philadelphia issue is a notable late-series rarity in MS64 and finer grades. Even seasoned collectors are taken off-guard by the extent of scarcity as documented by the population reports. The present near-Gem example is sharply attractive with tremendous visual appeal. A few light marks determine the grade, yet the variegated, sun-gold coloration and pinpoint strike suggest an even higher grade. Population: 34 in 64 (1 in 64+), 12 finer (6/15). NGC ID# 2684, PCGS# 8759

**4569 1907 MS63 NGC. CAC.** Garrett and Guth, in their *Encyclopedia of U.S. Gold Coins*, write of this issue: "The 1907-D eagle represents a classic example of why mintage figures should be discounted when determining rarity. In this case, the mintage of more than one million pieces makes the 1907-D eagle appear common, when it is really a semi-scarce date." Most surviving Mint State examples are heavily abraded, and those grading finer than MS64 are prohibitively rare. This luminous yellow-gold representative boasts unusually strong visual appeal for the grade, with the grade-limiting surface flaws being uniformly light and dispersed. A sharp strike further heightens the overall appeal.

Ex: Eric P. Newman Numismatic Education Society. NGC ID# 2688, PCGS# 8763

## INDIAN EAGLES

**4570 1907 No Periods MS62 NGC.** Original straw-gold luster illuminates the satiny surfaces of this collector-grade No Motto type coin. Few major abrasions are present, and we note just light chatter on Liberty's cheek which determines the grade. NGC ID# 28GF, PCGS# 8852

**1907 No Periods Ten, MS63  
Lustrous No Motto Type Coin**

- 4571 1907 No Periods MS63 PCGS.** A pleasing Mint State example, with original orange-gold luster and well-struck design elements. Scattered abrasions define the grade, but none are individually noteworthy. The No Periods 1907 Indian ten is the most frequently seen No Motto issue in the series, popular among budget-conscious type and date collectors. NGC ID# 28GF, PCGS# 8852

**1907 No Periods Ten, MS63+  
Affordable No Motto Type Coin**

- 4572 1907 No Periods MS63+ NGC.** The final product of Charles Barber's tinkering with Saint-Gaudens' design, the No Periods 1907 Indian eagle is the most often seen No Motto issue in high grades, ideal for type representation. This Plus-graded Select example is well-struck, with frosty yellow-gold luster and minimal abrasions. Minor flow lines in the peripheral recesses are the product of worn dies. NGC ID# 28GF, PCGS# 8852

- 4573 1908-D No Motto AU58 PCGS. CAC.** An affordable, near-Mint example of this No Motto issue, struck to the extent of 210,000 pieces. The design elements are boldly rendered and show only trivial friction. Scattered light abrasions on the devices are as expected for the grade. NGC ID# 28GH, PCGS# 8854

- 4574 1908 Motto MS63 PCGS.** An attractive Select example of the first Indian eagle issue with the popular motto IN GOD WE TRUST, this specimen shows bold definition on the design elements and the lustrous orange-gold surfaces display a moderate number of contact marks for the grade. NGC ID# 28GJ, PCGS# 8859

- 4575 1908 Motto MS63 NGC.** The design elements of this attractive Select specimen are sharply detailed and the lightly marked orange-gold surfaces are lustrous and appealing, with a few highlights of rose and green. NGC ID# 28GJ, PCGS# 8859

- 4576 1908 Motto MS63 NGC.** A pleasing first-year With Motto type coin, showing well-struck devices and satiny orange-gold luster. Light abrasions on Liberty's cheek limit the grade, but are not overly detracting. The With Motto issue accounts for most of the Philadelphia eagle production in 1908 (341,300 pieces). NGC ID# 28GJ, PCGS# 8859

- 4577 1908 Motto MS63 PCGS.** A well-struck, pleasing example for the grade, with satiny green-gold luster. Light contact on the high points of the eagle and Liberty's cheek, as well as a few stray lines in the fields, limit the grade. An affordable early With Motto type coin. NGC ID# 28GJ, PCGS# 8859

**1908 Ten Dollar, MS64  
Popular With Motto Design**

- 4578 1908 Motto MS64 NGC.** The With Motto 1908 Indian ten dollar is significant as first issue of the series with the motto IN GOD WE TRUST added to the left of the eagle on the reverse. This near-Gem displays lustrous yellow and orange-gold surfaces. The design elements are well-impressed. A few minor scuffs and contact marks prevent Gem classification. NGC ID# 28GJ, PCGS# 8859

**1908 Indian Eagle, MS64  
With Motto Variant**

- 4579 1908 Motto MS64 NGC.** This first-year With Motto issue is moderately available in Choice condition, but finer representatives are scarce. This MS64 coin displays satiny, almost matte-like, orange-gold luster over minimally abraded surfaces and sharply defined central devices. An ideal coin for type representation. NGC ID# 28GJ, PCGS# 8859

- 4580 1908-D Motto MS61 NGC.** To the unaided eye, this With Motto 1908-D eagle seems finer than MS61, although a loupe reveals grade-limiting contact on the high points of the devices. Wheat-gold luster is satiny with a few tiny russet specks on the obverse. NGC ID# 28GK, PCGS# 8860

- 4581 1909 MS62 PCGS.** The orange-gold surfaces of this impressive MS62 example show the expected number of minor contact marks for the grade, with frosty mint luster and well-detailed design elements throughout. NGC ID# 28GM, PCGS# 8862

**1909 Indian Eagle, MS63  
Appealing, Satiny Surfaces**

- 4582 1909 MS63 NGC.** Moderately available in the MS60 to MS63 range, this Philadelphia issue becomes conditionally scarce any finer, and Gems are rare. This Select example is minimally abraded for the grade, with satiny wheat-gold luster and well-defined motifs. A few small ticks on the eagle's wing are the only abrasions of note. NGC ID# 28GM, PCGS# 8862

**1909 Ten Dollar, MS63  
Elusive Any Finer**

- 4583 1909 MS63 NGC.** The 1909 is an available date in circulated grades, but it becomes scarce in MS63, and is seldom seen finer. This example displays radiant lemon-gold luster and well-defined motifs. Light, scattered abrasions limit the grade, but the eye appeal remains pleasing. An original example of this elusive Philadelphia issue. NGC ID# 28GM, PCGS# 8862

**1909 Indian Eagle, MS63  
Lustrous and Original**

- 4584 1909 MS63 PCGS.** An original example with apricot-gold luster and well-defined devices. Light, scattered abrasions accompany the grade, but none are individually obtrusive. The luster is mildly granular, rather than deeply frosted or satiny, not unusual for the issue. The 1909 ten is seldom seen finer than the MS63 level, and Gems are rare. NGC ID# 28GM, PCGS# 8862

- 4585 1909-D MS62 PCGS.** Sharply detailed in most areas, this impressive MS62 example shows a touch of softness on the leading edge of the eagle's wing. The lustrous orange-gold surfaces are lightly marked and eye appeal is strong for the grade. NGC ID# 28GN, PCGS# 8863

- 4586 1909-D MS62 PCGS.** From a small mintage of 121,540 pieces, the 1909-D Indian eagle is a scarce issue in grades above the MS62 level. This attractive example offers well-detailed design elements and a bold mintmark, with lustrous orange-gold surfaces that show a scattering of minor contact marks on both sides. NGC ID# 28GN, PCGS# 8863

- 4587 1909-D MS62 PCGS.** Sharply detailed in most areas, this attractive MS62 specimen shows just a touch of softness on the leading edge of the eagle's wing. The pleasing green and orange-gold surfaces are brightly lustrous, with a scattering of minor grade-consistent contact marks. NGC ID# 28GN, PCGS# 8863

**1909-D Ten Dollar, MS62  
Challenging Finer**

- 4588 1909-D MS62 NGC. CAC.** The 1909-D, with a mintage of fewer than 122,000 pieces, is a slightly better date in Mint State grades, and is notably scarce in Choice condition. This piece offers the budget-conscious collector a moderately affordable entry into the Uncirculated grade category, and delivers pleasing appeal with sharp motifs and original straw-gold luster. Scattered abrasions limit the grade. NGC ID# 28GN, PCGS# 8863

**1909-D Indian Ten, MS63  
Original Mint Luster**

- 4589 1909-D MS63 NGC.** This is an especially pleasing example for the MS63 grade level, particularly due to the originality of the orange-gold luster and the satiny surface texture that highlights the well-defined devices. Scattered abrasions are consistent with the grade and pose little distraction, although a small cluster of marks is noted below the ST in TRUST. Census: 60 in 63, 32 finer (5/15). NGC ID# 28GN, PCGS# 8863

**1909-S Ten Dollar, MS62  
Appealing for the Grade**

- 4590 1909-S MS62 PCGS.** For the MS62 grade level, this 1909-S Indian ten is quite pleasing. The surfaces are lightly abraded, but there are no heavy distractions and the luster is decidedly original, showing soft honey and peach hues. The 1909-S ten dollar is a better date in Uncirculated condition, particularly scarce finer than the present coin. NGC ID# 28GP, PCGS# 8864

- 4591 1910 MS64 NGC.** A preferred issue for type in the series, this original-looking Indian ten offers natural green-gold coloration and a crisp strike. Soft mint luster bolsters the appeal. The near-Gem level is optimal for "value" collectors, since the price quadruples when in full Gem state. NGC ID# 28GR, PCGS# 8865

**4592 1910-S MS61 PCGS.** The pleasing orange-gold surfaces of this attractive Mint State specimen show the expected number of minor contact marks for the grade and a few traces of amber patina, with satiny mint luster and well-detailed design elements. NGC ID# 268D, PCGS# 8867

**4593 1910-S MS61 PCGS.** Despite a healthy mintage of 811,000 coins, the 1910-S Indian eagle is a recognized better date in Mint State. This MS61 example is in the grade range most often seen, but the surface quality is unusually pleasing. Satiny golden luster illuminates well-struck motifs, with few significant abrasions in evidence. NGC ID# 268D, PCGS# 8867

#### 1910-S Eagle, Lustrous MS62

**4594 1910-S MS62 NGC.** The 1910-S becomes increasingly scarce in each succeeding Mint State grade, particularly finer than MS62. This piece is moderately abraded, as affirmed by the grade, but yields especially vibrant yellow-gold luster and shows pleasing definition on the design elements. A few notable scrapes in the left obverse field are not out of line for the MS62 level. NGC ID# 268D, PCGS# 8867

#### 1910-S Indian Eagle, MS62 Popular Mintmark Type Coin

**4595 1910-S MS62 PCGS.** The 1910-S Indian eagle claims a substantial mintage of 811,000 pieces, but the issue becomes scarce at the MS62 grade level. This attractive MS62 example offers well-detailed design elements and vibrant mint luster throughout, with lightly abraded yellow-gold surfaces. NGC ID# 268D, PCGS# 8867

#### 1910-S Ten Dollar, MS62 Scarce in Finer Grades

**4596 1910-S MS62 PCGS.** Despite a mintage of 811,000 coins, the 1910-S Indian eagle is a challenging date in pleasing Mint State condition, seldom seen finer than the present MS62 coin. This piece is well-struck, with luminous orange-gold luster. Grade-limiting abrasions are evenly dispersed over each side so as not to cause significant distraction. NGC ID# 268D, PCGS# 8867

**4597 1911-D Improperly Cleaned — NGC Details. AU.** An affordable example of this better-date ten dollar Indian. The surfaces are overbright from cleaning. We also note that there also are four post-striking marks located on the obverse in the general area of the NGC tabs. NGC ID# 28GU, PCGS# 8869

#### 1911-S Indian Eagle, MS61 Low-Mintage Issue

**4598 1911-S MS61 NGC.** The 1911-S eagle earned notoriety as a European hoard issue, with an influx of survivors that returned to the U.S. coin market in the 1970s. The low 51,000-piece mintage still impresses buyers, and the San Francisco mintmark attracts additional attention. As usual, the surfaces of this well-struck example are finely granular and frosty. The medium-gold fields and devices are softly lustrous and minimally marked for the assigned grade. Census: 40 in 61, 59 finer (6/15). NGC ID# 28GV, PCGS# 8870

**4599 1912 MS64 NGC. CAC.** Glowing straw-gold luster illuminates the minimally disturbed surfaces of this Choice 1912 Indian eagle. The strike is sharp and the eye appeal is outstanding. Finer examples are only infrequently encountered. NGC ID# 28GW, PCGS# 8871

**4600 1912-S MS61 PCGS.** This impressive Mint State example displays vivid orange-gold surfaces, with a scattering of minor contact marks on both sides and much original mint lustre. The design elements are well-detailed and the overall presentation is quite pleasant. NGC ID# 28GX, PCGS# 8872

**4601 1912-S MS61 NGC.** The design elements of this attractive Mint State specimen are well-detailed, with a touch of softness on the eagle's shoulder and lower headdress feathers. The lustrous orange-gold surfaces show the expected number of minor contact marks for the grade. NGC ID# 28GX, PCGS# 8872

**4602 1912-S MS61+ NGC.** In comparison to the Philadelphia issue of this year, the 1912-S Indian ten is moderately elusive in Mint State. This example is well-struck, with satiny straw-gold luster. Scattered abrasions determine the grade but pose little visual distraction. NGC ID# 28GX, PCGS# 8872

#### 1912-S Eagle, Attractive MS62

**4603 1912-S MS62 NGC.** Attractive deep orange patina with reddish accents and nicely struck surfaces make this S-mint eagle a keeper. A loupe reveals scattered contact marks on Liberty's cheek and chin, but only one thin scrape on the neck requires singular mention. Some charcoal-colored buildup (also seen only under a loupe) appears in a few letters at the reverse periphery. Most examples of this better issue are lightly circulated. NGC ID# 28GX, PCGS# 8872

**4604 1914-D MS63 NGC.** The 1914-D Indian eagle is not too difficult to locate in lower Mint State grades, but the issue becomes scarce above the MS63 level. This attractive Select example displays lightly marked orange-gold surfaces with frosty mint luster on both sides. NGC ID# 28H3, PCGS# 8876

**4605 1914-D MS63 PCGS.** Satiny golden luster illuminates well-detailed motifs on this Select 1914-D Indian ten. Each side is lightly abraded, but there are no severe distractions. The 1914-D is a slightly better date in the finer Mint State grades, but examples in MS63 and lower levels are obtainable for the budget-conscious collector. NGC ID# 28H3, PCGS# 8876

---

**1914-D Ten Dollar, MS64  
Elusive in Finer Grades**

**4606 1914-D MS64 NGC.** The 1914-D eagle is most often seen in the MS61 to MS62 grade range; Choice examples are sometimes available, but pieces grading MS65 or finer are scarcely encountered. This lustrous MS64 coin displays boldly struck design elements and satiny honey-gold luster. A few minor surface grazes limit the grade. NGC has seen 60 numerically finer submissions (6/15). NGC ID# 28H3, PCGS# 8876

**4607 1914-S MS61 PCGS.** This well-detailed Mint State specimen shows just a touch of softness on the lower headdress feathers and the lustrous orange-gold surfaces display hints of rose, with the usual number of minor contact for the grade. NGC ID# 28H4, PCGS# 8877

---

**1914-S Ten Dollar, MS62  
Better Date in Mint State**

**4608 1914-S MS62 PCGS.** The certified population for this slightly better branch mint issue trails off in Mint State, and examples are notably scarce at the Choice grade level. This MS62 coin offers a moderately affordable entry into the Uncirculated grade range, and shows only light, scattered abrasions. Well-struck, with original green-gold luster. NGC ID# 28H4, PCGS# 8877

---

**1914-S Ten Dollar, Lustrous MS62**

**4609 1914-S MS62 PCGS.** Satiny orange-gold luster and well-struck motifs are the chief attributes this 1914-S ten possesses, although its appeal is also heightened by the scarcity of finer examples. Scattered abrasions determine the grade. This issue is known as one of the more challenging dates in the series to find with pleasing eye appeal. NGC ID# 28H4, PCGS# 8877

---

**1915-S Indian Ten, Unc Sharpness  
Third-Lowest With Motto Mintage**

**4610 1915-S — Cleaning — PCGS Genuine. Unc Details.** With a limited mintage of only 59,000 coins, the 1915-S Indian eagle is elusive, particularly in Mint State. This example is unworn, although light cleaning precludes a numeric grade. Nonetheless, the surfaces display pleasing wheat-gold luster over soft, satiny surfaces. Only a few minor abrasions are observed. NGC ID# 28H6, PCGS# 8879

---

**1916-S Indian Ten, MS62  
Seldom Available Finer**

**4611 1916-S MS62 PCGS.** The 1916-S Indian eagle is conditionally elusive in Mint State, particularly above the MS62 grade level. This piece is well-struck, with medium yellow-gold luster. No major abrasions are present, although minor contact on the high points of the devices limits the grade. NGC ID# 28H7, PCGS# 8880

## LIBERTY DOUBLE EAGLES

1851 Double Eagle, AU53  
Pleasing Original Color

- 4612 1851 AU53 NGC.** Most 1851 double eagles were struck with California gold, as the purpose of the denomination was as a means of efficiently coining the large quantities of the yellow metal that were being shipped to the mints during the height of the Gold Rush. This AU type coin displays orange-gold color with hints of luster in the protected regions of the fields. The obverse stars are shallowly impressed due to die lapping. NGC ID# 268H, PCGS# 8904

1852 Double Eagle, AU55  
Scarce Issue in High Grade

- 4613 1852 AU55 PCGS.** The 1852 Liberty double eagle was produced in large numbers, but few high-quality examples were saved and the issue is seldom encountered in high grade today. This Choice AU specimen shows just a touch of wear on the well-detailed design elements and the green and orange-gold surfaces are lightly abraded. NGC ID# 268K, PCGS# 8906
- 4614 1852/1852 FS-301 XF45 PCGS. CAC.** Although undesignated as such on the PCGS holder, all four date digits are clearly repunched north. Luster fills the legends and outlines the stars. Small abrasions are distributed across honey-gold surfaces, but only a couple of marks on the eagle's shield merit singular mention. PCGS# 145729 Base PCGS# 8906

1852-O Twenty Dollar, XF40  
Popular Southern Mint Issue

- 4615 1852-O XF40 NGC. Variety 1.** A lightly abraded and problem-free New Orleans representative. Luster illuminates protected areas, such as the legends and shield. The wingtips and curls display wear. Among the more collectible double eagle issues from the elusive Southern facility, despite a mintage of less than a tenth of its Philadelphia counterpart. NGC ID# 268L, PCGS# 8907

1854 Small Date Twenty, AU55  
Some Luster Remaining

- 4616 1854 Small Date AU55 NGC.** The more plentiful of the two 1854 double eagle date logotypes, the Small Date variant is the variety most often seen in date collections. This Choice AU representative exhibits sharp detail with medium wheat-gold patina that shows hints of luster in the protected regions. No major abrasions are observed, just light chatter on the obverse that is consistent with the grade. NGC ID# 268P, PCGS# 8911

- 4617 1855-S AU50 NGC. Medium S.** A lightly circulated second-year San Francisco double eagle. The subtle orange-gold color suggests that the present coin was not among those recovered from shipwrecks such as the S.S. *Central America*. Abrasions are noted near Liberty's mouth and on the reverse rim at 6:30. NGC ID# 268X, PCGS# 8916

1857 Double Eagle, AU58  
CAC-Approved and Lustrous

- 4618 1857 AU58 NGC. CAC.** This Philadelphia issue had a mintage of more than 439,000 coins, but few survive in Mint State. This Borderline Uncirculated example retains significant mint luster in the fields and displays sharp detail on the devices. Light, scattered abrasions only occasionally interrupt the medium green-gold patina. NGC ID# 2693, PCGS# 8920

1857-S Twenty Dollar, AU53  
Lustrous Straw-Gold Surfaces

- 4619 1857-S AU53 NGC.** The 1857-S double eagle is an issue that was made famous by the S.S. *Central America* shipwreck treasure which yielded several thousand examples, and many modern-day collectors forget that it was once scarce in high grade. This old-time AU representative displays sharp detail with hints of luster in the protected areas. NGC ID# 2696, PCGS# 8922

**1857-S Double Eagle, AU58  
Appealing Old-Time Example**

**4620** 1857-S AU58 NGC. This is a lovely near-Mint example with original olive-gold patina and hints of luster in the recesses. Prior to the discovery of the S.S. *Central America* treasure, this old-time piece would have been among the finer-known 1857-S double eagles. The visual appeal is ideal for the collector who appreciates original color, differing noticeably from the bright appearance of most of the shipwreck coins. NGC ID# 2696, PCGS# 8922

**4621** 1858-S XF45 NGC. An original orange-gold example of this Type One San Francisco issue, retaining strong XF detail and hints of luster in the protected regions of the fields. Light surface chatter accompanies the grade. NGC ID# 2699, PCGS# 8925

**1860 Twenty Dollar, AU58  
Some Luster Remaining**

**4622** 1860 AU58 NGC. With a mintage in excess of 577,000 coins, the 1860 double eagle is moderately available in circulated grades, but the scarcity and typically poor quality of Mint State examples fuels significant demand for high-end AU representatives. This Borderline Uncirculated piece is well-detailed, with soft yellow-gold surfaces that retain hints of luster in the protected regions of the fields. NGC ID# 269D, PCGS# 8929

**4623** 1861 AU50 NGC. Hints of luster illuminate the recesses of this About Uncirculated Type One representative, while the remainder of each side shows honey-gold patina. A well-detailed example, lightly die clashed behind Liberty's head. NGC ID# 269G, PCGS# 8932

**1861 Liberty Twenty, AU55  
Popular Type Coin**

**4624** 1861 AU55 PCGS. The lightly abraded orange-gold surfaces of this Choice AU example are visited by attractive shades of rose patina. The design elements are well-detailed, with just a trace of wear on the coronet and Liberty's hair, and both sides retain traces of original mint luster. The 1861 is an available Type One date, quite popular with type collectors. NGC ID# 269G, PCGS# 8932

**1861 Twenty Dollar, AU55  
Original Surfaces**

**4625** 1861 AU55 NGC. CAC. Prior to the salvage of the S.S. *Central America* and S.S. *Republic* shipwrecks, the most plentiful Type One double eagle in high grade was the 1861, and this issue still serves well as a type coin. This Choice AU representative displays original green-gold patina with hints of rose-gold luster in the protected regions. Trivial high-point friction limits the grade, but leaves the devices sharply detailed. NGC ID# 269G, PCGS# 8932

**1861 Double Eagle, Near-Mint  
Popular Type One Issue**

**4626** 1861 AU58 PCGS. The 1861 double eagle had a substantial mintage of almost 3 million pieces, ideal for type purposes. Only after the discovery of thousands of 1857-S coins on the wreck of the S.S. *Central America* did this issue cease to be the most plentiful Type One twenty. This wheat-gold example retains generous luster and has only a touch of friction over the high points. NGC ID# 269G, PCGS# 8932

**4627** 1861-S AU50 PCGS. The vivid orange and rose-gold surfaces of this attractive AU specimen are lightly abraded and retain traces of original mint luster. Slight wear shows on the high points of the design elements, but almost all interior detail remains intact. NGC ID# 269K, PCGS# 8935

**4628** 1864-S VF35 NGC. The 1864-S double eagle is a slightly better date, particularly in high grades. This is a collectible mid-grade representative, showing light wear over bright, yellow-surfaces. A few minor marks are as expected for the grade. This issue is seldom seen in the VF range. NGC ID# 269T, PCGS# 8942

**4629** 1869-S AU53 NGC. The scarcity of this issue in Mint State puts increased pressure on pleasing AU examples. This piece is well-detailed with some luster in the protected areas. Wheat-gold surfaces show a few light abrasions, not unusual for the grade. NGC ID# 26A6, PCGS# 8956

**4630** 1871 XF45 NGC. The 1871 is a less often seen Type Two double eagle, and is rarely encountered in Mint State. This Choice XF example exhibits noticeable luster in the peripheral recesses, with bright yellow-gold color overall. Brief circulation has not overly hindered the design sharpness. Housed in a prior generation holder. NGC ID# 26AA, PCGS# 8960

**4631** 1871-S AU58 NGC. The 1871-S is the most available double eagle issue of this year, ideal for date representation. This nearly Uncirculated example displays medium olive-gold surfaces, with soft luster in the protected regions of the fields. No major abrasions are present. NGC ID# 26AC, PCGS# 8962

**1873 Double Eagle, Semiprooflike MS60  
Conditionally Rare Closed 3 Variant**

**4632 1873 Closed 3 MS60 PCGS.** This Closed 3 example is well-struck with rich straw-gold patina and semiprooflike mirroring in the fields. Moderate abrasions limit the grade, but there is no true wear. The Closed 3 1873 double eagle is scarcely seen in any Mint State grade, and all are extensively abraded; the sole finest is a single MS62+ NGC coin. The Smithsonian Institution lacks an example of the Closed 3 variety, and Garrett and Guth call this issue "an underrated 'sleeper.'" Population: 18 in 60, 14 finer (6/15). NGC ID# 26AG, PCGS# 8966

**4633 1873 Open 3 AU58 NGC.** The Open 3 logotype is obvious. This near-Mint representative shows delightfully original surfaces with significant amounts of luster in the protected regions. Honey-gold color blankets each side with a few small abrasions noted on Liberty's cheek. NGC ID# 26AH, PCGS# 8967

**1874-CC Double Eagle, XF45  
Some Semiprooflike Surface**

**4634 1874-CC XF45 PCGS. Variety 3-A.** A Wide Mintmark variety, as usual. This is an appealing Carson City type coin with strong XF detail and bright yellow-gold patina. Remnants of prooflike mirroring are observed in the protected regions of the fields, especially on the reverse. A horizontal mark in the obverse field left of Liberty's neck is the only abrasion of note. NGC ID# 26AP, PCGS# 8971

**4635 1874-S AU53 NGC.** The appeal of this piece lies largely in its original olive-gold surfaces that yield deeper coppery overtones around the peripheries and in the hints of semiprooflike mirroring that remain in the protected areas of the fields. Light wear does not impede the sharp strike. Scattered abrasions are present, as expected for the grade. NGC ID# 26AR, PCGS# 8972

**4636 1875-S AU58 NGC.** Obviously original, with bits of verdigris in the crevices and rich olive-gold patina overall; luster remains in the protected areas of the fields and glows in orange-gold hues. This 1875-S double eagle is well-detailed with scattered light abrasions. NGC ID# 26AU, PCGS# 8975

**4637 1876 MS60 NGC.** The surfaces are moderately abraded, as the grade suggests, but the frosty luster is intensely vibrant. A well-struck Type Two representative with straw-gold color that warms a little toward the centers. NGC ID# 26AV, PCGS# 8976

**4638 1876 MS61 NGC.** The Light Motto reverse with a different arrangement of the glory rays above the eagle, relative to the Heavy Motto counterpart. The Light Motto was never used on another issue, likely due to the 1877 introduction of the Type Three design. The present peach-gold Centennial-year double eagle exhibits booming luster and a good strike. NGC ID# 26AV, PCGS# 8976

**4639 1876-S AU55 NGC.** Original surfaces yield wheat-gold luster in the fields with medium olive-gold patina overall. The design elements are sharply struck and show just minor wear. A linear mark near star 8 on the obverse is only mentionable abrasion. NGC ID# 26AX, PCGS# 8978

**4640 1876-S AU58 NGC.** Well-detailed, with significant yellow-gold luster remaining in the protected areas. A grease streak (as struck) appears on the reverse between the CA in AMERICA, and the only obvious abrasions are a pair of old marks in the left obverse field near star 2. NGC ID# 26AX, PCGS# 8978

**1876-S Twenty Dollar, MS62  
Radiant, Frosty Luster**

**4641 1876-S MS62 PCGS Secure.** Frosty luster yields warm rose-gold hues over each side of this sharply struck S-mint twenty. A few dispersed abrasions on the obverse limit the grade, but the overall eye appeal is heightened by the originality of the surfaces. The 1876-S is moderately available through MS62, but becomes conditionally scarce finer. NGC ID# 26AX, PCGS# 8978

**4642 1877-S AU58 PCGS.** A touch of high-point friction does not impede the sharpness of the devices on this near-Mint 1877-S double eagle. This piece displays frosty yellow-gold luster in the fields and shows light, scattered abrasions, as expected for the grade. NGC ID# 26B2, PCGS# 8984

**4643 1877-S MS60 PCGS.** A sharply struck, Uncirculated example of this inaugural Type Three San Francisco issue. Yellow-gold luster shows occasional olive overtones amid a scattering of grade-consistent abrasions. NGC ID# 26B2, PCGS# 8984

**4644 1877-S MS61+ NGC.** With a mintage of more than 1.7 million coins, the 1877-S double eagle is plentiful in most grades, but its availability thins above the MS61 level. This Plus-graded example displays soft, frosty luster and medium olive-gold surfaces. Well-struck, with the expected scattered abrasions. NGC ID# 26B2, PCGS# 8984

**4645 1878-S MS60 PCGS.** Frosty peach-gold luster cartwheels around each side of this sharply rendered 1878-S twenty. Scattered abrasions are heaviest on the obverse, but are uniformly dispersed. A couple deeper marks appear on Liberty's cheek and below the ear. NGC ID# 26B5, PCGS# 8987

**1879-S Double Eagle, MS61  
Vibrant Original Luster**

**4646 1879-S MS61 PCGS.** The 1879-S twenty is one of the higher-mintage dates of the period, coming in with a total of more than 1.2 million coins. Nonetheless, Uncirculated survivors are limited in quantity, and are scarcer finer than MS61. This piece is appealing for the grade, with original straw-gold luster and sharp design elements. Grade-consistent abrasions are evenly distributed with little distraction. NGC ID# 26B9, PCGS# 8991

**4647 1883-S MS62 PCGS. CAC.** Tall S. Aquamarine toning dominates all but the apricot-gold centers. Lustrous and well struck with the expected number of small abrasions. A conditionally challenging issue nearly unobtainable above the MS63 level. NGC ID# 26BJ, PCGS# 9000

**4648 1884-CC XF40 NGC. Variety 1-A.** This piece is sharply detailed for the grade, with hints of luster in the protected regions of the fields. Medium wheat-gold surfaces are only minimally abraded. Housed in a prior generation holder. NGC ID# 26BK, PCGS# 9001

**1884-CC Twenty, Two-Toned XF45**

**4649 1884-CC XF45 PCGS Secure. Variety 1-A.** The surfaces range from peach-gold in the fields to deeper reddish-gold on the device high points, and the coin is uniformly well-struck and minimally abraded for the grade. Even though only one die pair is known for the small mintage of 81,000 pieces, note how the 4 in the die is slightly lower and appears to tilt a bit right compared to the 1888. Great eye appeal, and a super midgrade double eagle to represent the Carson City Mint. NGC ID# 26BK, PCGS# 9001

**4650 1889-S MS62 PCGS. CAC.** This popular San Francisco issue is infrequently seen with the fresh, frosty luster observed on this MS62 example. The design elements rise boldly amid the straw-gold surfaces and grade-limiting abrasions are light and evenly distributed. NGC ID# 26BW, PCGS# 9012

**4651 1889-S MS62 PCGS. CAC.** Tall S. This is one of only a limited number of attractive Mint State 1889-S double eagles not pedigreed to the Saddle Ridge Hoard. The strike is sharp and the surfaces displays frosty rose and green-gold hues. Light abrasions on the obverse limit the grade, but are not overly detracting. NGC ID# 26BW, PCGS# 9012

**1890 Twenty Dollar, MS62  
Better Type Three Philadelphia Issue**

**4652 1890 MS62 PCGS.** The Mint State availability of the 1890 double eagle is limited overall, but the certified population plummets above the MS62 grade level. This example is sharply struck and pleasant for the grade, with frosty straw-gold luster that warms to pale rose hues in the centers. A few light abrasions on Liberty's cheek limit NGC's assessment. Only 45 coins are numerically finer at PCGS (5/15). NGC ID# 26BX, PCGS# 9013

**1890 Twenty Dollar, MS62+  
Vibrant Luster**

**4653 1890 MS62+ NGC. CAC.** This sharply rendered example shows blended shades of peach, rose, and green-gold through the frosty surfaces. Light, scattered abrasions limit the grade, but are mostly trivial in nature. The 1890 double eagle is scarcely seen finer than the current MS62+ coin, with just 22 such examples certified by NGC (6/15). NGC ID# 26BX, PCGS# 9013

**1890-CC Twenty, Well-Detailed XF40**

**4654 1890-CC XF40 PCGS. Variety 2-B.** This is a scarcer die variety, showing the mintmark positioned a little further right than usual. Despite light wear and deep bronze-gold patina, this lightly circulated 1890-CC double eagle displays remnants of luster in the protected areas of the fields, particularly on the reverse. The motifs are well-detailed and exhibit minimal abrasions. NGC ID# 26BY, PCGS# 9014

**4655 1890-S MS62+ PCGS.** Vibrant yellow-gold luster shows softer peach hues in the centers of this 1890-S double eagle. The motifs are sharply defined, and only minor chatter on Liberty's cheek limits the grade. NGC ID# 26BZ, PCGS# 9015

**1892-CC Twenty Dollar, XF40**  
**Rich Peach Color, Minimally Marked**

- 4656 1892-CC XF40 PCGS. Variety 1-A.** Ex: Rainy Day Collection. This better date CC-mint twenty has rich peach-gold color and relatively few abrasions. Luster illuminates design recesses. The "Rainy Day" collection was a sizeable hoard of large denomination U.S. gold coins dated from the 1870s through the 1890s, dispersed circa-2000. The holding included many Carson City double eagles. NGC ID# 26C6, PCGS# 9020

**1892-CC Twenty Dollar, XF45**  
**Green Label Holder**

- 4657 1892-CC XF45 PCGS. CAC. Variety 1-A.** A lightly abraded and original peach-gold example that has superior eye appeal for its designated grade. Luster accompanies the legends, plumage, rays, and curls. Although more available than the rare 1891-CC, the 1892-CC is nonetheless scarcer than several other Carson City issues, especially the '90-CC and the '74-CC through '76-CC. Encapsulated in a green label holder. NGC ID# 26C6, PCGS# 9020
- 4658 1893 MS63 NGC.** The 1893 Liberty double eagle is a scarce issue in grades above the MS63 level. This attractive Select example exhibits sharply detailed design elements and lustrous reddish-gold surfaces that show a few scattered minor contact marks. NGC has graded 64 numerically finer examples (6/15). NGC ID# 26C8, PCGS# 9022
- 4659 1897-S MS64+ NGC.** Radiant apricot-gold luster gives this high-end Choice example a high degree of eye appeal, and the only grade-limiting imperfections are a few light grazes primarily localized on Liberty's cheek. NGC lists only 19 coins finer (5/15). NGC ID# 26CJ, PCGS# 9032

**1898 Liberty Double Eagle, MS63**  
**Elusive Issue in High Grade**

- 4660 1898 MS63 NGC.** The 1898 Liberty double eagle claims a relatively small mintage of 170,395 pieces and the issue is rare in grades above the MS63 level. This attractive Select example displays sharply detailed design elements and lustrous orange-gold surfaces with a scattering of minor contact marks that explain the grade. NGC has graded 23 numerically finer examples (5/15). NGC ID# 26CK, PCGS# 9033
- 4661 1898-S MS61 Prooflike NGC.** Only a limited number of Prooflike 1898-S twenties have been certified by NGC. This MS61 example is lightly abraded, as expected for the grade, but delivers ample mirroring in the fields and exhibits bold devices. Pleasing straw-gold patina encompasses each side. Census: 42 in 61 Prooflike, 50 finer (5/15). PCGS# 79034
- 4662 1899 MS64+ NGC.** Vibrant, frosty luster glows in shades of yellow and peach-gold on this Plus-designated Choice example. The motifs are sharp and the only grade-limiting contact is seen on Liberty's cheek. The 1899 twenty is seldom available finer. NGC ID# 26CM, PCGS# 9035
- 4663 1901 MS64 PCGS.** A perennial favorite for gold type, this Philadelphia issue is nearly always well-produced and attractive. The present near-Gem coin is fully struck with smooth, frosty surfaces and lustrous, wheat-gold coloration. A few tiny ticks are distributed across the surfaces, but they are widely spaced do not distract. Minor scuffs on Liberty's cheek and chin are the only marks of individual note. NGC ID# 26CS, PCGS# 9039

**1901-S Double Eagle, MS61 Prooflike**  
**Deeply Mirrored Fields**

- 4664 1901-S MS61 Prooflike NGC.** Slightly baggy over the prooflike surfaces — moreso on the obverse than the reverse. Dazzling yellow-gold color grabs the eye, however, and the coin is brightly reflective. This well-struck San Francisco date has always been rumored to exist in quantity among different hoards both here and abroad, some found and others yet to be discovered. This piece is one of only 22 Prooflike pieces certified by NGC, including nine in this grade and nine finer (5/15). PCGS# 79040

**1902 Double Eagle, MS62  
Low-Mintage Philadelphia Issue**

**4665 1902 MS62 NGC. CAC.** The 1902 double eagle stands out from its peers with a low mintage of only 31,140 pieces, and examples grading finer than the present piece are scarce. This representative displays satiny rose-gold luster with sharp design elements. Light contact on Liberty's cheek and in the exposed regions of the fields limits the grade, but hardly diminishes the eye appeal. NGC shows only 18 numerically finer examples (5/15). NGC ID# 26CU, PCGS# 9041

**4666 1904 MS64 NGC.** An attractive Choice example of this popular type issue, with well-preserved peach-gold surfaces, vibrant mint luster, and sharply detailed design elements. Overall eye appeal is tremendous. NGC ID# 26CY, PCGS# 9045

**4667 1904 MS61 Prooflike NGC.** The availability of this type coin issue declines significantly if one focuses their attention on the Prooflike category at NGC. This piece is well-struck, displaying glassy fields and medium orange-gold color. Scattered abrasions are mostly trivial in nature. PCGS# 79045

**4668 1904 MS62 Prooflike NGC.** Struck from freshly polished dies, this 1904 Liberty double eagle displays brightly mirrored fields and sharp devices. Light, scattered abrasions do not overly impede the eye appeal. PCGS# 79045

**4669 1904 MS62 Prooflike NGC.** Prooflike fields give this 20th century type coin a strong visual impression for the grade, while sharp design elements further contribute to the overall appeal. Scattered abrasions are expected for the grade, but none are individually obtrusive. PCGS# 79045

**4670 1904 MS63 Prooflike NGC.** The greenish-gold surfaces of this Select example display modest field-motif contrast, especially when the coin is rotated under a light source. This sharply struck piece reveals just a few minor contacts. PCGS# 79045

**4671 1904 MS63 Prooflike NGC.** With a mintage of over 6.2 million coins, this double eagle issue is by far the most plentiful in the series. However, Select examples with a Prooflike designation are scarce. The surfaces of this piece are primarily yellow-gold with a few splashes of reddish color over the obverse. Sharply struck with undeniable contrast, this representative is perfect for type purposes. Marks are lightly scattered throughout. PCGS# 79045

**4672 1904 MS64 Prooflike NGC.** The 1904 Liberty double eagle is by far the most common issue of the entire series from 1850 to 1907. However, prooflike examples are still only infrequently encountered as the NGC census date suggests. This piece has fully mirrored, light yellow fields with a hint of contrast. The devices are boldly defined from fresh dies and a strong strike. Census: 54 in 64 (2 in 64 ★) Prooflike, 12 finer (5/15). PCGS# 79045

**1904-S Twenty, MS65  
Few Known Finer**

**4673 1904-S MS65 PCGS.** The Gem grade level is about as fine as this late San Francisco issue is typically available; finer pieces are extremely rare and proportionately costly to acquire. This sharply struck, frosty example displays clean rose-gold luster with soft lilac hues around the peripheries. Only six Premium Gems are finer at PCGS (5/15). NGC ID# 26CZ, PCGS# 9046

**1904-S Double Eagle, MS63 Prooflike  
Significant In-Hand Eye Appeal**

**4674 1904-S MS63 Prooflike NGC.** The availability of this San Francisco issue declines sharply when one focuses on locating a Prooflike example. This Select representative displays sharp design elements set against pleasantly mirrored, wheat-gold fields. Light, scattered abrasions limit the grade, but none are individually bothersome. Census: 25 in 63 (1 in 63 ★) Prooflike, 3 finer (5/15). PCGS# 79046

**4675 1907 MS64 PCGS.** Frosty yellow-gold luster deepens to rose and honey hues in the central regions of this Choice final-year Liberty Head type coin. This piece is well-struck and attractive, with a few light abrasions on the cheek that limit the grade. Only 17 Gems are finer at PCGS (5/15). NGC ID# 26D7, PCGS# 9052

**4676 1907 MS64 PCGS. CAC.** This final-year Liberty Head issue is available in grades through MS64, but Gem representatives are rarely seen. The currently offered example is boldly struck, with radiant yellow-gold luster. Trivial contact on Liberty's cheek appears to be all that limits the grade. PCGS shows only 17 numerically finer representatives (5/15). NGC ID# 26D7, PCGS# 9052

**4677 1907 MS61 Prooflike NGC.** Popular for type purposes, the 1907 is the final issue in the long-running Liberty Head double eagle series. This piece is sharply struck, with mirrored fields and warm straw-gold color. NGC has certified only 15 coins as Prooflike, including three in this grade and 12 finer (5/15). PCGS# 79052

**4678 1907-S MS63 PCGS.** Mint-fresh, rose-gold luster accentuates the sharp design elements on this Select 1907-S Liberty twenty, while a suggestion of subtle reflectivity is observed in portions of the reverse fields. Lightly abraded, per the grade, but visually satisfactory. NGC ID# 26D9, PCGS# 9054

**4679 1907-S MS63 NGC.** The 1907-S Liberty double eagle is about on par with its Denver counterpart in regards to availability — slightly more plentiful in the MS60 to MS63 range, but scarcer in MS64 or finer. This Select example displays frosty orange-gold luster and bold motifs. Trivial grazes on Liberty's cheek limit the grade, but the visual impression of the coin is excellent. NGC ID# 26D9, PCGS# 9054

- 4680 1907-S MS63+ NGC.** This final-year Liberty double eagle is boldly struck, with frosty wheat-gold luster. A few scattered abrasions on the obverse limit the grade, but none are individually noteworthy. The 1907-S twenty's availability gradually declines in succeeding finer grades. NGC ID# 26D9, PCGS# 9054

## SAINT-GAUDENS DOUBLE EAGLES

### 1908 No Motto Twenty, MS66 Beautiful Gold Type Coin

- 4681 1908 No Motto MS66 PCGS Secure.** Short Rays Obverse. A lovely caramel-gold and olive-green double eagle. Lustrous and well preserved, characteristic of the Wells Fargo holding, although the pedigree of the present piece is unknown. The strike shows minor blending on Liberty's nose and the eagle's leg plumage, as usual for the briefly coined No Motto subtype. NGC ID# 26F6, PCGS# 9142

### 1908 Saint-Gaudens Twenty, MS66+ Vibrant No Motto Type Coin

- 4682 1908 No Motto MS66+ NGC.** Many of the high-grade examples of this available No Motto type issue originated in the Wells Fargo Hoard, a cache of about 19,000 glittering 1908 double eagles. This Plus-graded Premium Gem is not pedigreed to the hoard on the holder, but its outstanding quality and vivid eye appeal are reminiscent of the Wells Fargo coins. The design elements are well-rendered and the radiant yellow-gold surfaces deepen slightly around the peripheries. NGC ID# 26F6, PCGS# 9142

- 4683 1908-D No Motto MS63 NGC.** Of the three low relief No Motto issues, the 1908-D is the scarcest overall. This Select example displays satiny rose-gold luster and is moderately well-struck, save for the lower-left reverse rays which are not fully defined. A lack of major abrasions heightens the eye appeal. NGC ID# 26F7, PCGS# 9143

- 4684 1908-D No Motto MS63 PCGS.** This Select example is fairly clean for the grade, although a few noticeable ticks appear on Liberty's figure and in the rays below the right (facing) arm. Satiny rose-gold luster imparts pleasing eye appeal. NGC ID# 26F7, PCGS# 9143

### 1908 With Motto Twenty, MS64 Choice Surface Quality

- 4685 1908 Motto MS64 PCGS. CAC.** The thick, satiny surfaces are especially appealing on this Choice 1908 With Motto Saint-Gaudens double eagle, and they seem to swallow up a few light, scattered contact marks so as to deliver heightened visual merit. The strike is sharp, and the surfaces are aglow with warm straw-gold luster. Seldom seen in finer grades. NGC ID# 26F8, PCGS# 9147

- 4686 1908-S VF35 ANACS.** Just 22,000 pieces were struck, yet the issue is one of the few Saint-Gaudens dates that actually circulated in commerce to any great extent — a function of its West Coast mintage. Possibly, the present example was a pocket piece showcasing the new Saint-Gaudens design. The coin displays moderate wear over its apricot-gold surfaces, with a minor reverse rim bruise at the edge just below the eagle's beak. Still, it is an attractive well-circulated example and scarce as such, both for the grade and the low mintage. NGC ID# 26FA, PCGS# 9149

- 4687 1909/8 AU53 PCGS.** Desirable as the sole overdate in the Saint-Gaudens series and as a major *Guide Book* variety, this still-lustrous About Uncirculated example retains considerable eye appeal. Orange-gold accents visit the sharply detailed surfaces and the overdate is boldly evident. Only light abrasions are noted across both sides. NGC ID# 26FC, PCGS# 9151

### 1909-S Double Eagle, MS65 Rarely Seen Finer

- 4688 1909-S MS65 PCGS Secure.** This San Francisco issue is moderately available in Gem condition, but demand for such pieces is advanced by the rarity of finer examples. This coin is sharply struck, with frosty orange-gold luster that shows hints of lilac throughout. A few light ticks here and there do not detract. PCGS lists only 12 numerically finer representatives (6/15). NGC ID# 26FE, PCGS# 9153

- 4689 1910-D MS65 PCGS Secure.** A smooth and satiny Denver Mint Gem with generous luster and wonderful orange-gold coloration. Lilac and lime-green highlights flash across the sharply struck surfaces. The issue is always a favorite of type collectors and gold specialists for its consistently high quality and outstanding eye appeal. NGC ID# 26FG, PCGS# 9155

**1911 Double Eagle, MS64  
CAC-Endorsed Quality**

- 4690 1911 MS64 PCGS. CAC.** The availability of the 1911 Saint-Gaudens twenty declines significantly beyond the MS64 grade level, putting increased appeal among budget-conscious collectors on high-end MS64 examples. This piece is boldly struck, with satiny green-gold luster and pleasantly clean fields. Minor contact on the high points of Liberty's figure precludes a full Gem grade assessment. NGC ID# 26FJ, PCGS# 9157
- 4691 1911-D MS65+ NGC.** The Plus designation draws attention to the excellent surface quality of this satiny rose-gold 1911-D Saint-Gaudens double eagle. The design elements are boldly rendered and the only discernible abrasions are light and restricted to the high points of the motifs. NGC ID# 26FK, PCGS# 9158
- 4692 1911-D MS65+ NGC.** Liberty's fingers are sharp and the eagle's feathers are well-delineated on this high-end Gem 1911-D double eagle. The satiny surfaces yield radiant wheat-gold luster and the overall visual impression is outstanding. NGC ID# 26FK, PCGS# 9158
- 4693 1911-D MS65+ NGC. CAC.** CAC-endorsed, Gem-quality surfaces are the hallmark of this Plus-graded 1911-D Saint-Gaudens double eagle, although sharp design elements and rich, satiny luster further contribute to the visual appeal. A single tick above the eagle's head is the only abrasion of note. NGC ID# 26FK, PCGS# 9158

**1911-D Double Eagle, MS66  
Excellent Preservation**

- 4694 1911-D MS66 NGC.** The 1911-D Saint-Gaudens twenty is a fairly available issue in the absolute sense, benefiting from a mintage of more than 846,000 coins. Nonetheless, Premium Gems are the finest most collectors can acquire, as Superb Gems are rarely seen. This piece displays bold design elements and satiny bronze-gold luster. Trivial stacking marks on the high points of the motifs are all that limit the grade. NGC lists only 38 numerically finer representatives (5/15). NGC ID# 26FK, PCGS# 9158

**1911-S Double Eagle, MS65  
Seldom Encountered Finer**

- 4695 1911-S MS65 PCGS.** The 1911-S double eagle is marginally more available than its Philadelphia counterpart, but is significantly scarcer than the Denver issue of this year. This Gem example displays satiny rose and green-gold luster, with sharply struck design elements. A few light marks do not detract. PCGS lists just 32 numerically finer representatives (5/15). NGC ID# 26FL, PCGS# 9159
- 4696 1912 MS62 PCGS.** Lightly abraded, but devoid of any major distractions. This 1912 Saint-Gaudens double eagle is fairly well-struck, if just a touch soft on Liberty's knee and torch hand. Hints of peach and rose warm the centers while the margins show green-gold luster. NGC ID# 26FM, PCGS# 9160
- 4697 1913 MS62 PCGS.** A well-struck example with frosty yellow-gold luster. Each side shows a scattering of abrasions, although none are individually mentionable. The availability of this date declines somewhat in each succeeding finer grade. NGC ID# 26FN, PCGS# 9161
- 4698 1913-D MS64 PCGS.** This well-struck Choice example displays an attractive array of rose, orange, and pale olive-gold patina over satiny luster. A few minor abrasions on the eagle's feathers and in the left obverse field limit the grade, but are not immediately obvious to the unaided eye. NGC ID# 26FP, PCGS# 9162
- 4699 1913-D MS64 PCGS. CAC.** A satiny yellow-gold example of this Denver issue. The design elements show sharp details and minimal signs of contact. The fields are fairly clean. The availability of the 1913-D twenty declines in finer grades. NGC ID# 26FP, PCGS# 9162
- 4700 1913-S MS61 ANACS.** While the issue is not as challenging as its low 34,000-piece mintage might suggest, all Mint State examples are on the scarce side. This example displays lovely orange-gold patina and no untoward marks, although a scattering of tiny contacts define the grade. As is typical for the issue, the strike is less than full but great mint luster provides extra eye appeal. NGC ID# 26FR, PCGS# 9163
- 4701 1914 MS62 NGC.** Middle of the pack in terms of Mint State scarcity, this Philadelphia issue is better-known for its high production quality and visual appeal. Frosty and lustrous over lightly textured fields, cartwheel luster flashes over the honey-gold patina. Only an expected number of bagmarks dot the obverse, while the reverse appears a grade or so finer. NGC ID# 26FS, PCGS# 9164
- 4702 1914-S MS65 PCGS.** This delightful Gem exhibits sharply detailed design elements throughout, with vivid orange-gold surfaces that show minimal signs of contact. Vibrant mint luster radiates from both sides, adding to the ample eye appeal. NGC ID# 26FU, PCGS# 9166
- 4703 1915 MS62 PCGS.** Notably vibrant, yellow-gold luster in the hallmark of this Mint State 1915 twenty, although bold design elements also contribute to the visual merit. Lightly abraded, as the grade suggests, but there are no severe distractions. NGC ID# 26FV, PCGS# 9167
- 4704 1916-S MS63 NGC.** A sharply struck example, with satiny rose-gold luster that cartwheels around each side. The fields are fairly clean, although a number of abrasions appear along the length of Liberty's figure. NGC ID# 26FX, PCGS# 9169

**1920 Twenty Dollar, MS64  
Extremely Rare Any Finer**

- 4705 1920 MS64 NGC.** Well-struck, with satiny prairie-gold luster. The MS64 grade allows for a few scattered abrasions, none of which are particularly distracting. The 1920 double eagle is deceptively available in MS64, as just one grade point finer this date becomes one of the rarest issues in the series. Only seven coins are numerically finer at NGC, just one at PCGS (6/15). NGC ID# 26FY, PCGS# 9170

**1922-S Double Eagle, MS61  
Mass-Melted Issue**

- 4706 1922-S MS61 PCGS.** The 1922-S has approximately twice the mintage as the 1922, but many more of the latter were distributed. A supermajority of the 1922-S remained in Treasury vaults and was ultimately melted. The present lustrous example is among the few thousand survivors. It is well struck and primarily orange-gold, although the borders are apple-green. Certified in an old green label holder. NGC ID# 26G4, PCGS# 9174

**1922-S Twenty, MS62  
Collectible Mint State Example**

- 4707 1922-S MS62 NGC.** A bold strike is evident on the figure of Liberty and the eagle's feathers, although scattered abrasions limit the grade. Honey-gold surfaces show satiny luster with a touch of reflectivity discernible in portions of the obverse fields. The 1922-S is a slightly better date in Mint State, but remains available in the lower end of that range to the benefit of budget-conscious collectors. NGC ID# 26G4, PCGS# 9174

- 4708 1923-D MS66 PCGS.** This spectacular Premium Gem displays sharply detailed design elements and well-preserved orange-gold surfaces, with vibrant mint luster on both sides. Eye appeal is terrific. PCGS has graded 68 numerically finer examples (6/15). NGC ID# 26G6, PCGS# 9176

- 4709 1924 MS65+ NGC. CAC.** This Plus-graded Gem type coin displays frosty, vibrant luster rolling over clean fields and sharp design elements. Only a few trivial grazes on Liberty's knee and torso prevent a full MS66 grade, and these are hardly discernible to the unaided eye. NGC ID# 26G7, PCGS# 9177

**1924 Double Eagle, Sharp MS66+**

- 4710 1924 MS66+ NGC.** The well-preserved orange-gold surfaces of this high-end Premium Gem display vibrant mint luster on both sides and the design elements are sharply detailed throughout. Eye appeal is terrific. The 1924 Saint-Gaudens double eagle is a recognized common date, but its availability declines finer than MS66. NGC ID# 26G7, PCGS# 9177

- 4711 1924 MS66 PCGS. CAC.** While PCGS has certified more than 8,500 pieces at the Premium Gem level, a mere 90 coins are certified at the next-highest MS67 plateau, making high-end MS66 coins extra appealing both in quality and price. This rich, sun-gold example is sharply struck and notably unabraded. The torch hand shows nice finger detail. CAC endorsed and fittingly so. NGC ID# 26G7, PCGS# 9177

- 4712 1924-D — Improperly Cleaned — NGC Details. Unc.** A few faint hairlines suggest light cleaning, although this piece retains pleasantly vibrant yellow-gold luster. The peripheral stars are a touch soft, but the central devices are well-defined. The 1924-D is a better date in Mint State, this in stark contrast to its Philadelphia counterpart. NGC ID# 26G8, PCGS# 9178

**1925 Double Eagle, MS66+  
Captivating Originality**

- 4713 1925 MS66+ NGC.** The 1925 Saint-Gaudens double eagle is an available date, but its popularity as a type coin is often diminished by the shadows of the plentiful 1924 and 1927. This Plus-graded Premium Gem, however, is by all accounts an impressive representative for type or date purposes. Liberty's figure is sharply brought up and the vibrant fields are essentially devoid of abrasions. Radiant orange-gold luster exhibits the occasional glimpse of lilac and rose, delivering a high degree of eye appeal. NGC has seen only 25 finer representatives (5/15). NGC ID# 26GA, PCGS# 9180

- 4714 1927 MS65 NGC.** A beautiful, frosty Gem example, well-suited for type purposes. This intensely lustrous Saint-Gaudens twenty displays bold design elements illuminated by rolling rose-gold luster. A few trivial ticks on the figure of Liberty and hidden amid the eagle's feathers are consistent with the grade. NGC ID# 26GG, PCGS# 9186

- 4715 1928 MS66 PCGS.** Beautiful apple-green and peach toning intermingles across this thoroughly lustrous high-grade Saint-Gaudens type coin. A lens reveals only wispy contact. Encased in a green label holder. NGC ID# 26GK, PCGS# 9189

## COMMEMORATIVE SILVER

- 4716 1893 Isabella Quarter MS65 PCGS.** Bold rendering of the designs and rich, satiny luster contribute to this Gem Isabella quarter's pleasing eye appeal. The central regions display soft champagne toning which cedes to pale blue and lavender in the margins and is surrounded by deeper olive and russet colors around the peripheries. NGC ID# 28HR, PCGS# 9220
- 4717 1893 Isabella Quarter MS65 PCGS. CAC.** The well-preserved surfaces of this impressive Gem display attractive shades of golden-brown and lavender toning, with ample mint luster underneath. The design elements are well-detailed and eye appeal is quite strong. NGC ID# 28HR, PCGS# 9220

### 1893 Isabella Quarter, MS66 Delicate Multicolor Toning

- 4718 1893 Isabella Quarter MS66 PCGS.** This softly lustrous Isabella quarter shows lovely rainbow colors in the margins, slightly deeper on the obverse, with lilac-gold in the centers and pale russet around the peripheries. The strike is sharp and the only discernible abrasions are a couple minute ticks on the hip of the reverse figure. PCGS lists 49 numerically finer representatives (5/15). NGC ID# 28HR, PCGS# 9220

- 4719 1900 Lafayette Dollar MS63 PCGS. DuVall 1-B.** This Select piece shows few overt abrasions, though a number of wispy marks are hidden beneath dusky gold and cloud-white patina. Softly lustrous with dots of deeper crimson near the portrait of Washington. Ex: *Baltimore Signature* (Heritage, 3/2009), lot 1676. NGC ID# 28N8, PCGS# 9222

- 4720 1900 Lafayette Dollar MS63 PCGS. DuVall 1-B.** Rich gunmetal-gray, tan-brown, and blue-green toning encompass this satiny Select silver dollar. A loupe reveals smooth fields for the MS63 level, along with a few trivial slide marks on Washington's jaw and cheekbone. NGC ID# 28N8, PCGS# 9222

- 4721 1900 Lafayette Dollar MS63 PCGS. DuVall 2-C.** Rich peach-red, golden-brown, and aquamarine toning embraces this coruscating and crisply struck example. The reverse is well preserved, and obverse marks are relatively minor and mostly located near the TE in UNITED. NGC ID# 28N8, PCGS# 9222

- 4722 1900 Lafayette Dollar MS64 NGC. DuVall 1-B.** A well-preserved, satiny Lafayette type coin, displaying sharply rendered motifs and fewer abrasions than are expected for the grade. Each side is largely light golden in color, although splashes of deeper orange and amber toning appear along the lower-right reverse border. NGC ID# 28N8, PCGS# 9222

- 4723 1900 Lafayette Dollar MS64 PCGS. DuVall 2-C.** This boldly struck Lafayette dollar has a lustrous obverse and a satiny reverse. Blushes of forest-green and russet-brown toning encompass the borders. The interior is silver-gray. A few faded thin marks are noted on the left reverse field. NGC ID# 28N8, PCGS# 9222

### 1900 Lafayette Dollar, DuVall 3-D Brilliant Near-Gem, Scarce Variety

- 4724 1900 Lafayette Dollar MS64+ PCGS. DuVall 3-D.** A borderline Gem example of this scarce DuVall 3-D variety, with a noticeably repunched AT in STATES visible at the base of the two letters, and the final S is punched too low. ME of AMERICA is overly close together. Lafayette dollars seldom display the brilliant-white surfaces and frosty cartwheel luster of this coin. Only a few tiny marks prevent a full Gem designation. NGC ID# 28N8, PCGS# 9222

- 4725 1921 Alabama MS66 PCGS.** Strong mint luster is the main selling point for the Alabama half dollar. This example certainly displays that element. Additionally, the silver-blue surfaces show just a hint of golden peripheral color around the obverse. Only a few tiny marks appear on the conjoined portraits. NGC ID# 28HT, PCGS# 9224

- 4726 1921 Alabama MS66 PCGS.** Sharply detailed in most areas, this impressive Premium Gem shows just a touch of softness on the eagle's claws. The well-preserved, lustrous surfaces radiate vibrant mint luster, under shades of champagne-gold and lavender-gray toning. PCGS has graded three numerically finer examples (6/15). NGC ID# 28HT, PCGS# 9224

- 4727 1921 Alabama 2x2 MS65 PCGS. CAC.** Light to medium wheat-gold toning graces this lustrous and boldly struck Gem. The low mintage 2x2 variety is a series semikey in the present superior quality. Certified in a green label holder. NGC ID# 28HS, PCGS# 9225

- 4728 1921 Alabama 2x2 MS66 NGC.** Soft, satiny luster illuminates the well-defined motifs of this Premium Gem Alabama Centennial half dollar. Both sides show medium gold and champagne-gray toning, while the underlying surfaces reveal only a few small ticks upon close examination. Census: 93 in 66 (7 in 66+, 9 in 66 ★), 5 finer (5/15). NGC ID# 28HS, PCGS# 9225

### 1921 2x2 Alabama Centennial Half, MS66+ Soft Luster, Original Toning

- 4729 1921 Alabama 2x2 MS66+ PCGS. CAC.** This Plus-designated Premium Gem is well-struck and devoid of any distracting abrasions. Satiny luster resides beneath a blanket of dusky golden-gray toning with deeper russet and amber-red tinges around portions of the peripheries. The 2x2 variety is the scarcer of the two Alabama Centennial half dollar issues, and is seldom seen in this grade. PCGS shows only seven finer examples (5/15). NGC ID# 28HS, PCGS# 9225

- 4730 1936 Albany MS67+ PCGS. CAC.** The Albany, New York, Charter half dollar is a particularly challenging issue to locate with clean surfaces, making this Plus-designated MS67 example an exception to the rule. Both sides are devoid of distracting abrasions and the satiny luster displays mottled sun-gold and champagne toning over sharp design elements. Only two MS68 coins are finer at PCGS (6/15). NGC ID# 28HU, PCGS# 9227
- 4731 1936 Albany MS67+ PCGS. CAC.** This high-end Superb Gem displays vivid shades of magenta and greenish-gold toning at the peripheries, while the centers remain mostly brilliant. The design elements are well-detailed and intense satiny mint luster radiates from both sides. PCGS has graded two numerically finer examples (6/15). NGC ID# 28HU, PCGS# 9227
- 4732 1937 Antietam MS67 PCGS. CAC.** A sharply detailed Superb Gem from a low distribution of 18,028 pieces, this delightful representative offers impeccably preserved, lustrous surfaces under shades of lavender-gray and olive-gold toning — tab-toned on the reverse. CAC-endorsed for quality and appeal. Just 17 numerically finer pieces have been seen by PCGS (6/15). NGC ID# 28HV, PCGS# 9229

**1935 Arkansas Half Dollar, MS67  
Very Rare in Superb Gem Condition**

- 4733 1935 Arkansas MS67 PCGS. CAC.** The Philadelphia Mint struck 13,012 Arkansas commemorative half dollars in 1935 (including a dozen assay coins), the highest mintage for any issue in the five-year series. Still, the 1935-P is rare in Superb Gem condition. Softly frosted luster glistens over the largely brilliant surfaces of this example, while the motifs are sharply struck and marks are almost nonexistent. Population: 21 in 67 (3 in 67+), 0 finer (5/15). NGC ID# 28HW, PCGS# 9233
- 4734 1935-D Arkansas MS67 PCGS.** This impressive Superb Gem shows accents of greenish-gold and lavender-gray toning over lustrous, impeccably preserved surfaces. The design elements are sharply detailed and eye appeal is outstanding. Population: 53 in 67 (7 in 67+), 1 finer (6/15). NGC ID# 28HX, PCGS# 9234
- 4735 1935-S Arkansas MS67 PCGS.** This sharply detailed Superb Gem is among the finest survivors from the distribution of just 5,506 pieces. The well-preserved surfaces exhibit satiny mint luster under shades of lavender, gray, and greenish-gold toning. Population: 22 in 67 (2 in 67+), 0 finer (6/15). NGC ID# 28HY, PCGS# 9235
- 4736 1935-S Arkansas MS67 PCGS. CAC.** The impeccably preserved lavender-gray surfaces of this delightful Superb Gem are highlighted by hints of golden-brown and amber toning, with well-detailed design elements and satiny mint luster throughout. Population: 22 in 67 (2 in 67+), 0 finer (5/15). NGC ID# 28HY, PCGS# 9235
- 4737 1936-D Arkansas MS67 PCGS. CAC.** Orange-gold and lime patina visits the borders, while the interiors are pearl-gray. A magnificent Superb Gem that is sharply struck, although the eagle's breast has slight blending of detail. Encapsulated in a green label holder. Population: 36 in 67 (4 in 67+), 1 finer (6/15).  
*Ex: Long Beach Signature (Heritage, 2/2007), lot 5949, which realized \$3,450.* NGC ID# 28J2, PCGS# 9238

- 4738 1936-D Arkansas MS67 PCGS. CAC.** The Arkansas Centennial pieces had a five-year run with moderate success, although the quantities minted did not approach the total 500,000 pieces authorized by Congress. This Superb Gem 1936 Denver issue displays reddish-gold toning at the margins and smooth, nearly mark-free pearlescent silver centers. The ribbon and eagle's breast show only slight weakness — sharper than most examples. Population: 36 in 67 (4 in 67+), 1 finer (5/15). NGC ID# 28J2, PCGS# 9238
- 4739 1936-D Arkansas MS67 PCGS. CAC.** A medium gray specimen with a smattering of antique-gold and russet color gravitating toward the border regions, slightly heavier on the reverse. Soft violet resides in the centers. Well-struck, lustrous, and nicely preserved. Population: 36 in 67 (4 in 67+), 1 finer (6/15).  
*Ex: Baltimore Signature (Heritage, 7/2003), lot 9157; Long Beach Signature (1/2004), lot 6497.* NGC ID# 28J2, PCGS# 9238
- 4740 1939 Arkansas MS66 PCGS.** Highlights of lavender-gray and greenish-gold patina visit the well-preserved surfaces of this spectacular Premium Gem, with vibrant satiny mint luster on both sides. The design elements are well-detailed and visual appeal is quite strong. Population: 53 in 66 (6 in 66+), 2 finer (6/15). NGC ID# 28JA, PCGS# 9249
- 4741 1936-S Bay Bridge MS67 PCGS. CAC.** The open layout of the obverse design on the 1936-S Bay Bridge half dollar was prone to abrasions, and seldom is an example of this issue encountered in Superb Gem condition. This piece displays softly frosted luster and sharp rendering of the motifs. Peripheral tinges of orange-gold, crimson, and russet surround light golden centers. PCGS has seen only 10 numerically finer representatives (5/15). NGC ID# 28JD, PCGS# 9254

**1938 Boone Half Dollar, MS67  
Superb Satiny Appeal**

- 4742 1938 Boone MS67 PCGS. CAC.** Designed by Augustus Lukeman, the artist's conception of Daniel Boone proved to be popular motif with the public and the issue had a five-year run between 1934 and 1938. The final-year 1938 P-D-S sets had a low distribution of just 2,100 sets, making it a preferred date in the series. This example is particularly well-struck with satin-smooth surfaces and faint golden accents over lustrous, pearlescent silver coloration. Just a single coin is graded numerically finer at PCGS. Population: 38 in 67 (5 in 67+), 1 finer (6/15). NGC ID# 28JU, PCGS# 9274

**1936 Cincinnati, MS67**  
**Among the Finest at PCGS and NGC**

**4743 1936 Cincinnati MS67 PCGS.** Satin luster covers pearl-gray silver surfaces, enhanced by lilac highlights and russet-gold accents at the margins. Far-better produced and preserved than most examples of this commemorative issue, created on behalf of the Cincinnati Music Center and paying tribute to adopted native son Stephen Foster, "America's Troubadour." Softly lustrous and boldly struck. Population: 11 in 67 (1 in 67+), 0 finer (5/15). NGC ID# 28JZ, PCGS# 9283

**4744 1936-D Cincinnati MS67 PCGS.** Bright, glistening mint luster characterizes this high-grade Cincinnati half. The surfaces display light gray patina over most of each side with deeper golden-brown toning around the margins. Superior eye appeal and technical preservation. Population: 48 in 67 (6 in 67+), 2 finer (6/15).  
*Ex: Central States Signature (Heritage, 5/2004), lot 10820. NGC ID# 28K2, PCGS# 9284*

**4745 1936-D Cincinnati MS67 NGC.** Smooth and unblemished, the mint luster rolls around each side uninterrupted by the abrasions that are so often seen on this popular Cincinnati commemorative half. The obverse is pearl-gray while the reverse has iridescent amber-gold toning, suggestive of many years residency in an original holder of issue. Census: 38 in 67 (3 in 67+, 5 in 67 ★), 3 finer (6/15).  
*Ex: Long Beach Signature (Heritage, 5/2003), lot 7114; New York Bullet Sale (Heritage, 12/2003), lot 2440; Portland Signature (Heritage, 3/2004), lot 6897. NGC ID# 28K2, PCGS# 9284*

**4746 1936-S Cincinnati MS66 PCGS.** Sharply rendered and satiny, with mottled olive-gold and champagne-gray toning over each side. A single small cut on the portrait's cheek precludes an even finer grade. Population: 65 in 66 (3 in 66+), 3 finer (6/15). NGC ID# 28K3, PCGS# 9285

**4747 1892 Columbian MS66+ PCGS. CAC.** Brilliant surfaces reveal semiprooflike fields and sharp, frosty design elements on this high-end 1892 Columbian half dollar. Thoroughly attractive, with a couple tiny marks on Columbus' chin being the only abrasions of note. There are only 32 finer examples at PCGS (5/15). NGC ID# 26H5, PCGS# 9296

**4748 1893 Columbian MS66+ PCGS. CAC.** This Columbian half type coin displays frosty mint luster over the design elements, contrasted against significant mirroring in the fields. The motifs are sharply rendered and there are no obtrusive abrasions. The obverse displays warm sun-gold toning with deeper aquamarine peripheral hues, while the reverse is primarily the latter color with amber and russet-gray intermixed. PCGS has seen 18 finer representatives (5/15). NGC ID# 26H6, PCGS# 9297

**4749 1936 Gettysburg MS66+ NGC. CAC.** Simply outstanding surface quality is accentuated by glowing satin luster beneath iridescent mint-gold toning. The design elements are boldly rendered, and the high level of preservation endures even close scrutiny with a loupe. Seldom encountered finer. NGC ID# 28KB, PCGS# 9305

**1928 Hawaiian Half, MS65**  
**Appealing, Lightly Toned Surfaces**

**4750 1928 Hawaiian MS65 PCGS.** One of the keys to the classic commemorative series, the Hawaiian Sesquicentennial half dollar is one of the true success stories in a series replete with its share of shenanigans, boondoggles, and overly ambitious ventures. Most Hawaiian halves were sold to an appreciative island populace from a conservative mintage of 10,000 pieces. Relatively few Gem or finer coins survive, and lightly toned, sharply struck examples such as the present coin are always in demand. Golden overtones float over the faintly iridescent silver surfaces amid satiny mint luster. The MS65 grade is optimal for most series specialists. NGC ID# 28KE, PCGS# 9309

**1928 Hawaiian Half, Satiny MS65**

**4751 1928 Hawaiian MS65 PCGS. CAC.** A satiny Gem example of this popular classic commemorative issue, struck to mark the 150th anniversary of Captain James Cook's arrival on the Hawaiian Islands in 1778. This piece is well-struck and lustrous, with much of each side blanketed by the typically seen olive-gold toning. NGC ID# 28KE, PCGS# 9309

**4752 1924 Huguenot MS67 PCGS.** A lovely Superb Gem representative, this coin displays pleasing, satiny luster, while yellow-gold, orange, auburn, and lime-green toning is present on both sides, primarily at the outer edges. The devices are sharply struck with very few signs of contact. Population: 62 in 67 (10 in 67+), 2 finer (6/15). NGC ID# 28KG, PCGS# 9314

**4753 1920 Maine MS66+ PCGS. CAC.** Remember the Maine with this Premium Gem, an exceptional example with frosty silver luster and delicate hints of gold toning. An exceptional example, rarely found finer, with only 42 higher grade PCGS submissions (6/15). NGC ID# 28KN, PCGS# 9326

### 1921 Missouri Half Dollar, Frosty MS66

- 4754 1921 Missouri MS66 NGC.** Robert Aitken became one of the first outside artists to design a commemorative coin when his models appeared on the two varieties of the Panama-Pacific fifty dollar gold piece, and the first such repeat artist with his commission for the 1921 Missouri Centennial half. The pleasing Premium Gem presented here is a delightful representative of Aitken's work. The frosty surfaces display subtle hints of sky-blue and rose-gold patina. Immensely appealing and among the finer-known survivors. Census: 34 in 66, 2 finer (6/15).  
Ex: Orlando FUN Signature (Heritage, 1/2008), lot 2352. NGC ID# 28KS, PCGS# 9330

- 4755 1921 Missouri 2x4 MS65 PCGS.** A satiny Gem, this Missouri Centennial half dollar is boldly struck and free of major abrasions. Both sides show deep olive, russet, and amber color, with lighter lilac-gray undertones emerging in the central regions. PCGS lists only 34 numerically finer representatives (6/15). NGC ID# 28KR, PCGS# 9331

- 4756 1923-S Monroe MS66 NGC.** Tinges of rainbow toning appear beneath a dusky overlay of smoke-gray and pale champagne toning. The design elements are well-struck and the surfaces reveal only a few trivial imperfections. The Monroe Doctrine Centennial half is infrequently available in this grade, and finer pieces are rare. Census: 61 in 66 (4 in 66+, 1 in 66 ★, 1 in 66+★), 8 finer (6/15). NGC ID# 28KT, PCGS# 9333

- 4757 1934-D Oregon MS67 PCGS. CAC.** The Oregon Trail half dollar is one of the most popular silver commemoratives and the 1934-D issue claims a distribution of 7,006 pieces. This delightful Superb Gem displays vibrant mint luster and sharply detailed design elements, with lightly toned well-preserved surfaces. Population: 71 in 67 (4 in 67+), 1 finer (6/15). NGC ID# 28L2, PCGS# 9344

- 4758 1939-S Oregon MS67 PCGS. CAC.** The 1939-S Oregon Trail half had a distribution of just 3,000 coins (plus five pieces for assay purposes). This Superb Gem example is sharply struck and impeccably preserved, as the grade demands. Blended sun-gold and pale rose toning graces each side with a few deeper russet accents around the peripheries. PCGS lists eight coins numerically finer (5/15). NGC ID# 28LB, PCGS# 9354

### 1915-S/S Half Dollar, MS66 Panama-Pacific Exposition

- 4759 1915-S/S Panama-Pacific, FS-502, MS66 PCGS. CAC.** Golden-brown, lavender, and blue-green toning adorns the margins of this lustrous and well struck half dollar. Nearly pristine aside from wispy contact on the shield. A conditionally rare issue, presumably due to non-collector purchasers at the Panama-Pacific Exposition. Housed in a green label holder. PCGS# 511601 Base PCGS# 9357

- 4760 1920 Pilgrim MS67 PCGS.** Mottled olive-green and orange toning blanket otherwise brilliant surfaces with illuminant mint luster. This Superb Gem, celebrating the tercentenary of the landing of the pilgrims at Plymouth, is delicately preserved with no mentionable marks. A trifle weak in the central reverse. PCGS has seen only one numerically finer submission (5/15). NGC ID# 28LC, PCGS# 9359

- 4761 1920 Pilgrim MS67 NGC.** The 1920 Pilgrim half dollar is seldom encountered in MS67 condition, and finer coins are virtually unobtainable. This delightful Superb Gem is sharply detailed and brightly lustrous, with a few highlights of greenish-gold and lavender toning. Census: 27 in 67 (8 in 67 ★), 1 finer (6/15). NGC ID# 28LC, PCGS# 9359

- 4762 1921 Pilgrim MS66+ PCGS.** Crisply struck design elements are illuminated by mint-fresh luster on this Plus-designated Pilgrim half dollar. Two-sided toning displays warm champagne-gold centers and deeper amber and ocean-blue peripheries. Close study with a loupe reveals only a few minute ticks, in keeping with the grade. There are only 37 examples finer at PCGS (5/15). NGC ID# 28LD, PCGS# 9360

- 4763 1921 Pilgrim MS66+ PCGS. CAC.** A high-end example for the Premium Gem grade level, as affirmed by the CAC approval label. This Plus-graded Pilgrim half dollar displays bold design elements and rich, satiny luster. Pastel shades of lavender-blue and champagne grace much of each side, while deeper olive-gold and umber hues reside around the peripheries. PCGS lists 37 finer examples (5/15). NGC ID# 28LD, PCGS# 9360

- 4764 1936 Robinson MS67 PCGS.** The obverse is tab-toned, with the peripheral golden-brown patina interrupted at 2 and 8 o'clock. The reverse displays similar shades but adds forest-green along the right margin. Joseph T. Robinson was the Senate Majority Leader when the issue was struck, but the Arkansas politician died the following year. Population: 75 in 67 (1 in 67+), 2 finer (5/15). NGC ID# 28LJ, PCGS# 9369

- 4765 1935-S San Diego MS67 PCGS. CAC.** The obverse of the California Pacific International Exposition half dollar is derived from the same symbolic elements that make up The Great Seal of the State of California, while the reverse depicts the State of California building as it was seen at the Exposition. This Superb Gem example displays well-struck design elements and radiant, satiny luster. Overtones of sun-gold and amber-gray on both sides are visited by tinges of ruby-red and pistachio-green around the reverse periphery. PCGS records only five numerically finer representatives (5/15). NGC ID# 28LK, PCGS# 9371

- 4766 Fifty-Piece Lot of 1936-D San Diego Half Dollars MS65 PCGS. CAC.** Each piece is separately housed in an identically graded holder with a green CAC seal. Four of the coins are FS-101 with the mintmark repunched south. All coins are lightly toned and lustrous with attractive surfaces and moderate inexactness of strike on the observation tower. (Total: 50 coins) NGC ID# 28LL, PCGS# 9372

- 4767 1926 Sesquicentennial MS65 PCGS.** This Gem Sesquicentennial half dollar shows deep amber-gold and autumn-red toning over each side, with a peppered overlay of russet also observed. The strike is sharp and the surfaces display rich luster. Light contact marks on the high points of the design limit the grade. PCGS has seen eight numerically finer representatives (5/15). NGC ID# 28LM, PCGS# 9374

- 4768 1926 Sesquicentennial MS65 NGC.** Light golden patina over bright silver luster is common to each side, though the obverse adds numerous dabs of reddish-orange and forest-green luster. A few light marks near the bottom of the bell are within bounds for the Gem grade but not finer. NGC has graded 21 numerically finer examples (6/15). NGC ID# 28LM, PCGS# 9374

- 4769 1926 Sesquicentennial MS65 PCGS.** Satiny luster resides beneath iridescent lavender-gold and pale olive toning on each side of this Gem Sesquicentennial half dollar. A few trivial ticks on Washington's cheek limit the grade. PCGS has seen only eight numerically finer examples (6/15). NGC ID# 28LM, PCGS# 9374

- 4770 1935 Spanish Trail MS64 PCGS.** A collector-grade example, boldly struck with just a few too many small surface grazes to warrant a Gem numeric assessment. The satiny surfaces show just a faint suggestion of light golden color, and the overall eye appeal is pleasing for the issue and grade. NGC ID# 28LN, PCGS# 9376
- 4771 1935 Spanish Trail MS66+ NGC.** This high-end Premium Gem displays sharply detailed design elements and vibrant mint luster throughout. The well-preserved surfaces show delicate shades of champagne-gold and lavender toning. NGC ID# 28LN, PCGS# 9376
- 4772 1935 Spanish Trail MS67 PCGS.** This Superb Gem Spanish Trail half dollar is well-struck and devoid of any objectionable abrasions. Amber-gray and steel-gold toning uniformly blankets each side, and the eye appeal is excellent. PCGS lists only two MS68 coins finer (6/15). NGC ID# 28LN, PCGS# 9376
- 4773 1925 Stone Mountain MS67 PCGS.** The Stone Mountain half dollar is a plentiful classic commemorative issue, but seldom is a piece found in Superb Gem condition. This satiny representative is well-struck and displays lilac-tinted golden toning. There are only eight numerically finer coins at PCGS (5/15). NGC ID# 26H8, PCGS# 9378
- 4774 1925 Stone Mountain MS67 PCGS.** Rich golden-brown toning is confined to the left obverse rim. The remainder of this lustrous Superb Gem displays light olive-gold and ice-blue hues. A minor Doubled Die Reverse variety, with the letters in SOLDIER, etc., exhibiting a spread to the north. NGC ID# 26H8, PCGS# 9378
- 4775 1925 Stone Mountain MS67 PCGS.** The 1925 Stone Mountain commemorative half dollar can only be called scarce in MS67 condition, but finer coins are very rare. This attractive Superb Gem displays well-detailed design elements and satiny mint luster under shades of lavender-gray and greenish-gold toning. PCGS has graded eight numerically finer examples (6/15). NGC ID# 26H8, PCGS# 9378
- 4776 1925 Stone Mountain MS67 PCGS.** The Stone Mountain Memorial half dollar is a fairly available classic commemorative issue, but the population thins at the lofty MS67 grade level and finer pieces are rare. This coin is boldly struck, with satiny mint luster. Olive-gold overtones appear on much of each side. PCGS has seen eight numerically finer submissions (6/15). NGC ID# 26H8, PCGS# 9378
- 4777 1934 Texas MS67+ PCGS.** The year 1934 was the first occasion that the Texas Independence Centennial half dollar was struck, and only the Philadelphia Mint produced coinage. This example is well-struck and carefully preserved. Dusky lavender-gray and pale ice-blue hues compete with deeper russet and olive-gray overtones on each side of this Plus-designated type coin. Population: 81 in 67 (6 in 67+), 2 finer (5/15). NGC ID# 28LP, PCGS# 9381
- 4779 1936-S Texas MS67+ PCGS.** CAC. Well-struck and impeccably preserved, this Superb Gem 1936-S Texas Centennial half dollar offers medium champagne toning with scattered russet and olive overtones on each side. Only two coins are finer at PCGS (6/15). NGC ID# 28LW, PCGS# 9388
- 4780 1925 Vancouver MS67 NGC.** The Fort Vancouver Centennial half dollar is seldom seen at the MS67 grade level, and only two MS68 examples (one in MS68 ★) have been certified finer by NGC and PCGS combined (6/15). This piece is boldly struck with rich, satiny luster. Mint-green and lavender centers yield to deeper sun-gold and lilac around the peripheries. Census: 56 in 67 (1 in 67+, 11 in 67 ★), 1 finer (6/15). NGC ID# 28M5, PCGS# 9399
- 4781 Five-Piece Lot of 1927 Vermont Half Dollars MS65 PCGS.** One of the coins is lightly toned, and housed in an old green label holder with a green CAC seal. The other four pieces display moderate to rich golden-brown and stone-gray toning. (Total: 5 coins) NGC ID# 28M6, PCGS# 9401
- 4782 1946-D Booker T. Washington MS67 PCGS.** Registry Set enthusiasts will recognize the importance of this conditionally scarce Superb Gem. The brilliant surfaces display shimmering satin luster and fully struck devices. Virtually unmarked. Population: 47 in 67 (4 in 67+), 0 finer (5/15). NGC ID# 28M8, PCGS# 9405
- 4783 1947-S Booker T. Washington MS67 PCGS.** CAC. A degree of semiprooflike mirroring accentuates the fields of this Superb Gem Booker T. Washington half, providing a pleasant departure from the typical, satiny luster of this issue. The design elements are sharply impressed, and the surfaces display a hint of light golden toning. Population: 19 in 67, 0 finer (5/15). NGC ID# 28MC, PCGS# 9410
- 4784 1952 Washington-Carver MS67 PCGS.** This satiny Superb Gem boasts small iridescent freckles of color that provide an overall pinkish-gray appearance that is more prevalent on the obverse. Areas of golden-brown toning are present at the upper portion of the reverse. Both sides are splendidly preserved and well-struck. Population: 17 in 67 (2 in 67+), 1 finer (5/15). NGC ID# 28MV, PCGS# 9434
- 4785 1952 Washington-Carver MS67 PCGS.** A well-struck, eye-appealing example of this late classic commemorative issue. The obverse displays vivid ocean-blue and violet peripheral toning around softer yellow-gold and champagne hues in the center, while the reverse is light golden overall, deepening to a mild olive hue around the borders. Population: 17 in 67 (2 in 67+), 1 finer (5/15). NGC ID# 28MV, PCGS# 9434
- 4786 1952 Washington-Carver MS67 PCGS.** CAC. The 1952 Washington-Carver half dollar saw the largest distribution by far of the various series issues, meaning the largest number remaining after unsold examples were melted. The net number disbursed was slightly more than 1.1 million pieces. Nonetheless, the issue has attained conditional rarity status in Superb Gem condition. This piece displays great eye appeal over pristine surfaces that are mostly pinkish with accents of jade and blue. A high-end example with the CAC endorsement, to boot. Population: 17 in 67 (2 in 67+), 1 finer (5/15). NGC ID# 28MV, PCGS# 9434
- 4787 1952 Washington-Carver MS67 NGC.** CAC. Attractive shades of champagne-gold, lavender, and magenta toning blanket the well-preserved surfaces of this spectacular Superb Gem. Well-detailed design elements and vibrant mint luster add to the outstanding eye appeal. Census: 33 in 67 (1 in 67+, 9 in 67 ★, 2 in 67+★), 1 finer (6/15). NGC ID# 28MV, PCGS# 9434
- 4788 1936 Wisconsin MS68 NGC.** Light-champagne toning combines with flawless surfaces and a full strike to generate a high degree of allure. Issued to celebrate the 100th anniversary of the establishment of the territorial government. Census: 39 in 68 (7 in 68 ★, 1 in 68+★), 0 finer (5/15). NGC ID# 28N6, PCGS# 9447

**1936-D Texas Half Dollar, MS68  
Tied for Finest Certified**

- 4778 1936-D Texas MS68 NGC.** Hints of pale-violet and blue shades flow amid profuse silver luster over the smooth, frosted surfaces of this Superb Gem Texas half dollar. The fields and devices are essentially pristine and unimprovable, while the strike is uniformly sharp. A distribution of 9,039 pieces was slightly less than the highest of the 5-year series with exception of the inaugural 1834 issue, which had a net distribution of 61,463 pieces. Census: 13 in 68 (1 in 68 ★), 0 finer (6/15). NGC ID# 28LV, PCGS# 9387

## COMMEMORATIVE GOLD

- 4789** 1903 Louisiana Purchase, Jefferson, MS65 PCGS. CAC. Sharply detailed design elements and vibrant mint luster are the calling cards of this remarkable Gem. The orange-gold surfaces show no mentionable distractions and overall eye appeal is exceptional. NGC ID# 26HA, PCGS# 7443
- 4790** 1903 Louisiana Purchase, Jefferson, MS65 PCGS. CAC. A pleasingly detailed and charming Jefferson gold dollar, luminous with pale straw-gold on the portrait and a richer yellow in the fields. Excellent overall eye appeal.  
Ex: Long Beach Signature (Heritage, 9/2010), lot 4866; Central States Signature (Heritage, 4/2011), lot 6074. NGC ID# 26HA, PCGS# 7443
- 4791** 1903 Louisiana Purchase, Jefferson, MS65 PCGS. CAC. This sharply detailed Gem representative exhibits orange-gold surfaces with no mentionable distractions and vibrant mint luster on both sides. Overall eye appeal is outstanding. NGC ID# 26HA, PCGS# 7443
- 4792** 1903 Louisiana Purchase, Jefferson, MS65 PCGS. CAC. The pristine lemon-yellow surfaces of this delightful Gem show prooflike reflectivity throughout and the design elements are sharply detailed in all areas. Overall eye appeal is terrific. NGC ID# 26HA, PCGS# 7443
- 4793** 1903 Louisiana Purchase, Jefferson, MS65 PCGS. CAC. This spectacular Gem exhibits sharply detailed design elements and well-preserved orange-gold surfaces. Vibrant mint luster radiates from both sides and eye appeal is terrific. NGC ID# 26HA, PCGS# 7443
- 4794** 1903 Louisiana Purchase, Jefferson, MS65 NGC. CAC. Struck to commemorate the 100th anniversary of the Louisiana Purchase, this attractive Gem displays vivid orange-gold surfaces, with vibrant mint luster and sharply detailed design elements on both sides. NGC ID# 26HA, PCGS# 7443
- 4795** 1903 Louisiana Purchase, Jefferson, MS65 NGC. CAC. This remarkable Gem displays vibrant mint luster on both sides, with prooflike reflectivity at selected angles. The design elements are sharply detailed and the orange-gold surfaces are free of mentionable distractions. NGC ID# 26HA, PCGS# 7443
- 4796** 1903 Louisiana Purchase, Jefferson, MS66 PCGS. CAC. This delightful Premium Gem offers impeccably preserved orange-gold surfaces that show vibrant mint luster throughout, and much prooflike reflectivity at certain angles. The design elements are sharply detailed and eye appeal is terrific. NGC ID# 26HA, PCGS# 7443
- 4797** 1903 Louisiana Purchase, Jefferson, MS66 PCGS. CAC. A spectacular Premium Gem with sharply detailed design elements and pristine orange-gold surfaces that show a few hints of rose. Vibrant mint luster adds to the tremendous eye appeal. NGC ID# 26HA, PCGS# 7443
- 4798** 1903 Louisiana Purchase, Jefferson, MS66 NGC. CAC. A stunning Premium Gem representative of the first commemorative gold dollar, with impeccably preserved orange-gold surfaces and sharply detailed design elements throughout. Vibrant mint luster radiates from both sides. NGC ID# 26HA, PCGS# 7443
- 4799** 1903 Louisiana Purchase, Jefferson, MS66 NGC. CAC. A gorgeous example of this introductory commemorative gold dollar. Lime-green, orange, and yellow-gold luster bathes virtually pristine surfaces. Precisely struck, eye-catching, and a good value relative to the next higher grade.  
Ex: Baltimore Signature (Heritage, 3/2009), lot 1767. NGC ID# 26HA, PCGS# 7443
- 4800** 1903 Louisiana Purchase, Jefferson, MS66 PCGS. CAC. Virtually a full strike, this brilliant-yellow Jefferson gold dollar has prooflike fields around satiny devices, creating a lovely cameo appearance. A few coppery toning splashes are evident on each side, with trivial marks that are invisible unless a glass is utilized.  
Ex: Chicago Signature (Heritage, 8/2011), lot 5058. NGC ID# 26HA, PCGS# 7443
- 4801** 1903 Louisiana Purchase, McKinley, MS65 PCGS. The McKinley variant of the Louisiana Purchase gold dollar is minutely scarcer in high grade than its Jefferson counterpart. This is a well-struck example with rich orange and peach-gold color. Semiprooflike mirroring in the fields reveals few abrasions. NGC ID# 26HB, PCGS# 7444
- 4802** 1903 Louisiana Purchase, McKinley, MS65 PCGS. CAC. This satiny Gem is devoid of significant abrasions, although a loupe reveals trivial contact on the high points of portrait that limits the grade. The strike is sharp and the eye appeal is outstanding. NGC ID# 26HB, PCGS# 7444
- 4803** 1903 Louisiana Purchase, McKinley, MS65 PCGS. CAC. This Gem example is notably sharp on the obverse portrait, with satiny luster that illuminates rich orange-gold and peach hues. A single graze on the top of McKinley's head appears to be all that limits the grade. This is a lovely CAC-approved type coin. NGC ID# 26HB, PCGS# 7444
- 4804** 1903 Louisiana Purchase, McKinley, MS65 PCGS. CAC. McKinley's portrait was modeled on his earlier presidential medal by Charles Barber. This attractive Gem displays sharply detailed design elements and vivid orange-gold surfaces with vibrant mint luster on both sides. NGC ID# 26HB, PCGS# 7444
- 4805** 1903 Louisiana Purchase, McKinley, MS65 PCGS. CAC. Fallen president William McKinley appeared on half the Louisiana Purchase gold dollars in 1903, with Thomas Jefferson on the other half. This impressive Gem exhibits sharply detailed design elements and well-preserved orange-gold surfaces. NGC ID# 26HB, PCGS# 7444
- 4806** 1903 Louisiana Purchase, McKinley, MS65 NGC. CAC. This delightful Gem displays vibrant mint luster and sharply detailed design elements throughout. The orange-gold surfaces show only the most insignificant signs of contact and eye appeal is outstanding. NGC ID# 26HB, PCGS# 7444
- 4807** 1903 Louisiana Purchase, McKinley, MS65 NGC. CAC. From a distribution of 17,500 pieces, this impressive Gem exhibits sharply detailed design elements throughout, with vibrant mint luster and well-preserved yellow and orange-gold surfaces. NGC ID# 26HB, PCGS# 7444
- 4808** 1903 Louisiana Purchase, McKinley, MS66 PCGS. CAC. William McKinley first appeared on a gold dollar commemorative in 1903 (he would later appear on the McKinley commemorative dollars of 1916-1917). This delightful Superb Gem displays sharply detailed design elements and lustrous orange-gold surfaces with outstanding eye appeal. NGC ID# 26HB, PCGS# 7444
- 4809** 1903 Louisiana Purchase, McKinley, MS66 NGC. CAC. The orange-gold surfaces of this magnificent Premium Gem are impeccably preserved, with vibrant satiny mint luster on both sides. The design elements are sharply detailed and overall eye appeal is tremendous. NGC ID# 26HB, PCGS# 7444
- 4810** 1903 Louisiana Purchase, McKinley, MS67 PCGS. CAC. The McKinley and Jefferson types of the Louisiana Purchase gold dollar are comparable in high-grade availability overall, both being conditionally scarce in Superb Gem condition. This McKinley representative displays bold design definition, with radiant, satiny luster and fresh yellow-gold color. Only two coins are numerically finer at PCGS (6/15). NGC ID# 26HB, PCGS# 7444
- 4811** 1903 Louisiana Purchase, McKinley, MS67 NGC. CAC. An extraordinary Superb Gem representative, with razor-sharp definition on all design elements and impeccably preserved orange-gold surfaces that radiate vibrant mint luster on both sides. NGC has graded five numerically finer examples (5/15). NGC ID# 26HB, PCGS# 7444
- 4812** 1904 Lewis and Clark MS64 PCGS. A well-struck example, with straw-gold luster and semiprooflike mirroring in the fields. A few stray lines limit the grade, but there are no obtrusive abrasions. This 1904 issue is slightly more available in high grade than its 1905 counterpart, ideal for type representation. NGC ID# 26HC, PCGS# 7447

- 4813 1904 Lewis and Clark MS64 NGC. CAC.** The well-preserved yellow-gold surfaces of this attractive Choice example show a few highlights of green, with some slight roughness in the lower-left obverse field, near the bust truncation. The design elements are sharply detailed, with ample mint luster throughout. NGC ID# 26HC, PCGS# 7447
- 4814 1905 Lewis and Clark MS63 PCGS.** Some small, scattered, wispy abrasions and hairlines appear on each side, and the luster is a trifle flat, but the overall appearance is quite acceptable for the grade. The 1905 Lewis and Clark Exposition gold dollar is actually a tad elusive in this affordable condition.  
*Ex: Dallas Signature (Heritage, 12/2005), lot 3042. NGC ID# 26HD, PCGS# 7448*
- 4815 1905 Lewis and Clark MS64+ PCGS.** This high-end Choice example displays lightly marked orange-gold surfaces with vibrant mint luster on both sides. The design elements are sharply detailed and overall eye appeal is outstanding. NGC ID# 26HD, PCGS# 7448
- 4816 1905 Lewis and Clark MS64 PCGS. CAC.** The 1905 Lewis and Clark commemorative gold dollar is considerably more difficult to locate than its 1904 counterpart. This sharply detailed, orange-gold Choice example offers lustrous surfaces with outstanding eye appeal and few signs of contact. NGC ID# 26HD, PCGS# 7448
- 4817 1915-S Panama-Pacific Gold Dollar MS65 PCGS.** A sharply struck and exemplary peach-gold Gem. The lustrous surfaces show only trivial imperfections when inspected beneath a loupe. Although sometimes identified as a baseball player, the obverse figure is instead a Panama Canal worker. Housed in a green label holder. NGC ID# 26HE, PCGS# 7449
- 4818 1915-S Panama-Pacific Gold Dollar MS65 PCGS. CAC.** The dollar is the most plentiful of the four gold commemoratives issued in conjunction with the Panama-Pacific International Exposition held in San Francisco in 1915. This Gem example is boldly struck and devoid of distractions. Lovely rose and orange-gold hues encompass each side. NGC ID# 26HE, PCGS# 7449
- 4819 1915-S Panama-Pacific Gold Dollar MS65 PCGS. CAC.** The San Francisco Mint struck 25,034 gold dollars for the Panama-Pacific International Exposition in 1915 (including 34 assay coins), but only 15,000 were sold; the remaining 10,034 coins were melted at the San Francisco Mint in October 1916. This Gem example is well-struck and equally well-preserved without obvious flaws. Satiny surfaces yield warm honey-gold color. NGC ID# 26HE, PCGS# 7449
- 4820 1915-S Panama-Pacific Gold Dollar MS65 PCGS. CAC.** A clean, frosty example, this Gem Panama-Pacific gold dollar is boldly struck with glowing yellow-gold luster. The gold dollar is the most available of the four gold issues struck for the Panama-Pacific International Exposition held in San Francisco in 1915. NGC ID# 26HE, PCGS# 7449
- 4821 1915-S Panama-Pacific Gold Dollar MS65 PCGS. CAC.** The mintmark is nicely repunched southeast. Olive-green and honey-gold alternate across this coruscating and crisply struck Gem. A narrow lint mark is apparent on the neck of the canal worker, but post-strike contact is practically absent. NGC ID# 26HE, PCGS# 7449
- 4822 1915-S Panama-Pacific Gold Dollar MS65 PCGS. CAC.** The 1915-S Panama-Pacific gold dollars were struck to commemorate the opening of the Panama Canal. This spectacular Gem exhibits sharply detailed design elements and well-preserved orange-gold surfaces, with vibrant mint luster and outstanding eye appeal. NGC ID# 26HE, PCGS# 7449
- 4823 1915-S Panama-Pacific Gold Dollar MS65 PCGS. CAC.** The 1915-S Panama-Pacific gold dollar was part of a five coin program authorized to commemorate the opening of the Panama Canal. This delightful Gem exhibits razor-sharp definition on all design elements and the lustrous orange-gold surfaces show minimal signs of contact. NGC ID# 26HE, PCGS# 7449
- 4824 1915-S Panama-Pacific Gold Dollar MS65 PCGS. CAC.** A lovely peach-gold and lime-green Gem. The lustrous surfaces are unblemished, and the strike shows only slight inexactness along the left borders. The mintmark is clearly repunched southeast, as seen on approximately one in three examples of this low mintage issue. NGC ID# 26HE, PCGS# 7449
- 4825 1915-S Panama-Pacific Gold Dollar MS65 NGC. CAC.** An exquisite khaki-gold Gem whose sole imperfection is a minuscule strike-through on the canal worker's cap. A lustrous and beautiful souvenir of the Panama-Pacific Exposition. Housed in a former generation holder.  
*Ex: Dallas Signature (Heritage, 10/2012), lot 5239, which realized \$1,292.50. NGC ID# 26HE, PCGS# 7449*
- 4826 1915-S Panama-Pacific Gold Dollar MS66 PCGS. CAC.** From a distribution of 15,000 pieces, the 1915-S Panama-Pacific gold dollar is very scarce in grades above the MS66 level. This delightful Premium Gem displays sharply detailed design elements and well-preserved lustrous surfaces. PCGS has graded 64 numerically finer examples (5/15). NGC ID# 26HE, PCGS# 7449
- 4827 1915-S Panama-Pacific Gold Dollar MS66 PCGS. CAC.** Orange-gold and sea-green shades alternate across lustrous and virtually pristine surfaces. The mintmark is widely repunched southeast; an obvious candidate for inclusion in a future edition of *Cherrypickers*!. NGC ID# 26HE, PCGS# 7449
- 4828 1915-S Panama-Pacific Gold Dollar MS66 NGC. CAC.** A sharply detailed Premium Gem, from a distribution of 16,000 pieces, this attractive yellow-gold example offers well-preserved surfaces with vibrant mint luster on both sides and ample eye appeal. NGC ID# 26HE, PCGS# 7449

#### 1915-S Panama-Pacific Quarter Eagle, MS65

- 4829 1915-S Panama-Pacific Quarter Eagle MS65 NGC. CAC.** The 1915-S Panama-Pacific quarter eagle claims a small distribution of 6,749 pieces, but the issue has a relatively high survival rate. This attractive Gem exhibits well-detailed design elements and the pleasing orange-gold surfaces radiate vibrant mint luster, with only minor signs of contact. Eye appeal is outstanding. NGC ID# 26HK, PCGS# 7450
- 4830 1916 McKinley MS65 PCGS.** An excellent type coin, this Gem 1916 McKinley gold dollar is sharply struck, with rich orange-gold luster and semiprooflike obverse fields. The surfaces are free of distracting abrasions, although a few trivial lines limit the grade. NGC ID# 26HE, PCGS# 7454
- 4831 1916 McKinley MS65 PCGS.** Splendidly patinated rose-red, lime-green, and orange-gold. Lustrous and well struck with outstanding preservation. This exceptional McKinley Memorial dollar is housed in a green label holder.  
*Ex: West Palm Beach Signature (Heritage, 7/2009), lot 2009. NGC ID# 26HE, PCGS# 7454*
- 4832 1916 McKinley MS65 PCGS. CAC.** This fully struck and essentially pristine Gem is bathed in rich peach patina. The eye appeal is outstanding. Gold standard advocate William McKinley appears on six different U.S. coin issues; commemorative gold dollars from 1903, 1916, and 1917, plus the PDS versions of his 2013 Presidential dollar. Encapsulated in a green label holder. NGC ID# 26HE, PCGS# 7454

**4833 1916 McKinley MS65 PCGS. CAC.** A well-preserved orange-gold Gem, with well-detailed design elements that show just a touch of the usual softness on the hair, and vibrant mint luster on both sides. Overall visual appeal is quite strong. NGC ID# 26HF, PCGS# 7454

**4834 1916 McKinley MS65 PCGS. CAC.** This impressive Gem representative shows well-preserved orange-gold surfaces, with a few hints of lilac and vibrant mint luster throughout. The design elements are well-detailed and the fields show prooflike reflectivity in selected areas. NGC ID# 26HF, PCGS# 7454

**4835 1916 McKinley MS65 PCGS. CAC.** The well-preserved lemon-yellow surfaces of this attractive Gem display subtle highlights of rose, with vibrant mint luster on both sides. The design elements are well-detailed and eye appeal is outstanding. NGC ID# 26HF, PCGS# 7454

**4836 1916 McKinley MS65 PCGS. CAC.** The attractive orange-gold surfaces of this impressive Gem show only microscopic signs of contact and the design elements are well-detailed, with just a touch of the usual softness on the hair. Vibrant mint luster adds to the outstanding eye appeal. NGC ID# 26HF, PCGS# 7454

**4837 1916 McKinley MS65 PCGS. CAC.** From a modest distribution of 9,977 pieces, this attractive Gem exhibits lustrous orange-gold surfaces that show minimal signs of contact. The design elements are well-detailed and overall visual appeal is excellent. NGC ID# 26HF, PCGS# 7454

**4838 1916 McKinley MS65 PCGS. CAC.** A delightful Gem representative of the popular McKinley gold dollar, with well-detailed design elements and well-preserved peach-gold surfaces that radiate vibrant mint luster. Eye appeal is outstanding. NGC ID# 26HF, PCGS# 7454

**4839 1916 McKinley MS65 NGC. CAC.** Sharply detailed in most areas, this attractive Gem shows just a trace of the usual softness on the hair. The pleasing yellow-gold surfaces are brightly lustrous, with no mentionable distractions. NGC ID# 26HF, PCGS# 7454

**4840 1916 McKinley MS65 NGC. CAC.** Fewer than 10,000 McKinley gold dollars were distributed in 1916. This impressive Gem offers well-detailed design elements and brightly lustrous yellow-gold surfaces that show only the most insignificant signs of contact. NGC ID# 26HF, PCGS# 7454

**4841 1916 McKinley MS66 PCGS. CAC.** The 1916 McKinley gold dollar is still an available issue at the MS66 grade level, but it becomes scarce in higher grades. This attractive Premium Gem is well-detailed and brightly lustrous, with impeccably preserved surfaces. NGC ID# 26HF, PCGS# 7454

**4842 1916 McKinley MS66+ PCGS. CAC.** A fully struck caramel-gold Premium Gem with exemplary luster and a virtual absence of contact. A pinpoint spot appears near the top of the L in MCKINLEY on the obverse, and a small as-made strike-through is noted northeast of the 6 in the date. NGC ID# 26HF, PCGS# 7454

**4843 1917 McKinley MS65 PCGS. CAC.** This sharply detailed Gem displays vivid yellow and orange-gold surfaces with much prooflike reflectivity in the fields. No mentionable surface flaws are evident and overall eye appeal is terrific. NGC ID# 26HG, PCGS# 7455

**4844 1917 McKinley MS65 PCGS. CAC.** The 1917 McKinley gold dollar claims a smaller distribution than its 1916 counterpart, at a meager 5,000 pieces. This well-detailed Gem displays lustrous orange-gold surfaces with minimal signs of contact and outstanding eye appeal. NGC ID# 26HG, PCGS# 7455

**4845 1917 McKinley MS66 PCGS. CAC.** The McKinley gold dollars of 1916-1917 were actually the second appearance of the fallen president on a commemorative gold dollar, as his likeness was featured on half the Louisiana Purchase dollars of 1903. This impressive Premium Gem is well-detailed and brightly lustrous, with terrific eye appeal. NGC ID# 26HG, PCGS# 7455

---

### 1917 McKinley Memorial Gold Dollar Frosty MS67

**4846 1917 McKinley MS67 NGC.** The McKinley Memorial gold dollar is seldom seen at the MS67 grade level, with such pieces being the finest obtainable by collectors. This exceptional piece displays seemingly undisturbed surfaces with frosty yellow-gold luster. A couple pillars on the reverse are a trifle soft, but the strike is otherwise well-executed. Census: 58 in 67 (5 in 67 ★), 0 finer (6/15). NGC ID# 26HG, PCGS# 7455

---

**4847 1922 Grant No Star MS65 PCGS.** Deep orange-gold color complements good luster and a near-absence of contact, save for one thin mark in the right obverse field. Excellent eye appeal for this popular Civil War-themed commemorative.  
*Ex: Central States Signature (Heritage, 4/2012), lot 7024.* NGC ID# 26HJ, PCGS# 7458

**4848 1922 Grant No Star MS65 PCGS. CAC.** A high grade olive-gold Gem. A tiny strike-through on the forehead, as coined, is the sole apparent imperfection. The strike is sharp aside from the unavoidable incompleteness on the tree trunk near the frame house window. Housed in an old green label holder. NGC ID# 26HJ, PCGS# 7458

**4849 1922 Grant No Star MS65 PCGS. CAC.** From a distribution of just 5,000 pieces, this delightful No Star example exhibits well-detailed design elements and lustrous yellow-gold surfaces with no mentionable distractions. NGC ID# 26HJ, PCGS# 7458

**4850 1922 Grant No Star MS66 PCGS. CAC.** A splendidly preserved peach-gold example of this scarce commemorative issue. As is the case with the Grant half dollar, the Star and No Star variants served no apparent purpose other than to provide additional revenue for the distributor. Certified in a green label holder. NGC ID# 26HJ, PCGS# 7458

**4851 1922 Grant No Star MS66 PCGS. CAC.** This spectacular Premium Gem represents the intended design, without the star that was added erroneously to some 1922 Grant gold dollars. The design elements are sharply detailed and the well-preserved orange-gold surfaces are brightly lustrous. NGC ID# 26HJ, PCGS# 7458

---

### 1922 No Star Grant Gold Dollar, MS67 Nearly Unavailable Any Finer

**4852 1922 Grant No Star MS67 NGC.** While the With Star variant received more "press" when minted, the production of Grant Memorial gold dollars was equally split between the No Star and With Star types and, in fact, the No Star variety is slightly scarcer in the highest grades. This lustrous and attractive Superb Gem displays lively medium-gold surfaces with hints of orange and lime-green overtones over the sharply struck elements. Just five pieces are certified in a numerically finer grade at NGC (6/15). NGC ID# 26HJ, PCGS# 7458

**1922 No Star Grant Gold Dollar, MS67  
Among the Finest at PCGS**

- 4853 1922 Grant No Star MS67 PCGS. CAC.** Fresh, satiny luster in warm straw-gold hues accentuates the sharp design elements of this Superb Gem No Star Grant gold dollar, among the finest certified by PCGS (6/15). Congress authorized a production of 10,000 Grant Memorial gold dollars in 1922, and the Mint divided this between two different varieties: the With Star and the No Star. The purpose was to be able to market two different varieties to collectors for perceivably increased profit. NGC ID# 26HJ, PCGS# 7458

**1922 No Star Grant Memorial Gold Dollar  
Sharp MS67**

- 4854 1922 Grant No Star MS67 NGC. CAC.** The Grant No Star gold dollar had a distribution of just 5,016 pieces, an identical number to its With Star counterpart. Nonetheless, the No Star variant is somewhat scarce in high grade. This Superb Gem representative is boldly struck with satiny yellow-gold luster. Affirmed by the CAC endorsement, the surface quality is outstanding. Only five coins are numerically finer at NGC (6/15). NGC ID# 26HJ, PCGS# 7458
- 4855 1922 Grant With Star MS65 PCGS.** Hints of lilac appear within the satiny orange-gold luster of this Gem With Star Grant Memorial gold dollar. The devices are well-detailed, and there are only a few minor grazes discernible when studied beneath a loupe. NGC ID# 26HH, PCGS# 7459
- 4856 1922 Grant With Star MS65 PCGS. CAC.** The distribution of the popular With Star type was just 5,016 pieces. This delightful Gem exhibits sharply detailed design elements and virtually pristine orange-gold surfaces, with vibrant mint luster on both sides. NGC ID# 26HH, PCGS# 7459
- 4857 1922 Grant With Star MS65 NGC. CAC.** The popular With Star issue was not officially requested by the Grant Memorial Association and that feature seems to have been added erroneously. This delightful Gem is sharply detailed and brightly lustrous, with well-preserved orange-gold surfaces. NGC ID# 26HH, PCGS# 7459
- 4858 1922 Grant With Star MS66 PCGS. CAC.** Flowing luster on flashy, rich orange-gold surfaces is accompanied by excellent strike and preservation. This piece is certified in a green-label holder with CAC green approval sticker, a popular format for some collectors. A limited number of finer pieces are available, but the Premium Gem grade is ideal for the budget-conscious collector seeking quality. NGC ID# 26HH, PCGS# 7459
- 4859 1922 Grant With Star MS66 PCGS. CAC.** The design elements of this impressive Premium Gem are well-detailed and the surface preservation is beyond reproach. The orange-gold surfaces are lustrous and appealing, with outstanding eye appeal. NGC ID# 26HH, PCGS# 7459

- 4860 1922 Grant With Star MS66 PCGS. CAC.** The design elements of this delightful Premium Gem exhibit razor-sharp definition throughout and both sides radiate vibrant mint luster. The orange-gold surfaces show a few highlights of rose, with no mentionable distractions and outstanding eye appeal. NGC ID# 26HH, PCGS# 7459

- 4861 1922 Grant With Star MS66 PCGS. CAC.** Sharp design elements and carefully preserved, satiny surfaces each contribute to the outstanding eye appeal of this straw-gold Grant Memorial gold dollar. This With Star variant had a mintage of 5,000 pieces (plus 16 assay coins), all of which were eventually distributed. The initial purchase price was \$3.50, \$0.50 more than that of the No Star variant. NGC ID# 26HH, PCGS# 7459

- 4862 1922 Grant With Star MS66 PCGS. CAC.** A spectacular Premium Gem example of the popular With Star variant, this coin offers well-detailed design elements and impeccably preserved orange-gold surfaces. Vibrant mint luster adds to the outstanding visual appeal. NGC ID# 26HH, PCGS# 7459

- 4863 1922 Grant With Star MS66 NGC. CAC.** This spectacular Premium Gem displays sharply detailed design elements and virtually pristine orange-gold surfaces with a few hints of rose patina. Vibrant mint luster adds to the extraordinary eye appeal. NGC ID# 26HH, PCGS# 7459

- 4864 1922 Grant With Star MS66 NGC. CAC.** A beautiful butter-gold Premium Gem whose coruscating and unabraded surfaces display a sharp strike except for the trunk of the tree near the frame house window. Laura Gardin Fraser is the designer, along with the corresponding commemorative half dollar. Certified in a former generation holder.  
*Ex: Dallas Signature (Heritage, 10/2012), lot 5259, which realized \$2,350.* NGC ID# 26HH, PCGS# 7459

- 4865 1926 Sesquicentennial MS65 NGC.** An ideally well-struck and frosty example of this American Independence commemorative issue, with the only discernible abrasions being a few tiny ticks on the high points of the devices. A blend of rose and green-gold hues encompasses each side, with a few coppery-red alloy spots in the central regions. NGC ID# 26HL, PCGS# 7466

- 4866 1926 Sesquicentennial MS65 PCGS.** A few faint grazes on the figure of Liberty appear to be all that limit the grade on this frosty Sesquicentennial quarter eagle. The low-relief design elements show pleasing definition, and each side is aglow in warm wheat-gold luster. NGC ID# 26HL, PCGS# 7466

- 4867 1926 Sesquicentennial MS65 PCGS.** The 1926 Sesquicentennial quarter eagle claims a distribution of 46,019 pieces. This impressive Gem offers well-detailed design elements and vibrant mint luster throughout. The orange-gold surfaces show no mentionable distractions. NGC ID# 26HL, PCGS# 7466

**1926 Sesquicentennial Quarter Eagle, MS65+**

- 4868 1926 Sesquicentennial MS65+ PCGS.** A high-end Gem specimen of the 1926 Sesquicentennial commemorative quarter eagle, with well-detailed design elements and vibrant mint luster throughout. The vivid orange-gold surfaces radiate vibrant mint luster and show no mentionable signs of contact. Overall visual appeal is outstanding. NGC ID# 26HL, PCGS# 7466

- 4869 1926 Sesquicentennial MS65 PCGS. CAC.** The design elements of this impressive Gem are sharply detailed and the orange-gold surfaces are impeccably preserved, aside from a few minor contact marks on the torso. Vibrant mint luster adds to the outstanding eye appeal. NGC ID# 26HL, PCGS# 7466
- 4870 1926 Sesquicentennial MS65 PCGS. CAC.** The well-preserved orange-gold surfaces of this attractive Gem display a few hints of rose patina, with vibrant mint luster on both sides. The design elements are well-detailed and eye appeal is excellent. NGC ID# 26HL, PCGS# 7466
- 4871 1926 Sesquicentennial MS65+ PCGS. CAC.** Rich orange-gold luster rolls in cartwheels across this Sesquicentennial quarter eagle, which goes beyond the MS65 designation to score a coveted Plus from PCGS. Beyond the noteworthy preservation, the strike is pleasing, and even critical coin connoisseurs would be hard-pressed to find a better coin in the grade range. NGC ID# 26HL, PCGS# 7466

## TERRITORIAL GOLD

### 1860 Clark, Gruber Five Dollar Choice VF, Kagin-2

- 4872 1860 Clark, Gruber & Co. Five Dollar VF35 PCGS. K-2, R.4.** Unlike the ten and twenty dollar Clark, Gruber 1860 issues, their five dollar design imitates Federal types and omits any depiction of Pikes Peak. On this collectible example, the mildly bright lemon-gold surfaces retain noticeable luster. We note two small digs beneath the chin and a dull vertical mark above the arrowheads. Listed on page 398 of the 2016 *Guide Book*.  
Ex: Long Beach Signature (Heritage, 2/2007), lot 5336, which realized \$2,875. PCGS# 10136

## S.S.C.A. RELIC GOLD MEDAL

- 4873 2009 "Humbert Commemorative" Gem Proof Ultra Cameo NGC.** Struck from "Pure California Gold" with the reverse inscription HUMBERT GOLD INGOT / COMMEMORATIVE 2009 / PURE CALIFORNIA GOLD / 2.5 OZ TROY 999.9 FINE. The piece is similar in appearance and design to the Kagin-11 Humbert "slugs" from the Gold Rush period, struck with a medal turn of the dies. The contrast is stark and the eye appeal is proportionately bold, fueled by unmarked, yellow-gold mirrors.

## CALIFORNIA FRACTIONAL GOLD

- 4874 1854 Liberty Octagonal 1 Dollar, BG-532, Low R.4, MS62 NGC.** A sharply struck peach-gold representative of this scarce Period One variety. The attractively toned surfaces are unblemished. Among those examples certified by PCGS, 96 of 126 are in circulated grades, which confirms that BG-532 contributed to Gold Rush commerce in an era marked by persistent shortages of silver and gold coins. PCGS# 10509
- 4875 1875 Indian Round 25 Cents, BG-878, R.3, MS67 Deep Mirror Prooflike NGC.** A well struck sun-gold Premium Gem with outstanding preservation and highly reflective fields. The Indian has a sleepy expression on this more available Christopher Mohrig die marriage. Census: 3 in 66 Deep Prooflike, 2 finer (5/15). PCGS# 910739 Base PCGS# 10739

## PATTERNS

### 1862 GOD OUR TRUST Half Dollar Judd-295, Select Proof Struck in Silver

- 4876 1862 Half Dollar, Judd-295, Pollock-353 PR63 PCGS.** A gleaming, gold-toned silver pattern proof, struck from the regular Seated half dies except for the motto GOD OUR TRUST above the eagle's head, without the scroll. The same reverse die also struck patterns in 1861. This example is attractive and sharply detailed, with minor hair-thin field lines that account for the assigned Select Proof grade. A long, reverse die crack travels south from the edge between the T and E in STATES through the eagle's beak to the top left shield point. Population: 1 in 63, 11 finer (6/15). PCGS# 60445

### 1863 Judd-338 Half Dollar, PR63 Cameo GOD OUR TRUST, Silver Pattern With Scroll

- 4877 1863 Half Dollar, Judd-338, Pollock-410 PR63 Cameo PCGS.** The Mint experimented with different Motto designs and wording starting in 1861, in part inspired by the uncertainties brought on by the Civil War. The first suggested mottos included OUR TRUST IS IN GOD, which was too lengthy, later shortened to GOD OUR TRUST for the early patterns. This example is a continuation of the design first presented in 1861 as Judd-277, with GOD OUR TRUST in a scroll above the eagle. Vivid blue accents at the borders complement pale gold toning across the deeply reflective fields and frosted devices. A close predecessor to the adopted 1866 Motto design, which was finalized as IN GOD WE TRUST with a longer, more artistic scroll. Population: 4 in 63, 11 finer (6/15). PCGS# 60500

1865 Judd-426 Quarter in Copper, PR64 Brown  
'Transitional' Pattern

- 4878** 1865 Quarter Dollar, Judd-426, Pollock-498, Low R.7, PR64 Brown PCGS. Similar to the adopted design of 1866, the motto IN GOD WE TRUST has been placed on a scroll in the reverse field above the eagle. Struck in copper with a reeded edge. Sharp design elements are set against deeply reflective fields amid varying shades of auburn, olive, and coppery-brown toning. A few faint specks do not detract. This variety is rare in any grade, with only a dozen or slightly more specimens believed known. These dies also struck examples in silver and aluminum, all rare. PCGS# 60611

1867 Five Cent Pattern in Nickel  
Judd-570, PR63

- 4879** 1867 Five Cents, Judd-570, Pollock-638, R.5, PR63 PCGS. A bust of Liberty wearing a coronet and facing left dominates the obverse design. UNITED STATES OF AMERICA is around the periphery with the date below. The top of the 7 is distant from the curl. The reverse shows 5 CENTS centered within a laurel wreath with the motto IN GOD WE TRUST at the top. CENTS is in a curved line. Struck in nickel with a plain edge. This is an attractive and relatively inexpensive pattern with more than 30 examples known. The nickel-gray surfaces are covered with pale golden patina over each side. PCGS# 60780

1868 Trial Half Dime in Nickel  
Judd-638, Regular Dies, PR65 Cameo

- 4880** 1868 Seated Half Dime, Judd-638, Pollock-710, Low R.6, PR65 Cameo NGC. Ex: Exemplar Collection. Struck in nickel from regular dies with a Plain Edge. The Judd-638 pattern was likely produced by the Mint specifically for collectors of off-metal trial strikings. This example is sharply struck with moderate contrast between the frosted devices and satinlike fields. No evidence of die clashing exists, as sometimes seen for this variety. A highly attractive Gem example of this scarce nickel pattern. Census: 1 in 65 Cameo, 5 finer (6/15). PCGS# 534921 Base PCGS# 60856

1868 Half Dime, PR67 Cameo  
Judd-638, Nickel Alloy

- 4881** 1868 Seated Half Dime, Judd-638, Pollock-710, Low R.6, PR67 Cameo NGC. From regular issue, plain edge proof dies, but struck in nickel alloy instead of silver. Traditionally listed as a die trial, but probably made for sale to collectors, according to USPatterns.com. A brilliant and unabraded Superb Gem. The reflective fields exhibit numerous die lines and clash marks, as struck. Minor blending of impression is noted on the upper left portion of the wreath. Census: 3 in 67 Cameo, 0 finer (5/15). PCGS# 534921 Base PCGS# 60856

1869 Cent Pattern in Nickel  
Judd-666, PR65+

- 4882** 1869 One Cent, Judd-666, Pollock-741, R.5, PR65+ NGC. The obverse exhibits a bust of Liberty facing left with the legend UNITED STATES OF AMERICA around the periphery and the date below the bust. Liberty wears a coronet inscribed LIBERTY. A Roman numeral I is centered in a laurel wreath on the reverse. Struck in nickel with a plain edge. This variant combines Obverse 1 — date right with 9 centered under curl, L in LIBERTY between second and third pearl — with Reverse A — broad ribbon ends. The surfaces are bright and highly reflective with faint horizontal streaks of golden-tan toning. Exceptional preservation. PCGS# 60890

1869 Standard Silver Dime  
Judd-708, Attractive PR65

- 4883** 1869 Standard Silver Ten Cents, Judd-708, Pollock-787, R.5, PR65 PCGS. The Standard Silver patterns offer a challenging-yet-achievable goal for the collector, with 54 different patterns across the various denominations comprising a basic set. The J-708 Standard Silver dime features Liberty with a star on the headband, paired with the normal Standard Silver reverse die. The mirrored, Gem proof surfaces are beautifully toned with cerulean-blue borders and pale russet-gold interiors. Mint-related obverse die polish lines are visible under magnification. Struck in silver with a reeded edge. Population: 9 in 65, 1 finer (6/15). PCGS# 60933

**1869 Standard Silver Half, PR62  
Judd-754, Silver, Reeded Edge**

- 4884** 1869 Standard Silver Half Dollar, Judd-754, Pollock-838, R.5, PR62 PCGS. A bust of Liberty faces right and wears a headband inscribed LIBERTY. The headband is ornamented with a star. The legend UNITED STATES OF AMERICA surrounds the figure, and a scroll with IN GOD WE TRUST is below. The reverse has 50 CENTS centered in a wreath of oak and laurel with STANDARD SILVER above and the date 1869 below. Struck in silver with a reeded edge. Light wheat-gold toning graces the borders of this otherwise brilliant specimen. The strike is good, although the hair near the ear shows slight inexactness. The fields are flashy, and the grade is determined by delicate obverse hairlines. PCGS# 60984

**1870 Standard Silver Dime Pattern  
Judd-843, Brilliant PR65**

- 4885** 1870 Standard Silver Ten Cents, Judd-843, Pollock-942, Low R.6, PR65 NGC. The obverse features the head of Liberty with a diadem in her hair and no stars on the tiara. A scroll with IN GOD WE TRUST curves beneath the bust rather than the date, which is shown on the reverse. The reverse conveys simplicity of design with 10 CENTS in the center, surrounded by a wreath of cotton and corn and with STANDARD above. Struck in silver with a reeded edge. This is a brilliant example with lovely surfaces. The obverse displays a slightly pebbly texture and appears to have been struck from rusted dies.  
Ex: Long Beach Signature (Heritage, 9/2007), lot 3021. PCGS# 61087

**1879 Goloid Metric Dollar, Proof Details  
Attractive Judd-1626 Pattern**

- 4886** 1879 Goloid Metric Dollar, Judd-1626, Pollock-1822, R.4 — Cleaned — ANACS. PR60 Details. The William Barber Goloid Metric dollar designs pairs a capped Liberty Head with a reverse carrying the statutory as well as elemental inscriptions. A circle of stars about the central text breaks the otherwise continuous wording. Purportedly struck in goloid (a silver alloy that includes a small portion of gold) with a reeded edge. These were issued in three-piece sets that also included the 1879 Flowing Hair stella in gold (Judd-1635) and the 1879 silver Metric dollar design (Judd-1617), which had an obverse similar to that used on the famous fifty dollar (half union) gold patterns of 1877 (Judd-1546). This piece shows somewhat muted luster and a few hairlines from a light wiping at some point in the past, but it is retoning nicely to pale rose-gold with plenty of reflectivity and eye appeal despite the caveat.

**7089 1924-S MS64 Red and Brown PCGS.** PCGS Population (205/23). NGC Census: (68/13). Mintage: 11,696,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$775. NGC ID# 22CE, PCGS# 2556

**7090 1925-S MS64 Red and Brown PCGS. CAC.** PCGS Population (154/8). NGC Census: (60/10). Mintage: 26,380,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$775. NGC ID# 22CH, PCGS# 2565

**7091 1929-D MS66 Red and Brown PCGS. CAC.** PCGS Population (1/0). NGC Census: (3/0). Mintage: 41,730,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$300. NGC ID# 22CV, PCGS# 2598

**7092 1929-D MS65 Red PCGS. CAC.** PCGS Population (193/27). NGC Census: (47/5). Mintage: 41,730,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$360. NGC ID# 22CV, PCGS# 2599

**7093 1934-D MS66+ Red PCGS. CAC.** PCGS Population (409/30). NGC Census: (230/23). Mintage: 28,446,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$185. NGC ID# 22DA, PCGS# 2638

**7094 1943-S Doubled Die Obverse, FS-101 MS66 PCGS.** (FS-019.5). PCGS Population (14/5). NGC Census: (0/0). PCGS# 37822

**7095 2009-D Early Childhood MS67 Red PCGS.** PCGS Population (46/0). NGC Census: (0/0). Numismedia Wsl. Price for problem free NGC/PCGS coin in MS67: \$70. NGC ID# 22KD, PCGS# 407243

## PROOF LINCOLN CENTS

**7096 1913 PR63 Red and Brown PCGS.** PCGS Population (51/256). NGC Census: (13/151). Mintage: 2,983. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR63: \$480. NGC ID# 22KW, PCGS# 3316

**7097 1950 PR66 Cameo NGC.** NGC Census: (96/39). PCGS Population (73/15). Numismedia Wsl. Price for problem free NGC/PCGS coin in PR66: \$585. NGC ID# 22LA, PCGS# 83359

**7098 1954 PR68 Red Cameo NGC.** NGC Census: (22/0). PCGS Population (9/0). Numismedia Wsl. Price for problem free NGC/PCGS coin in PR68: \$1,325. NGC ID# 22LE, PCGS# 83371

**7099 1959 PR68 Red Deep Cameo PCGS.** PCGS Population (34/3). NGC Census: (21/0). Numismedia Wsl. Price for problem free NGC/PCGS coin in PR68: \$775. NGC ID# 22LK, PCGS# 93386

## TWO CENT PIECES

**7100 1865 MS65 Red and Brown NGC. CAC.** NGC Census: (351/74). PCGS Population (282/29). Mintage: 13,640,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$550. NGC ID# 22NA, PCGS# 3583

**7101 1865 MS65 Red and Brown PCGS. CAC.** PCGS Population (282/29). NGC Census: (350/74). Mintage: 13,640,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$550. NGC ID# 22NA, PCGS# 3583

**7102 1868 MS65 Red and Brown NGC.** NGC Census: (77/9). PCGS Population (50/5). Mintage: 2,803,750. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$785. NGC ID# 22NC, PCGS# 3598

**7103 1869 MS65 Brown PCGS. CAC.** PCGS Population (8/0). NGC Census: (21/3). Mintage: 1,546,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$440. NGC ID# 22ND, PCGS# 3603

**7104 1872 — Cleaning — PCGS Genuine. XF Details.** NGC Census: (16/92). PCGS Population (39/157). Mintage: 64,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$985.

## PROOF TWO CENT PIECE

**7105 1871 PR65 Red and Brown NGC.** NGC Census: (58/22). PCGS Population (81/17). Mintage: 960. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR65: \$1,125. NGC ID# 22NH, PCGS# 3646

## THREE CENT SILVER

**7106 1851 MS65 NGC.** NGC Census: (183/86). PCGS Population (196/147). Mintage: 5,447,400. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$715. NGC ID# 22YX, PCGS# 3664

**7107 1861 MS65 PCGS.** PCGS Population (104/110). NGC Census: (117/108). Mintage: 497,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$875. NGC ID# 22ZA, PCGS# 3679

**7108 1861 MS65 NGC.** NGC Census: (117/110). PCGS Population (104/110). Mintage: 497,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$875. NGC ID# 22ZA, PCGS# 3679

**7109 1862/1 MS64 NGC.** NGC Census: (78/140). PCGS Population (89/174). Mintage: 343,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$635. NGC ID# 22ZC, PCGS# 3681

**7110 1862/1 MS64 NGC.** NGC Census: (78/139). PCGS Population (89/173). Mintage: 343,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$635. NGC ID# 22ZC, PCGS# 3681

**7111 1866 — Bent — PCGS Genuine. XF Details.** NGC Census: (0/80). PCGS Population (3/86). Mintage: 22,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$475.

**7112 1867 — Smoothed — PCGS Genuine. AU Details.** NGC Census: (0/40). PCGS Population (2/47). Mintage: 4,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$540.

**7113 1869 — Bent — PCGS Genuine. XF Details.** NGC Census: (0/47). PCGS Population (3/58). Mintage: 4,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$425.

## PROOF THREE CENT SILVER

**7114 1866 PR63 PCGS. Ex: Teich Family Collection.** PCGS Population (69/131). NGC Census: (35/111). Mintage: 725. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR63: \$600. NGC ID# 27CC, PCGS# 3716

**7115 1866 PR63 Cameo NGC.** NGC Census: (4/35). PCGS Population (9/36). PCGS# 83716

**7116 1867 PR64 PCGS.** PCGS Population (99/79). NGC Census: (89/84). Mintage: 625. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR64: \$915. NGC ID# 27CD, PCGS# 3717

**7117 1871 PR61 PCGS.** PCGS Population (16/313). NGC Census: (8/184). Mintage: 960. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR61: \$375. NGC ID# 27CG, PCGS# 3722

**7118 1871 PR62 NGC.** NGC Census: (20/164). PCGS Population (45/267). Mintage: 960. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR62: \$475. NGC ID# 27CG, PCGS# 3722

**7119 1871 PR63 NGC.** NGC Census: (45/119). PCGS Population (82/180). Mintage: 960. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR63: \$740. NGC ID# 27CG, PCGS# 3722

## THREE CENT NICKELS

**7120 1865 MS66 NGC. CAC.** NGC Census: (20/1). PCGS Population (39/2). Mintage: 11,382,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$1,075. NGC ID# 22NJ, PCGS# 3731

**7121 1872 MS65 PCGS. CAC.** PCGS Population (25/14). NGC Census: (22/2). Mintage: 861,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$1,050. NGC ID# 2757, PCGS# 3738

**7122 1876 MS64 PCGS.** PCGS Population (52/42). NGC Census: (33/20). Mintage: 160,800. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$545. NGC ID# 275A, PCGS# 3744

**7123 1881 MS65 PCGS. CAC.** PCGS Population (79/51). NGC Census: (48/11). Mintage: 1,080,575. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$480. NGC ID# 22NT, PCGS# 3749

**7124 1887 MS63 PCGS.** PCGS Population (11/80). NGC Census: (10/53). Mintage: 5,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$735. NGC ID# 22NU, PCGS# 3755

### PROOF THREE CENT NICKELS

**7125 1867 PR65 PCGS.** PCGS Population (54/4). NGC Census: (48/17). Mintage: 625. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR65: \$885. NGC ID# 275M, PCGS# 3763

**7126 1873 Closed 3 PR65 Cameo NGC.** NGC Census: (38/24). PCGS Population (47/17). PCGS# 83769

**7127 1873 Closed 3 PR65 Cameo PCGS.** PCGS Population (48/17). NGC Census: (39/24). PCGS# 83769

**7128 1874 PR66 NGC.** NGC Census: (27/2). PCGS Population (22/2). Mintage: 700. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR66: \$825. NGC ID# 275V, PCGS# 3770

**7129 1878 PR64 Cameo PCGS.** PCGS Population (21/161). NGC Census: (16/137). PCGS# 83774

**7130 1879 PR67 PCGS. CAC.** PCGS Population (43/2). NGC Census: (58/5). Mintage: 3,200. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR67: \$950. NGC ID# 275Z, PCGS# 3775

**7131 1887/6 PR65 NGC. CAC.** NGC Census: (157/91). PCGS Population (177/62). Mintage: 2,900. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR65: \$625. NGC ID# 276A, PCGS# 3784

**7132 1887 PR65 PCGS.** PCGS Population (126/51). NGC Census: (98/42). Mintage: 2,960. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR65: \$665. NGC ID# 2769, PCGS# 3783

### SHIELD NICKELS

**7133 1867 Rays MS64 NGC.** NGC Census: (182/65). PCGS Population (144/41). Mintage: 2,019,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$865. NGC ID# 22NY, PCGS# 3791

**7134 1867 No Rays MS65 PCGS. CAC.** PCGS Population (69/17). NGC Census: (110/27). Mintage: 28,800,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$685. NGC ID# 22NZ, PCGS# 3794

**7135 1869 MS65 PCGS. CAC.** PCGS Population (63/14). NGC Census: (91/15). Mintage: 16,395,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$725. NGC ID# 22P3, PCGS# 3796

**7136 1882 MS66 PCGS.** PCGS Population (80/6). NGC Census: (52/4). Mintage: 11,476,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$850. NGC ID# 22PC, PCGS# 3812

**7137 1882 MS66 NGC.** NGC Census: (52/4). PCGS Population (80/6). Mintage: 11,476,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$850. NGC ID# 22PC, PCGS# 3812

### PROOF SHIELD NICKELS

**7138 1873 Closed 3 PR65 PCGS. CAC.** PCGS Population (98/28). NGC Census: (104/42). Mintage: 1,100. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR65: \$530. NGC ID# 276P, PCGS# 3827

**7139 1875 PR65 NGC.** NGC Census: (67/26). PCGS Population (66/16). Mintage: 700. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR65: \$960. NGC ID# 276S, PCGS# 3829

**7140 1875 PR65 PCGS. CAC.** PCGS Population (66/16). NGC Census: (67/26). Mintage: 700. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR65: \$960. NGC ID# 276S, PCGS# 3829

**7141 1879 PR65 PCGS.** PCGS Population (175/91). NGC Census: (161/135). Mintage: 3,200. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR65: \$575. NGC ID# 22PG, PCGS# 3833

### LIBERTY NICKELS

**7142 1887 MS65 NGC.** NGC Census: (77/19). PCGS Population (100/24). Mintage: 15,263,652. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$785. NGC ID# 22PL, PCGS# 3848

**7143 1887 MS65 PCGS.** PCGS Population (97/25). NGC Census: (77/19). Mintage: 15,263,652. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$785. NGC ID# 22PL, PCGS# 3848

**7144 1889 MS65 PCGS. CAC.** PCGS Population (99/24). NGC Census: (171/46). Mintage: 15,881,361. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$700. NGC ID# 2775, PCGS# 3850

**7145 1890 MS65 PCGS.** PCGS Population (58/15). NGC Census: (47/10). Mintage: 16,259,272. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$925. NGC ID# 22PM, PCGS# 3851

**7146 1892 MS65 PCGS. CAC.** PCGS Population (104/20). NGC Census: (87/11). Mintage: 11,699,642. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$875. NGC ID# 2777, PCGS# 3853

**7147 1897 MS65 PCGS.** PCGS Population (82/16). NGC Census: (64/9). Mintage: 20,428,736. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$720. NGC ID# 22PN, PCGS# 3858

**7148 1900 MS66 PCGS.** PCGS Population (53/7). NGC Census: (46/4). Mintage: 27,255,996. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$900. NGC ID# 22PS, PCGS# 3861

**7149 1904 MS66 NGC. CAC.** NGC Census: (59/2). PCGS Population (81/0). Mintage: 21,404,984. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$815. NGC ID# 277F, PCGS# 3865

**7150 1905 MS66 PCGS.** PCGS Population (77/0). NGC Census: (32/1). Mintage: 29,827,276. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$875. NGC ID# 277G, PCGS# 3866

**7151 1907 MS64 NGC.** NGC Census: (216/90). PCGS Population (270/114). Mintage: 39,214,800. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$180. NGC ID# 277J, PCGS# 3868

**7152 1907 MS65 PCGS.** PCGS Population (86/28). NGC Census: (79/11). Mintage: 39,214,800. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$540. NGC ID# 277J, PCGS# 3868

- 7153 1911 MS66 PCGS.** PCGS Population (46/2). NGC Census: (27/1). Mintage: 39,559,372. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$950. NGC ID# 277M, PCGS# 3872
- 7154 1912-S XF45 PCGS.** PCGS Population (15/935). NGC Census: (0/574). Mintage: 238,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$846. NGC ID# 277R, PCGS# 3875

## PROOF LIBERTY NICKELS

- 7155 1883 With Cents PR65+ Cameo NGC. CAC.** NGC Census: (62/37). PCGS Population (54/36). PCGS# 83881
- 7156 1894 PR65 PCGS.** PCGS Population (116/18). NGC Census: (120/47). Mintage: 2,632. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR65: \$585. NGC ID# 2784, PCGS# 3892

- 7399 1840-O — Improperly Cleaned — NGC Details. Unc.** NGC Census: (0/35). PCGS Population (2/25). Mintage: 855,100. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: \$675.
- 7400 1840-O — Improperly Cleaned — NGC Details. Unc.** NGC Census: (0/35). PCGS Population (2/25). Mintage: 855,100. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: \$675.
- 7401 1840-O Small Letters, Very Small O, WB-102, Die Pair 7, R.2, XF40 PCGS.** Slight luster remains over lilac-gray surfaces with deeper blue toning at the margins. Strong detail exists except at the eagle's left leg and talon. The letters of LIBERTY are all sharp. PCGS Population all varieties (25/96). NGC Census: (13/89). Mintage: 855,100. Ex: Larry Briggs (12/1993). From The Dr. Harry Salyards Collection, Part Two. PCGS# 572004 Base PCGS# 6235
- 7402 1841-O AU53 PCGS.** PCGS Population (11/55). NGC Census: (7/66). Mintage: 401,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU53: \$375. NGC ID# 24GS, PCGS# 6237 Base PCGS# 6237
- 7403 1842 Medium Date, Large Letters, — Harshly Cleaned — NGC Details. Unc.** NGC Census: (0/37). PCGS Population (0/18).
- 7404 1842 Small Date, Large Letters, WB-102 — Cleaned — PCGS Genuine. AU Details.** The usual advanced die break and cud above TAT of STATES. Lightly cleaned and now toned in pleasing gray-blue shades with rose-gold accents. A thin scrape through ALF of HALF is noted. Ex: Don Valenziano (6/1987). From The Dr. Harry Salyards Collection, Part Two. PCGS# 572012 Base PCGS# 6240
- 7405 1842 Medium Date, Large Letters, WB-104 — Questionable Color — PCGS Genuine. AU Details.** Sharply struck with deep purple and blue toning over copper-red luster, deemed questionable by the service. Still an appealing representative of the Medium Date dies. Mintage: 2,012,764. Ex: Larry Briggs (11/1985). From The Dr. Harry Salyards Collection, Part Two. PCGS# 572013 Base PCGS# 6239
- 7406 1842-O Medium Date, Large Letters, AU50 NGC.** NGC Census: (4/35). PCGS Population (12/31). Mintage: 754,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$425. NGC ID# 24GW, PCGS# 6242 Base PCGS# 6242
- 7407 1842-O Medium Date, Large Letters, WB-102, Die Pair 8, R.3 — Cleaning — PCGS Genuine. AU Details.** Struck from an early state of the dies. Pale gold toning lightly covers portions of the frosty silver surfaces, which appear largely unaffected by a past light cleaning. Mint luster remains. Mintage: 754,000. Ex: December Sale Part I (Stack's, 12/1987), lot 1461. From The Dr. Harry Salyards Collection, Part Two.
- 7408 1843 AU53 PCGS. CAC.** PCGS Population (28/119). NGC Census: (16/118). Mintage: 3,844,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU53: \$285. NGC ID# 24GX, PCGS# 6243 Base PCGS# 6243
- 7409 1843 Repunched Date, WB-105, XF45 PCGS.** The Triple Date variety, with digits 43 slightly repunched north three times. The coin displays light golden-gray toning with some iridescence at the rims. Traces of mint luster remain. PCGS Population all varieties (71/175). NGC Census: (36/148). Mintage: 3,844,000. Ex: Norman Pullen (6/1984). From The Dr. Harry Salyards Collection, Part Two. PCGS# 572022 Base PCGS# 6243
- 7410 1845-O WB-101, Die Pair 7, R.4, AU55 PCGS.** A variety without drapery, with the folds of Liberty's drapery below the elbow fully effaced by die polishing. Attractive lilac, sea-green, and golden toning. Sharp strike with remaining mint luster across both sides. PCGS Population all varieties (12/33). NGC Census: (8/47). Mintage: 2,094,000. Ex: J.J. Teaparty (2/1999). From The Dr. Harry Salyards Collection, Part Two. PCGS# 572036 Base PCGS# 6249
- 7411 1846-O Medium Date AU53 PCGS.** PCGS Population (15/34). NGC Census: (10/46). Mintage: 2,304,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU53: \$350. NGC ID# 27SW, PCGS# 6255 Base PCGS# 6255

- 7412 1847 AU58 PCGS.** PCGS Population (19/35). NGC Census: (20/26). Mintage: 1,156,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$575. NGC ID# 24HA, PCGS# 6257 Base PCGS# 6257
- 7413 1847 WB-101 AU50 PCGS.** Thick, battleship-gray toning with golden luster shining through at infrequent locations. Problem-free, original surfaces. PCGS Population (14/87). NGC Census: (8/72). Mintage: 1,156,000. Ex: Heritage Rare Coin Galleries (6/1986). From The Dr. Harry Salyards Collection, Part Two. PCGS# 572054 Base PCGS# 6257
- 7414 1847-O AU58 PCGS.** PCGS Population (8/20). NGC Census: (13/29). Mintage: 2,584,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$575. NGC ID# 24HB, PCGS# 6259 Base PCGS# 6259
- 7415 1848-O WB-101, Die Pair 22, R.3, XF45 PCGS.** Silver-gray surfaces retain glimpses of mint luster. Final use of both the obverse and reverse dies with weakness from die wear. PCGS Population all varieties: 27 in 45, 76 finer. Mintage: 3,180,000. Ex: Randy Wiley (4/1994). From The Dr. Harry Salyards Collection, Part Two. PCGS# 572065 Base PCGS# 6261
- 7416 1849 AU58 NGC. CAC.** NGC Census: (20/36). PCGS Population (14/47). Mintage: 1,252,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$565. NGC ID# 24HE, PCGS# 6262 Base PCGS# 6262
- 7417 1849 WB-101 — Cleaning — PCGS Genuine. AU Details.** Crescents of gunmetal-blue toning provide eye appeal and some silver luster remains in spite of the light cleaning. Sharply struck. Mintage: 1,252,000. Ex: Bob Everett (11/1986). From The Dr. Harry Salyards Collection, Part Two.

- 7418 1849-O WB-101, Die Pair 1, R.3 — Cleaned — PCGS Genuine. AU Details.** Gold, silver-gray and blue toning disguise delicate hair-thin lines on the semiprooflike surfaces for substantial eye appeal despite a light cleaning. Mintage: 2,310,000.  
*Ex: Jonathan Kern (6/1985).*  
*From The Dr. Harry Salyards Collection, Part Two. PCGS# 572073 Base PCGS# 6263*
- 7419 1850 — Cleaning — PCGS Genuine. VF Details.** Mintage: 227,000.
- 7420 1850-O AU55 NGC.** NGC Census: (10/49). PCGS Population (11/68). Mintage: 2,456,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$520. NGC ID# 24HH, PCGS# 6265 Base PCGS# 6265
- 7421 1850-O WB-101, Die Pair 7, R.3 — Scratch — PCGS Genuine. XF Details.** The net grade results from a curving, shallow pinscratch from below Liberty's cap to the inside of star 13, hidden in the attractive rainbow toning. Liberal mint luster provides appeal. Mintage: 2,456,000.  
*Ex: Norman Pullen (7/1984).*  
*From The Dr. Harry Salyards Collection, Part Two.*
- 7422 1851 — Graffiti — PCGS Genuine. XF Details.** NGC Census: (0/49). PCGS Population (9/81). Mintage: 200,750. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$1,150.
- 7423 1852-O Fine 15 PCGS.** NGC Census: (1/36). PCGS Population (4/87). Mintage: 144,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 15: \$377. NGC ID# 24HM, PCGS# 6269 Base PCGS# 6269
- 7424 1852-O — Improperly Cleaned — NGC Details. XF.** NGC Census: (5/26). PCGS Population (17/49). Mintage: 144,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$775.
- 7425 1853 Arrows and Rays AU55 NGC.** NGC Census: (128/448). PCGS Population (117/471). Mintage: 3,532,708. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$685. NGC ID# 24JJ, PCGS# 6275 Base PCGS# 6275
- 7426 1853 Arrows and Rays AU58 NGC.** NGC Census: (174/274). PCGS Population (80/393). Mintage: 3,532,708. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$925. NGC ID# 24JJ, PCGS# 6275 Base PCGS# 6275
- 7427 1853 Arrows and Rays, WB-101, — Cleaned — PCGS Genuine. XF Details.** The cleaning is light, with attractive blue and gold album toning undisturbed. A prominent die crack crosses the obverse shield through Liberty's hand. Mintage: 3,532,708.  
*Ex: Jim Crosby (1/1999).*  
*From The Dr. Harry Salyards Collection, Part Two. PCGS# 572085 Base PCGS# 6275*

**7826 1927-S MS64 NGC.** NGC Census: (1044/79). PCGS Population (1479/76). Mintage: 866,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$1,375. NGC ID# 257U, PCGS# 7372

**7827 1927-S MS64 PCGS.** PCGS Population (1478/76). NGC Census: (1041/79). Mintage: 866,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$1,125. NGC ID# 257U, PCGS# 7372

**7828 1928 MS62 NGC.** NGC Census: (1526/2609). PCGS Population (1761/4593). Mintage: 360,649. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$560. NGC ID# 257V, PCGS# 7373

**7829 1928 MS62 NGC.** NGC Census: (1526/2609). PCGS Population (1761/4593). Mintage: 360,649. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$560. NGC ID# 257V, PCGS# 7373

**7830 1928 MS63 NGC.** NGC Census: (1528/1089). PCGS Population (2408/2189). Mintage: 360,649. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$860. NGC ID# 257V, PCGS# 7373

**7831 1928-S MS64 PCGS.** PCGS Population (1908/56). NGC Census: (1251/42). Mintage: 1,632,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$1,175. NGC ID# 257W, PCGS# 7374

**7832 1928-S MS64 NGC.** NGC Census: (1261/42). PCGS Population (1899/55). Mintage: 1,632,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$1,175. NGC ID# 257W, PCGS# 7374

**7833 1928-S MS64 NGC.** NGC Census: (1251/42). PCGS Population (1901/56). Mintage: 1,632,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$1,175. NGC ID# 257W, PCGS# 7374

**7834 1928-S MS64 PCGS.** PCGS Population (1908/56). NGC Census: (1251/42). Mintage: 1,632,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$1,025. NGC ID# 257W, PCGS# 7374

**7835 1928-S MS64 PCGS. CAC.** PCGS Population (1899/55). NGC Census: (1251/42). Mintage: 1,632,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$1,175. NGC ID# 257W, PCGS# 7374

**7836 1934-S AU58 PCGS. CAC.** PCGS Population (460/2049). NGC Census: (432/1240). Mintage: 1,011,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$985. NGC ID# 257Z, PCGS# 7377

**7837 1934-S — Cleaning — PCGS Genuine. Unc Details.** NGC Census: (48/1193). PCGS Population (49/1987). Mintage: 1,011,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: \$1,525.

**7838 1935 MS65 PCGS.** PCGS Population (896/195). NGC Census: (730/77). Mintage: 1,576,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$675. NGC ID# 2582, PCGS# 7378

**7839 1935-S MS64 PCGS. CAC.** PCGS Population (1480/824). NGC Census: (899/474). Mintage: 1,964,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$600. NGC ID# 2583, PCGS# 7379

## EISENHOWER DOLLAR

**7840 1971 MS66 PCGS. CAC.** PCGS Population (56/0). NGC Census: (37/0). Mintage: 47,799,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$1,250. NGC ID# 2584, PCGS# 7406

## PROOF SUSAN B. ANTHONY DOLLAR

**7841 1981-S Type Two PR70 Deep Cameo PCGS.** PCGS Population (171). NGC Census: (66). Numismedia Wsl. Price for problem free NGC/PCGS coin in PR70: \$625. NGC ID# 259J, PCGS# 99595

## GOLD DOLLARS

**7842 1849 Open Wreath MS61 NGC.** NGC Census: (285/973). PCGS Population (106/742). Mintage: 687,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: \$310. NGC ID# 25B9, PCGS# 7502

**7843 1851-C — Tooled — PCGS Genuine. AU Details.** NGC Census: (12/352). PCGS Population (59/224). Mintage: 41,267. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$1,475.

**7844 1851-O MS61 PCGS.** PCGS Population (26/176). NGC Census: (118/267). Mintage: 290,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: \$750. NGC ID# 25BN, PCGS# 7516

**7845 1853 MS63 PCGS.** PCGS Population (1023/831). NGC Census: (1298/1123). Mintage: 4,076,051. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$515. NGC ID# 25BU, PCGS# 7521

**7846 1853-O MS62 NGC.** NGC Census: (265/162). PCGS Population (128/99). Mintage: 290,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$975. NGC ID# 25BX, PCGS# 7524

**7847 1854 Type Two AU58 NGC.** NGC Census: (2320/1616). PCGS Population (541/1239). Mintage: 783,943. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$625. NGC ID# 25C3, PCGS# 7531

**7848 1854 Type Two — Improperly Cleaned — NGC Details. Unc.** NGC Census: (76/1543). PCGS Population (47/1198). Mintage: 783,943. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: \$1,300.

**7849 1855-O — Bent — NGC Details. AU.** NGC Census: (37/398). PCGS Population (55/208). Mintage: 55,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$1,850.

**7850 1856 Slanted 5 MS63 NGC.** NGC Census: (174/117). PCGS Population (172/105). Mintage: 1,762,936. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$540. NGC ID# 25C9, PCGS# 7540

**7851 1857 MS62 NGC.** NGC Census: (307/145). PCGS Population (151/169). Mintage: 774,789. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$360. NGC ID# 25CD, PCGS# 7544

**7852 1857 MS64 NGC.** NGC Census: (36/18). PCGS Population (44/25). Mintage: 774,789. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$900. NGC ID# 25CD, PCGS# 7544

**7853 1862 MS64 PCGS.** PCGS Population (285/128). NGC Census: (307/175). Mintage: 1,361,390. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$950. NGC ID# 25CW, PCGS# 7560

**7854 1870 MS61 PCGS.** PCGS Population (7/84). NGC Census: (20/61). Mintage: 6,335. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: \$885. NGC ID# 25D6, PCGS# 7569

**7855 1874 MS61 Prooflike NGC.** NGC Census: (6/17). PCGS Population (0/0). Mintage: 198,820. PCGS# 77575

**7856 1884 MS62 PCGS.** PCGS Population (50/180). NGC Census: (40/115). Mintage: 5,200. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$375. NGC ID# 25DN, PCGS# 7585

## CLASSIC QUARTER EAGLE

**7857 1836 Script 8 — Cleaned — ANACS. AU50 Details.** NGC Census: (114/883). PCGS Population (67/277). Mintage: 547,986. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$1,000.

## LIBERTY QUARTER EAGLES

**7858 1840 — Improperly Cleaned — NGC Details. AU.** NGC Census: (19/47). PCGS Population (9/15). Mintage: 18,800. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$1,950.

**7859 1843 AU53 NGC.** NGC Census: (24/120). PCGS Population (10/38). Mintage: 100,546. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU53: \$550. NGC ID# 25GL, PCGS# 7727

**7860 1846 — Obverse Damage — NGC Details. Unc.** NGC Census: (3/21). PCGS Population (1/11). Mintage: 21,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: \$3,750.

**7861 1852 MS62 NGC.** NGC Census: (245/140). PCGS Population (106/134). Mintage: 1,159,681. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$535. NGC ID# 25HR, PCGS# 7763

**7862 1852 MS62 NGC.** NGC Census: (242/137). PCGS Population (106/128). Mintage: 1,159,681. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$535. NGC ID# 25HR, PCGS# 7763

**7863 1852 MS62+ NGC.** NGC Census: (242/136). PCGS Population (106/134). Mintage: 1,159,681. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$535. NGC ID# 25HR, PCGS# 7763

**7864 1852-O AU53 NGC.** NGC Census: (62/279). PCGS Population (33/64). Mintage: 140,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU53: \$785. NGC ID# 25HU, PCGS# 7766

**7865 1855 MS62 NGC.** NGC Census: (64/47). PCGS Population (45/42). Mintage: 235,480. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$800. NGC ID# 25J4, PCGS# 7774

**7866 1861 New Reverse, Type Two, MS61 NGC.** NGC Census: (437/712). PCGS Population (120/528). Mintage: 1,283,878. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: \$675. NGC ID# 25JX, PCGS# 7794

**7867 1861 New Reverse, Type Two, MS61 NGC.** NGC Census: (438/713). PCGS Population (120/534). Mintage: 1,283,878. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: \$675. NGC ID# 25JX, PCGS# 7794

**7868 1866-S XF45 PCGS.** PCGS Population (31/40). NGC Census: (42/101). Mintage: 38,900. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$702. NGC ID# 25K8, PCGS# 7804

**7869 1868 AU58 NGC.** NGC Census: (71/24). PCGS Population (17/12). Mintage: 3,625. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$935. NGC ID# 25KB, PCGS# 7807

**7870 1868-S AU50 NGC.** NGC Census: (30/148). PCGS Population (12/62). Mintage: 34,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$650. NGC ID# 25KC, PCGS# 7808

**7871 1869 AU55 PCGS.** PCGS Population (21/37). NGC Census: (28/86). Mintage: 4,300. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$875. NGC ID# 25KD, PCGS# 7809

**7872 1871 AU55 NGC.** NGC Census: (23/66). PCGS Population (12/40). Mintage: 5,350. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$785. NGC ID# 25KH, PCGS# 7813

**7873 1871 AU58 NGC.** NGC Census: (40/26). PCGS Population (13/27). Mintage: 5,350. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$875. NGC ID# 25KH, PCGS# 7813

**7874 1873 Closed 3 MS63 NGC.** NGC Census: (53/45). PCGS Population (63/59). Mintage: 55,225. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$975. NGC ID# 25KM, PCGS# 7818

**7875 1879-S AU58 NGC.** NGC Census: (68/17). PCGS Population (2/12). Mintage: 43,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$650. NGC ID# 25L3, PCGS# 7831

**7876 1882 AU58 PCGS.** PCGS Population (34/76). NGC Census: (58/83). Mintage: 4,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$600. NGC ID# 25L6, PCGS# 7834

**7877 1886 AU58 PCGS.** PCGS Population (28/49). NGC Census: (45/72). Mintage: 4,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$665. NGC ID# 25LA, PCGS# 7838

**7878 1894 MS62 NGC.** NGC Census: (56/89). PCGS Population (47/74). Mintage: 4,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$865. NGC ID# 25LJ, PCGS# 7846

**7879 1898 MS64 NGC.** NGC Census: (152/161). PCGS Population (154/128). Mintage: 24,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$800. NGC ID# 25LN, PCGS# 7850

**7880 1902 MS63 PCGS.** PCGS Population (915/1265). NGC Census: (726/1241). Mintage: 133,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$480. NGC ID# 25LT, PCGS# 7854

**7881 1902 MS64+ NGC.** NGC Census: (709/531). PCGS Population (736/529). Mintage: 133,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$580.

**7882 1906 MS63 PCGS. CAC.** PCGS Population (1494/1967). NGC Census: (1230/1988). Mintage: 176,300. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$450. NGC ID# 25LX, PCGS# 7858

☐ IF NECESSARY, PLEASE INCREASE MY BIDS BY ☐ 1 ☐ 2 ☐ 3 INCREMENT(S)*Lots will be purchased as much below top bids as possible.*☐ I WANT TO LIMIT MY BIDDING TO A TOTAL OF \$

at the hammer amount for all lots listed on this bid sheet. I am aware that by utilizing the Budget Bidding feature, all bids on this sheet will be affected. If I intend to have regular bidding on other lots I will need to use a separate bid sheet.

Do you want to receive an email, text message, or fax confirming receipt of your bids?

☐ Email ☐ Cell Phone Text ☐ Fax

Payment by check may result in your property not being released until purchase funds clear our bank. Checks must be drawn on a U.S. bank. All bids are subject to the applicable Buyer's Premium. See HA.com for details.

I have read and agree to all of the Terms and Conditions of Auction: inclusive of paying interest at the lesser of 1.5% per month (18% per annum) or the maximum contract interest rate under applicable state law from the date of auction.

REFERENCES: New bidders who are unknown to us must furnish satisfactory industry references or a valid credit card in advance of the auction date.

**(Signature required)** Please make a copy of this bid sheet for your records.☐ I HAVE PREVIOUSLY BOUGHT FROM HERITAGE AUCTIONS☐ I HAVE A RESALE PERMIT – please contact 877-HERITAGE (437-4824)

Non-Internet bids (including but not limited to, podium, fax, phone and mail bids) may be submitted at any time and are treated similar to floor bids. These types of bids must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and will be considered your high bid.

# Terms and Conditions of Auction

## Auctioneer and Auction:

1. This Auction is presented by Heritage Auctions, a d/b/a/ of Heritage Auctioneers & Galleries, Inc., or Heritage Auctions, Inc., or Heritage Numismatic Auctions, Inc., or Heritage Vintage Sports Auctions, Inc., or Currency Auctions of America, Inc., as identified with the applicable licensing information on the title page of the catalog or on the HA.com Internet site (the "Auctioneer"). The Auction is conducted under these Terms and Conditions of Auction and applicable state and local law. Announcements and corrections from the podium and those made through the Terms and Conditions of Auctions appearing on the Internet at HA.com supersede those in the printed catalog.

## Buyer's Premium:

2. All bids are subject to a Buyer's Premium which is in addition to the placed successful bid:
- Fifteen percent (15%) on Domain Names & Intellectual Property Auction lots;
- Seventeen and one-half percent (17.5%) on Currency, US Coin, and World & Ancient Coin Auction lots, except for Gallery Auction lots as noted below;
- Nineteen and one-half percent (19.5%) on Comic, Movie Poster, Sports Collectibles, and Gallery Auction (sealed bid auctions of mostly bulk numismatic material) lots;
- Twenty-two percent (22%) on Wine Auction lots;
- For lots in all other categories not listed above, the Buyer's Premium per lot is twenty-five percent (25%) on the first \$100,000 (minimum \$14), plus twenty percent (20%) of any amount between \$100,000 and \$1,000,000, plus twelve percent (12%) of any amount over \$1,000,000.

## Auction Venues:

3. The following Auctions are conducted solely on the Internet: Heritage Weekly Internet Auctions (Coin, Currency, Comics, Rare Books, Jewelry & Watches, Guitars & Musical Instruments, and Vintage Movie Posters); Heritage Monthly Internet Auctions (Sports, World Coins and Rare Wine). Signature\* Auctions and Grand Format Auctions accept bids from the Internet, telephone, fax, or mail first, followed by a floor bidding session; HeritageLive! and real-time telephone bidding are available to registered clients during these auctions.

## Bidders:

4. Any person participating or registering for the Auction agrees to be bound by and accepts these Terms and Conditions of Auction ("Bidder(s)").
5. All Bidders must meet Auctioneer's qualifications to bid. Any Bidder who is not a client in good standing of the Auctioneer may be disqualified at Auctioneer's sole option and will not be awarded lots. Such determination may be made by Auctioneer in its sole and unlimited discretion, at any time prior to, during, or even after the close of the Auction. Auctioneer reserves the right to exclude any person from the auction.
6. If an entity places a bid, then the person executing the bid on behalf of the entity agrees to personally guarantee payment for any successful bid.

## Credit:

7. In order to place bids, Bidders who have not established credit with the Auctioneer must either furnish satisfactory credit information (including two collectibles-related business references) or supply valid credit card information along with a social security number, well in advance of the Auction. Bids placed through our Interactive Internet program will only be accepted from pre-registered Bidders. Bidders who are not members of HA.com or affiliates should preregister at least 48 hours before the start of the first session (exclusive of holidays or weekends) to allow adequate time to contact references. Credit will be granted at the discretion of Auctioneer. Additionally Bidders who have not previously established credit or who wish to bid in excess of their established credit history may be required to provide their social security number or the last four digits thereof so a credit check may be performed prior to Auctioneer's acceptance of a bid. Check writing privileges and immediate delivery of merchandise may also be determined by pre-approval of credit based on a combination of criteria: HA.com history, related industry references, bank verification, a credit bureau report and/or a personal guarantee for a corporate or partnership entity in advance of the auction venue.

## Bidding Options:

8. Bids in Signature. Auctions or Grand Format Auctions may be placed as set forth in the printed catalog section entitled "Choose your bidding method." For auctions held solely on the Internet, see the alternatives on HA.com. Review at <http://www.ha.com/c/ref/web-tips.zx#biddingTutorial>.
9. Presentment of Bids: Non-Internet bids (including but not limited to podium, fax, phone and mail bids) are treated similar to floor bids in that they must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone, or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and this revised amount will be considered your high bid.
10. Auctioneer's Execution of Certain Bids. Auctioneer cannot be responsible for your errors in bidding, so carefully check that every bid is entered correctly. When identical mail or FAX bids are submitted, preference is given to the first received. To ensure the greatest accuracy, your written bids should be entered on the standard printed bid sheet and be received at Auctioneer's place of business at least two business days before the Auction start. Auctioneer is not responsible for executing mail bids or FAX bids received on or after the day the first lot is sold, nor Internet bids submitted after the published closing time; nor is Auctioneer responsible for proper execution of bids submitted by telephone, mail, FAX, e-mail, Internet, or in person once the Auction begins. Bids placed electronically via the internet may not be withdrawn until your written request is received and acknowledged by Auctioneer (FAX: 214-409-1425); such requests must state the reason, and may constitute grounds for withdrawal of bidding privileges. Lots won by mail Bidders will not be delivered at the Auction unless prearranged.
11. Caveat as to Bid Increments. Bid increments (over the current bid level) determine the lowest amount you may bid on a particular lot. Bids greater than one increment over the current bid can be any whole dollar amount. It is possible under several circumstances for winning bids to be between increments, sometimes only \$1 above the previous increment. Please see: "How can I lose by less than an increment?" on our website. Bids will be accepted in whole dollar amounts only. No "buy" or "unlimited" bids will be accepted.

The following chart governs current bidding increments  
(see [HA.com/c/ref/web-tips.zx#guidelines-increments](http://HA.com/c/ref/web-tips.zx#guidelines-increments)).

Current Bid .....	Bid Increment	Current Bid .....	Bid Increment
< \$10.....	\$1	\$10,000 - \$19,999 .....	\$1,000
\$10 - \$49 .....	\$2	\$20,000 - \$49,999 .....	\$2,000
\$50 - \$99 .....	\$5	\$50,000 - \$99,999 .....	\$5,000
\$100 - \$199 .....	\$10	\$100,000 - \$199,999 .....	\$10,000
\$200 - \$499 .....	\$20	\$200,000 - \$499,999 .....	\$20,000
\$500 - \$999 .....	\$50	\$500,000 - \$999,999 .....	\$50,000
\$1,000 - \$1,999 .....	\$100	\$1,000,000 - \$4,999,999 .....	\$100,000
\$2,000 - \$4,999 .....	\$200	\$5,000,000 - \$9,999,999 .....	\$250,000
\$5,000 - \$9,999 .....	\$500	>= \$10,000,000 .....	\$500,000

12. If Auctioneer calls for a full increment, a bidder may request Auctioneer to accept a bid at half of the increment ("Cut Bid") only once per lot. After offering a Cut Bid, bidders may continue to participate only at full increments. Off-increment bids may be accepted by the Auctioneer at Signature\* Auctions and Grand Format Auctions. If the Auctioneer solicits bids other than the expected increment, these bids will not be considered Cut Bids.

## Conducting the Auction:

13. Notice of the consignor's liberty to place bids on his lots in the Auction is hereby made in accordance with Article 2 of the Texas Business and Commercial Code. A "Minimum Bid" is

an amount below which the lot will not sell. THE CONSIGNOR OF PROPERTY MAY PLACE WRITTEN "Minimum Bids" ON HIS LOTS IN ADVANCE OF THE AUCTION; ON SUCH LOTS, IF THE HAMMER PRICE DOES NOT MEET THE "Minimum Bid", THE CONSIGNOR MAY PAY A REDUCED COMMISSION ON THOSE LOTS. "Minimum Bids" are generally posted online several days prior to the Auction closing. For any successful bid placed by a consignor on his Property on the Auction floor, or by any means during the live session, or after the "Minimum Bid" for an Auction have been posted, we will require the consignor to pay full Buyer's Premium and Seller's Commissions on such lot.

14. The highest qualified Bidder recognized by the Auctioneer shall be the Buyer. In the event of a tie bid, the earliest bid received or recognized wins. In the event of any dispute between any Bidders at an Auction, Auctioneer may at his sole discretion reoffer the lot. Auctioneer's decision and declaration of the winning Bidder shall be final and binding upon all Bidders. Bids properly offered, whether by floor Bidder or other means of bidding, may on occasion be missed or go unrecognized; in such cases, the Auctioneer may declare the recognized bid accepted as the winning bid, regardless of whether a competing bid may have been higher. Auctioneer reserves the right after the hammer fall to accept bids and reopen bidding for bids placed through the Internet or otherwise.
15. Auctioneer reserves the right to refuse to honor any bid or to limit the amount of any bid, in its sole discretion. A bid is considered not made in "Good Faith" when made by an insolvent or irresponsible person, a person under the age of eighteen, or is not supported by satisfactory credit, collectibles references, or otherwise. Regardless of the disclosure of his identity, any bid by a consignor or his agent on a lot consigned by him is deemed to be made in "Good Faith." Any person apparently appearing on the OFAC list is not eligible to bid.
16. Nominal Bids. The Auctioneer in its sole discretion may reject nominal bids, small opening bids, or very nominal advances. If a lot bearing estimates fails to open for 40-60% of the low estimate, the Auctioneer may pass the item or may place a protective bid on behalf of the consignor.
17. Lots bearing bidding estimates shall open at Auctioneer's discretion (approximately 50%-60% of the low estimate). In the event that no bid meets or exceeds that opening amount, the lot shall pass as unsold.
18. All items are to be purchased per lot as numerically indicated and no lots will be broken. Auctioneer reserves the right to withdraw, prior to the close, any lots from the Auction.
19. Auctioneer reserves the right to rescind the sale in the event of nonpayment, breach of a warranty, disputed ownership, auctioneer's clerical error or omission in exercising bids and reserves, or for any other reason and in Auctioneer's sole discretion. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) and any other damages or expenses pertaining to the lot.
20. Auctioneer occasionally experiences Internet and/or Server service outages, and Auctioneer periodically schedules system downtime for maintenance and other purposes, during which Bidders cannot participate or place bids. If such outages occur, we may at our discretion extend bidding for the Auction. Bidders unable to place their Bids through the Internet are directed to contact Client Services at 877-HERITAGE (437-4824).
21. The Auctioneer, its affiliates, or their employees consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors.
22. The Auctioneer has the right to sell certain unsold items after the close of the Auction. Such lots shall be considered sold during the Auction and all these Terms and Conditions shall apply to such sales including but not limited to the Buyer's Premium, return rights, and disclaimers.

## Payment:

23. All sales are strictly for cash in United States dollars (including U.S. currency, bank wire, cashier checks, travelers checks, eChecks, and bank money orders), and are subject to all reporting requirements). All deliveries are subject to good funds; funds being received in Auctioneer's account before delivery of the Purchases; and all payments are subject to a clearing period. Auctioneer reserves the right to determine if a check constitutes "good funds": checks drawn on a U.S. bank are subject to a ten business day hold, and thirty days when drawn on an international bank. Clients with pre-arranged credit status may receive immediate credit for payments via eCheck, personal, or corporate checks. All others will be subject to a hold of 5 days, or more, for the funds to clear prior to releasing merchandise. (Ref. T&C item 7 Credit for additional information.) Payments can be made 24-48 hours post auction from the My Orders page of the HA.com website.
24. Payment is due upon closing of the Auction session, or upon presentment of an invoice. Auctioneer reserves the right to void an invoice if payment in full is not received within 7 days after the close of the Auction. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) on the lot and any other damages pertaining to the lot or Auctioneer, at its option, may charge a twenty (20%) restock fee on the amount of the purchase and offset the restock fee against any monies paid to the Auctioneer or against any of the purchaser's properties held by the Auctioneer.
25. Lots delivered to you, or your representative are subject to all applicable state and local taxes, unless appropriate permits are on file with Auctioneer. Bidder agrees to pay Auctioneer the actual amount of tax due in the event that sales tax is not properly collected due to: 1) an expired, inaccurate, or inappropriate tax certificate or declaration, 2) an incorrect interpretation of the applicable statute, 3) or any other reason. The appropriate form or certificate must be on file at and verified by Auctioneer five days prior to Auction, or tax must be paid; only if such form or certificate is received by Auctioneer within 4 days after the Auction can a refund of tax paid be made. Lots from different Auctions may not be aggregated for sales tax purposes.
26. In the event that a Bidder's payment is dishonored upon presentment(s), Bidder shall pay the maximum statutory processing fee set by applicable state law. If you attempt to pay via eCheck and your financial institution denies this transfer from your bank account, or the payment cannot be completed using the selected funding source, you agree to complete payment using your credit card on file.
27. If any Auction invoice submitted by Auctioneer is not paid in full when due, the unpaid balance will bear interest at the highest rate permitted by law from the date of invoice until paid. Any invoice not paid when due will bear a three percent (3%) late fee on the invoice amount. If the Auctioneer refers any invoice to an attorney for collection, the buyer agrees to pay attorney's fees, court costs, and other collection costs incurred by Auctioneer. If Auctioneer assigns collection to its in-house legal staff, such attorney's time expended on the matter shall be compensated at a rate comparable to the hourly rate of independent attorneys.
28. In the event a successful Bidder fails to pay any amounts due, Auctioneer reserves the right to sell the lot(s) securing the invoice to any underbidders in the Auction that the lot(s) appeared, or at subsequent private or public sale, or relist the lot(s) in a future auction conducted by Auctioneer. A defaulting Bidder agrees to pay for the reasonable costs of resale (including a 15% seller's commission, if assigned to an auction conducted by Auctioneer). The defaulting Bidder is liable to pay any difference between his total original invoice for the lot(s), plus any applicable interest, and the net proceeds for the lot(s) if sold at private sale or the subsequent hammer price of the lot(s) less the 15% seller's commissions, if sold at an Auctioneer's auction.
29. Auctioneer reserves the right to require payment in full in good funds before delivery of the merchandise.
30. Auctioneer shall have a lien against the merchandise purchased by the buyer to secure payment of the Auction invoice. Auctioneer is further granted a lien and the right to retain possession of any other property of the buyer then held by the Auctioneer or its affiliates to secure payment of any Auction invoice or any other amounts due the Auctioneer or affiliates from the buyer. With respect to these lien rights, Auctioneer shall have all the rights of a secured creditor under Article 9 of the Texas Uniform Commercial Code, including but not limited to the right of sale (including

# Terms and Conditions of Auction

a 15% seller's commission, if consigned to an auction conducted by Auctioneer). In addition, with respect to payment of the Auction invoice(s), the buyer waives any and all rights of offset he might otherwise have against the Auctioneer and the consignor of the merchandise included on the invoice. If a Bidder owes Auctioneer or its affiliates on any account, Auctioneer and its affiliates shall have the right to offset such unpaid account by any credit balance due Bidder, and it may secure by possessory lien any unpaid amount by any of the Bidder's property in their possession..

31. Title shall not pass to the successful Bidder until all invoices are paid in full. It is the responsibility of the buyer to provide adequate insurance coverage for the items once they have been delivered to a common carrier or third-party shipper.

## **Delivery; Shipping; and Handling Charges:**

32. Buyer is liable for shipping, handling, registration, and renewal fees, if any. Please refer to Auctioneer's website HA.com/c/shipping.zx for the latest charges or call Auctioneer. Auctioneer is unable to combine purchases from other auctions or affiliates into one package for shipping purposes. Lots won will be shipped in a commercially reasonable time after payment in good funds for the merchandise and the shipping fees is received or credit extended, except when third-party shipment occurs. Buyer agrees that Service and Handling charges related to shipping items which are not pre-paid may be charged to the credit card on file with Auctioneer.

33. Successful international Bidders shall provide written shipping instructions, including specified customs declarations, to the Auctioneer for any lots to be delivered outside of the United States. NOTE: Declaration value shall be the item(s) hammer price together with its buyer's premium and Auctioneer shall use the correct harmonized code for the lot. Domestic Buyers on lots designated for third-party shipment must designate the common carrier, accept risk of loss, and prepay shipping costs.

34. All shipping charges will be borne by the successful Bidder. On all domestic shipments, any risk of loss during shipment will be borne by Heritage until the shipping carrier's confirmation of delivery to the address of record in Auctioneer's file (carrier's confirmation is conclusive to prove delivery to Bidder; if the client has a Signature release on file with the carrier, the package is considered delivered without Signature) or delivery by Heritage to Bidder's selected third-party shipper. On all foreign shipments, any risk of loss during shipment will be borne by the Bidder following Auctioneer's delivery to the Bidder's designated common carrier or third-party shipper.

35. Due to the nature of some items sold, it shall be the responsibility for the successful Bidder to arrange pick-up and shipping through third-parties; as to such items Auctioneer shall have no liability. Failure to pick-up or arrange shipping in a timely fashion (within ten days) shall subject Lots to storage and moving charges, including a \$100 administration fee plus \$10 daily storage for larger items and \$5.00 daily for smaller items (storage fee per item) after 35 days. In the event the Lot is not removed within ninety days, the Lot may be offered for sale to recover any past due storage or moving fees, including a 10% Seller's Commission.

36A. The laws of various countries regulate the import or export of certain plant and animal properties, including (but not limited to) items made of (or including) ivory, whalebone, turtle shell, coral, crocodile, or other wildlife. Transport of such lots may require special licenses for export, import, or both. Bidder is responsible for: 1) obtaining all information on such restricted items for both export and import; 2) obtaining all such licenses and/or permits. Delay or failure to obtain any such license or permit does not relieve the buyer of timely compliance with standard payment terms. For further information, please contact Ron Brackemyre at 800- 872-6467 ext. 1312.

36B. California State law prohibits the importation of any product containing Python skin into the State of California, thus no lot containing Python skin will be shipped to or invoiced to a person or company in California.

36C. Auctioneer shall not be liable for any loss caused by or resulting from:

- a. Seizure or destruction under quarantine or Customs regulation, or confiscation by order of any Government or public authority, or risks of contraband or illegal transportation of trade, or
- b. Breakage of statuary, marble, glassware, bric-a-brac, porcelains, jewelry, and similar fragile articles

37. Any request for shipping verification for undelivered packages must be made within 30 days of shipment by Auctioneer.

## **Cataloging, Warranties and Disclaimers:**

38. NO WARRANTY, WHETHER EXPRESSED OR IMPLIED, IS MADE WITH RESPECT TO ANY DESCRIPTION CONTAINED IN THIS AUCTION OR ANY SECOND OPINE. Any description of the items or second opine contained in this Auction is for the sole purpose of identifying the items for those Bidders who do not have the opportunity to view the lots prior to bidding, and no description of items has been made part of the basis of the bargain or has created any express warranty that the goods would conform to any description made by Auctioneer. Color variations can be expected in any electronic or printed imaging, and are not grounds for the return of any lot. NOTE: Auctioneer, in specified auction venues, for example, Fine Art, may have express written warranties and you are referred to those specific terms and conditions. .

39. Auctioneer is selling only such right or title to the items being sold as Auctioneer may have by virtue of consignment agreements on the date of auction and disclaims any warranty of title to the Property. Auctioneer disclaims any warranty of merchantability or fitness for any particular purposes. All images, descriptions, sales data, and archival records are the exclusive property of Auctioneer, and may be used by Auctioneer for advertising, promotion, archival records, and any other uses deemed appropriate.

40. Translations of foreign language documents may be provided as a convenience to interested parties. Auctioneer makes no representation as to the accuracy of those translations and will not be held responsible for errors in bidding arising from inaccuracies in translation.

41. Auctioneer disclaims all liability for damages, consequential or otherwise, arising out of or in connection with the sale of any Property by Auctioneer to Bidder. No third party may rely on any benefit of these Terms and Conditions and any rights, if any, established hereunder are personal to the Bidder and may not be assigned. Any statement made by the Auctioneer is an opinion and does not constitute a warranty or representation. No employee of Auctioneer may alter these Terms and Conditions, and, unless signed by a principal of Auctioneer, any such alteration is null and void.

42. Auctioneer shall not be liable for breakage of glass or damage to frames (patent or latent); such defects, in any event, shall not be a basis for any claim for return or reduction in purchase price.

## **Release:**

43. In consideration of participation in the Auction and the placing of a bid, Bidder expressly releases Auctioneer, its officers, directors and employees, its affiliates, and its outside experts that provide second opinions, from any and all claims, cause of action, chose of action, whether at law or equity or any arbitration or mediation rights existing under the rules of any professional society or affiliation based upon the assigned description, or a derivative theory, breach of warranty express or implied, representation or other matter set forth within these Terms and Conditions of Auction or otherwise. In the event of a claim, Bidder agrees that such rights and privileges conferred therein are strictly construed as specifically declared herein; e.g., authenticity, typographical error, etc. and are the exclusive remedy. Bidder, by non-compliance to these express terms of a granted remedy, shall waive any claim against Auctioneer.

44. Notice: Some Property sold by Auctioneer are inherently dangerous e.g. firearms, cannons, and small items that may be swallowed or ingested or may have latent defects all of which may cause harm to a person. Purchaser accepts all risk of loss or damage from its purchase of these items and Auctioneer disclaims any liability whether under contract or tort for damages and losses, direct or consequential, and expressly disclaims any warranty as to safety or usage of any lot sold.

## **Dispute Resolution and Arbitration Provision:**

45. By placing a bid or otherwise participating in the auction, Bidder accepts these Terms and Conditions of Auction, and specifically agrees to the dispute resolution provided herein. Consumer disputes shall be resolved through court litigation which has an exclusive Dallas, Texas venue

clause and jury waiver. Non-consumer dispute shall be determined in binding arbitration which arbitration replaces the right to go to court, including the right to a jury trial.

46. Auctioneer in no event shall be responsible for consequential damages, incidental damages, compensatory damages, or any other damages arising or claimed to be arising from the auction of any lot. In the event that Auctioneer cannot deliver the lot or subsequently it is established that the lot lacks title, or other transfer or condition issue is claimed, in such cases the sole remedy shall be limited to rescission of sale and refund of the amount paid by Bidder; in no case shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot. After one year has elapsed, Auctioneer's maximum liability shall be limited to any commissions and fees Auctioneer earned on that lot.

47. In the event of an attribution error, Auctioneer may at its sole discretion, correct the error on the Internet, or, if discovered at a later date, to refund the buyer's purchase price without further obligation.

48. Exclusive Dispute Resolution Process: All claims, disputes, or controversies in connection with, relating to and/or arising out of your Participation in the Auction or purchase of any lot, any interpretation of the Terms and Conditions of Sale or any amendments thereto, any description of any lot or condition report, any damage to any lot, any alleged verbal modification of any term of sale or condition report or description and/or any purported settlement whether asserted in contract, tort, under Federal or State statute or regulation or any claim made by you of a lot or your Participation in the auction involving the auction or a specific lot involving a warranty or representation of a consignor or other person or entity including Auctioneer { which claim you consent to be made a party} (collectively, "Claim") shall be exclusively heard by, and the claimant (or respondent as the case may be) and Heritage each consent to the Claim being presented in a confidential binding arbitration before a single arbitrator administered by and conducted under the rules of, the American Arbitration Association. The locale for all such arbitrations shall be Dallas, Texas. The arbitrator's award may be enforced in any court of competent jurisdiction. If a Claim involves a consumer, exclusive subject matter jurisdiction for the Claim is in the State District Courts of Dallas County, Texas and the consumer consents to subject matter and in personam jurisdiction; further CONSUMER EXPRESSLY WAIVES ANY RIGHT TO TRIAL BY JURY. A consumer may elect arbitration as specified above. Any claim involving the purchase or sale of numismatic or related items may be submitted through binding PNG arbitration. Any Claim must be brought within two (2) years of the alleged breach, default or misrepresentation or the Claim is waived. Exemplary or punitive damages are not permitted and are waived. A Claim is not subject to class certification. Nothing herein shall be construed to extend the time of return or conditions and restrictions for return. This Agreement and any Claim shall be determined and construed under Texas law. The prevailing party (a party that is awarded substantial and material relief on its damage claim based on damages sought vs. awarded or the successful defense of a Claim based on damages sought vs. awarded) may be awarded its reasonable attorneys' fees and costs.

49. No claims of any kind can be considered after the settlements have been made with the consignors. Any dispute after the settlement date is strictly between the Bidder and consignor without involvement or responsibility of the Auctioneer.

50. In consideration of their participation in or application for the Auction, a person or entity (whether the successful Bidder, a Bidder, a purchaser and/or other Auction participant or registrant) agrees that all disputes in any way relating to, arising under, connected with, or incidental to these Terms and Conditions and purchases, or default in payment thereof, shall be arbitrated pursuant to the arbitration provision. In the event that any matter including actions to compel arbitration, construe the agreement, actions in aid of arbitration or otherwise needs to be litigated, such litigation shall be exclusively in the Courts of the State of Texas, in Dallas County, Texas, and if necessary the corresponding appellate courts. For such actions, the successful Bidder, purchaser, or Auction participant also expressly submits himself to the personal jurisdiction of the State of Texas.

51. These Terms & Conditions provide specific remedies for occurrences in the auction and delivery process. Where such remedies are afforded, they shall be interpreted strictly. Bidder agrees that any claim shall utilize such remedies; Bidder making a claim in excess of those remedies provided in these Terms and Conditions agrees that in no case whatsoever shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot.

## **Miscellaneous:**

52. Agreements between Bidders and consignors to effectuate a non-sale of an item at Auction, inhibit bidding on a consigned item to enter into a private sale agreement for said item, or to utilize the Auctioneer's Auction to obtain sales for non-selling consigned items subsequent to the Auction, are strictly prohibited. If a subsequent sale of a previously consigned item occurs in violation of this provision, Auctioneer reserves the right to charge Bidder the applicable Buyer's Premium and consignor a Seller's Commission as determined for each auction venue and by the terms of the seller's agreement.

53. Acceptance of these Terms and Conditions qualifies Bidder as a client who has consented to be contacted by Heritage in the future. In conformity with "do-not-call" regulations promulgated by the Federal or State regulatory agencies, participation by the Bidder is affirmative consent to being contacted at the phone number shown in his application and this consent shall remain in effect until it is revoked in writing. Heritage may from time to time contact Bidder concerning sale, purchase, and auction opportunities available through Heritage and its affiliates and subsidiaries.

54. Rules of Construction: Auctioneer presents properties in a number of collectible fields, and as such, specific venues have promulgated supplemental Terms and Conditions. Nothing herein shall be construed to waive the general Terms and Conditions of Auction by these additional rules and shall be construed to give force and effect to the rules in their entirety.

## **State Notices:**

Notice as to an Auction in California. Auctioneer has in compliance with Title 2.95 of the California Civil Code as amended October 11, 1993 Sec. 1812.600, posted with the California Secretary of State its bonds for it and its employees, and the auction is being conducted in compliance with Sec. 2338 of the Commercial Code and Sec. 535 of the Penal Code.

Notice as to an Auction in New York City. These Terms and Conditions of Sale are designed to conform to the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This sale is a Public Auction Sale conducted by Heritage Auctioneers & Galleries, Inc. # 41513036. The New York City licensed auctioneers are: Sam Foosse, #095260; Kathleen Guzman, #0762165; Nicholas Dawes, #1304724; Ed Beardsley, #1183220; Scott Peterson, #1306933; Andrea Voss, #1320558, who will conduct the Sale on behalf of itself and Heritage Numismatic Auctions, Inc. (for Coins) and Currency Auctions of America, Inc. (for currency). All lots are subject to: the consignor's rights to bid thereon in accord with these Terms and Conditions of Sale, consignor's option to receive advances on their consignments, and Auctioneer, in its sole discretion, may offer limited extended financing to registered bidders, in accord with Auctioneer's internal credit standards. A registered bidder may inquire whether a lot is subject to an advance or a reserve. Auctioneer has made advances to various consignors in this sale. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders.

Notice as to an Auction in Texas. In compliance with TDLR rule 67.100(c)(1), notice is hereby provided that this auction is covered by a Recovery Fund administered by the Texas Department of Licensing and Regulation, P.O. Box 12157, Austin, Texas 78711 (512) 463-6599. Any complaints may be directed to the same address.

Notice as to an Auction in Ohio: Auction firm and Auctioneer are licensed by the Dept. of Agriculture, and either the licensee is bonded in favor of the state or an aggrieved person may initiate a claim against the auction recovery fund created in Section 4707.25 of the Revised Code as a result of the licensee's actions, whichever is applicable.

# Terms and Conditions of Auction

## Additional Terms & Conditions:

### COINS & CURRENCY

COINS and CURRENCY TERM A: Signature. Auctions are not on approval. No certified material may be returned because of possible differences of opinion with respect to the grade offered by any third-party organization, dealer, or service. No guarantee of grade is offered for uncertified Property sold and subsequently submitted to a third-party grading service. There are absolutely no exceptions to this policy. Under extremely limited circumstances, (e.g. gross cataloging error) a purchaser, who did not bid from the floor, may request Auctioneer to evaluate voiding a sale: such request must be made in writing detailing the alleged gross error; submission of the lot to the Auctioneer must be pre-approved by the Auctioneer; and bidder must notify Ron Brackemyre (1-800-872-6467 Ext. 1312) in writing of such request within three (3) days of the non-floor bidder's receipt of the lot. Any lot that is to be evaluated must be in our offices within 30 days after Auction. Grading or method of manufacture do not qualify for this evaluation process nor do such complaints constitute a basis to challenge the authenticity of a lot. AFTER THAT 30-DAY PERIOD, NO LOTS MAY BE RETURNED FOR REASONS OTHER THAN AUTHENTICITY. Lots returned must be housed intact in their original holder. No lots purchased by floor Bidders may be returned (including those Bidders acting as agents for others) except for authenticity. Late remittance for purchases may be considered just cause to revoke all return privileges.

COINS and CURRENCY TERM B: Auctions conducted solely on the Internet THREE (3) DAY RETURN POLICY: Certified Coin and Uncertified and Certified Currency lots paid for within seven days of the Auction closing are sold with a three (3) day return privilege unless otherwise noted in the description as "Sold As Is, No Return Lot". You may return lots under the following conditions: Within three days of receipt of the lot, you must first notify Auctioneer by contacting Client Service by phone (877-HERITAGE (437-4824)) or e-mail (Bid@HA.com), and immediately ship the lot(s) fully insured to the attention of Returns, Heritage, 3500 Maple Avenue, 17th Floor, Dallas TX 75219-3941. Lots must be housed intact in their original holder and condition. You are responsible for the insured, safe delivery of any lots. A non-negotiable return fee of 5% of the purchase price (\$10 per lot minimum) will be deducted from the refund for each returned lot or billed directly. Postage and handling fees are not refunded. After the three-day period (from receipt), no items may be returned for any reason. Late remittance for purchases revokes these Return privileges.

COINS and CURRENCY TERM C: Bidders who have inspected the lots prior to any Auction, or attended the Auction, or bid through an Agent, will not be granted any return privileges, except for reasons of authenticity.

COINS and CURRENCY TERM D: Coins sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for a guarantee by Auctioneer that they are genuine. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Numismatic Guaranty Corporation (NGC), P.O. Box 4776, Sarasota, FL 34230, <http://www.ngccoin.com/services/writtenguarantee.asp>; Professional Coin Grading Service (PCGS), PO Box 9458, Newport Beach, CA 92658, <http://www.pcg.com/guarantee.html>; ANACS, 6555 S. Kenton St. Ste. 303, Englewood, CO 80111; and Independent Coin Grading Co. (ICG), 7901 East Bellevue Ave., Suite 50, Englewood, CO 80111.

COINS and CURRENCY TERM E: Notes sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for guarantee by Auctioneer that they are genuine. Grading, condition or other attributes of any lot may have a material effect on its value, and the opinion of others, including third-party grading services such as PCGS Currency, PMG, and CGA may differ with that of Auctioneer. Auctioneer shall not be bound by any prior or subsequent opinion, determination, or certification by any grading service. Bidder specifically waives any claim to right of return of any item because of the opinion, determination, or certification, or lack thereof, by any grading service. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Paper Money Guaranty (PMG), PO Box 4711, Sarasota FL 34230; PCGS Currency, PO Box 9458, Newport Beach, CA 92658; Currency Grading & Authentication (CGA), PO Box 418, Three Bridges, NJ 08887. Third party graded notes are not returnable for any reason whatsoever.

COINS and CURRENCY TERM F: Since we cannot examine encapsulated coins or notes, they are sold "as is" without our grading opinion, and may not be returned for any reason. Auctioneer shall not be

liable for any patent or latent defect or controversy pertaining to or arising from any encapsulated collectible. In any such instance, purchaser's remedy, if any, shall be solely against the service certifying the collectible.

COINS and CURRENCY TERM G: Due to changing grading standards over time, differing interpretations, and to possible mishandling of items by subsequent owners, Auctioneer reserves the right to grade items differently than shown on certificates from any grading service that accompany the items. Auctioneer also reserves the right to grade items differently than the grades shown in the prior catalog should such items be reconsigned to any future auction.

COINS and CURRENCY TERM H: Although consensus grading is employed by most grading services, it should be noted as aforesaid that grading is not an exact science. In fact, it is entirely possible that if a lot is broken out of a plastic holder and resubmitted to another grading service or even to the same service, the lot could come back with a different grade assigned.

COINS and CURRENCY TERM I: Certification does not guarantee protection against the normal risks associated with potentially volatile markets. The degree of liquidity for certified coins and collectibles will vary according to general market conditions and the particular lot involved. For some lots there may be no active market at all at certain points in time.

COINS and CURRENCY TERM J: All non-certified coins and currency are guaranteed genuine, but are not guaranteed as to grade, since grading is a matter of opinion, an art and not a science, and therefore the opinion rendered by the Auctioneer or any third party grading service may not agree with the opinion of others (including trained experts), and the same expert may not grade the same item with the same grade at two different times. Auctioneer has graded the non-certified numismatic items, in the Auctioneer's opinion, to their current interpretation of the American Numismatic Association's standards as of the date the catalog was prepared. There is no guarantee or warranty implied or expressed that the grading standards utilized by the Auctioneer will meet the standards of any grading service at any time in the future.

COINS and CURRENCY TERM K: Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

COINS and CURRENCY TERM L: NOTE: Purchasers of rare coins or currency through Heritage have available the option of arbitration by the Professional Numismatists Guild (PNG); if an election is not made within ten (10) days of an unresolved dispute, Auctioneer may elect either PNG or A.A.A. Arbitration.

COINS and CURRENCY TERM M: For more information regarding Canadian lots attributed to the Charlton reference guides, please contact: Charlton International, PO Box 820, Station Willowdale B, North York, Ontario M2K 2R1 Canada.

COINS and CURRENCY TERM N: Some of the lots offered herein have been assigned to 1031 Services, Inc. for the purpose of consignor's tax deferred exchange.

COINS and CURRENCY TERM O: Financing. Auctioneer offers various extended payment options to qualified pre-approved persons and companies. The options include Extended Payment Programs (EPP) Flexible Payment Program (FPP) and Dealer Terms. Each program has its specific terms and conditions and such terms and conditions are strictly enforced. Each program has to be executed by the purchaser. Auctioneer reserves the right to alter or deny credit and in such case these auction terms shall control.

For wiring instructions call the Credit department at 877-HERITAGE (437-4824) or e-mail: CreditDept@HA.com

## New York State Auctions Only

Notice as to an Auction in New York City. These Terms and Conditions of Sale are designed to conform to the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This sale is a Public Auction Sale conducted by Heritage Auctioneers & Galleries, Inc. #1364738. The New York City licensed auctioneers are: Samuel Foose 0952360; Robert Korver 1096338; Kathleen Guzman 0762165; Michael J. Sadler 1304630; Scott Peterson 1306933; Andrea Voss 1320558; Nicholas Dawes 1304724; Ed Beardsley 1183220; Bob Merrill 1473403; Paul Minshull 2001161; Fiona Elias 2001163; Brian Nalley 2001162; Jennifer Marsh 2009623; Alissa Ford 2009565, who will conduct the Sale on behalf of itself and Heritage Auctioneers & Galleries, Inc. All lots are subject to: the consignor's rights to bid thereon in accord with these Terms and Conditions of Sale, consignor's option to receive advances on their consignments, and Auctioneer, in its sole discretion, may offer limited extended financing to registered bidders, in accord with Auctioneer's internal credit standards or receive a guaranty. A registered bidder may inquire whether a lot is subject to an advance, a reserve, or a guaranty. Auctioneer has made advances to various consignors in this sale and a guaranty. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders. Rev 3-23-2015
